#### Important notice

The present document can be downloaded from the ETSI Search & Browse Standards application.

The present document may be made available in electronic versions and/or in print. The content of any electronic and/or print versions of the present document shall not be modified without the prior written authorization of ETSI. In case of any existing or perceived difference in contents between such versions and/or in print, the prevailing version of an ETSI deliverable is the one made publicly available in PDF format on ETSI deliver repository.

Users should be aware that the present document may be revised or have its status changed, this information is available in the Milestones listing.

If you find errors in the present document, please send your comments to the relevant service listed under <u>Committee Support Staff</u>.

If you find a security vulnerability in the present document, please report it through our Coordinated Vulnerability Disclosure (CVD) program.

#### Notice of disclaimer & limitation of liability

The information provided in the present deliverable is directed solely to professionals who have the appropriate degree of experience to understand and interpret its content in accordance with generally accepted engineering or other professional standard and applicable regulations.

No recommendation as to products and services or vendors is made or should be implied.

No representation or warranty is made that this deliverable is technically accurate or sufficient or conforms to any law and/or governmental rule and/or regulation and further, no representation or warranty is made of merchantability or fitness for any particular purpose or against infringement of intellectual property rights.

In no event shall ETSI be held liable for loss of profits or any other incidental or consequential damages.

Any software contained in this deliverable is provided "AS IS" with no warranties, express or implied, including but not limited to, the warranties of merchantability, fitness for a particular purpose and non-infringement of intellectual property rights and ETSI shall not be held liable in any event for any damages whatsoever (including, without limitation, damages for loss of profits, business interruption, loss of information, or any other pecuniary loss) arising out of or related to the use of or inability to use the software.

#### Copyright Notification

No part may be reproduced or utilized in any form or by any means, electronic or mechanical, including photocopying and microfilm except as authorized by written permission of ETSI.

The content of the PDF version shall not be modified without the written authorization of ETSI.

The copyright and the foregoing restriction extend to reproduction in all media.

# Intellectual Property Rights

#### **Essential patents**

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for ETSI members and non-members, and can be found in ETSI SR 000 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available from the ETSI Secretariat. Latest updates are available on the ETSI IPR online database.

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

#### **Trademarks**

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

**DECT**<sup>TM</sup>, **PLUGTESTS**<sup>TM</sup>, **UMTS**<sup>TM</sup> and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP**<sup>TM</sup>, **LTE**<sup>TM</sup> and **5G**<sup>TM</sup> logo are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M**<sup>TM</sup> logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM**<sup>®</sup> and the GSM logo are trademarks registered and owned by the GSM Association.

# **Legal Notice**

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities. These shall be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between 3GPP and ETSI identities can be found at 3GPP to ETSI numbering cross-referencing.

# Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the <u>ETSI Drafting Rules</u> (Verbal forms for the expression of provisions).

"must" and "must not" are NOT allowed in ETSI deliverables except when used in direct citation.

#### **Foreword**

This Technical Specification has been produced by the 3rd Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
  - 1 presented to TSG for information;
  - 2 presented to TSG for approval;
  - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

In the present document, modal verbs have the following meanings:

shall indicates a mandatory requirement to do somethingshall not indicates an interdiction (prohibition) to do something

The constructions "shall" and "shall not" are confined to the context of normative provisions, and do not appear in Technical Reports.

The constructions "must" and "must not" are not used as substitutes for "shall" and "shall not". Their use is avoided insofar as possible, and they are not used in a normative context except in a direct citation from an external, referenced, non-3GPP document, or so as to maintain continuity of style when extending or modifying the provisions of such a referenced document.

**should** indicates a recommendation to do something

**should not** indicates a recommendation not to do something

may indicates permission to do something

**need not** indicates permission not to do something

The construction "may not" is ambiguous and is not used in normative elements. The unambiguous constructions "might not" or "shall not" are used instead, depending upon the meaning intended.

can indicates that something is possiblecannot indicates that something is impossible

The constructions "can" and "cannot" are not substitutes for "may" and "need not".

will indicates that something is certain or expected to happen as a result of action taken by an agency

the behaviour of which is outside the scope of the present document

will not indicates that something is certain or expected not to happen as a result of action taken by an

agency the behaviour of which is outside the scope of the present document

might indicates a likelihood that something will happen as a result of action taken by some agency the

behaviour of which is outside the scope of the present document

might not indicates a likelihood that something will not happen as a result of action taken by some agency

the behaviour of which is outside the scope of the present document

In addition:

is (or any other verb in the indicative mood) indicates a statement of fact

is not (or any other negative verb in the indicative mood) indicates a statement of fact

The constructions "is" and "is not" do not indicate requirements.

# Introduction

This clause is optional. If it exists, it is always the second unnumbered clause.

# 1 Scope

The present document specifies the stage 3 protocol and data model for the ADRF Service Based Interface. It provides stage 3 protocol definitions and message flows, and specifies the API for each service offered by the ADRF.

The 5G System stage 2 architecture and procedures are specified in 3GPP TS 23.501 [2] and 3GPP TS 23.502 [3]. The stage 2 definition and procedures of store and retrieve the collected data and analytics are contained in 3GPP TS 23.288 [14] and 3GPP TS 23.502 [3].

The Technical Realization of the Service Based Architecture and the Principles and Guidelines for Services Definition are specified in 3GPP TS 29.500 [4] and 3GPP TS 29.501 [5].

### 2 References

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document *in the same Release as the present document*.

# 3 Definitions, symbols and abbreviations

#### 3.1 Definitions

For the purposes of the present document, the terms and definitions given in 3GPP TR 21.905 [1] and the following apply. A term defined in the present document takes precedence over the definition of the same term, if any, in 3GPP TR 21.905 [1].

None.

# 3.2 Symbols

For the purposes of the present document, the following symbols apply:

None.

#### 3.3 Abbreviations

For the purposes of the present document, the abbreviations given in 3GPP TR 21.905 [1] and the following apply. An abbreviation defined in the present document takes precedence over the definition of the same abbreviation, if any, in 3GPP TR 21.905 [1].

# 4 Services offered by the ADRF

#### 4.1 Introduction

The Analytics Data Repository Service is used for the Analytics Data Repository Function (ADRF) to storage and retrieval of data by e.g. Consumers NF(s) (e.g. NWDAF) which access the data using Nadrf service. The ADRF offers to other NFs the following service:

- Nadrf\_DataManagement.

Table 4.1-1: Service provided by ADRF

Service Name	Description	Service Operations	Operation Semantics	Example Consumer(s)

# 4.2 Nadrf\_DataManagement Service

#### 4.2.1 Service Description

#### 4.2.1.1 Overview

The Nadrf\_DataManagement service as defined in 3GPP TS 23.288 [14], is provided by the Analytics Data Repository Function (ADRF).

#### This service:

- allows NF consumers to store data or analytics in the ADRF;
- allows NF consumers to retrieve data or analytics from an ADRF; and
- allows NF consumers to delete data or analytics from an ADRF.

NOTE: Storage of ML models in ADRF is not specified in this Release of the specification.

#### 4.2.1.2 Service Architecture

The 5G System Architecture is defined in 3GPP TS 23.501 [2]. The Network Data Analytics Exposure architecture is defined in 3GPP TS 23.288 [14].

The Nadrf\_DataManagement service is part of the Nadrf service-based interface exhibited by the Analytics Data Repository Function (ADRF).

Known consumers of the Nadrf\_DataManagement service are:

- Data Collection Coordination Function (DCCF)
- Network Data Analytics Function (NWDAF)
- Messaging Framework Adaptor Function (MFAF)

The Nadrf\_DataManagement service is provided by the ADRF and consumed by the NF service consumers as shown in figure 4.2.1.2-1 for the SBI representation model and in figure 4.2.1.2-2 for the reference point representation model.

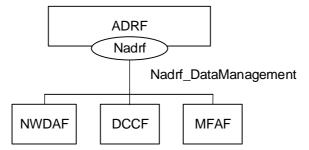

Figure 4.2.1.2-1: Reference Architecture for the Nadrf\_DataManagement Service; SBI representation

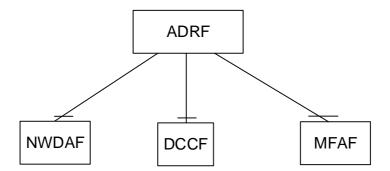

Figure 4.2.1.2-2: Nadrf\_DataManagement service architecture, reference point representation

#### 4.2.1.3 Network Functions

#### 4.2.1.3.1 Analytics Data Repository Function (ADRF)

The Analytics Data Repository Function (ADRF) provides the functionality to allow NF consumers to store, retrieve, and remove data or analytics from the ADRF.

#### 4.2.1.3.2 NF Service Consumers

The NWDAF and DCCF:

- supports storing data or analytics in the ADRF;
- supports retrieving data or analytics from an ADRF; and
- supports deletion data or analytics from an ADRF.

#### The MFAF:

- supports storing data or analytics in the ADRF.

#### 4.2.2 Service Operations

#### 4.2.2.1 Introduction

Table 4.2.2.1-1: Operations of the Nadrf\_DataManagement Service

Service operation name	Description	Initiated by
Nadrf_DataManagement_StorageRe quest	This service operation is used by an NF to request the ADRF to store data or analytics. Data or analytics are provided to the ADRF in the request message.	NF service consumer (DCCF, NWDAF, MFAF)
Nadrf_DataManagement_StorageSu bscriptionRequest	This service operation is used by an NF to request the ADRF to initiate a subscription for data or analytics. Data or analytics provided in notifications as a result of the subsequent subscription by the ADRF are stored in the ADRF.	NF service consumer (DCCF, NWDAF)
Nadrf_DataManagement_StorageSu bscriptionRemoval	This service operation is used by an NF to request that the ADRF no longer subscribes to data or analytics it is collecting and storing.	NF service consumer (DCCF, NWDAF)
Nadrf_DataManagement_RetrievalR equest	This service operation is used by an NF to retrieve stored data or analytics from the ADRF.	NF service consumer (DCCF, NWDAF)
Nadrf_DataManagement_RetrievalSubscribe	This service operation is used by an NF to retrieve stored data or analytics from the ADRF and to receive future notifications containing the corresponding data or analytics received by ADRF.	NF service consumer (DCCF, NWDAF)
Nadrf_DataManagement_RetrievalU nsubscribe	This service operation is used by an NF to request that the ADRF no longer sends data or analytics to a notification endpoint.	NF service consumer (DCCF, NWDAF)
Nadrf_DataManagement_RetrievalN otify	This service operation is used by the ADRF to notify an NF with either data or analytics, or instructions to fetch the data or analytics from the ADRF.	ADRF
Nadrf_DataManagement_Delete	This service operation is used by an NF to delete stored data in ADRF.	NF service consumer (DCCF, NWDAF)

#### 4.2.2.2 Nadrf\_DataManagement\_StorageRequest service operation

#### 4.2.2.2.1 General

The Nadrf\_DataManagement\_StorageRequest service operation is used by an NF service consumer to store data or analytics.

#### 4.2.2.2.2 Request Storage of data or analytics

Figure 4.2.2.2.1 shows a scenario where the NF service consumer sends a request to the ADRF to store data or analytics.

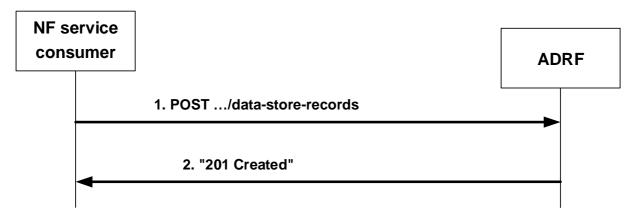

Figure 4.2.2.2.1: NF service consumer requesting to store data or analytics

The NF service consumer shall invoke the Nadrf\_DataManagement\_StorageRequest service operation to store data or analytics. The NF service consumer shall send an HTTP POST request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/data-store-records" as Resource URI representing the "ADRF Data Store Records" resource, as shown in figure 4.2.2.2.2-1, step 1, to create an "Individual ADRF Data Store Record" according to the information in the message body. The NadrfDataStoreRecord data structure provided in the request body shall include:

- one of the following:
  - analytics subscription notification(s) within the "anaNotifications" attribute together with the corresponding subscription information within the "anaSub" attribute;
  - data subscription notification within the "dataNotif" attribute together with the corresponding subscription information within the "dataSub" attribute.

Upon the reception of an HTTP POST request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/data-store-records" as Resource URI and NadrfDataStoreRecord data structure as request body, the ADRF shall:

- create a new data store record;
- assign a storeTransId;
- store the data or analytics.

NOTE: If the data and/or analytics is already stored or being stored in the ADRF, the ADRF will still create a new "Individual ADRF Data Store Record" resource and assign a new storeTransId if the ADRF intends to not really store the data again in the memory again based on the implementation.

If the ADRF created an "Individual ADRF Data Store Record" resource, the ADRF shall respond with "201 Created" with the message body containing a representation of the created record, as shown in figure 4.2.2.2.2-1, step 2. The ADRF shall include a Location HTTP header field. The Location header field shall contain the URI of the created record i.e. "{apiRoot}/nadrf-datamanagement/<apiVersion>/data-store-records/{storeTransId}".

If an error occurs when processing the HTTP POST request, the ADRF shall send an HTTP error response as specified in clause 5.1.7.

#### 4.2.2.3 Nadrf\_DataManagement\_StorageSubscriptionRequest service operation

#### 4.2.2.3.1 General

The Nadrf\_DataManagement\_StorageSubscriptionRequest service operation is used by an NF service consumer to request that the ADRF creates a subscription to data or analytics and subsequently stores notified data or analytics in the ADRF.

#### 4.2.2.3.2 Requesting subscription and storage of data or analytics

Figure 4.2.2.3.2-1 shows a scenario where the NF service consumer sends a request to the ADRF to subscribe for data or analytics to be stored in the ADRF.

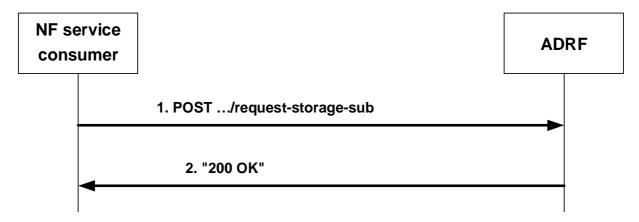

Figure 4.2.2.3.2-1: NF service consumer requesting that the ADRF subscribes to and subsequently stores data or analytics

The NF service consumer shall invoke the Nadrf\_DataManagement\_StorageSubscriptionRequest service operation to request the ADRF to subscribe to data or analytics. The NF service consumer shall send an HTTP POST request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/request-storage-sub" as URI, as shown in figure 4.2.2.3.2-1, step 1. The NadrfDataStoreSubscription data structure provided in the request body shall include:

- one of the following subscription attributes:
  - analytics subscription information within the "anaSub" attribute;
  - data subscription information within the "dataSub" attribute;
- one of the following target identifiers:
  - DCCF or NWDAF instance identifier within the "targetNfId" attribute;
  - DCCF or NWDAF NF set identifier within the "targetNfSetId" attribute;

and may include:

- formatting instructions within the "formatInstruct" attribute;
- processing instructions within the "procInstruct" attribute.

Upon the reception of an HTTP POST request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/request-storage-sub" as URI and NadrfDataStoreSubscription data structure as request body, the ADRF shall assign a transaction reference identifier to this request and, if the request is successfully processed and accepted, the ADRF shall respond with "200 OK" as shown in figure 4.2.2.3.2-1 step 2, with the message body containing an NadrfDataStoreSubscriptionRef data structure, which shall include the assigned transaction reference identifier as "transRefId" attribute.

NOTE: If the data and/or analytics is already stored or being stored in the ADRF, the ADRF will still assign a new transaction reference identifier if the ADRF intends to not really store the data again in the memory again based on the implementation.

If an error occurs when processing the HTTP POST request, the ADRF shall send an HTTP error response as specified in clause 5.1.7.

In the case of a successful response, the ADRF may subsequently create a data or analytics subscription (according to inputs that had been received in the NadrfDataStoreSubscription data structure; this is not performed if the ADRF determines that the data is already being stored based on an existing subscription) with a DCCF as described in 3GPP TS 29.574 [23] or with an NWDAF as described in 3GPP TS 29.520 [15], and create a mapping between the previously assigned and returned transaction reference identifier and the subscription that is used to serve the transaction.

#### 4.2.2.4 Nadrf\_DataManagement\_StorageSubscriptionRemoval service operation

#### 4.2.2.4.1 General

The Nadrf\_DataManagement\_StorageSubscriptionRemoval service operation is used by an NF service consumer to request the ADRF to remove a subscription for data or analytics.

#### 4.2.2.4.2 Requesting removal of subscription of data or analytics

Figure 4.2.2.4.2-1 shows a scenario where the NF service consumer sends a request to the ADRF to unsubscribe for storage of data or analytics.

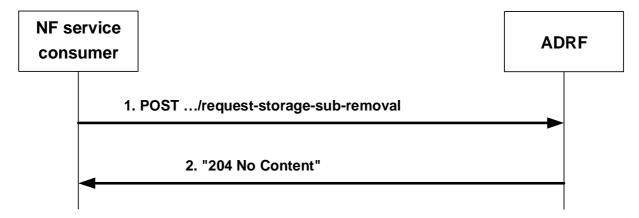

Figure 4.2.2.4.2-1: NF service consumer requesting the removal of a subscription to storage of data or analytics

The NF service consumer shall invoke the Nadrf\_DataManagement\_StorageSubscriptionRemoval service operation to request the ADRF to remove a subscription to data or analytics that are stored in the ADRF. The NF service consumer shall send an HTTP POST request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/request-storage-sub-removal" as URI, as shown in figure 4.2.2.4.2-1, step 1. The POST request body shall contain an NadrfDataStoreSubscriptionRef data structure, which shall include a transaction reference identifier as "transRefId" attribute.

Upon the reception of an HTTP POST request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/request-storage-sub-removal" as URI, if the ADRF successfully processed and accepted the received HTTP POST request, the ADRF shall respond with HTTP "204 No Content" status. Subsequently, the ADRF shall remove the (DCCF or NWDAF) subscription that had been created and mapped to the received transaction reference identifier as described in clause 4.2.2.3, unless this subscription is mapped to further transaction reference identifiers (of transactions that are still active).

If errors occur when processing the HTTP POST request, the ADRF shall send an HTTP error response as specified in clause 5.1.7.

#### 4.2.2.5 Nadrf\_DataManagement\_RetrievalRequest service operation

#### 4.2.2.5.1 General

The Nadrf\_DataManagement\_RetrievalRequest service operation is used by an NF service consumer to retrieve stored data or analytics.

#### 4.2.2.5.2 Request and get stored data or analytics from ADRF Data Store

Figure 4.2.2.5.2-1 shows a scenario where the NF service consumer sends a request to the ADRF to retrieve stored data or analytics.

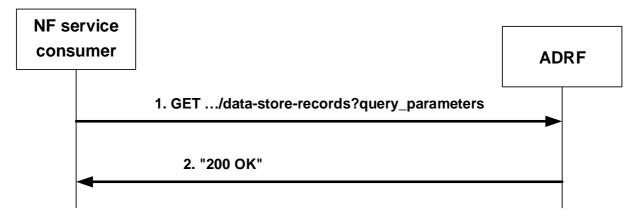

Figure 4.2.2.5.2-1: NF service consumer requesting to retrieve stored data or analytics

The NF service consumer shall invoke the Nadrf\_DataManagement\_RetrievalRequest service operation to retrieve stored data or analytics. The NF service consumer shall send an HTTP GET request with "{apiRoot}/nadrf-datamanagement/v1/data-store-records" as Resource URI representing the "ADRF Data Store Records" resource, as shown in figure 4.2.2.5.2-1, step 1, to request ADRF data store records according to the query parameter value of the store transaction identifier within the "store-trans-id" attribute or the query parameter value of the fetch correlation identifier(s) within the "fetch-correlation-ids" attribute.

Upon the reception of the HTTP GET request, the ADRF shall:

- find the data or analytics according to the requested parameters.

If the requested data or analytics is found, the ADRF shall respond with "200 OK" status code with the message body containing the NadrfDataStoreRecord data structure. The NadrfDataStoreRecord data structure in the response body shall include:

- one of the following:
  - information about network analytics function events that occurred in the "anaNotifications" attribute together with the corresponding subscription information within the "anaSub" attribute;
  - information about data event within the "dataNotif" attribute together with the corresponding subscription information within the "dataSub" attribute.

If the requested analytics or data does not exist, the ADRF shall respond with "204 No Content". If an error occurs when processing the HTTP GET request, the ADRF shall send an HTTP error response as specified in clause 5.1.7.

#### 4.2.2.6 Nadrf DataManagement RetrievalSubscribe service operation

#### 4.2.2.6.1 General

The Nadrf\_DataManagement\_RetrievalSubscribe service operation is used by an NF service consumer to subscribe to the ADRF to retrieve via notifications data or analytics that is stored in the ADRF and to receive future notifications with data or analytics when they are received by the ADRF.

#### 4.2.2.6.2 Requesting retrieval and subscription of data or analytics

Figure 4.2.2.6.2-1 shows a scenario where the NF service consumer sends a request to the ADRF to retrieve and subscribe to data or analytics.

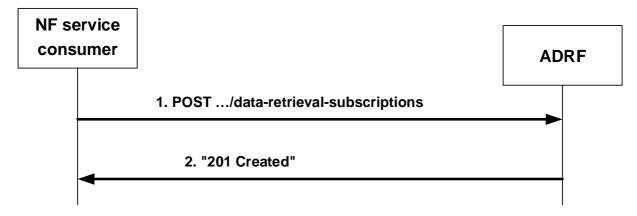

Figure 4.2.2.6.2-1: NF service consumer requesting to retrieve and subscribe to data or analytics

The NF service consumer shall invoke the Nadrf\_DataManagement\_RetrievalSubscribe service operation to retrieve and subscribe to data or analytics. The NF service consumer shall send an HTTP POST request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/data-retrieval-subscriptions" as Resource URI representing the "ADRF Data Retrieval Subscriptions" resource, as shown in figure 4.2.2.6.2-1, step 1, to create an "Individual ADRF Data Retrieval Subscription" according to the information in the message body. The NadrfDataRetrievalSubscription data structure provided in the request body shall include:

- notification correlation identfier within the "notifCorrId" attribute;
- one of the following:
  - analytics subscription information within the "anaSub" attribute;
  - data subscription information within the "dataSub" attribute;
- a notification target address within the "notificationURI" attribute;
- a time window for the data retrieval and subscription within the "timePeriod" attribute;

Upon the reception of an HTTP POST request with "{apiRoot}/nadrf-datamanagement/v1/data-retrieval-subscriptions" as Resource URI and NadrfDataRetrievalSubscription data structure as request body, the ADRF shall:

- create a new subscription;
- assign a subscriptionId;
- store the subscription.

If the ADRF created an "Individual ADRF Data Retrieval Subscription" resource, the ADRF shall respond with "201 Created" with the message body containing a representation of the created subscription, as shown in figure 4.2.2.6.2-1, step 2. The ADRF shall include a Location HTTP header field. The Location header field shall contain the URI of the created record i.e. "{apiRoot}/nadrf-datamanagement/<apiVersion>/data-retrieval-subscriptions/{subscriptionId}".

If an error occurs when processing the HTTP POST request, the ADRF shall send an HTTP error response as specified in clause 5.1.7.

#### 4.2.2.7 Nadrf DataManagement RetrievalUnsubscribe service operation

#### 4.2.2.7.1 General

The Nadrf\_DataManagement\_RetrievalUnsubscribe service operation is used by an NF service consumer to remove a retrieval subscription to data or analytics.

#### 4.2.2.7.2 Requesting removal of retrieval subscription for data or analytics

Figure 4.2.2.7.2-1 shows a scenario where the NF service consumer sends a request to the ADRF to remove a retrieval subscription for data or analytics.

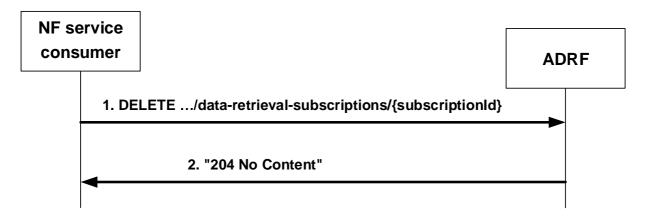

Figure 4.2.2.7.2-1: NF service consumer requesting to remove retrieval subscription for data or analytics

The NF service consumer shall invoke the Nadrf\_DataManagement\_RetrievalUnsubscribe service operation to remove a retrieval subscription for data or analytics. The NF service consumer shall send an HTTP DELETE request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/data-retrieval-subscriptions/{subscriptionId}" as Resource URI representing an "Individual ADRF Data Retrieval Subscription" resource, as shown in figure 4.2.2.7.2-1, step 1, where "{subscriptionId}" is the identifier of the existing data retrieval subscription that is to be deleted.

Upon the reception of an HTTP DELETE request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/data-retrieval-subscriptions/{subscriptionId}" as Resource URI, if the ADRF successfully processed and accepted the received HTTP DELETE request, the ADRF shall:

- remove the corresponding subscription;
- respond with HTTP "204 No Content" status.

If errors occur when processing the HTTP DELETE request, the ADRF shall send an HTTP error response as specified in clause 5.1.7.

If the ADRF determines the received HTTP DELETE request needs to be redirected, the ADRF shall send an HTTP redirect response as specified in clause 6.10.9 of 3GPP TS 29.500 [4].

#### 4.2.2.8 Nadrf\_DataManagement\_RetrievalNotify service operation

#### 4.2.2.8.1 General

The Nadrf\_DataManagement\_RetrievalNotify service operation is used by ADRF to notify NF service consumers about subscribed events related to data or analytics.

#### 4.2.2.8.2 Notification about subscribed data or analytics

Figure 4.2.2.8.2-1 shows a scenario where the ADRF sends a request to the NF service consumer to notify it about data or analytics events.

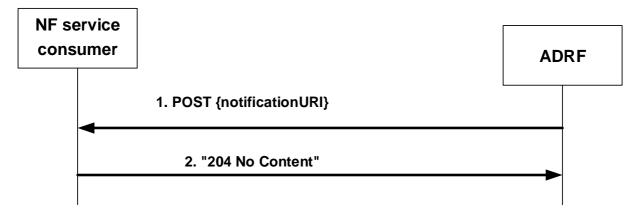

Figure 4.2.2.8.2-1: ADRF notifies the NF service consumer about subscribed data or analytics

The ADRF shall invoke the Nadrf\_DataManagement\_RetrievalNotify service operation to notify about subscribed data or analytics events. The ADRF shall send an HTTP POST request to the "{notificationURI}" received in the subscription (see clause 5.1.5 for the definition of this notificationURI), as shown in figure 4.2.2.8.2-1, step 1. The NadrfDataRetrievalNotification data structure provided in the request body shall include:

- notification correlation Id within the "notifCorrId" attribute:
- the time stamp which represents the time when ADRF completes preparation of the requested data or analytics within the "timeStamp" attribute;
- one of the following:
  - information about network data analytics function events that occurred in the "anaNotifications" attribute;
  - data collected from data sources (e.g. SMF, NEF) in the "dataNotif" attribute;
  - information for fetching the data or analytics in the "fetchInstruct" attribute.

NOTE: The fetch correlation identifiers included in the fetch instructions of the "fetchInstruct" attribute can be used to fetch data or analytics using the Nadrf\_DataManagement\_RetrievalRequest service operation as described in clause 4.2.2.5.2. The (mandatory) fetch URI included in the fetch instructions of the "fetchInstruct" attribute is expected to be in line with the standard resource URI defined for the Nadrf\_DataManagement\_RetrievalRequest service operation, i.e. {apiRoot}/nadrf-datamanagement/<apiVersion>/data-store-records, but it can be anything because it is actually not needed by the NF service consumer in this case.

The NadrfDataRetrievalNotification data structure provided in the request body may include:

- a termination request provided by the ADRF within the "terminationReq" attribute.

Upon the reception of an HTTP POST request with "{notificationURI}" as Resource URI and NadrfDataRetrievalNotification data structure as request body, if the NF service consumer successfully processed and accepted the received HTTP POST request, the NF Service Consumer shall:

- store the notification;
- respond with HTTP "204 No Content" status code.

If errors occur when processing the HTTP POST request, the NF service consumer shall send an HTTP error response as specified in clause 5.1.7.

If the NF service consumer determines the received HTTP POST request needs to be redirected, the NF service consumer shall send an HTTP redirect response as specified in clause 6.10.9 of 3GPP TS 29.500 [4].

#### 4.2.2.9 Nadrf\_DataManagement\_Delete service operation

#### 4.2.2.9.1 General

The Nadrf\_DataManagement\_Delete service operation is used by an NF service consumer to delete stored data or analytics.

#### 4.2.2.9.2 Requesting removal of stored data or analytics

Figure 4.2.2.9.2-1 shows a scenario where the NF service consumer sends a request to the ADRF to delete stored data or analytics.

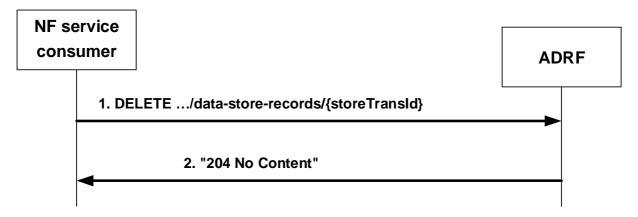

Figure 4.2.2.9.2-1: NF service consumer requesting to remove stored data or analytics

The NF service consumer shall invoke the Nadrf\_DataManagement\_Delete service operation to remove stored data or analytics. The NF service consumer shall send an HTTP DELETE request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/data-store-records/{storeTransId}" as Resource URI representing an "Individual ADRF Data Store Record" resource, as shown in figure 4.2.2.9.2-1, step 1, where "{storeTransId}" is the transaction identifier of the stored record that is to be deleted.

Upon the reception of an HTTP DELETE request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/data-store-records/{storeTransId}" as Resource URI, if the ADRF successfully processed and accepted the received HTTP DELETE request, the ADRF shall:

- remove the corresponding stored record;
- respond with HTTP "204 No Content" status code.

If errors occur when processing the HTTP DELETE request, the ADRF shall send an HTTP error response as specified in clause 5.1.7.

If the ADRF determines the received HTTP DELETE request needs to be redirected, the ADRF shall send an HTTP redirect response as specified in clause 6.10.9 of 3GPP TS 29.500 [4].

# 4.2.2.9.3 Requesting removal of stored data or analytics using data or analytics specification

Figure 4.2.2.9.3-1 shows a scenario where the NF service consumer sends a request to the ADRF to delete stored data or analytics based on a data or analytics specification.

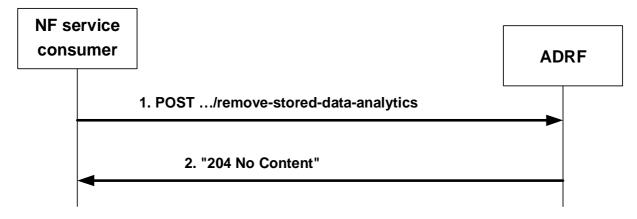

Figure 4.2.2.9.3-1: NF service consumer requesting to remove stored data or analytics

The NF service consumer shall invoke the Nadrf\_DataManagement\_Delete service operation to remove stored data or analytics based on a data or analytics specification. The NF service consumer shall send an HTTP POST request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/remove-stored-data-analytics" as URI, as shown in figure 4.2.2.9.3-1, step 1. The POST request body shall contain an NadrfStoredDataSpec data structure. The NadrfStoredDataSpec data structure provided in the request body shall include:

- a time window in which the data to be deleted was collected in the "timePeriod" attribute; and
- one of the following:
  - a data specification in the "dataSpec" attribute;
  - an analytics specification in the "anaSpec" attribute;

Upon the reception of an HTTP POST request with "{apiRoot}/nadrf-datamanagement/<apiVersion>/remove-stored-data-analytics" as URI, if the ADRF successfully processed and accepted the received HTTP POST request, the ADRF shall respond with HTTP "204 No Content" status. The ADRF shall remove any stored analytics or data that match the analytics or data specification received in the request.

If errors occur when processing the HTTP POST request, the ADRF shall send an HTTP error response as specified in clause 5.1.7.

# 5 API Definitions

# 5.1 Nadrf\_DataManagement Service API

#### 5 1 1 Introduction

The Nadrf DataManagement service shall use the Nadrf DataManagement API.

The API URI of the Nadrf\_DataManagement API shall be:

#### {apiRoot}/<apiName>/<apiVersion>

The request URIs used in HTTP requests from the NF service consumer towards the NF service producer shall have the Resource URI structure defined in clause 4.4.1 of 3GPP TS 29.501 [5], i.e.:

#### {apiRoot}/<apiName>/<apiVersion>/<apiSpecificResourceUriPart>

with the following components:

- The {apiRoot} shall be set as described in 3GPP TS 29.501 [5].
- The <apiName> shall be "nadrf-datamanagement".

- The <apiVersion> shall be "v1".
- The <apiSpecificResourceUriPart> shall be set as described in clause 5.1.3.

#### 5.1.2 Usage of HTTP

#### 5.1.2.1 General

HTTP/2, IETF RFC 7540 [11], shall be used as specified in clause 5 of 3GPP TS 29.500 [4].

HTTP/2 shall be transported as specified in clause 5.3 of 3GPP TS 29.500 [4].

The OpenAPI [6] specification of HTTP messages and content bodies for the Nadrf\_DataManagement API is contained in Annex A.

#### 5.1.2.2 HTTP standard headers

#### 5.1.2.2.1 General

See clause 5.2.2 of 3GPP TS 29.500 [4] for the usage of HTTP standard headers.

#### 5.1.2.2.2 Content type

JSON, IETF RFC 8259 [12], shall be used as content type of the HTTP bodies specified in the present specification as specified in clause 5.4 of 3GPP TS 29.500 [4]. The use of the JSON format shall be signalled by the content type "application/json".

"Problem Details" JSON object shall be used to indicate additional details of the error in a HTTP response body and shall be signalled by the content type "application/problem+json", as defined in IETF RFC 7807 [13].

#### 5.1.2.3 HTTP custom headers

The mandatory HTTP custom header fields specified in clause 5.2.3.2 of 3GPP TS 29.500 [4] shall be applicable.

#### 5.1.3 Resources

#### 5.1.3.1 Overview

This clause describes the structure for the Resource URIs, the resources and methods used for the service.

Figure 5.1.3.1-1 depicts the resource URIs structure for the Nadrf\_DataManagement API.

# {apiRoot}/nadrf-datamanagement/<apiVersion> //data-store-records //storeTransId} //data-retrieval-subscriptions

Figure 5.1.3.1-1: Resource URI structure of the Nadrf\_DataManagement API

Table 5.1.3.1-1 provides an overview of the resources and applicable HTTP methods.

Table 5.1.3.1-1: Resources and methods overview

Resource name	Resource URI	HTTP method or custom operation	Description
ADRF Data Store Records	/data-store-records	GET	Retrieve the stored data or analytics
		POST	Create a new Individual Data Store resource.
Individual ADRF Data Store Record	/data-store-records/{storeTransId}	DELETE	Delete an individual ADRF Data Store Record identified by {storeTransId}.
ADRF Data Retrieval Subscriptions	/data-retrieval-subscriptions	POST	Create a new Individual ADRF Data Retrieval Subscription resource.
Individual ADRF Data Retrieval Subscription	/data-retrieval- subscriptions/{subscriptionId}	DELETE	Delete an individual ADRF Data Retrieval Subscription identified by {subscriptionId}.

#### 5.1.3.2 Resource: ADRF Data Store Records

#### 5.1.3.2.1 Description

The ADRF Data Store Records resource represents all data storage records to the Nadrf\_DataManagement Service at a given ADRF. The resource allows an NF service consumer to create a new Individual ADRF Data Store Record resource and to retrieve Individual ADRF Data Store Record resources that fulfil certain criteria.

#### 5.1.3.2.2 Resource Definition

Resource URI: {apiRoot}/nadrf-datamanagement/<apiVersion>/data-store-records

The <apiVersion> shall be set as described in clause 5.1.1.

This resource shall support the resource URI variables defined in table 5.1.3.2.2-1.

Table 5.1.3.2.2-1: Resource URI variables for this resource

Name	Data type	Definition
apiRoot	string	See clause 5.1.1

#### 5.1.3.2.3 Resource Standard Methods

#### 5.1.3.2.3.1 POST

This method shall support the URI query parameters specified in table 5.1.3.2.3.1-1.

Table 5.1.3.2.3.1-1: URI query parameters supported by the POST method on this resource

Name	Data type	Р	Cardinality	Description	Applicability
n/a					

This method shall support the request data structures specified in table 5.1.3.2.3.1-2 and the response data structures and response codes specified in table 5.1.3.2.3.1-3.

Table 5.1.3.2.3.1-2: Data structures supported by the POST Request Body on this resource

Data type	Р	Cardinality	Description
NadrfDataStoreR	М	1	New individual Data Store Record to be created
ecord			

Table 5.1.3.2.3.1-3: Data structures supported by the POST Response Body on this resource

Data type	Р	Cardinality	Response	Description

NadrfDataStoreRecord	М	1	200 OK	Data Store record.
n/a			204 No	If the request ADRF Data Store Record does not exist, the
			Content	ADRF shall respond with "204 No Content ".
NOTE: The mandatory	HT	TP error statu	s codes for t	he GET method listed in table 5.2.7.1-1 of
3GPP TS 29.50	00 [4	l] also apply.		

#### 5.1.3.2.4 Resource Custom Operations

None.

#### 5.1.3.3 Resource: Individual ADRF Data Store Record

#### 5.1.3.3.1 Description

The Individual ADRF Data Store Record resource represents data or analytics stored via the Nadrf\_DataManagement\_StorageRequest in ADRF.

#### 5.1.3.3.2 Resource Definition

 $Resource\ URI:\ \{apiRoot\}/nadrf-datamanagement/< apiVersion>/data-store-records/\{storeTransId\}\}$ 

The <apiVersion> shall be set as described in clause 5.1.1.

This resource shall support the resource URI variables defined in table 5.1.3.3.2-1.

Table 5.1.3.3.2-1: Resource URI variables for this resource

Name	Data type	Definition
apiRoot	string	See clause 5.1.1.
storeTransId	string	Identifies an individual data store record.

#### 5.1.3.3.3 Resource Standard Methods

#### 5.1.3.3.3.1 DELETE

This method shall support the URI query parameters specified in table 5.1.3.3.3.1-1.

Table 5.1.3.3.3.1-1: URI query parameters supported by the DELETE method on this resource

Name	Data type	Р	Cardinality	Description	Applicability
n/a					

This method shall support the request data structures specified in table 5.1.3.3.3.1-2 and the response data structures and response codes specified in table 5.1.3.3.3.1-3.

Table 5.1.3.3.3.1-2: Data structures supported by the DELETE Request Body on this resource

Data type	Р	Cardinality	Description
n/a			

Table 5.1.3.3.3.1-3: Data structures supported by the DELETE Response Body on this resource

Data type	Р	Cardinality	Response codes	Description	
n/a			204 No Content	The Individual ADRF Data Store Record resource was deleted successfully.	
RedirectRespons e	0	01	307 Temporary Redirect	Temporary redirection, during Individual ADRF Data Store Record deletion. The response shall include a Location header field containing an alternative URI of the resource located in an alternative ADRF (service) instance.	
RedirectRespons e	0	01	308 Permanent Redirect	Permanent redirection, during Individual ADRF Data Store Record deletion. The response shall include a Location header field containing an alternative URI of the resource located in an alternative ADRF (service) instance.	
NOTE: The manadatory HTTP error status code for the DELETE method listed in Table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.					

Table 5.1.3.3.3.1-4: Headers supported by the 307 Response Code on this resource

Name	Data type	Р	Cardinality	Description
Location	string	М		An alternative URI of the resource located in an alternative ADRF (service) instance.
3gpp-Sbi-Target- Nf-Id	string	0		Identifier of the target NF (service) instance towards which the request is redirected.

Table 5.1.3.3.3.1-5: Headers supported by the 308 Response Code on this resource

Name	Data type	Р	Cardinality	Description
Location	string	М		An alternative URI of the resource located in an alternative ADRF (service) instance.
3gpp-Sbi-Target- Nf-Id	string	0		Identifier of the target NF (service) instance towards which the request is redirected.

#### 5.1.3.3.4 Resource Custom Operations

None in this release of the specification.

#### 5.1.3.4 Resource: ADRF Data Retrieval Subscriptions

#### 5.1.3.4.1 Description

The ADRF Data Retrieval Subscriptions resource represents all data retrieval subscriptions to the Nadrf\_DataManagement Service at a given ADRF. The resource allows an NF service consumer to create a new Individual ADRF Data Retrieval Subscription resource.

#### 5.1.3.4.2 Resource Definition

Resource URI: {apiRoot}/nadrf-datamanagement/<apiVersion>/data-retrieval-subscriptions

The <apiVersion> shall be set as described in clause 5.1.1.

This resource shall support the resource URI variables defined in table 5.1.3.4.2-1.

Table 5.1.3.4.2-1: Resource URI variables for this resource

Name	Data type	Definition
apiRoot	string	See clause 5.1.1

#### 5.1.3.4.3 Resource Standard Methods

#### 5.1.3.4.3.1 POST

This method shall support the URI query parameters specified in table 5.1.3.4.3.1-1.

Table 5.1.3.4.3.1-1: URI query parameters supported by the POST method on this resource

Name	Data type	Р	Cardinality	Description	Applicability
n/a					

This method shall support the request data structures specified in table 5.1.3.4.3.1-2 and the response data structures and response codes specified in table 5.1.3.4.3.1-3.

Table 5.1.3.4.3.1-2: Data structures supported by the POST Request Body on this resource

Data type	P	Cardinality	Description
NadrfDataRetriev	М	1	Individual ADRF Data Retrieval Subscription resource to be created.
alSubscription

NadrfDataRetriev alSubscription	M		201 Created	The creation of an Individual ADRF Data Retrieval Subscription resource is confirmed and a representation of that resource is returned.	
NOTE: The manadatory HTTP error status code for the POST method listed in Table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.					

Table 5.1.3.4.3.1-4: Headers supported by the 201 response code on this resource

Name	Data type	Р	Cardinality	Description
Location	string	M		Contains the URI of the newly created resource, according to the structure: {apiRoot}/nadrf-datamanagement/v1/data-retrieval-subscriptions/{subscriptionld}

#### 5.1.3.4.4 Resource Custom Operations

None in this release of the specification.

#### 5.1.3.5 Resource: Individual ADRF Data Retrieval Subscription

#### 5.1.3.5.1 Description

The Individual ADRF Data Retrieval Subscription resource represents single ADRF data retrieval subscription to the Nadrf\_DataManagement Service at a given ADRF. The resource allows an NF service consumer to delete Individual ADRF Data Retrieval Subscription resource.

#### 5.1.3.5.2 Resource Definition

Resource URI: {apiRoot}/nadrf-datamanagement/v1/data-retrieval-subscriptions/{subscriptionId}

This resource shall support the resource URI variables defined in table 5.1.3.5.2-1.

Table 5.1.3.5.2-1: Resource URI variables for this resource

Name	Data type	Definition
apiRoot	string	See clause 5.1.1
subscriptionId	string	Identifies a subscription to the Nadrf_DataManagement service.

#### 5.1.3.5.3 Resource Standard Methods

#### 5.1.3.5.3.1 DELETE

This method shall support the URI query parameters specified in table 5.1.3.5.3.1-1.

Table 5.1.3.5.3.1-1: URI query parameters supported by the DELETE method on this resource

Name	Data type	Р	Cardinality	Description	Applicability
n/a					

This method shall support the request data structures specified in table 5.1.3.5.3.1-2 and the response data structures and response codes specified in table 5.1.3.5.3.1-3.

Table 5.1.3.5.3.1-2: Data structures supported by the DELETE Request Body on this resource

Data type	Р	Cardinality	Description
n/a			

Table 5.1.3.5.3.1-3: Data structures supported by the DELETE Response Body on this resource

Data type	Р	Cardinality	Response	Description

n/a			204 No	The Individual ADRF Data Retrieval Subscription resource was		
			Content	deleted successfully.		
RedirectRespons	0	01	307	Temporary redirection, during Individual ADRF Data Retrieval		
е			Temporary	Subscription deletion. The response shall include a Location		
			Redirect	header field containing an alternative URI of the resource		
				located in an alternative ADRF (service) instance.		
RedirectRespons	0	01	308	Permanent redirection, during Individual ADRF Data Retrieval		
е			Permanent	Subscription deletion. The response shall include a Location		
			Redirect	header field containing an alternative URI of the resource		
				located in an alternative ADRF (service) instance.		
NOTE: The man	NOTE: The manadatory HTTP error status code for the DELETE method listed in Table 5.2.7.1-1 of					
3GPP TS	3 29.5	00 [4] also appl	y.			

Table 5.1.3.5.3.1-4: Headers supported by the 307 Response Code on this resource

Name	Data type	Р	Cardinality	Description
Location	string	М		An alternative URI of the resource located in an alternative ADRF (service) instance.
3gpp-Sbi-Target- Nf-Id	string	0		Identifier of the target NF (service) instance towards which the request is redirected.

Table 5.1.3.5.3.1-5: Headers supported by the 308 Response Code on this resource

Name	Data type	Р	Cardinality	Description
Location	string	М	1	An alternative URI of the resource located in an alternative
				ADRF (service) instance.
3gpp-Sbi-Target-	string	0	01	Identifier of the target NF (service) instance towards which the
Nf-Id				request is redirected.

#### 5.1.3.5.4 Resource Custom Operations

None in this release of the specification.

#### 5.1.4 Custom Operations without associated resources

#### 5.1.4.1 Overview

The structure of the custom operation URIs of the Nadrf\_DataManagement service is shown in Figure 5.1.4.1-1.

#### {apiRoot}/nadrf-datamanagement/v1

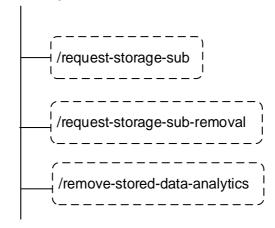

Figure 5.1.4.1-1: Custom operation URI structure of the Nadrf\_DataManagement API

Table 5.1.4.1-1 provides an overview of the custom operations and applicable HTTP methods.

Table 5.1.4.1-1: Custom operations without associated resources

Custom operation URI	Mapped HTTP method	Description
{apiRoot}/nadrf-	POST	Request the ADRF to create a subscription for
datamanagement/ <apiversion>/request- storage-sub</apiversion>		data or analytics and then store the received data or analytics in the ADRF.
{apiRoot}/nadrf-	POST	Request the ADRF to remove a subscription
datamanagement/ <apiversion>/request-</apiversion>		for data or analytics.
storage-sub-removal		
{apiRoot}/nadrf-	POST	Request the ADRF to remove already stored
datamanagement/ <apiversion>/remove-</apiversion>		data or analytics.
stored-data-analytics		

#### 5.1.4.2 Operation: request-storage-sub

#### 5.1.4.2.1 Description

The operation is used by the NF service consumer to request the ADRF to create a subscription for data or analytics and then store the received data or analytics in the ADRF.

#### 5.1.4.2.2 Operation Definition

This operation shall support the request data structures shown in Table 5.1.4.2.2-1 and the response data structures and error codes specified in Tables 5.1.4.2.2-2.

Table 5.1.4.2.2-1: Data structures supported by the POST Request Body on this resource

Data type	Р	Cardinality	Description
NadrfDataStoreS	М	1	Information about the storage subscription that the ADRF shall create.
ubscription			

Table 5.1.4.2.2-2: Data structures supported by the POST Response Body on this resource

Data type	Р	Cardinality	Response	Description		
			codes			
NadrfDataStoreS	М	1	200 OK	Successful request to trigger the creation of a subscription for		
ubscriptionRef				data or analytics at the ADRF. A reference is provided.		
NOTE: The manadatory HTTP error status code for the POST method listed in Table 5.1.7.1-1 of						
3GPP TS 29.500 [4] also apply.						

#### 5.1.4.3 Operation: request-storage-sub-removal

#### 5.1.4.3.1 Description

The operation is used by the NF service consumer to request the ADRF to remove a subscription for data or analytics which was used to store the received data or analytics in the ADRF.

#### 5.1.4.3.2 Operation Definition

This operation shall support the request data structures shown in Table 5.1.4.3.2-1 and the response data structures and error codes specified in Tables 5.1.4.3.2-2.

Table 5.1.4.3.2-1: Data structures supported by the POST Request Body on this resource

Data type	Р	Cardinality	Description
NadrfDataStoreS	М	1	Reference used to identify the subscription that the ADRF shall remove.
ubscriptionRef			

Table 5.1.4.3.2-2: Data structures supported by the POST Response Body on this resource

Data type	Р	Cardinality	Response codes	Description	
n/a				Successful request to trigger the removal of a subscription for data or analytics at the ADRF.	
NOTE: The manadatory HTTP error status code for the POST method listed in Table 5.1.7.1-1 of 3GPP TS 29.500 [4] also apply.					

#### 5.1.4.4 Operation: remove-stored-data-analytics

#### 5.1.4.4.1 Description

The operation is used by the NF service consumer to request the ADRF to remove stored data or analytics based on a data or analytics specification.

#### 5.1.4.4.2 Operation Definition

This operation shall support the request data structures shown in Table 5.1.4.4.2-1 and the response data structures and error codes specified in Tables 5.1.4.4.2-2.

Table 5.1.4.4.2-1: Data structures supported by the POST Request Body on this resource

Data type	Р	Cardinality	Description
NadrfStoredData	М	1	Information about the specification of data or analytics stored in ADRF.
Spec			

Table 5.1.4.4.2-2: Data structures supported by the POST Response Body on this resource

Data type	Р	Cardinality	Response codes	Description
n/a				Successful request to remove data or analytics at the ADRF based on a data or analytics specification.
NOTE: The mandatory HTTP error status code for the POST method listed in Table 5.1.7.1-1 of 3GPP TS 29.500 [4] also apply.				

#### 5.1.5 Notifications

#### 5.1.5.1 General

Notifications shall comply to clause 6.2 of 3GPP TS 29.500 [4] and clause 4.6.2.3 of 3GPP TS 29.501 [5].

Table 5.1.5.1-1: Notifications overview

Notification	Callback URI	HTTP method or custom operation	Description (service operation)
Retrieval Notification	{notificationURI}		Report data or analytics from ADRF.

#### 5.1.5.2 Retrieval Notification

#### 5.1.5.2.1 Description

The Retrieval Notification is used by the NF service producer to report one or several data retrieval events to an NF service consumer that has subscribed to such notifications.

#### 5.1.5.2.2 Target URI

The Callback URI "{notificationURI}" shall be used with the callback URI variables defined in table 5.1.5.2.2-1.

Table 5.1.5.2.2-1: Callback URI variables

Name	Definition
notificationURI	String formatted as URI with the Callback Uri

#### 5.1.5.2.3 Standard Methods

#### 5.1.5.2.3.1 POST

This method shall support the request data structures specified in table 5.1.5.2.3.1-1 and the response data structures and response codes specified in table 5.1.5.2.3.1-2.

Table 5.1.5.2.3.1-1: Data structures supported by the POST Request Body

Data type	P	Cardinality	Description
NadrfDataRetrievalNotification	М	1	Provides information about observed data or analytics.

Table 5.1.5.2.3.1-2: Data structures supported by the POST Response Body

Data type	Р	Cardinality	Response codes	Description			
n/a			204 No Content	The receipt of the Notification is acknowledged.			
RedirectResponse	0	01	307 Temporary Redirect	Temporary redirection, during the retrieval notification. The response shall include a Location header field containing an alternative URI representing the end point of an alternative NF consumer (service) instance where the notification should be sent.			
RedirectResponse	0	01	308 Permanent Redirect	Permanent redirection, during the retrieval notification. The response shall include a Location header field containing an alternative URI representing the end point of an alternative NF consumer (service) instance where the notification should be sent.			
NOTE: The mandatory HTTP error status codes for the POST method listed in Table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.							

Table 5.1.5.2.3.1-3: Headers supported by the 307 Response Code on this resource

Name	Data type	Р	Cardinality	Description
Location	string	M		An alternative URI representing the end point of an alternative NF consumer (service) instance towards which the notification should be redirected.
3gpp-Sbi-Target- Nf-Id	string	0		Identifier of the target NF (service) instance towards which the notification request is redirected.

Table 5.1.5.2.3.1-4: Headers supported by the 308 Response Code on this resource

Name	Data type	Р	Cardinality	Description
Location	string	М	An alternative URI representing the end point of an alternative	
		· · · · · · · · · · · · · · · · · · ·		NF consumer (service) instance towards which the notification
				should be redirected.
3gpp-Sbi-Target-	string	0	01	Identifier of the target NF (service) instance towards which the
Nf-Id				notification request is redirected.

#### 5.1.6 Data Model

#### 5.1.6.1 General

This clause specifies the application data model supported by the Nadrf\_DataManagement API.

Table 5.1.6.1-1 specifies the data types defined for the Nadrf\_DataManagement service based interface protocol.

Table 5.1.6.1-1: Nadrf\_DataManagement specific Data Types

Data type	Clause defined	Description	Applicability
DataNotification	5.1.6.2.9	Represents a data subscription notification of one of various possible data sources.	
DataSubscription	5.1.6.2.8	Contains information about Data specification.	
NadrfDataRetrievalNotification	5.1.6.2.5	Represents a notification that corresponds with an Individual ADRF Data Retrieval Subscription resource.	
NadrfDataRetrievalSubscription	5.1.6.2.4	Represents an Individual ADRF Data Retrieval Subscription resource.	
NadrfDataStoreRecord	5.1.6.2.2	Represents an Individual ADRF Data Store Record resource.	
NadrfDataStoreSubscription	5.1.6.2.3	Contains information to be used by the ADRF to create a Data or Analytics subscription.	
NadrfDataStoreSubscriptionRef	5.1.6.2.6	Contains a reference to a request for a Data or Analytics subscription.	
NadrfStoredDataSpec	5.1.6.2.7	Contains information about Data or Analytics specification.	

Table 5.1.6.1-2 specifies data types re-used by the Nadrf\_DataManagement service based interface protocol from other specifications, including a reference to their respective specifications and when needed, a short description of their use within the Nadrf\_DataManagement service based interface.

Table 5.1.6.1-2: Nadrf\_DataManagement re-used Data Types

Data type	Reference	Comments	Applicability
AfEventExposureNotif	3GPP TS 29.517 [20]	Represents notifications on	
		AF event(s) that occurred for	
		an Individual AF Event	
		Subscription resource.	
AfEventExposureSubsc	3GPP TS 29.517 [20]	Represents AF event	
		subscription.	
AmfEventNotification	3GPP TS 29.518 [18]	Represents notifications on	
		AMF event(s) that occurred	
		for an Individual AMF Event	
A (5 (0 ) : ()	00DD T0 00 540 (40)	Subscription resource.	
AmfEventSubscription	3GPP TS 29.518 [18]	Represents AMF event	
D . T	00DD T0 00 574 (40)	subscription.	
DateTime	3GPP TS 29.571 [16]	Identifies the time.	
EeSubscription	3GPP TS 29.503 [19]	Represents UDM event	
E ( II ) C	0000 70 00 570 1041	subscription.	
FetchInstruction	3GPP TS 29.576 [24]	The fetch instruction	
		indicates that the data or	
		analytics can be fetched by the consumer.	
FormattingInstruction	3GPP TS 29.574 [23]	DCCF formatting	
Formattinginstruction	3GFF 13 29.374 [23]	Instructions.	
MonitoringReport	3GPP TS 29.503 [19]	UDM Monitoring Report.	
NefEventExposureNotif	3GPP TS 29.503 [19]	Represents notifications on	
NeiEveritExposureriotti	3GPP 13 29.591 [21]	network exposure event(s)	
		that occurred for an	
		Individual Network Exposure	
		Event Subscription	
		resource.	
NefEventExposureSubsc	3GPP TS 29.591 [21]	Represents NEF event	
THOIL VOINE APOSOTIO G G G G G G G G G G G G G G G G G G G	0011 10 20.001 [21]	subscription.	
NfInstanceId	3GPP TS 29.571 [16]	NF instance identifier.	
NfSetId	3GPP TS 29.571 [16]	NF set identifier.	
NnwdafEventsSubscription	3GPP TS 29.520 [15]	Represents an NWDAF	
		analytics subscription.	
NnwdafEventsSubscriptionNotification	3GPP TS 29.520 [15]	Represents an NWDAF	
		analytics subscription	
		notification.	
NotificationData	3GPP TS 29.510 [10]	Represents an NRF event	
		notification.	
NsmfEventExposure	3GPP TS 29.508 [17]	Represents SMF event	
		subscription.	
NsmfEventExposureNotification	3GPP TS 29.508 [17]	Represents SMF event	
		notification.	
ProcessingInstruction	3GPP TS 29.574 [23]	DCCF processing	
		Instructions.	
SACEventReport	3GPP TS 29.536 [25]	Represents an NSACF	
		event notification.	
SACEventSubscription	3GPP TS 29.536 [25]	Represents and NSACF	
		event subscription.	
SubscriptionData	3GPP TS 29.510 [10]	Represents an NRF event	
		subscription.	
TimeWindow	3GPP TS 29.122 [22]	Represents a time window.	
Uri	3GPP TS 29.571 [16]	URI.	

#### 5.1.6.2 Structured data types

#### 5.1.6.2.1 Introduction

This clause defines the structures to be used in resource representations.

#### 5.1.6.2.2 Type: NadrfDataStoreRecord

Table 5.1.6.2.2-1: Definition of type NadrfDataStoreRecord

Attribute name	Data type	Р	Cardinality	Description	Applicability
dataNotif	DataNotification	С	01	Data subscription notification. (NOTE 1)	
anaNotifications	array(NnwdafEv entsSubscriptio nNotification)	С	1N	List of analytics subscription notifications. (NOTE 1)	
anaSub	NnwdafEventsS ubscription	С	01	Represents the subscription information of the corresponding analytics notification. Shall be present if the "anaNotifications" attribute is provided. (NOTE 2)	
dataSub	DataSubscriptio n	С	01	Represents the subscription information of the corresponding data notification. Shall be present if the "dataNotif" attribute is provided. (NOTE 2) and "dataNotif" shall be provide	

NOTE 2: Exactly one of the attributes "anaSub" and "dataSub" shall be provided.

#### 5.1.6.2.3 Type: NadrfDataStoreSubscription

Table 5.1.6.2.3-1: Definition of type NadrfDataStoreSubscription

Attribute name	Data type	Р	Cardinality	Description	Applicability	
anaSub	NnwdafEventsS ubscription	С	01	Subscribed analytics events. (NOTE 1)		
dataSub	DataSubscriptio n	С	01	Represents requested Events subscription. (NOTE 1)		
targetNfld	NfinstanceId	С	01	DCCF or NWDAF NF instance identifier to which the ADRF shall create the requested subscription. (NOTE 2)		
targetNfSetId	NfSetId	С	01	DCCF or NWDAF NF set identifier to which the ADRF shall create the requested subscription. (NOTE 2)		
formatInstruct	FormattingInstr uction	0	01	Formatting instructions to be used for sending event notifications.		
proclnstruct	ProcessingInstr uction	0	01	Processing instructions to be used for sending event notifications.		
NOTE 1: Exactly one of these attributes shall be provided.						

NOTE 2: One of "targetNfld" and "targetNfSetId" shall be provided.

## 5.1.6.2.4 Type: NadrfDataRetrievalSubscription

Table 5.1.6.2.4-1: Definition of type NadrfDataRetrievalSubscription

	Data type	Р	Cardinality	Description	Applicability
	InwdafEventsS bscription	С	01	Subscribed analytics events. (NOTE 1)	
dataSub D	DataSubscriptio	С	01	Represents requested Events subscription. (NOTE 1)	
notificationURI U	Jri	M	1	Notification target address. This attribute shall have the same value as the callback URI attribute of the requested subscription attribute.	
timePeriod T	imeWindow	M	1	Represents a start time and a stop time during which the requested data is collected and/or will be collected at the data source.	
notifCorrld st	tring	M	1	Notification correlation identifier provided by the NF service consumer to be used later by the ADRF in the notifications that correspond with this subscription. The value of this attribute shall be unique per subscription for a given NF service consumer.	
NOTE 1: Exactly one	of these attribute	s sh	all be provided	<u>.</u> İ.	

#### 5.1.6.2.5 Type: NadrfDataRetrievalNotification

Table 5.1.6.2.5-1: Definition of type NadrfDataRetrievalNotification

Attribute name	Data type	Р	Cardinality	Description	Applicability
notifCorrld	string	M	1	This attribute indicates the notification correlation identifier provided by the NF service consumer during the data retrieval subscription. This parameter can be useful if the NF service consumer uses a common callback URI for multiple subscriptions.	
anaNotifications	array(NnwdafEv entsSubscriptio nNotification)	С	1N	List of analytics subscription notifications. (NOTE)	
dataNotif	DataNotification	С	01	Data subscription notification. (NOTE)	
fetchInstruct	FetchInstruction	С	01	The fetch instruction indicates that the data or analytics can be fetched by the consumer. (NOTE)	
terminationReq	boolean	0	01	If provided and set to "true", it indicates that the subscription is requested to be terminated, i.e. no further notifications related to this subscription will be provided. The default value is "false".	
timeStamp	DateTime	М	1	It represents the time when ADRF completed preparation of the requested data or analytics.	
NOTE: Exactly or	ne of these attribut	es sh	ali de provided	J.	

#### 5.1.6.2.6 Type: NadrfDataStoreSubscriptionRef

Table 5.1.6.2.6-1: Definition of type NadrfDataStoreSubscriptionRef

Attribute name	Data type	Р	Cardinality	Description	Applicability
transRefld	string	M	1	Transaction reference	
				identifier.	

### 5.1.6.2.7 Type: NadrfStoredDataSpec

Table 5.1.6.2.7-1: Definition of type NadrfStoredDataSpec

Attribute name	Data type	Р	Cardinality	Description	Applicability
dataSpec	DataSubscriptio n	С	01	Represents data specification. (NOTE)	
anaSpec	NnwdafEventsS ubscription	С	01	Represents analytics specification. (NOTE)	
timePeriod	TimeWindow	M	1	Represents a start time and a stop time during which the requested data to be removed was collected at the data source.	
NOTE: Exactly o					

5.1.6.2.8 Type: DataSubscription

Table 5.1.6.2.8-1: Definition of type DataSubscription

Attribute name	Data type	Р	Cardinality	Description	Applicability				
amfDataSub	AmfEventSubsc ription	С	01	Represents requested AMF Events subscription. (NOTE)					
smfDataSub	NsmfEventExpo sure	С	01	Represents requested SMF Events subscription. (NOTE)					
udmDataSub	EeSubscription	С	01	Represents requested UDM Events subscription. (NOTE)					
nefDataSub	NefEventExpos ureSubsc	С	01	Represents requested NEF Events subscription. (NOTE)					
afDataSub	AfEventExposur eSubsc	С	01	Represents requested AF Events subscription. (NOTE)					
nrfDataSub	SubscriptionDat a	С	01	Represents requested NRF Events subscription. (NOTE)					
nsacfDataSub	SACEventSubs cription	С	01	Represents requested NSACF Events subscription. (NOTE)					
NOTE: Exactly or	ne of these attribute	es sh	all be provided	d.					

#### 5.1.6.2.9 Type: DataNotification

Table 5.1.6.2.9-1: Definition of type DataNotification

Attribute name	Data type	Р	Cardinality	Description	Applicability
afEventNotifs	array(AfEventE xposureNotif)	C	1N	List of notifications on AF event(s). (NOTE 1)	
amfEventNotifs	array(AmfEvent Notification)	O	1N	List of notifications on AMF event(s). (NOTE 1)	
smfEventNotifs	array(NsmfEven tExposureNotifi cation)	O	1N	List of notifications on SMF event(s). (NOTE 1)	
udmEventNotifs	array(Monitorin gReport)	С	1N	List of monitoring reports containing information about UDM event(s). (NOTE 1)	
nefEventNotifs	array(NefEvent ExposureNotif)	С	1N	List of notifications on network exposure event(s). (NOTE 1)	
nrfEventNotifs	array(Notificatio nData)	С	1N	List of notifications on NRF event(s). (NOTE 1)	
nsacfEventNotifs	array(SACEvent Report)	C	1N	List of notifications on NSACF event(s). (NOTE 1)	_
timeStamp	DateTime	0	01	Indicates the timestamp for the event(s). (NOTE 2)	

NOTE 1: Exactly one of these attributes shall be provided.

NOTE 2: The "timeStamp" attribute within the DataNotification data type may be provided if any of the "timeStamp" attribute within AfEventNotification contained in the AfEventExposureNotif, or within AmfEventReport contained in the AmfEventNotification, or within EventNotification contained in the NsmfEventExposureNotification, or within MonitoringReport, or within NefEventNotification contained in the NefEventExposureNotif or within SACEventReportItem contained in the SACEventReport data type is not provided.

#### 5.1.6.3 Simple data types and enumerations

None.

#### 5.1.6.4 Data types describing alternative data types or combinations of data types

None.

### 5.1.7 Error Handling

#### 5.1.7.1 General

For the Nadrf\_DataManagement API, HTTP error responses shall be supported as specified in clause 4.8 of 3GPP TS 29.501 [5]. Protocol errors and application errors specified in table 5.1.7.2-1 of 3GPP TS 29.500 [4] shall be supported for an HTTP method if the corresponding HTTP status codes are specified as mandatory for that HTTP method in table 5.1.7.1-1 of 3GPP TS 29.500 [4].

In addition, the requirements in the following clauses are applicable for the Nadrf\_DataManagement API.

#### 5.1.7.2 Protocol Errors

No specific procedures for the Nadrf\_DataManagement service are specified.

#### 5.1.7.3 Application Errors

The application errors defined for the Nadrf\_DataManagement service are listed in Table 5.1.7.3-1.

Table 5.1.7.3-1: Application errors

Application Error	HTTP status code	Description

## 5.1.8 Feature negotiation

The optional features in table 5.1.8-1 are defined for the Nadrf\_DataManagement API. They shall be negotiated using the extensibility mechanism defined in clause 6.6 of 3GPP TS 29.500 [4].

**Table 5.1.8-1: Supported Features** 

Feature number	Feature Name	Description

# 5.1.9 Security

As indicated in 3GPP TS 33.501 [8] and 3GPP TS 29.500 [4], the access to the Nadrf\_DataManagement API may be authorized by means of the OAuth2 protocol (see IETF RFC 6749 [9]), based on local configuration, using the "Client Credentials" authorization grant, where the NRF (see 3GPP TS 29.510 [10]) plays the role of the authorization server.

If OAuth2 is used, an NF Service Consumer, prior to consuming services offered by the Nadrf\_DataManagement API, shall obtain a "token" from the authorization server, by invoking the Access Token Request service, as described in 3GPP TS 29.510 [10], clause 5.4.2.2.

NOTE: When multiple NRFs are deployed in a network, the NRF used as authorization server is the same NRF that the NF Service Consumer used for discovering the Nadrf\_DataManagement service.

The Nadrf\_DataManagement API defines a single scope "nadrf-datamanagement" for the entire service, and it does not define any additional scopes at resource or operation level.

# Annex A (normative): OpenAPI specification

#### A.1 General

This Annex specifies the formal definition of the API(s) defined in the present specification. It consists of OpenAPI 3.0.0 specifications in YAML format.

This Annex takes precedence when being discrepant to other parts of the specification with respect to the encoding of information elements and methods within the API(s).

NOTE 1: The semantics and procedures, as well as conditions, e.g. for the applicability and allowed combinations of attributes or values, not expressed in the OpenAPI definitions but defined in other parts of the specification also apply.

Informative copies of the OpenAPI specification files contained in this 3GPP Technical Specification are available on a Git-based repository that uses the GitLab software version control system (see 3GPP TS 29.501 [5] clause 5.3.1 and 3GPP TR 21.900 [7] clause 5B).
