#### Important notice

The present document can be downloaded from the ETSI Search & Browse Standards application.

The present document may be made available in electronic versions and/or in print. The content of any electronic and/or print versions of the present document shall not be modified without the prior written authorization of ETSI. In case of any existing or perceived difference in contents between such versions and/or in print, the prevailing version of an ETSI deliverable is the one made publicly available in PDF format on ETSI deliver repository.

Users should be aware that the present document may be revised or have its status changed, this information is available in the Milestones listing.

If you find errors in the present document, please send your comments to the relevant service listed under <u>Committee Support Staff</u>.

If you find a security vulnerability in the present document, please report it through our Coordinated Vulnerability Disclosure (CVD) program.

#### Notice of disclaimer & limitation of liability

The information provided in the present deliverable is directed solely to professionals who have the appropriate degree of experience to understand and interpret its content in accordance with generally accepted engineering or other professional standard and applicable regulations.

No recommendation as to products and services or vendors is made or should be implied.

No representation or warranty is made that this deliverable is technically accurate or sufficient or conforms to any law and/or governmental rule and/or regulation and further, no representation or warranty is made of merchantability or fitness for any particular purpose or against infringement of intellectual property rights.

In no event shall ETSI be held liable for loss of profits or any other incidental or consequential damages.

Any software contained in this deliverable is provided "AS IS" with no warranties, express or implied, including but not limited to, the warranties of merchantability, fitness for a particular purpose and non-infringement of intellectual property rights and ETSI shall not be held liable in any event for any damages whatsoever (including, without limitation, damages for loss of profits, business interruption, loss of information, or any other pecuniary loss) arising out of or related to the use of or inability to use the software.

#### Copyright Notification

No part may be reproduced or utilized in any form or by any means, electronic or mechanical, including photocopying and microfilm except as authorized by written permission of ETSI.

The content of the PDF version shall not be modified without the written authorization of ETSI.

The copyright and the foregoing restriction extend to reproduction in all media.

## Intellectual Property Rights

#### **Essential patents**

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for ETSI members and non-members, and can be found in ETSI SR 000 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available from the ETSI Secretariat. Latest updates are available on the ETSI IPR online database.

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

#### **Trademarks**

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

**DECT**<sup>TM</sup>, **PLUGTESTS**<sup>TM</sup>, **UMTS**<sup>TM</sup> and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP**<sup>TM</sup>, **LTE**<sup>TM</sup> and **5G**<sup>TM</sup> logo are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M**<sup>TM</sup> logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM**<sup>®</sup> and the GSM logo are trademarks registered and owned by the GSM Association.

## **Legal Notice**

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities. These shall be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between 3GPP and ETSI identities can be found at <u>3GPP to ETSI numbering cross-referencing</u>.

## Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the <u>ETSI Drafting Rules</u> (Verbal forms for the expression of provisions).

"must" and "must not" are NOT allowed in ETSI deliverables except when used in direct citation.

## Foreword

This Technical Specification has been produced by the 3<sup>rd</sup> Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

#### where:

- x the first digit:
  - 1 presented to TSG for information;
  - 2 presented to TSG for approval;
  - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

## 1 Scope

The present specification provides the stage 3 definition for the usage of the Unified Data Repository service (Nudr\_DataRepository) of 5G System for Policy Data, Application Data and Structured Data for Exposure.

The Unified Data Repository (UDR) provides the Unified Data Repository service. This service provides a repository for policy data, application data and exposure data.

The stage 3 protocol definition for Nudr Service Based Interface which is common for subscription data, policy data, application data and exposure data is specified in 3GPP TS 29.504 [6].

## 2 References

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document *in the same Release as the present document*.

## 3 Definitions and abbreviations

## 3.1 Definitions

For the purposes of the present document, the terms and definitions given in 3GPP TR 21.905 [1] and the following apply. A term defined in the present document takes precedence over the definition of the same term, if any, in 3GPP TR 21.905 [1].

## 3.2 Abbreviations

For the purposes of the present document, the abbreviations given in 3GPP TR 21.905 [1] and the following apply. An abbreviation defined in the present document takes precedence over the definition of the same abbreviation, if any, in 3GPP TR 21.905 [1].

| A2X     | Aircraft-to-Everything                                |
|---------|---|
| AM      | Access and Mobility Management                        |
| ATSSS   | Access Traffic Steering, Switching, Splitting         |

## 4 Overview

The resources, data model and usage defined in the present document are used by the 5GC NFs (e.g. PCF, NEF) to access the policy data, application data or exposure data via the Unified Data Repository services as specified in 3GPP TS 29.504 [6].

## 5 Usage of Nudr\_DataRepository Service API for Policy Data

## 5.1 Introduction

The following clauses specify the usage of Nudr\_DataRepository service for policy data. The principles specified in 3GPP TS 29.504 [6] are followed unless explicitly specified otherwise in the following clauses.

#### 5.2 Resources

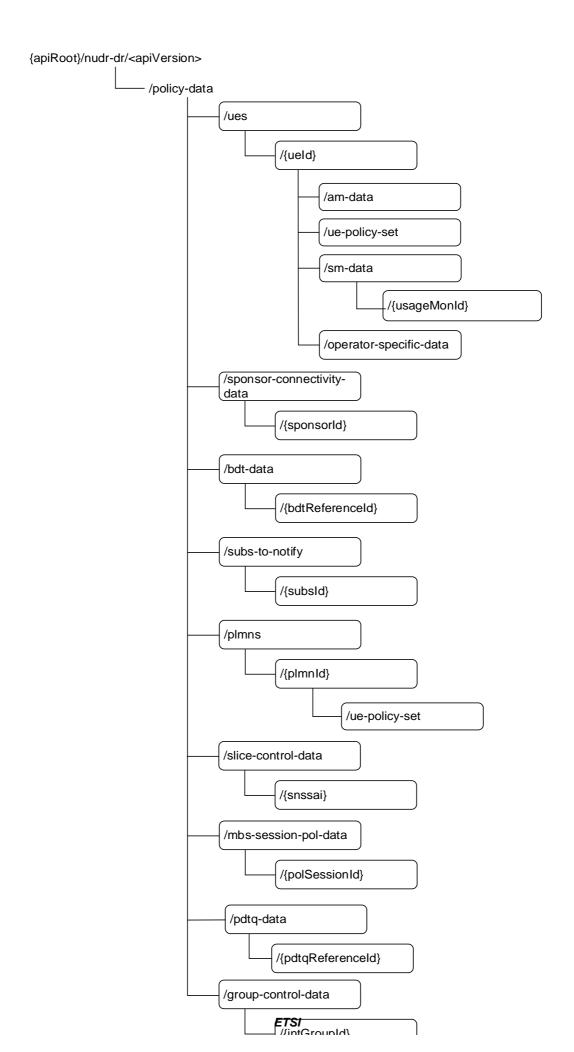

#### 5.2.1 Overview

This clause specifies the resources for the usage of the Unified Data Repository service for Policy Data.

#### 5.2.2 Resource Structure

This clause describes the structure for the Resource URIs and the resources and methods used for the service.

Figure 5.2.2-1 depicts the resource URIs structure for the Nudr\_DataRepository API for policy data.

#### Figure 5.2.2-1: Resource URI structure of the Nudr\_DataRepository API for policy data

Table 5.2.2-1 provides an overview of the resources and applicable HTTP methods.

Table 5.2.2-1: Resources and methods overview

| Resource name               | Resource URI   | HTTP method or custom operation | Description  |
|-----------------------------|--|---------------------------------|--|
| PolicyDataForIndividualUe   | /policy-data/ues/{ueld}                                | GET                             | Retrieve multiple policy data sets (access and mobility policy data, UE policy set data, session management policy data, usage monitoring data, operator specific policy data) for a subscriber. |
| AccessAndMobilityPolicyData | /policy-data/ues/{ueld}/<br>am-data                    | GET                             | Retrieve the access and mobility policy data for a subscriber.   |
|                             |  | PATCH                           | When the feature "AccessAndMobilityPolicyData Modify" is supported, modify the access and mobility policy data for a subscriber.   |
|                             |  | GET                             | Retrieve the UE policy set data for a subscriber.  |
| UEPolicySet                 | /policy-data/ues/{ueld}/<br>ue-policy-set              | PUT                             | Create or modify the UE policy set data for a subscriber.  |
|                             |  | PATCH                           | Modify the UE policy set data for a subscriber.  |
| SessionManagementPolicyData | /policy-data/ues/{ueld}/<br>sm-data                    | GET                             | Retrieve the session management policy data for a subscriber.  |
|                             |  | PATCH                           | When the feature "SessionManagementPolicyDat aPatch" is supported, modify the session management policy data for a subscriber.   |
|                             |  | GET                             | Retrieve a usage monitoring resource.  |
| UsageMonitoringInformation  | /policy-data/ues/{ueld}/<br>sm-data/{usageMonld}       | PUT                             | Create a usage monitoring resource.  |
|                             |  | DELETE                          | Delete a usage monitoring resource.  |
|                             |  | GET                             | Retrieve the operator specific policy data of a UE   |
| Operator Specific Date      | /policy-data/ues/{ueld}/                               | PATCH                           | Modify the operator specific policy data of a UE.  |
| OperatorSpecificData        | operator-specific-data                                 | PUT                             | Create or modify the operator specific policy data of a UE.  |
|                             |  | DELETE                          | Delete the operator specific policy data for a UE.   |
| SponsorConnectivityData     | /policy-data/sponsor-<br>connectivity-data/{sponsorld} | GET                             | Retrieve the sponsored connectivity information for a given sponsorld.   |
| BdtData                     | /policy-data/bdt-data                                  | GET                             | Retrieve the BDT data collection.  |
|                             |  | GET                             | Retrieve the BDT data information associated with a BDT reference Id.  |
| IndividualBdtData           | /policy-data/bdt-data/<br>{bdtReferenceId}             | PUT                             | Create a BDT data resource associated with a BDT reference Id.   |
|                             |  | PATCH                           | Modifies an BDT data resource associated with an BDT reference Id.   |

|                                  |  | DELETE | Delete a BDT data resource associated with a BDT reference Id.   |
|----------------------------------|--|--------|--|
| PolicyDataSubscriptions          | /policy-data/subs-to-notify                      | GET    | Retrieve Individual Policy Data<br>Subscriptions from the Policy<br>Data Subscriptions collection.   |
| 1 OlicyDataSubscriptions         | /policy-data/subs-to-notify                      | POST   | Create a subscription to receive notifications of policy data changes.   |
|                                  |  | GET    | Retrieve a subscription identified by {subsld}.  |
| IndividualPolicyDataSubscription | /policy-data/subs-to-notify/<br>{subsId}         | PUT    | Modify a subscription to receive notifications of policy data changes.   |
|                                  |  | DELETE | Delete a subscription identified by {subsld}.  |
| PlmnUePolicySet                  | /policy-data/plmns/{plmnld}/<br>ue-policy-set    | GET    | Retrieve the UE policy set data for an H-PLMN.   |
| Olive Dellier Occupani           | /policy-data/slice-control-                      | GET    | Retrieve network slice specific policy control data for a given S-NSSAI.   |
| SlicePolicyControlData           | data/{snssai}                                    | PATCH  | Modify network slice specific policy control data for a given S-NSSAI.   |
| MBSSessionPolicyControlData      | /policy-data/mbs-session-pol-data/{polSessionId} | GET    | Retrieve MBS Session Policy<br>Control Data for an MBS<br>Session based on the MBS<br>Session Identifier or an AF<br>Application Identifier. |
| PdtqData                         | /policy-data/pdtq-data                           | GET    | Retrieve the PDTQ data collection.   |
|                                  |  | GET    | Retrieve the PDTQ data information associated with a PDTQ reference Id.  |
| IndividualPdtqData               | /policy-data/pdtq-data/                          | PUT    | Create a PDTQ data resource associated with a PDTQ reference Id.   |
| individualFdiqData               | {pdtqReferenceId}                                | PATCH  | Modifies a PDTQ data resource associated with an PDTQ reference Id.  |
|                                  |  | DELETE | Delete a PDTQ data resource associated with a PDTQ reference Id.   |
| GroupPolicyControlData           | /policy-data/group-control-                      | GET    | Retrieve group specific policy control data for a 5G VN group.   |
| Groupe office of the order       | data/{intGroupId}                                | PATCH  | Modify group specific policy control data for a 5G VN group.   |

## 5.2.3 Resource: AccessAndMobilityPolicyData

## 5.2.3.1 Description

The resource represents all UE related mobility and access policies attributes in the UDR for a given "ueId".

#### 5.2.3.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/ues/{ueId}/am-data

This resource shall support the resource URI variables defined in table 5.2.3.2-1.

Table 5.2.3.2-1: Resource URI variables for this resource

| Name    | Data type | Definition   |
|---------|-----------|--|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1  |
| ueld    | VarUeld   | Represents the Subscription Identifier SUPI or GPSI. Data type VarUeld is defined in 3GPP TS 29.571 [7]. |

#### 5.2.3.3 Resource Standard Methods

#### 5.2.3.3.1 GET

This method shall support the URI query parameters specified in table 5.2.3.3.1-1.

Table 5.2.3.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type         | Р | Cardinality | Description  |
|-----------|-------------------|---|-------------|--|
| supp-feat | SupportedFeatures | 0 | 01          | The features supported by the NF service consumer. |

This method shall support the request data structures specified in table 5.2.3.3.1-2 and the response data structures and response codes specified in table 5.2.3.3.1-3.

Table 5.2.3.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.3.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type                       | Р  | Cardinality | Response codes | Description  |  |  |  |  |
|---------------------------------|--|-------------|----------------|--|--|--|--|--|
| AmPolicyData                    | М  | 1           |                | Upon success, a response body containing access and mobility policies shall be returned. |  |  |  |  |
| NOTE: The mandatory also apply. | The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] |             |                |  |  |  |  |  |

#### 5.2.3.3.2 PATCH

This method shall support the URI query parameters specified in table 5.2.3.3.2-1.

Table 5.2.3.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Ք | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.3.3.2-2 and the response data structures and response codes specified in table 5.2.3.3.2-3.

Table 5.2.3.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type         | Р | Cardinality | Description   |
|-------------------|---|-------------|---|
| AmPolicyDataPatch | М |             | When the "AccessAndMobilityPolicyDataModify" feature is supported, it requests the modification of the access and mobility policy data resource for a given subscriber. |

Table 5.2.3.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data type     | Р   | Cardinality    | Response            | Description   |  |  |  |  |
|---------------|---|----------------|---------------------|---|--|--|--|--|
|               |   |                | codes               |   |  |  |  |  |
| n/a           |   |                | 204 No Content      | Successful case.  |  |  |  |  |
|               |   |                |                     | The resource has been successfully updated and no           |  |  |  |  |
|               |   |                |                     | additional content is to be sent in the response message.   |  |  |  |  |
| AmPolicyData  | М   | 1              | 200 OK              | When the "AccessAndMobilityPolicyDataModify" feature is     |  |  |  |  |
|               |   |                |                     | supported, upon success, the execution report is returned.  |  |  |  |  |
|               |   |                |                     | (NOTE 1) (NOTE 2)   |  |  |  |  |
| NOTE 1: The r | 1: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of                  |                |                     |   |  |  |  |  |
| 3GPF          | 3GPP TS 29.500 [4] also apply.  |                |                     |   |  |  |  |  |
|               | If all the modification instructions in the PATCH request have been implemented, the UDR shall respond with |                |                     |   |  |  |  |  |
| 204 N         | 204 No Content response; If some of the modification instructions in the PATCH request have been            |                |                     |   |  |  |  |  |
| disca         | rded,   | and the NF ser | vice consumer suppo | orted the "PatchReport" feature, the UDR shall respond with |  |  |  |  |
| AmP           | olicyE  | Data.          |                     |   |  |  |  |  |

## 5.2.4 Resource: UEPolicySet

#### 5.2.4.1 Description

The resource represents UE policy set for a given "ueId" stored in the UDR of the H-PLMN.

#### 5.2.4.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/ues/{ueId}/ue-policy-set

This resource shall support the resource URI variables defined in table 5.2.4.2-1.

Table 5.2.4.2-1: Resource URI variables for this resource

| Name    | Data type | Definition   |
|---------|-----------|--|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1  |
| ueld    |           | Represents the Subscription Identifier SUPI or GPSI. Data type VarUeld is defined in 3GPP TS 29.571 [7]. |

#### 5.2.4.3 Resource Standard Methods

#### 5.2.4.3.1 PUT

This method shall support the URI query parameters specified in table 5.2.4.3.1-1.

Table 5.2.4.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.4.3.1-2 and the response data structures and response codes specified in table 5.2.4.3.1-3.

Table 5.2.4.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type   | Р | Cardinality | Description   |
|-------------|---|-------------|---|
| UePolicySet | М | 1           | Create or modify the UE policy set resource for a given subscriber. |

Table 5.2.4.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type  | Р | Cardinality    | Response codes   | Description  |  |
|--|---|----------------|--|--|--|
| UePolicySet M  |   | 1              | 201 Created  | Successful case. The resource has been successfully created and a response body containing a representation of the created UEPolicySet resource shall be returned. |  |
| UePolicySet  | M | 1              | 200 OK   | Successful case. The resource has been successfully updated and a response body containing UE policies shall be returned.  |  |
| n/a 204 No Con   |   | 204 No Content | Successful case. The resource has been successfully updated and no additional content is to be sent in the response message. |  |  |
| NOTE: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |                |  |  |  |

Table 5.2.4.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | М |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/policy-data/ues/{ueld}/ue-policy-set</apiversion> |

#### 5.2.4.3.2 PATCH

This method shall support the URI query parameters specified in table 5.2.4.3.2-1.

Table 5.2.4.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.4.3.2-2 and the response data structures and response codes specified in table 5.2.4.3.2-3.

Table 5.2.4.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type        | Р | Cardinality | Description   |
|------------------|---|-------------|---|
| UePolicySetPatch | М | 1           | Modify the UE policy set resource for a given subscriber. |

Table 5.2.4.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data type  | P | Cardinality | Response codes | Description  |  |  |
|--|---|-------------|----------------|--|--|--|
| n/a  |   |             | 204 No Content | Successful case. The resource has been successfully updated and no additional content is to be sent in the response message. |  |  |
| NOTE: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |

#### 5.2.4.3.3 GET

This method shall support the URI query parameters specified in table 5.2.4.3.3-1.

Table 5.2.4.3.3-1: URI query parameters supported by the GET method on this resource

| Name      | Data type         | Р | Cardinality | Description  |
|-----------|-------------------|---|-------------|--|
| supp-feat | SupportedFeatures | 0 | 01          | The features supported by the NF service consumer. |

This method shall support the request data structures specified in table 5.2.4.3.3-2 and the response data structures and response codes specified in table 5.2.4.3.3-3.

Table 5.2.4.3.3-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.4.3.3-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response | Description   |  |  |
|--|---|-------------|----------|---|--|--|
|  |   |             | codes    |   |  |  |
| UePolicySet  | М | 1           |          | Upon success, a response body containing the UE policies shall be returned. |  |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |          |   |  |  |

## 5.2.5 Resource: SessionManagementPolicyData

#### 5.2.5.1 Description

The resource represents all PDU session related subscription attributes in the UDR for a given ueId.

#### 5.2.5.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/ues/{ueId}/sm-data

This resource shall support the resource URI variables defined in table 5.2.5.2-1.

Table 5.2.5.2-1: Resource URI variables for this resource

| Name    | Data type | Definition   |
|---------|-----------|--|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1.   |
| ueld    |           | Represents the Subscription Identifier SUPI or GPSI. Data type VarUeld is defined in 3GPP TS 29.571 [7]. |

#### 5.2.5.3 Resource Standard Methods

#### 5.2.5.3.1 GET

This method shall support the URI query parameters specified in table 5.2.5.3.1-1.

Table 5.2.5.3.1-1: URI query parameters supported by the GET method on this resource

| Name                    | Data type              | Р | Cardinality | Description   |                      |
|-------------------------|------------------------|---|-------------|---|----------------------|
| snssai                  | Snssai                 | 0 | 01          | Identifies a Single Network Slice Selection Assistance Information.   |                      |
|                         |                        |   |             | (NOTE)  |                      |
| multi-pdu-<br>sess-info | array(PduSessi onInfo) | 0 | 2N          | Identifies a list of S-NSSAI and DNN combination(s).  | MultiPduSe<br>ssInfo |
|                         |                        |   |             | (NOTE)  |                      |
| dnn                     | Dnn                    | 0 | 01          | Identifies a Data Network Name.   |                      |
|                         |                        |   |             | (NOTE)  |                      |
| fields                  | array(string)          | С | 1N          | When the NF consumer only retrieves a subset of the resource, the "fields" query parameter shall be included. The "fields" query parameter contains the pointers of the attribute(s) to be retrieved. |                      |
| supp-feat               | SupportedFeat          | 0 | 01          | Identifies the features supported by the NF service   |                      |
|                         | ures                   |   |             | consumer.   |                      |
|                         |                        |   |             | ported and the "multi-pdu-sess-info" query parameter is<br>ry parameters shall not be present.  | present,             |

When an optional query parameter is not included, the UDR shall return session management policy data per DNN matching the value of the included query parameter(s) for all the possible values of the omitted query parameter. E.g. if "snssai" is not included, and "dnn" is included, UDR shall return the session management policy data per DNN for the DNN identified by "dnn" for all network slices where such DNN is available.

This method shall support the request data structures specified in table 5.2.5.3.1-2 and the response data structures and response codes specified in table 5.2.5.3.1-3.

Table 5.2.5.3.1-2: Data structures supported by the GET Request Body on this resource

|    | Data type | Р | Cardinality | Description |
|----|-----------|---|-------------|-------------|
| n/ | /a        |   |             |             |

Table 5.2.5.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type                       | Р  | Cardinality | Response codes | Description   |  |  |  |
|---------------------------------|--|-------------|----------------|---|--|--|--|
| SmPolicyData                    | М  | 1           |                | Upon success, a response body containing<br>SmPolicyData shall be returned. |  |  |  |
| NOTE: The mandatory also apply. | The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] |             |                |   |  |  |  |

#### 5.2.5.3.2 PATCH

This method shall support the URI query parameters specified in table 5.2.5.3.2-1.

Table 5.2.5.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
|      |           |   |             |             |

This method shall support the request data structures specified in table 5.2.5.3.2-2 and the response data structures and response codes specified in table 5.2.5.3.2-3.

Table 5.2.5.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type         | Р | Cardinality | Description  |
|-------------------|---|-------------|--|
| SmPolicyDataPatch | М |             | When the "SessionManagementPolicyDataPatch" feature is supported, it requests the modification of the session management policy data for a subscriber. |

Table 5.2.5.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data t   | ype   | Р  | Cardinality | Response codes  | Description   |  |  |  |  |  |
|----------|---|--|-------------|---|---|--|--|--|--|--|
| n/a      |   |  |             | 204 No Content  | Successful case. The resource has been successfully updated and no additional content is to be sent in the response message. (NOTE 2)(NOTE 3) |  |  |  |  |  |
| SmPolicy | Data  | М  | 1           | 200 OK Upon success, the execution report is returned. (NOTE 2)(NOTE 3) |   |  |  |  |  |  |
| NOTE 1:  | The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.  |  |             |   |   |  |  |  |  |  |
| NOTE 2:  | If all the modification instructions in the PATCH request have been implemented, the UDR shall respond with 204 No Content response; if some of the modification instructions in the PATCH request have been discarded, and the NF service consumer supported the "PatchReport" feature, the UDR shall respond with SmPolicyData. |  |             |   |   |  |  |  |  |  |
| NOTE 3:  |   | When the resource is successfully updated, if the SmPolicyDataPatch in the request requires the creation, removal, or update of an entry of the "umData" attribute, the UDR shall create, remove or update the |             |   |   |  |  |  |  |  |

## 5.2.6 Resource: UsageMonitoringInformation

#### 5.2.6.1 Description

The resource represents an individual usage monitoring resource created in the UDR and associated with a ueId and a usageMonId.

corresponding UsageMonitoringInformation resource for the indicated limit identifier.

#### 5.2.6.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/ues/{ueId}/sm-data/{usageMonId}

This resource shall support the resource URI variables defined in table 5.2.6.2-1.

Table 5.2.6.2-1: Resource URI variables for this resource

| Name       | Data type | Definition  |
|------------|-----------|---|
| apiRoot    | string    | See 3GPP TS 29.504 [6] clause 6.1.1.  |
| ueld       | VarUeld   | Represents the Subscription Identifier SUPI or GPSI. Data type VarUeld is defined in 3GPP TS 29.571 [7].  |
| usageMonId | string    | Unique identifier of the individual SM Policy usage monitoring resource. It contains the identity of the corresponding limit as defined in the "limitld" attribute of the UsageMonDataLimit data type (see clause 5.4.2.6). |

#### 5.2.6.3 Resource Standard Methods

#### 5.2.6.3.1 PUT

This method shall support the URI query parameters specified in table 5.2.6.3.1-1.

Table 5.2.6.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.6.3.1-2 and the response data structures and response codes specified in table 5.2.6.3.1-3.

Table 5.2.6.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type    | Р | Cardinality | Description                           |
|--------------|---|-------------|---------------------------------------|
| UsageMonData | М | 1           | Create the usage monitoring resource. |

Table 5.2.6.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type    | P  | Cardinality | Response codes | Description   |  |  |  |  |
|--------------|--|-------------|----------------|---|--|--|--|--|
| UsageMonData | M  | 1           |                | Successful case. The resource has been successfully created and a response body is returned containing a representation of the resource. (NOTE 2) |  |  |  |  |
|              | NOTE 1: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.   |             |                |   |  |  |  |  |
|              | NOTE 2: When the resource is successfully created, the UDR shall create a new entry within the "umData" attribute of the SessionManagementPolicyData resource for the corresponding "limitId" accordingly. |             |                |   |  |  |  |  |

Table 5.2.6.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description  |
|----------|-----------|---|-------------|--|
| Location | string    | M |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/policy-data/ues/{ueld}/sm-data/{usageMonId}</apiversion> |

#### 5.2.6.3.2 DELETE

This method shall support the URI query parameters specified in table 5.2.6.3.2-1.

Table 5.2.6.3.2-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.6.3.2-2 and the response data structures and response codes specified in table 5.2.6.3.2-3.

Table 5.2.6.3.2-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.6.3.2-3: Data structures supported by the DELETE Response Body on this resource

| Data ty | pe   | Р     | Cardinality  | Response codes          | Description  |  |  |
|---------|--|-------|--------------|-------------------------|--|--|--|
| n/a     |  |       |              | 204 No Content          | Successful case.                                     |  |  |
|         |  |       |              |                         | The resource has been successfully deleted. (NOTE 2) |  |  |
| NOTE 1: | The mandatory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of             |       |              |                         |  |  |  |
|         | 3GPP TS 29.500 [4] also apply.   |       |              |                         |  |  |  |
| NOTE 2: | When the resource is successfully deleted, the UDR shall delete within the "umData" attribute of the |       |              |                         |  |  |  |
|         | Sessi  | ionMa | anagementPol | icyData resource the co | prresponding "limitId" entry accordingly.            |  |  |

#### 5.2.6.3.3 GET

This method shall support the URI query parameters specified in table 5.2.6.3.3-1.

Table 5.2.6.3.3-1: URI query parameters supported by the GET method on this resource

| Name      | Data type         | Р | Cardinality | Description  |
|-----------|-------------------|---|-------------|--|
| supp-feat | SupportedFeatures | 0 | 01          | The features supported by the NF service consumer. |

This method shall support the request data structures specified in table 5.2.6.3.3-2 and the response data structures and response codes specified in table 5.2.6.3.3-3.

Table 5.2.6.3.3-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.6.3.3-3: Data structures supported by the GET Response Body on this resource

| Data type  | P | Cardinality | Response codes | Description   |  |  |  |
|--|---|-------------|----------------|---|--|--|--|
| UsageMonData   | М | 1           | 200 OK         | Successful case.  |  |  |  |
|  |   |             |                | The usage monitoring data is returned.                            |  |  |  |
| n/a  |   |             | 204 No Content | The resource was found but no usage monitoring data is available. |  |  |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |  |

## 5.2.7 Resource: SponsorConnectivityData

#### 5.2.7.1 Description

The resource represents sponsored data connectivity related information stored in the UDR for a given sponsorId.

#### 5.2.7.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/sponsor-connectivity-data/{sponsorId}

This resource shall support the resource URI variables defined in table 5.2.7.2-1.

Table 5.2.7.2-1: Resource URI variables for this resource

| Name      | Data type | Definition                           |
|-----------|-----------|--------------------------------------|
| apiRoot   | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |
| sponsorld | string    | Represents the sponsor identity.     |

#### 5.2.7.3 Resource Standard Methods

#### 5.2.7.3.1 GET

This method shall support the URI query parameters specified in table 5.2.7.3.1-1.

Table 5.2.7.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type         | Р | Cardinality | Description  |
|-----------|-------------------|---|-------------|--|
| supp-feat | SupportedFeatures | 0 | 01          | The features supported by the NF service consumer. |

This method shall support the request data structures specified in table 5.2.7.3.1-2 and the response data structures and response codes specified in table 5.2.7.3.1-3.

Table 5.2.7.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.7.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type                         | Р    | Cardinality     | Response codes     | Description   |
|-----------------------------------|------|-----------------|--------------------|---|
| SponsorConnectivityData           | М    | 1               | 200 OK             | Upon success, a response body containing Sponsor Connectivity Data shall be returned. |
| n/a                               |      |                 | 204 No Content     | The resource was found but no Sponsor Connectivity Data is available.                 |
| NOTE: The mandatory H also apply. | TTP( | error status co | des for the GET me | thod listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4]                                  |

#### 5.2.8 Resource: BdtData

#### 5.2.8.1 Description

The resource represents background data transfer data stored in the UDR.

#### 5.2.8.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/bdt-data

This resource shall support the resource URI variables defined in table 5.2.8.2-1.

Table 5.2.8.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

#### 5.2.8.3 Resource Standard Methods

#### 5.2.8.3.1 GET

This method shall support the URI query parameters specified in table 5.2.8.3.1-1.

Table 5.2.8.3.1-1: URI query parameters supported by the GET method on this resource

| Name        | Data type             | Р | Cardinality | Description  |
|-------------|-----------------------|---|-------------|--|
| bdt-ref-ids | array(BdtReferenceId) | 0 |             | If included, this IE shall contain a list of the BDT reference identifiers.  Each member of the array is an individual BDT reference identifier. |
| supp-feat   | SupportedFeatures     | 0 | 01          | The features supported by the NF service consumer.   |

This method shall support the request data structures specified in table 5.2.8.3.1-2 and the response data structures and response codes specified in table 5.2.8.3.1-3.

Table 5.2.8.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.8.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |  |  |
|--|---|-------------|----------------|---|--|--|--|
| array(BdtData)   | М | 0N          |                | Upon success, a response body containing the BDT data shall be returned.  Each member of the array is an individual BDT data. |  |  |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |  |

#### 5.2.9 Resource: IndividualBdtData

#### 5.2.9.1 Description

The resource represents individual background data transfer data stored in the UDR for a given "bdtReferenceId".

#### 5.2.9.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/bdt-data/{bdtReferenceId}

This resource shall support the resource URI variables defined in table 5.2.9.2-1.

Table 5.2.9.2-1: Resource URI variables for this resource

| Name           | Data type | Definition  |
|----------------|-----------|---|
| apiRoot        | string    | See 3GPP TS 29.504 [6] clause 6.1.1.  |
| bdtReferenceId |           | Represents the transfer policy of background data transfer for provided ASP. Data type BdtReferenceld is defined in 3GPP TS 29.122 [9]. |

#### 5.2.9.3 Resource Standard Methods

#### 5.2.9.3.1 GET

This method shall support the URI query parameters specified in table 5.2.9.3.1-1.

Table 5.2.9.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type         | Р | Cardinality | Description  |
|-----------|-------------------|---|-------------|--|
| supp-feat | SupportedFeatures | 0 | 01          | The features supported by the NF service consumer. |

This method shall support the request data structures specified in table 5.2.9.3.1-2 and the response data structures and response codes specified in table 5.2.9.3.1-3.

Table 5.2.9.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.9.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description  |  |
|--|---|-------------|----------------|--|--|
| BdtData  | М | 1           |                | Upon success, a response body containing the BDT data shall be returned. |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |

#### 5.2.9.3.2 PUT

This method shall support the URI query parameters specified in table 5.2.9.3.2-1.

Table 5.2.9.3.2-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.9.3.2-2 and the response data structures and response codes specified in table 5.2.9.3.2-3.

Table 5.2.9.3.2-2: Data structures supported by the PUT Request Body on this resource

| Data type | Р | Cardinality | Description                                     |
|-----------|---|-------------|---|
| BdtData   | М | 1           | Create the BDT data for a given bdtReferenceld. |

Table 5.2.9.3.2-3: Data structures supported by the PUT Response Body on this resource

| Data type  | Р  | Cardinality | Response codes     | Description                                 |  |  |
|--|--|-------------|--------------------|---|--|--|
| BdtData  | М  | 1           | 201 Created        | Successful case.                            |  |  |
|  |  |             |                    | The resource has been successfully created. |  |  |
| ProblemDetails   | 0  | 01          | 403 Forbidden      | The resource is not allowed to be updated.  |  |  |
|  |  |             |                    | (NOTE 2)                                    |  |  |
| NOTE 1: The man  | NOTE 1: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] |             |                    |   |  |  |
| also apply.  |  |             |                    |   |  |  |
| NOTE 2: The "cause" attribute within the "ProblemDetails" data structure may be set to |  |             |                    |   |  |  |
| "MODIFIC   | CATIO  | ON_NOT_ALLC | WED" as defined in | table 5.2.7.2-1 of 3GPP TS 29.500 [4].      |  |  |

Table 5.2.9.3.2-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description  |
|----------|-----------|---|-------------|--|
| Location | string    | М | 1           | Contains the URI of the newly created resource, according to                 |
|          |           |   |             | the structure: {apiRoot}/nudr-dr/ <apiversion>/policy-data/bdt-</apiversion> |
|          |           |   |             | data/{bdtReferenceId}  |

#### 5.2.9.3.3 DELETE

This method shall support the URI query parameters specified in table 5.2.9.3.3-1.

Table 5.2.9.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.9.3.3-2 and the response data structures and response codes specified in table 5.2.9.3.3-3.

Table 5.2.9.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р                | Cardinality | Description |
|-----------|------------------|-------------|-------------|
| n/a       | , and the second |             |             |

Table 5.2.9.3.3-3: Data structures supported by the DELETE Response Body on this resource

| Data type | Р | Cardinality   | Response codes | Description                                 |  |  |  |  |
|-----------|---|---|----------------|---|--|--|--|--|
| n/a       |   |   | 204 No Content | Successful case.                            |  |  |  |  |
|           |   |   |                | The resource has been successfully deleted. |  |  |  |  |
|           |   | andatory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of TS 29.500 [4] also apply. |                |   |  |  |  |  |

#### 5.2.9.3.4 PATCH

This method shall support the URI query parameters specified in table 5.2.9.3.4-1.

Table 5.2.9.3.4-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.9.3.4-2 and the response data structures and response codes specified in table 5.2.9.3.4-3.

Table 5.2.9.3.4-2: Data structures supported by the PATCH Request Body on this resource

| Data type    | Р | Cardinality | Description                                     |
|--------------|---|-------------|---|
| BdtDataPatch | М | 1           | Modify the BDT data for a given bdtReferenceld. |

Table 5.2.9.3.4-3: Data structures supported by the PATCH Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description  |  |
|--|---|-------------|----------------|--|--|
| BdtData  | М | 1           | 200 OK         | The resource has been successfully updated and a response body containing BDT data shall be returned.                        |  |
| n/a  |   |             |                | Successful case. The resource has been successfully updated and no additional content is to be sent in the response message. |  |
| NOTE: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |

## 5.2.10 Resource: PolicyDataSubscriptions

#### 5.2.10.1 Description

This resource is used to represent subscriptions to notification of policy data modification.

#### 5.2.10.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/subs-to-notify

This resource shall support the resource URI variables defined in table 5.2.10.2-1.

Table 5.2.10.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

#### 5.2.10.3 Resource Standard Methods

#### 5.2.10.3.1 POST

This method shall support the URI query parameters specified in table 5.2.10.3.1-1.

Table 5.2.10.3.1-1: URI query parameters supported by the POST method on this resource

| I | Name | Data type | Р | Cardinality | Description |
|---|------|-----------|---|-------------|-------------|
| Ī | n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.10.3.1-2 and the response data structures and response codes specified in table 5.2.10.3.1-3.

Table 5.2.10.3.1-2: Data structures supported by the POST Request Body on this resource

| Data type              | Р | Cardinality | Description  |
|------------------------|---|-------------|--|
| PolicyDataSubscription | М | 1           | Identifies the subscription to notification of policy data modification. |

Table 5.2.10.3.1-3: Data structures supported by the POST Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description   |  |  |  |
|---|---|-------------|----------------|---|--|--|--|
| PolicyDataSubscr<br>iption  | M | 1           |                | Upon success, a response body containing a representation of each Individual subscription resource shall be returned.  The HTTP response shall include a "Location" HTTP header that contains the resource URI of the created resource. |  |  |  |
| NOTE: The mandatory HTTP error status codes for the POST method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |  |

Table 5.2.10.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description  |
|----------|-----------|---|-------------|--|
| Location | string    | М |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/policy-</apiversion> |
|          |           |   |             | data/subs-to-notify/{subsId}   |

#### 5.2.10.3.2 GET

This method shall support the URI query parameters specified in table 5.2.10.3.2-1.

Table 5.2.10.3.2-1: URI query parameters supported by the GET method on this resource

| Name         | Data type                 | Р     | Cardinality    | Description  |
|--------------|---------------------------|-------|----------------|--|
|              | array(string)             | С     | 1N             | Indicate the resources for which it is requested to return the existing subscriptions to notifications on data changes. It contains the <apispecificresourceuripart> of a monitored resource.  When present, the UDR shall return the IndividualPolicyDataSubscription resource(s) for which one or more of the indicated resources in the "monresources" query parameter matches with the <apispecificresourceuripart> of one or more entries of the "monitoredResourceUris" property of the resource (i.e. within the resource representation in the PolicyDataSubscription data structure).</apispecificresourceuripart></apispecificresourceuripart> |
| ue-id        | VarUeld                   | С     | 01             | Represents the Subscription Identifier SUPI or GPSI. Data type VarUeld is defined in 3GPP TS 29.571 [7]. When present, the UDR shall return the IndividualPolicyDataSubscription resource(s) for the indicated UE.   |
| supp-feat    | SupportedFeatures         | 0     | 01             | The features supported by the NF service consumer, as per clause 6.6 of 3GPP TS 29.500 [4].  |
| NOTE: Either | the "mon-resources" or "u | ıe-id | d" query parar | neters shall be present in the request.  |

This method shall support the request data structures specified in table 5.2.10.3.2-2 and the response data structures and response codes specified in table 5.2.10.3.2-3.

Table 5.2.10.3.2-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.10.3.2-3: Data structures supported by the GET Response Body on this resource

| Data type                       | Р    | Cardinality    | Response codes           | Description  |
|---------------------------------|------|----------------|--------------------------|--|
| array(PolicyDataSubscription)   | M    | 0N             |                          | Upon success, a response body containing the the requested Individual Policy Data Subscription(s) shall be returned. |
| NOTE: The mandatory also apply. | HTTF | error status o | codes for the GET method | listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4]  |

## 5.2.11 Resource: IndividualPolicyDataSubscription

### 5.2.11.1 Description

This resource is used to represent an individual subscription to notification of policy data modification.

#### 5.2.11.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/subs-to-notify/{subsId}

This resource shall support the resource URI variables defined in table 5.2.11.2-1.

Table 5.2.11.2-1: Resource URI variables for this resource

| Name    | Data type | Definition  |
|---------|-----------|---|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1.  |
| subsld  |           | The subsld identifies an individual policy data subscription to notifications. The value is allocated by the UDR during creation of the PolicyDataSubscriptions resource. |

#### 5.2.11.3 Resource Standard Methods

#### 5.2.11.3.1 PUT

This method shall support the URI query parameters specified in table 5.2.11.3.1-1.

Table 5.2.11.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.11.3.1-2 and the response data structures and response codes specified in table 5.2.11.3.1-3.

Table 5.2.11.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type              | Р | Cardinality | Description   |
|------------------------|---|-------------|---|
| PolicyDataSubscription | М | 1           | Updates the subscription to notification of policy data modification. |

Table 5.2.11.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type                       | Р    | Cardinality    | Response codes   | Description  |
|---------------------------------|------|----------------|------------------|--|
| PolicyDataSubscription          | М    | 1              | 200 OK           | The individual subscription resource was updated successfully.   |
| n/a                             |      |                |                  | The individual subscription resource was updated successfully and no additional content is to be sent in the response message. |
| NOTE: The mandatory also apply. | HTTF | error status o | odes for the PUT | method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4]   |

#### 5.2.11.3.2 DELETE

This method shall support the URI query parameters specified in table 5.2.11.3.2-1.

Table 5.2.11.3.2-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.11.3.2-2 and the response data structures and response codes specified in table 5.2.11.3.2-3.

Table 5.2.11.3.2-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description                      |
|-----------|---|-------------|----------------------------------|
| n/a       |   |             | The request body shall be empty. |

Table 5.2.11.3.2-3: Data structures supported by the DELETE Response Body on this resource

| Data  | type              | Р                              | Cardinality   | Response codes | Description   |  |  |  |  |
|-------|-------------------|--------------------------------|---|----------------|---|--|--|--|--|
| n/a   |                   |                                |   | 204 No Content | Upon success, an empty response body shall be returned. |  |  |  |  |
| NOTE: | The ma            | ındat                          | ry HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of |                |   |  |  |  |  |
|       | 3GPP <sup>-</sup> | 3GPP TS 29.500 [4] also apply. |   |                |   |  |  |  |  |

#### 5.2.11.3.3 GET

This method shall support the URI query parameters specified in table 5.2.11.3.3-1.

Table 5.2.11.3.3-1: URI query parameters supported by the GET method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.11.3.3-2 and the response data structures and response codes specified in table 5.2.11.3.3-3.

Table 5.2.11.3.3-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.11.3.3-3: Data structures supported by the GET Response Body on this resource

| Data type                       | Р    | Cardinality    | Response codes           | Description  |
|---------------------------------|------|----------------|--------------------------|--|
| PolicyDataSubscription          | M    | 1              |                          | Upon success, a response body containing the resource representation of the requested Individual Policy Data Subscription. |
| NOTE: The mandatory also apply. | HTTF | error status o | codes for the GET method | listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4]  |

## 5.2.12 Resource: OperatorSpecificData

#### 5.2.12.1 Description

This resource represents the UE's operator specific data.

NOTE: This resource can be used for operator specific data that is related to any policy data (e.g., AM policy data).

This resource is modelled with the Document resource archetype (see clause C.1 of 3GPP TS 29.501 [5]).

#### 5.2.12.2 Resource Definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/ues/{ueId}/operator-specific-data

This resource shall support the resource URI variables defined in table 5.2.12.2-1.

Table 5.2.12.2-1: Resource URI variables for this resource

| Name    | Data type | Definition   |
|---------|-----------|--|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1.   |
| ueld    | VarUeld   | Represents the Subscription Identifier SUPI or GPSI. Data type VarUeld is defined in 3GPP TS 29.571 [7]. |

#### 5.2.12.3 Resource Standard Methods

#### 5.2.12.3.1 GET

This method is used to retrieve operator specific data from the UDR.

This method shall support the URI query parameters specified in table 5.2.12.3.1-1.

Table 5.2.12.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type          | Р | Cardinality | Description   |
|-----------|--------------------|---|-------------|---|
| fields    | array(string)      | С |             | When the NF consumer only retrieves a subset of the resource, the "fields" query parameter shall be included. The "fields" query parameter contains the pointers of the attribute(s) to be retrieved. |
| supp-feat | SupportedFea tures | 0 | 01          | Identifies the features supported by the NF service consumer.   |

This method shall support the request data structures specified in table 5.2.12.3.1-2 and the response data structures and response codes specified in table 5.2.12.3.1-3.

Table 5.2.12.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.12.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description  |  |
|--|---|-------------|----------------|--|--|
| map(OperatorSpecif icDataContainer)  | M | 0N          |                | Upon success, a response body containing a map shall be returned. The key of the map is an operator specific data element name and the value is the operator specific data of such data element, for the current UE (identified by the {ueld} variable in the resource path).  If the resource does not contain any keys, the response consists of an empty JSON object (empty map). |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |

#### 5.2.12.3.2 PATCH

This method is used to modify operator specific data in the UDR.

This method shall support the URI query parameters specified in table 5.2.12.3.2-1.

Table 5.2.12.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.12.3.2-2 and the response data structures and response codes specified in table 5.2.12.3.2-3.

Table 5.2.12.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type        | Р | Cardinality | Description   |
|------------------|---|-------------|---|
| array(PatchItem) | М | 1N          | Contains the delta data to the operator specific data |

Table 5.2.12.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data type      | Р  | Cardinality | Response codes | Description  |  |  |  |
|----------------|--|-------------|----------------|--|--|--|--|
| n/a            |  |             | 204 No Content | Upon successful modification there is no body in the response message.(NOTE 2) |  |  |  |
| PatchResult    | М  | 1           | 200 OK         | Upon success, the execution report is returned. (NOTE 2)                       |  |  |  |
| ProblemDetails | 0  | 01          | 403 Forbidden  | The resource is not allowed to be updated. (NOTE 3)                            |  |  |  |
|                | OTE 1: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.  |             |                |  |  |  |  |
| 204 N          | TE 2: If all the modification instructions in the PATCH request have been implemented, the UDR shall respond with 204 No Content response; if some of the modification instructions in the PATCH request have been discarded, and the NF service consumer supported the "PatchReport" feature, the UDR shall respond with PatchResult. |             |                |  |  |  |  |
| NOTE 3: The "  | The "cause" attribute within the "ProblemDetails" data structure may be set to  "MODIFICATION NOT ALLOWED" as defined in table 5.2.7.2-1 of 3GPP TS 29.500 [4].  |             |                |  |  |  |  |

#### 5.2.12.3.3 **PUT**

This method is used to create or modify operator specific data in the UDR.

This method shall support the URI query parameters specified in table 5.2.12.3.3-1.

Table 5.2.12.3.3-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.12.3.3-2 and the response data structures and response codes specified in table 5.2.12.3.3-3.

Table 5.2.12.3.3-2: Data structures supported by the PUT Request Body on this resource

| Data type                           | Р | Cardinality | Description   |
|-------------------------------------|---|-------------|---|
| map(OperatorSpecificData Container) | М |             | A map containing the new representation of the operator specific data.  The key of the map is operator specific data element name and the |
| ,                                   |   |             | value is the operator specific data of the UE.  |

Table 5.2.12.3.3-3: Data structures supported by the PUT Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |  |  |
|--|---|-------------|----------------|---|--|--|--|
| map(OperatorSp<br>ecificDataContai<br>ner)   | М | 1           | 200 OK         | Upon successful modification a response body containing a map shall be returned. The key of the map is operator specific data element name and the value is the operator specific data of the UE.   |  |  |  |
| map(OperatorSp<br>ecificDataContai<br>ner)   | M | 1           | 201 Created    | If the "OSDResource_Create_Delete" feature is supported and the resource has been successfully created, a response body is returned. The key of the map is operator specific data element name and the value is the operator specific data of the UE. |  |  |  |
| n/a  |   |             | 204 No Content | The resource has been successfully updated.   |  |  |  |
| ProblemDetails   | 0 | 01          | 403 Forbidden  | The resource is not allowed to be updated. (NOTE 2)   |  |  |  |
| NOTE 1: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.  NOTE 2: The "cause" attribute within the "ProblemDetails" data structure may be set to  "MODIFICATION NOT ALLOWED" as defined in table 5.2.7.2.1 of 3GPP TS 29.500 [4] |   |             |                |   |  |  |  |

<sup>&</sup>quot;MODIFICATION\_NOT\_ALLOWED" as defined in table 5.2.7.2-1 of 3GPP TS 29.500 [4].

### Table 5.2.12.3.3-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | М |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/policy-data/ues/{ueld}/operator-specific-data.</apiversion> |

#### 5.2.12.3.4 DELETE

This method shall support the URI query parameters specified in table 5.2.12.3.4-1.

#### Table 5.2.12.3.4-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.12.3.4-2 and the response data structures and response codes specified in table 5.2.12.3.4-3.

### Table 5.2.12.3.4-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

#### Table 5.2.12.3.4-3: Data structures supported by the DELETE Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description  |  |  |
|---|---|-------------|----------------|--|--|--|
| n/a   |   |             | 204 No Content | Successful case, applicable when the  "OSDResource_Create_Delete" feature is supported.  The resource has been successfully deleted. |  |  |
| NOTE: The mandatory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |

## 5.2.13 Resource: PlmnUePolicySet

### 5.2.13.1 Description

The resource represents the UE policy set for a given "plmnId" representing an H-PLMN stored in the UDR of a V-PLMN.

#### 5.2.13.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/plmns/{plmnId}/ue-policy-set

This resource shall support the resource URI variables defined in table 5.2.13.2-1.

Table 5.2.13.2-1: Resource URI variables for this resource

| Name    | Data type | Definition   |
|---------|-----------|--|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1.                           |
| plmnld  | string    | Concatenating a Mcc and Mnc as defined in 3GPP TS 29.505 [15]. |

### 5.2.13.3 Resource Standard Methods

#### 5.2.13.3.1 GET

This method shall support the URI query parameters specified in table 5.2.13.3.1-1.

Table 5.2.13.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type         | Р | Cardinality | Description  |
|-----------|-------------------|---|-------------|--|
| supp-feat | SupportedFeatures | 0 | 01          | The features supported by the NF service consumer. |

This method shall support the request data structures specified in table 5.2.13.3.1-2 and the response data structures and response codes specified in table 5.2.13.3.1-3.

Table 5.2.13.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.13.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |
|--|---|-------------|----------------|---|--|
| UePolicySet  | М | 1           |                | Upon success, a response body containing the UE policies shall be returned. |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |

## 5.2.14 Resource: PolicyDataForIndividualUe

### 5.2.14.1 Description

The resource represents all UE related policy data sets in the UDR for a given "ueId".

#### 5.2.14.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/ues/{ueId}

This resource shall support the resource URI variables defined in table 5.2.14.2-1.

Table 5.2.14.2-1: Resource URI variables for this resource

| Name    | Data type | Definition   |
|---------|-----------|--|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1  |
| ueld    |           | Represents the Subscription Identifier SUPI or GPSI. Data type VarUeld is defined in 3GPP TS 29.571 [7]. |

#### 5.2.14.3 Resource Standard Methods

#### 5.2.14.3.1 GET

This method shall support the URI query parameters specified in table 5.2.14.3.1-1.

Table 5.2.14.3.1-1: URI query parameters supported by the GET method on this resource

| Name   | Data type                   | Р | Cardinality | Description  |  |
|--|-----------------------------|---|-------------|--|--|
| supp-feat  | SupportedFeatures           | 0 | 01          | The features supported by the NF service consumer, as per clause 6.6 of 3GPP TS 29.500 [4].  |  |
| data-subset-<br>names  | array(PolicyDataSubs<br>et) | 0 | 2N          | The policy data subsets (e.g. AM policies, SM policies, etc.) requested by the NF service consumer. If this query parameter is not provided by the NF service consumer, this means that all the available policy data subsets shall be returned. |  |
| NOTE: When two or more policy data subsets sets shall be retrieved, it is recommended to use a single GET request with query parameters. |                             |   |             |  |  |

This method shall support the request data structures specified in table 5.2.14.3.1-2 and the response data structures and response codes specified in table 5.2.14.3.1-3.

Table 5.2.14.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.14.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type                       | Р    | Cardinality    | Response codes           | Description   |
|---------------------------------|------|----------------|--------------------------|---|
| PolicyDataForIndividual<br>UE   | M    | 1              |                          | Upon success, a response body containing the policy data subsets requested by the NF service consumer or all the policy data subsets shall be returned. |
| NOTE: The mandatory also apply. | HTTF | error status o | codes for the GET method | listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4]   |

## 5.2.15 Resource: SlicePolicyControlData

### 5.2.15.1 Description

The resource represents the network slice specific policy control subscription data stored in the UDR for a given S-NSSAI.

#### 5.2.15.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/slice-control-data/{snssai}

This resource shall support the resource URI variables defined in table 5.2.15.2-1.

Table 5.2.15.2-1: Resource URI variables for this resource

| Name    | Data type | Definition   |
|---------|-----------|--|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1.   |
| snssai  | Snssai    | The S-NSSAI value used in the last segment of the resource URI is encoded as a |
|         |           | string as defined in 3GPP TS 29.571 [7], clause 5.4.4.2.                       |

#### 5.2.15.3 Resource Standard Methods

#### 5.2.15.3.1 GET

This method shall support the URI query parameters specified in table 5.2.15.3.1-1.

Table 5.2.15.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type          | Р | Cardinality | Description  |
|-----------|--------------------|---|-------------|--|
| supp-feat | SupportedFeat ures | 0 | 01          | The features supported by the NF service consumer. |

This method shall support the request data structures specified in table 5.2.15.3.1-2 and the response data structures and response codes specified in table 5.2.15.3.1-3.

Table 5.2.15.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.15.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type                       | P    | Cardinality    | Response codes          | Description  |
|---------------------------------|------|----------------|-------------------------|--|
| SlicePolicyData                 | M    | 1              |                         | Upon success, a response body containing network slice specific policy control data shall be returned. |
| NOTE: The mandatory also apply. | HTTF | error status o | odes for the GET method | d listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4]  |

#### 5.2.15.3.2 PATCH

This method shall support the URI query parameters specified in table 5.2.15.3.2-1.

Table 5.2.15.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
|      |           |   |             |             |

This method shall support the request data structures specified in table 5.2.15.3.2-2 and the response data structures and response codes specified in table 5.2.15.3.2-3.

Table 5.2.15.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type            | Р | Cardinality | Description   |
|----------------------|---|-------------|---|
| SlicePolicyDataPatch | М |             | Modify a network slice specific policy control data resource for a given S-NSSAI. |

Table 5.2.15.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data type       | Р | Cardinality                           | Response codes | Description   |
|-----------------|---|---------------------------------------|----------------|---|
| SlicePolicyData | М | 1                                     | 200 OK         | The resource has been successfully updated and a response body containing network slice specific policy control data shall be returned. |
| n/a             |   |                                       | 204 No Content | The resource has been successfully updated and no additional content is to be sent in the response message.                             |
|                 |   | y HTTP error sta<br>500 [4] also appl |                | PATCH method listed in table 5.2.7.1-1 of   |

## 5.2.16 Resource: MBSSessionPolicyControlData

### 5.2.16.1 Description

The resource represents the MBS Session Policy Control Data for an MBS Session.

### 5.2.16.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/mbs-session-pol-data/{polSessionId}

This resource shall support the resource URI variables defined in table 5.2.16.2-1.

Table 5.2.16.2-1: Resource URI variables for this resource

| Name         | Data type        | Definition  |
|--------------|------------------|---|
| apiRoot      | string           | See 3GPP TS 29.504 [6] clause 6.1.1.                              |
| polSessionId | MbsSessPolDataId | Represents the identifier of the MBS Session Policy Control Data. |

#### 5.2.16.3 Resource Standard Methods

#### 5.2.16.3.1 GET

This method shall support the URI query parameters specified in table 5.2.16.3.1-1.

Table 5.2.16.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type     | Р | Cardinality | Description  |
|-----------|---------------|---|-------------|--|
| supp-feat | SupportedFeat | 0 | 01          | The features supported by the NF service consumer. |
|           | ures          |   |             | The leadures supported by the Ni Service consumer. |

Table 5.2.16.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.16.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | P | Cardinality | Response codes | Description  |  |  |
|--|---|-------------|----------------|--|--|--|
| MbsSessPolCtrlData   | М | 1           |                | Successful case. The requested MBS Session Policy Control Data is successfully returned. |  |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |

## 5.2.17 Resource: PdtqData

### 5.2.17.1 Description

The resource represents planned data transfer with QoS requirements data stored in the UDR.

### 5.2.17.2 Resource definition

#### Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/pdtq-data

This resource shall support the resource URI variables defined in table 5.2.17.2-1.

Table 5.2.17.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

### 5.2.17.3 Resource Standard Methods

### 5.2.17.3.1 GET

This method shall support the URI query parameters specified in table 5.2.8.3.1-1.

Table 5.2.17.3.1-1: URI query parameters supported by the GET method on this resource

| Name         | Data type              | Р | Cardinality | Description  |
|--------------|------------------------|---|-------------|--|
| pdtq-ref-ids | array(PdtqReferenceId) | 0 |             | If included, this IE shall contain a list of the PDTQ reference identifiers.  Each member of the array is an individual PDTQ reference identifier. |
| supp-feat    | SupportedFeatures      | 0 | 01          | The features supported by the NF service consumer.   |

This method shall support the request data structures specified in table 5.2.17.3.1-2 and the response data structures and response codes specified in table 5.2.17.3.1-3.

Table 5.2.17.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.17.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type              | Р   | Cardinality | Response codes | Description   |  |  |  |  |
|------------------------|---|-------------|----------------|---|--|--|--|--|
| array(PdtqData)        | М   | 0N          |                | Upon success, a response body containing the PDTQ data shall be returned.  Each member of the array is an individual PDTQ data. |  |  |  |  |
| NOTE: The manda apply. | NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also |             |                |   |  |  |  |  |

## 5.2.18 Resource: IndividualPdtqData

### 5.2.18.1 Description

The resource represents individual planned data transfer with QoS requirements data stored in the UDR for a given "pdtqReferenceId".

### 5.2.18.2 Resource definition

 $Resource\ URI:\ \{apiRoot\}/nudr-dr/< apiVersion >/ policy-data/pdtq-data/\{pdtqReferenceId\}\}$ 

This resource shall support the resource URI variables defined in table 5.2.18.2-1.

Table 5.2.18.2-1: Resource URI variables for this resource

| Name            | Data type | Definition  |
|-----------------|-----------|---|
| apiRoot         | string    | See 3GPP TS 29.504 [6] clause 6.1.1.  |
| pdtqReferenceId |           | Represents the PDTQ policy of planned data transfer with QoS requirements for provided ASP. Data type PdtqReferenceId is defined in |
|                 |           | 3GPP TS 29.543 [25].  |

#### 5.2.18.3 Resource Standard Methods

#### 5.2.18.3.1 GET

This method shall support the URI query parameters specified in table 5.2.18.3.1-1.

Table 5.2.18.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type         | Р | Cardinality | Description  |
|-----------|-------------------|---|-------------|--|
| supp-feat | SupportedFeatures | 0 | 01          | The features supported by the NF service consumer. |

This method shall support the request data structures specified in table 5.2.18.3.1-2 and the response data structures and response codes specified in table 5.2.9.3.1-3.

Table 5.2.18.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.18.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | P | Cardinality | Response codes | Description   |  |  |  |
|--|---|-------------|----------------|---|--|--|--|
| PdtqData   | М | 1           |                | Upon success, a response body containing the PDTQ data shall be returned. |  |  |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |  |

#### 5.2.18.3.2 PUT

This method shall support the URI query parameters specified in table 5.2.18.3.2-1.

Table 5.2.18.3.2-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.18.3.2-2 and the response data structures and response codes specified in table 5.2.18.3.2-3.

Table 5.2.18.3.2-2: Data structures supported by the PUT Request Body on this resource

| Data type | P | Cardinality | Description                                       |
|-----------|---|-------------|---|
| PdtgData  | М | 1           | Create the PDTQ data for a given pdtgReferenceId. |

Table 5.2.18.3.2-3: Data structures supported by the PUT Response Body on this resource

| Data type  | Р   | Cardinality | Response      | Description                                 |  |  |
|--|---|-------------|---------------|---|--|--|
|  |   |             | codes         |   |  |  |
| PdtqData   | M   | 1           | 201 Created   | Successful case.                            |  |  |
|  |   |             |               | The resource has been successfully created. |  |  |
| ProblemDetails   | 0   | 01          | 403 Forbidden | The resource is not allowed to be updated.  |  |  |
|  |   |             |               | (NOTE 2)                                    |  |  |
| NOTE 1: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] |   |             |               |   |  |  |
| also apply.  |   |             |               |   |  |  |
| NOTE 2: The "cause" attribute within the "ProblemDetails" data structure may be set to                           |   |             |               |   |  |  |
| "MODIFICATION  | "MODIFICATION_NOT_ALLOWED" as defined in table 5.2.7.2-1 of 3GPP TS 29.500 [4]. |             |               |   |  |  |

Table 5.2.18.3.2-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description  |
|----------|-----------|---|-------------|--|
| Location | string    | М |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/policy-</apiversion> |
|          |           |   |             | data/pdtq-data/{pdtqReferenceId}   |

#### 5.2.18.3.3 DELETE

This method shall support the URI query parameters specified in table 5.2.18.3.3-1.

Table 5.2.18.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.18.3.3-2 and the response data structures and response codes specified in table 5.2.18.3.3-3.

Table 5.2.18.3.2-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.18.3.3-3: Data structures supported by the DELETE Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description  |  |  |
|---|---|-------------|----------------|--|--|--|
| n/a   |   |             | 204 No Content | Successful case. The resource has been successfully deleted. |  |  |
| NOTE: The mandatory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |

#### 5.2.18.3.4 PATCH

This method shall support the URI query parameters specified in table 5.2.18.3.4-1.

Table 5.2.18.3.4-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.2.18.3.4-2 and the response data structures and response codes specified in table 5.2.18.3.4-3.

Table 5.2.18.3.4-2: Data structures supported by the PATCH Request Body on this resource

| Data type     | Р | Cardinality | Description                                       |
|---------------|---|-------------|---|
| PdtqDataPatch | М | 1           | Modify the PDTQ data for a given pdtqReferenceId. |

Table 5.2.18.3.4-3: Data structures supported by the PATCH Response Body on this resource

| Data type  | P | Cardinality | Response codes | Description  |  |
|--|---|-------------|----------------|--|--|
| PdtqData   | М | 1           | 200 OK         | The resource has been successfully updated and a response body containing PDTQ data shall be returned.                       |  |
| n/a  |   |             | 204 No Content | Successful case. The resource has been successfully updated and no additional content is to be sent in the response message. |  |
| NOTE: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |

## 5.2.19 Resource: GroupPolicyControlData

### 5.2.19.1 Description

The resource represents the group specific policy control data for a 5G VN group stored at the UDR.

### 5.2.19.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/policy-data/group-control-data/{intGroupId}

This resource shall support the resource URI variables defined in table 5.2.19.2-1.

Table 5.2.19.2-1: Resource URI variables for this resource

| Name       | Data type | Definition   |
|------------|-----------|--|
| apiRoot    | string    | See clause 6.1.1 of 3GPP TS 29.504 [6].                                    |
| intGroupId | GroupId   | Identifies a 5G VN group as defined in clause 5.3.2 of 3GPP TS 29.571 [7]. |

#### 5.2.19.3 Resource Standard Methods

### 5.2.19.3.1 GET

This method shall support the URI query parameters specified in table 5.2.19.3.1-1.

Table 5.2.19.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type             | Ρ | Cardinality | Description  |
|-----------|-----------------------|---|-------------|--|
| supp-feat | SupportedFeat<br>ures | 0 | 01          | Contains the features supported by the NF service consumer.  This query parameter shall be present when feature negotiation needs to take place. |

This method shall support the request data structures specified in table 5.2.19.3.1-2 and the response data structures and response codes specified in table 5.2.19.3.1-3.

Table 5.2.19.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 5.2.19.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description   |  |  |
|---|---|-------------|----------------|---|--|--|
| GroupPolicyData   | M | 1           |                | Successful case. The requested group specific policy control data for the targeted 5G VN group shall be returned. |  |  |
| NOTE: The mandatory HTTP error status codes for the HTTP GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] shall also apply. |   |             |                |   |  |  |

#### 5.2.19.3.2 PATCH

This method shall support the URI query parameters specified in table 5.2.19.3.2-1.

Table 5.2.19.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
|      |           |   |             |             |

This method shall support the request data structures specified in table 5.2.19.3.2-2 and the response data structures and response codes specified in table 5.2.19.3.2-3.

Table 5.2.19.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type            | Р | Cardinality | Description   |
|----------------------|---|-------------|---|
| GroupPolicyDataPatch | М | 1           | Modify a group specific policy control data resource for a 5G VN group. |

Table 5.2.19.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description  |  |  |
|---|---|-------------|----------------|--|--|--|
| GroupPolicyData   | M | 1           | 200 OK         | Successful case. The resource is successfully modified and a representation of the updated resource (i.e., updated group specific policy control data) is returned in the response body. |  |  |
| n/a   |   |             | 204 No Content | Successful case. The resource is successfully modified and no content is returned in the response body.  |  |  |
| NOTE: The mandatory HTTP error status codes for the HTTP PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] shall also apply. |   |             |                |  |  |  |

## 5.3 Notifications

### 5.3.1 General

Notifications shall comply with clause 6.2 of 3GPP TS 29.500 [4] and clause 4.6.2.3 of 3GPP TS 29.501 [5].

This clause describes the resources to provide notification to NF service consumers which have subscribed to be notified when policy data is changed.

**Table 5.3.1-1: Notifications overview** 

| Notification                       | Callback URI      | HTTP method or custom operation | Description (service operation)          |
|------------------------------------|-------------------|---------------------------------|--|
| Policy Data Change<br>Notification | {notificationUri} |                                 | Used for policy data change notification |

## 5.3.2 Policy Data Change Notification

The POST method shall be used for policy data change notification and the URI shall be provided during the subscription procedure.

Callback URI: {notificationUri}

This method shall support the URI query parameters specified in table 5.3.2-1.

Table 5.3.2-1: URI query parameters supported by the POST method

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 5.3.2-2 and the response data structures and response codes specified in table 5.3.2-3.

Table 5.3.2-2: Data structures supported by the POST Request Body

| Data type                      | Р | Cardinality | Description                          |
|--------------------------------|---|-------------|--------------------------------------|
| array(PolicyDataChangeNotifica | M | 1N          | Notification of policy data changes. |
| tion)                          |   |             |                                      |

Table 5.3.2-3: Data structures supported by the POST Response Body

| Data ty | Data type P Cardinality   |  | Response | Description    |  |  |  |
|---------|---|--|----------|----------------|--|--|--|
|         |   |  |          | codes          |  |  |  |
| n/a     |   |  |          | 204 No Content | The reception of the notification is acknowledged. |  |  |
|         | IOTE: The mandatory HTTP error status codes for the POST method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |  |          |                |  |  |  |

### 5.4 Data Model

### 5.4.1 General

This clause specifies the application data model supported by the API.

Table 5.4.1-1 specifies the data types defined for the Nudr\_DataRepository for Policy Data service-based interface protocol.

Table 5.4.1-1: Nudr\_DataRepository specific Data Types for Policy Data

| Data type                   | Section defined | Description  | Applicability  |
|-----------------------------|-----------------|--|--|
| AmPolicyData                | 5.4.2.2         | Contains the AM policy data for a given subscriber.                  |  |
| AmPolicyDataPatch           | 5.4.2.2A        | Contains the modifiable AM policy data for a subscriber.             | AccessAndMob<br>ilityPolicyDataM<br>odify              |
| BdtData                     | 5.4.2.9         | Contains the background data transfer data.                          |  |
| BdtDataPatch                | 5.4.2.27        | Contains the modifiable background data transfer data                |  |
| BdtPolicyStatus             | 5.4.3.5         | Contains the validation status for a negotiated BDT policy.          |  |
| DnnRouteSelectionDescriptor | 5.4.2.20        | Contains the route selector parameters per DNN.                      |  |
| ItemPath                    | 5.4.3.2         | Represents a fragment of a resource, i.e. a subset of resource data. | ConditionalSub<br>scriptionwithPar<br>tialNotification |

| LimitIdToMonitoringKey         | 5.4.2.16 | Contains the limit identifier and the corresponding monitoring key for a given S-  |  |
|--------------------------------|----------|--|--|
|                                |          | NSSAI and DNN.   |  |
| MbsSessPolCtrlData             | 5.4.2.31 | Contains MBS Session Policy Control Data.  |  |
| MbsSessPolDataId               | 5.4.2.32 | Represents the identifier used to access the MBS Session Policy Control Data.  |  |
| NotificationItem               | 5.4.2.25 | Contains the list of resource fragments included in the notification triggered by the modification of a given resource fragment. | ConditionalSub<br>scriptionwithPar<br>tialNotification |
| Osld                           | 5.4.3.2  | Operating System supported by the UE.  |  |
| PdtqData                       | 5.4.2.33 | Contains the planned data transfer with QoS requirements data.   |  |
| PdtqDataPatch                  | 5.4.2.34 | Contains the modifiable planned data transfer with QoS requirements data   |  |
| Periodicity                    | 5.4.3.4  | Indicates a type of time period.   |  |
| PlmnRouteSelectionDescriptor   | 5.4.2.18 | Contains the route selectors for a serving PLMN.   |  |
| PolicyCounterInfoRm            | 5.4.2.38 | Identifies the policy counter status.  | SLAMUP   |
| PolicyDataChangeNotification   | 5.4.2.11 | Contains changed policy data for which notification was requested.   |  |
| PolicyDataForIndividualUe      | 5.4.2.28 | Contains policy data sets for a given subscriber.  |  |
| PolicyDataSubscription         | 5.4.2.10 | Identifies a subscription to policy data change notification.  |  |
| PolicyDataSubset               | 5.4.3.6  | Indicates a policy data subset (e.g. AM policy data, SM policy data).  |  |
| ResourceItem                   | 5.4.2.24 | Represents list of fragments of a resource, i.e. a list of subsets of resource data monitored for notification of data changes.  | ConditionalSub<br>scriptionwithPar<br>tialNotification |
| RestrictedStatus               | 5.4.2.37 | Contains reason for restricted status and the time stamp of when the status was stored.  | AbnormalBeha viour                                     |
| SlicePolicyData                | 5.4.2.29 | Contains network slice specific policy control information for an S-NSSAI.   |  |
| SlicePolicyDataPatch           | 5.4.2.30 | Contains modifiable network slice specific policy control information for an S-NSSAI.  |  |
| SmPolicyData                   | 5.4.2.5  | Contains SM policy data for a subscriber.  |  |
| SmPolicyDataPatch              | 5.4.2.21 | Contains modifiable SM policy data for a subscriber.   | SessionManag<br>ementPolicyDat<br>aPatch               |
| SmPolicyDnnData                | 5.4.2.15 | Contains SM policy data for a DNN and S-NSSAI.   |  |
| SmPolicyDnnDataPatch           | 5.4.2.23 | Contains modifiable SM policy data for a DNN and S-NSSAI.  | SessionManag<br>ementPolicyDat<br>aPatch               |
| SmPolicySnssaiData             | 5.4.2.14 | Contains SM policy data for an S-NSSAI.  |  |
| SmPolicySnssaiDataPatch        | 5.4.2.22 | Contains modifiable SM policy data for an S-NSSAI.   | SessionManag<br>ementPolicyDat<br>aPatch               |
| SnssaiRouteSelectionDescriptor | 5.4.2.19 | Contains the route selector parameters per SNSSAI.   |  |
| SponsorConnectivityData        | 5.4.2.8  | Contains the sponsored data connectivity related information for a sponsor identifier.   |  |
| TimePeriod                     | 5.4.2.12 | Contains the periodicity for the defined usage monitoring data limits.   |  |
| UePolicySetPatch               | 5.4.2.17 | Contains the UE policy data that can be modified by the PCF.   |  |
| UePolicySection                | 5.4.2.3  | Contains the UE policy section.  |  |
| UePolicySet                    | 5.4.2.4  | Contains the UE policy set for a given subscriber.   |  |
| UpdatedItem                    | 5.4.2.26 | An updated resource fragment, represented by its location in a resource and its data type.                                       | ConditionalSub<br>scriptionwithPar<br>tialNotification |
| UsageMonLevel                  | 5.4.3.3  | Indicates the level of the usage monitoring instance (PDU Session level or per Service)  |  |
| UsageMonData                   | 5.4.2.7  | Contains remain allowed usage data for a subscriber.   |  |

| UsageMonDataLimit |   | Contains usage monitoring control data for a subscriber.                            |  |
|-------------------|---|---|--|
| UsageMonDataScope | - | Contains SNSSAI and DNN combinations to which the UsageMonData instance belongs to. |  |

Table 5.4.1-2 specifies data types re-used by the Nudr\_DataRepository for Policy Data service based interface protocol from other specifications, including a reference to their respective specifications and when needed, a short description of their use within the Nudr\_DataRepository for Policy Data service based interface.

Table 5.4.1-2: Nudr\_DataRepository re-used Data Types for Policy Data

| Data type                     | Reference           | Comments  | Applicability        |
|-------------------------------|---------------------|---|----------------------|
| 5Qi                           | 3GPP TS 29.571 [7]  | Indicates the 5G QoS Identifier.  | 1                    |
| ApplicationId                 | 3GPP TS 29.571 [7]  | Contains the application identifier.  |                      |
| ArpPriorityLevel              | 3GPP TS 29.571 [7]  | Indicates the allocation and retention priority level.  |                      |
| BdtReferenceId                | 3GPP TS 29.122 [9]  | Indicates the background data transfer  |                      |
|                               |                     | reference ID for the transfer policy.   |                      |
| BitRate                       | 3GPP TS 29.571 [7]  | String representing a bit rate that shall be formatted as follows: pattern: "^\d+(\.\d+)? (bps Kbps Mbps Gbps Tbps)\$" Examples: "125 Mbps", "0.125 Gbps", "125000 Kbps". |                      |
| Bytes                         | 3GPP TS 29.571 [7]  | String with format "byte" as defined in OpenAPI Specification [3], i.e., base64-encoded characters.   |                      |
| ChargingInformation           | 3GPP TS 29.512 [12] | The address(es), and if available, the instance ID and the set ID of the Charging Function.   |                      |
| DateTime                      | 3GPP TS 29.571 [7]  | String with format "date-time" as defined in OpenAPI Specification [3].   |                      |
| Dnn                           | 3GPP TS 29.571 [7]  | Data Network Name. (NOTE)   |                      |
| ExceptionId                   | 3GPP TS 29.520 [29] | Describes the Exception Id.   | AbnormalBeh aviour   |
| MbsSessionId                  | 3GPP TS 29.571 [7]  | Contains the MBS Session Identifier.  |                      |
| Metadata                      | 3GPP TS 29.571 [7]  | Contains opaque information for the service functions in the N6-LAN that is provided by AF and transparently sent to UPF.   | SFC                  |
| NetworkAreaInfo               | 3GPP TS 29.554 [13] | Represents a network area information.  |                      |
| OperatorSpecificDataContainer | 3GPP TS 29.505 [15] | Container for operator specific data  |                      |
| PatchResult                   | 3GPP TS 29.571 [7]  |   |                      |
| PatchItem                     | 3GPP TS 29.571 [7]  | Data structure used for JSON patch.   |                      |
| PdtqPolicy                    | 3GPP TS 29.543 [25] | Represents a PDTQ policy.   |                      |
| PdtqReferenceId               | 3GPP TS 29.543 [25] | Indicates the planned data transfer with QoS requirements reference ID for the PDTQ policy.   |                      |
| PduSessionType                | 3GPP TS 29.571 [7]  | PDU Session Type.   |                      |
| PduSessionInfo                | 3GPP TS 29.571 [7]  | Represents the S-NSSAI and DNN combination for a PDU Session.   | MultiPduSess<br>Info |
| Pei                           | 3GPP TS 29.571 [7]  | Personal Equipment Identifier.  |                      |
| PendingPolicyCounterStatus    | 3GPP TS 29.594 [28] | Indicates the pending policy counter status.  | SLAMUP               |
| Plmnld                        | 3GPP TS 29.571 [7]  | PLMN Identity.  |                      |
| PresenceInfo                  | 3GPP TS 29.571 [7]  | Presence Reporting Area Information.  |                      |
| PolicyCounterInfo             | 3GPP TS 29.594 [28] | Identifies the policy counter status.   | SLAMUP               |
| ProblemDetails                | 3GPP TS 29.571 [7]  | Used in error responses to provide more detailed information about an error.  |                      |
| SliceMbr                      | 3GPP TS 29.571 [7]  | Contains the slice Maximum Bit Rate including UL and DL.  | NSAC                 |
| Snssai                        | 3GPP TS 29.571 [7]  | Identifies the S-NSSAI.   | 1                    |
| SscMode                       | 3GPP TS 29.571 [7]  | SSC mode.   |                      |
| SupportedFeatures             | 3GPP TS 29.571 [7]  | Used to negotiate the applicability of the optional features  |                      |

| TraceData   | 3GPP TS 29.571 [7]  | Identifies the trace requirements.  | EnhancedUe<br>Policy |  |  |  |
|---|---------------------|---|----------------------|--|--|--|
| Tnapld  | 3GPP TS 29.571 [7]  | Trusted Network Access Point identifier.  | AfGuideTNAP<br>s     |  |  |  |
| TrafficDescriptor   | 3GPP TS 29.122 [9]  | Identifies the traffic descriptor of the background data.   |                      |  |  |  |
| TransferPolicy  | 3GPP TS 29.554 [13] | Represents a transfer policy.   |                      |  |  |  |
| Uinteger  | 3GPP TS 29.571 [7]  | Unsigned Integer, i.e. only value 0 and integers greater than 0 are allowed.                        |                      |  |  |  |
| Uri   | 3GPP TS 29.571 [7]  | String providing an URI.  |                      |  |  |  |
| UsageThreshold  | 3GPP TS 29.122 [9]  | Usage Thresholds (a data volume expected to be transferred per UE and/or time duration in seconds). |                      |  |  |  |
| VarUeld   | 3GPP TS 29.571 [7]  | String represents the SUPI or GPSI.   |                      |  |  |  |
| NOTE: The UDR uses the DNN as received from the NF service consumer without applying any transformation. To successfully perform DNN matching, in a specific deployment a DNN shall always be encoded either with the full DNN (e.g., because there are multiple Operator Identifiers for a Network Identifier) or the DNN Network Identifier only. |                     |   |                      |  |  |  |

# 5.4.2 Structured data types

### 5.4.2.1 Introduction

This clause defines the structures to be used in resource representations.

# 5.4.2.2 Type AmPolicyData

Table 5.4.2.2-1: Definition of type AmPolicyData

| instance ID and the CHF set ID of the Charging Function. (NOTE)  subscSpendingLi boolean  O 01 Indicates whether the PCF must enforce Access and Mobility management related policies based on subscriber spending limits. True: Spending limit control is enabled; False: Spending limit control is not enabled. The absence of this attribute means that spending limit control is not provisioned for the UE.  spendLimInfo map(PolicyCou nterInfo)  o 1N Contains the status of the requested policy counters for UE. The key of the map is the attribute "policyCounterId".  restriStatus array(Restricte dStatus)  o 1N List of restricted status that contains the reason for the status and the time stamp of when the status was stored.  SupportedFeat ures  SupportedFeat ures  o 01 Indicates the list of negotiated supported features.  This parameter shall be provided if the NF service consumer has provided a list of   | Attribute name | Data type     | Р | Cardinality | Description  | Applicability         |

This parameter shall be provided if the NF service consumer has provided a list of supported features in its request.  |                       |

## 5.4.2.2A Type AmPolicyDataPatch

Table 5.4.2.2A-1: Definition of type AmPolicyDataPatch

| Attribute name | Data type                    | Р | Cardinality | Description   | Applicability         |
|----------------|------------------------------|---|-------------|---|-----------------------|
| restriStatus   | array(Restricte<br>dStatus)  | 0 | 1N          | List of restricted status that contains the reason for the status and the time stamp of when the status was stored.         | AbnormalBeh<br>aviour |
| spendLimInfo   | map(PolicyCou<br>nterInfoRm) | 0 |             | Contains the updated status of the requested policy counters for UE. The key of the map is the attribute "policyCounterId". | SLAMUP                |

# 5.4.2.3 Type UePolicySection

Table 5.4.2.3-1: Definition of type UePolicySection

| Attribute name      | Data type | Р | Cardinality | Description  |
|---------------------|-----------|---|-------------|--|
| uePolicySectionInfo | Bytes     | M |             | Base64-encoded characters, containing the UE Policy Section Contents for the given UPSI as specified in Figure D.6.2.5 of 3GPP TS 24.501 [11] (see octets d+9 until k of that Figure, i.e. the first character of this attribute represents the first six bits of octet d+9, and so on). |
| upsi                | Upsi      | М | 1           | Identifier for UE Policy Section (UPSI).   |

# 5.4.2.4 Type UePolicySet

Table 5.4.2.4-1: Definition of type UePolicySet

| Attribute name           | Data type                                 | Р | Cardinality | Description  | Applicability         |
|--------------------------|---|---|-------------|--|-----------------------|
| praInfos                 | map(Presenc<br>eInfo)                     | 0 | 1N          | Presence reporting area information. Each PresenceInfo element shall include the Presence Reporting Area Identifier within the "prald" attribute and, for a UE-dedicated presence reporting area, shall also include the list of elements composing the presence reporting area.  A "prald" may indicate a Presence Reporting Area Set.  The "prald" attribute within the PresenceInfo data type shall also be the key of the map. |                       |
|                          |   |   |             | The attribute "presenceState" shall not be present.  |                       |
| subscCats                | array(string)                             | 0 | 1N          | List of categories associated with the subscriber  |                       |
| uePolicySections         | map(UePolicy<br>Section)                  | 0 | 1N          | Contains the UE Policy Sections. The UPSI (UE Policy Section Identifier) is used as the key in the map.  |                       |
| upsis                    | array(Upsi)                               | 0 | 1N          | List of identifiers for the "uePolicySections" (list of UPSI(s)).  |                       |
| allowedRouteSel<br>Descs | map(PlmnRo<br>uteSelectionD<br>escriptor) | 0 | 1N          | Contains allowed route selection descriptors per serving PLMN for a UE. The serving PLMN identifier is the key of the map.   |                       |
| andsplnd                 | boolean                                   | 0 | 01          | Indication of UE supporting ANDSP. True: The UE supports ANDSP; False: The UE does not support ANDSP.  |                       |
| epsUrspInd               | boolean                                   | 0 | 01          | Indication of UE supporting URSP provisioning in EPS. True: The UE supports URSP provisioning in EPS; False: The UE does not support URSP provisioning in EPS.   | EpsUrsp               |
| vpsUrspInd               | boolean                                   | 0 | 01          | Indication of UE supporting VPLMN-specific URSP. True: The UE supports VPLMN-specific URSP; False: The UE does not support VPLMN-specific URSP.  | VPLMNSpecif<br>icURSP |
| urspEnfInd               | boolean                                   | 0 | 01          | Indication of UE supporting URSP enforcement report.  True: The UE supports URSP enforcement report;  False: The UE does not support URSP enforcement report.  | URSPEnforce<br>ment   |
| pei                      | Pei                                       | 0 | 01          | Personal Equipment Identifier.   |                       |
| oslds                    | array(Osld)                               | 0 | 1N          | Identification of the UE Operating System(s).  |                       |

| chfInfo                 | ChargingInfor mation       | 0 | 01 | The address(es) and, if available, the CHF instance ID and the CHF set ID of the Charging Function. (NOTE 2)   | CHFInformati<br>on    |
|-------------------------|----------------------------|---|----|--|-----------------------|
| subscSpendingLi<br>mits | boolean                    | 0 | 01 | Indicates whether the PCF must enforce UE policies based on subscriber spending limits. True: Spending limit control is enabled; False: Spending limit control is not enabled. The absence of this attribute means that spending limit control is not provisioned for the UE.                                      | SLAMUP                |
| spendLimInfo            | map(PolicyCo<br>unterInfo) | 0 | 1N | Contains the status of the requested policy counters for UE. The key of the map is the attribute "policyCounterId".  | SLAMUP                |
| tracingReq              | TraceData                  | 0 | 01 | Tracing requirements as defined in TS 32.421 [26]  | EnhancedUe<br>Policy  |
| resetIds                | array(string)              | 0 | 1N | This IE uniquely identifies a part of temporary data in UDR that contains the created resource.  This attribute may be provided in the response of successful resource creation.   |                       |
| restriStatus            | array(Restrict edStatus)   | 0 | 1N | List of restricted status that contains the reason for the status and the time stamp of when the status was stored.  | AbnormalBeh<br>aviour |
| suppFeat                | SupportedFe atures         | С | 01 | This IE represents a list of Supported features used as described in clause 5.6. This attribute shall be provided in the PUT request and in the response of successful resource creation, and in the HTTP GET response if the "supp-feat" attribute query parameter is included in the HTTP GET request. (NOTE 1). |                       |

NOTE 1: In the HTTP request, it represents the set of features supported by the NF service consumer. In the HTTP response, it represents the set of features supported by both the NF service consumer and the UDR.

NOTE 2: When the feature "CHFInformation" is supported, the "secondaryChfAddress" may be omitted.

### 5.4.2.5 Type SmPolicyData

Table 5.4.2.5-1: Definition of type SmPolicyData

| Attribute name     | Data type                   | Р | Cardinality | Description  | Applicability |
|--------------------|-----------------------------|---|-------------|--|---------------|
| smPolicySnssaiData | map(SmPolicyS<br>nssaiData) | М | 1N          | Session Management Policy data per S-<br>NSSAI for all the SNSSAIs of the<br>subscriber.<br>The key of the map is the S-NSSAI.<br>(NOTE 2)   |               |
| umDataLimits       | map(UsageMon<br>DataLimit)  | 0 | 1N          | Contains a list of usage monitoring profiles associated with the subscriber. The limit identifier is used as the key of the map.   |               |
| umData             | map(UsageMon<br>Data)       | 0 | 1N          | Contains the remaining allowed usage data associated with the subscriber.  The limit identifier is used as the key in the map.   |               |
| suppFeat           | SupportedFeat ures          | С | 01          | Indicates the list of negotiated supported features. This parameter shall be supplied by the UDR in the response to the PATCH/GET request when the PATCH/GET request includes the "supp-feat" query parameter and the UDR supports feature negotiation for Session Management Policy Data. |               |

NOTE 1: In this Release of the specification the "limitId" corresponds to the Monitoring Key.

NOTE 2: The S-NSSAI value used as key of the map is encoded as a string as defined in 3GPP TS 29.571[7], clause 5.4.4.2.

### 5.4.2.6 Type UsageMonDataLimit

Table 5.4.2.6-1: Definition of type UsageMonDataLimit

| Attribute name | Data type               | Р | Cardinality | Description  |
|----------------|-------------------------|---|-------------|--|
| limitId        | string                  | М | 1           | Identifies the limit, i.e. the usage monitoring control instance   |
| scopes         | map(UsageMonD ataScope) | 0 | 1N          | Identifies the SNSSAI and DNN combinations to which the usage monitoring data limit applies.  The S-NSSAI is the key of the map. (NOTE 2)  If the "scopes" attribute is omitted, the limit applies to every S-NSSAI and DNN.   |
| umLevel        | UsageMonLevel           | 0 | 01          | Indicates the level of the usage monitoring instance (PDU Session level or per Service).   |
| startDate      | DateTime                | С | 01          | Start date and time when the usage monitoring instance applies. It shall be provided when the resetPeriod attribute is provided.   |
| endDate        | DateTime                | 0 | 01          | End date and time when the usage monitoring instance applies.  |
| usageLimit     | UsageThreshold          | 0 | 01          | Maximum allowed traffic volume/time usage for a usage monitoring instance. If a resetPeriod is specified, this limit applies to every period separately and not for the entire time between the start and end dates. So for example, if the resetPeriod is daily, the usageLimit is applicable for each day until the end date is specified. |
| resetPeriod    | TimePeriod              | 0 | 01          | Time period to reset the remaining allowed usage for a periodic usage monitoring instance (postpaid subscriptions). This attribute along with the startDate determine the actual absolute time at which usage needs to be reset.   |

NOTE 1: In this Release of the specification the "limitId" attribute is the Monitoring Key, and the "scopes" attribute shall always be present including one distinct SNSSAI and DNN pair.

NOTE 2: The S-NSSAI value used as key of the map is encoded as a string as defined in 3GPP TS 29.571[7], clause 5.4.4.2.

### 5.4.2.7 Type UsageMonData

Table 5.4.2.7-1: Definition of type UsageMonData

| Attribute name | Data type               | Р | Cardinality | Description   | Applicability |
|----------------|-------------------------|---|-------------|---|---------------|
| limitId        | string                  | М | 1           | Identifies the limit as defined in the "limitId" attribute of the UsageMonDataLimit data type (see clause 5.4.2.6).   |               |
| scopes         | map(UsageMonD ataScope) | 0 | 1N          | Identifies the SNSSAI and DNN combinations to which the remaining usage monitoring data applies. The S-NSSAI is the key of the map. (NOTE 3)  |               |
| umLevel        | UsageMonLevel           | 0 | 01          | Indicates the level of the usage monitoring instance (PDU Session level or per Service).  |               |
| allowedUsage   | UsageThreshold          | 0 | 01          | Remaining allowed traffic volume usage and/or resource time usage.  |               |
| resetTime      | DateTime                | 0 | 01          | Time to reset the allowed usage back to the usageLimit of the corresponding UsageMonDataLimit. This is computed based on the corresponding startDate, resetPeriod and endDate of the corresponding UsageMonDataLimit. The allowedUsage is only applicable if the resetTime is in the future relative to the current time. |               |
| suppFeat       | SupportedFeatur<br>es   | С | 01          | This IE represents a list of Supported features used as described in clause 5.6. This attribute shall be provided in the PUT request and in the response of successful resource creation, and in the HTTP GET response if the "supp-feat" attribute query parameter is included in the HTTP GET request. (NOTE 2).        |               |
| resetIds       | array(string)           | 0 | 1N          | This IE uniquely identifies a part of temporary data in UDR that contains the created resource.  This attribute may be provided in the response of successful resource creation.  |               |

NOTE 1: In this Release of the specification the "limitId" attribute is the Monitoring Key, and the "scopes" attribute shall always be present including one distinct SNSSAI and DNN pair.

### 5.4.2.8 Type SponsorConnectivityData

Table 5.4.2.8-1: Definition of type SponsorConnectivityData

| Attribute name | Data type                   | Р | Cardinality | Description   |
|----------------|-----------------------------|---|-------------|---|
| asplds         | array(string)               | М | 1N          | Identifies a list of Application Service Provider Identifiers   |
|                |                             |   |             | associated with the sponsor identity.                           |
|                | SupportedEo                 |   |             | Indicates the list of negotiated supported features.            |
| suppFeat       | suppFeat SupportedFe atures | С | 01          | This parameter shall be provided if the NF service consumer has |
|                |                             |   |             | provided a list of supported features in its request.           |

NOTE 2: In the HTTP request, it represents the set of features supported by the NF service consumer. In the HTTP response, it represents the set of features supported by both the NF service consumer and the UDR.

NOTE 3: The S-NSSAI value used as key of the map is encoded as a string as defined in 3GPP TS 29.571 [7], clause 5.4.4.2.

#### Type BdtData 5.4.2.9

Table 5.4.2.9-1: Definition of type BdtData

| Attribute name   | Data type         | Р | Cardinality | Description  |  |  |  |  |  |
|--|-------------------|---|-------------|--|--|--|--|--|--|
| aspld  | string            | М | 1           | This IE contains an identity of an application service provider.   |  |  |  |  |  |
| transPolicy  | TransferPolicy    | М | 1           | This IE contains the transfer policy.  |  |  |  |  |  |
| bdtRefld   | BdtReferenceId    | 0 | 01          | This IE indicates the background data transfer reference ID for  |  |  |  |  |  |
|  |                   |   |             | the transfer policy.   |  |  |  |  |  |
| nwAreaInfo   | NetworkAreaInfo   | 0 | 01          | This IE represents a network area information.   |  |  |  |  |  |
| numOfUes   | Uinteger          | 0 | 01          | This IE contains the number of UEs using the indicated   |  |  |  |  |  |
| <u> </u>   |                   |   |             | transfer policy. It shall be present when available.   |  |  |  |  |  |
| volPerUe   | UsageThreshold    | 0 | 01          | This IE contains a data volume expected to be transferred per  |  |  |  |  |  |
|  |                   |   |             | UE for the indicated transfer policy. It shall be present when   |  |  |  |  |  |
| alia ia  | Dan               |   | 01          | available.   |  |  |  |  |  |
| dnn  | Dnn<br>Cassai     | 0 | 01          | This IE identifies a DNN.  This IE identifies a slice.   |  |  |  |  |  |
| snssai   | Snssai            | _ |             |  |  |  |  |  |  |
| trafficDes   | TrafficDescriptor | 0 | 01          | Contains the traffic descriptor of the background data.  |  |  |  |  |  |
| bdtpStatus   | BdtPolicyStatus   | 0 | 01          | Contains the validation status for a negotiated BDT policy. It shall be included when available. Default value is "VALID" if |  |  |  |  |  |
|  |                   |   |             | lomitted.  |  |  |  |  |  |
| warnNotifEnabl   | boolean           | 0 | 01          | This IE indicates whether the BDT warning notification is  |  |  |  |  |  |
| ed   | boolean           | 0 | 01          | lenabled or disabled.  |  |  |  |  |  |
| eu   |                   |   |             | true: enabled;   |  |  |  |  |  |
|  |                   |   |             | false: disabled (default value).   |  |  |  |  |  |
| notifUri   | Uri               | 0 | 01          | This IE contains an URI of the recipient of the BDT warning  |  |  |  |  |  |
|  |                   |   |             | notification.  |  |  |  |  |  |
| suppFeat   | SupportedFeatur   | С | 01          | This IE represents a list of Supported features used as  |  |  |  |  |  |
|  | es                |   |             | described in clause 5.6.   |  |  |  |  |  |
|  |                   |   |             | This attribute shall be provided in the PUT request and in the   |  |  |  |  |  |
|  |                   |   |             | response of successful resource creation, and in the HTTP  |  |  |  |  |  |
|  |                   |   |             | GET response if the "supp-feat" attribute query parameter is   |  |  |  |  |  |
|  |                   |   |             | included in the HTTP GET request. (NOTE).  |  |  |  |  |  |
| resetIds   | array(string)     | 0 | 1N          | This IE uniquely identifies a part of temporary data in UDR that   |  |  |  |  |  |
|  |                   |   |             | contains the created resource.   |  |  |  |  |  |
|  |                   |   |             | This attribute may be provided in the response of successful   |  |  |  |  |  |
|  |                   |   |             | resource creation.   |  |  |  |  |  |
| NOTE: In the HTTP request, it represents the set of features supported by the NF service consumer. In the HTTP |                   |   |             |  |  |  |  |  |  |
| response, it represents the set of features supported by both the NF service consumer and the UDR.             |                   |   |             |  |  |  |  |  |  |

response, it represents the set of features supported by both the NF service consumer and the UDR.

#### Type PolicyDataSubscription 5.4.2.10

Table 5.4.2.10-1: Definition of type PolicyDataSubscription

| Attribute name        | Data type  | Р | Cardinality | Description  | Applicability  |
|-----------------------|------------|---|-------------|--|--|
| notificationUri       | Uri        | М | 1           | URI provided by the NF service consumer indicating where to receive the subscribed notifications from the UDR.   |  |
| notifld               | string     | С | 01          | Notification Correlation ID assigned by the NF service consumer. It shall be included when the "ConditionalSubscriptionwithPartialNotification " or the "ConditionalSubscriptionWithExcludeNotification" feature is supported. | ConditionalS<br>ubscriptionwi<br>thPartialNotifi<br>cation<br>ConditionalS<br>ubscriptionW<br>ithExcludeNo<br>tification |
| monitoredResourceUris | array(Uri) | M | 1N          | A set of URIs provided by the NF service consumer that identify the resources as defined in table 5.2.2-1 for which a modification triggers a notification.  (NOTE 1)  |  |

|                  | T                                       |   | 1  |  |  |
|------------------|---|---|----|--|--|
| monResItems      | array(ResourceItem)                     |   |    | A set of monitored resource fragments provided by the NF service consumer.  When present, this IE indicates the trigger of the notification is conditioned to the data change occurs in one or more of the attributes contained in a resource fragment as defined by the ResourceItem data type, and that the triggered notification shall only include the resource fragment as defined by the ResourceItem data type.  (NOTE 2)  | ConditionalS<br>ubscriptionwi<br>thPartialNotifi<br>cation |
| excludedResItems | array(ResourceItem)                     | 0 | 1N | A set of resource fragments provided by the NF service consumer that are excluded from data change monitoring.  When present, this IE indicates the trigger of the notification is conditioned to the data change occurs in any attribute contained in the resource(s) identified by "monitoredResourceUris", except when the changed data is in one or more of the attributes contained in a resource fragment as defined by the Resourceltem data type. (NOTE 2) (NOTE 3) (NOTE 4)   | ConditionalS<br>ubscriptionW<br>ithExcludeNo<br>tification |
| immRep           | boolean                                 | 0 | 01 | If provided by the NF service consumer and set to "true", it indicates to the UDR that existing entries that match this subscription shall be immediately reported within the "immReports" attribute in the response. The default value is false.  | ImmediateRe<br>portPcc                                     |
| immReports       | array(PolicyDataCh<br>angeNotification) |   | 1N | Contains entries stored in the UDR that match this subscription.  It shall be included in the POST response body of a subscription creation if the request included the "immRep" attribute set to true and the UDR needs to include an immediate report in the response.  It shall be included in the PUT response body of a subscription modification if the UDR needs to include an immediate report in the response and:  - if the modification request included the "immRep" attribute set to true and it was previously set to false or not provided;  - if the modification request added the monitoring of new resources within the "monitoredResourceUris" attribute and/or new monitored resource fragments within the "monResItems" attribute, and the "immRep" attribute was previously set to true; and/or  - if the modification request updated the set of excluded resources within the "excludedResItems" attribute and the "immRep" attribute was previously set to true. | ImmediateRe portPcc  |
| expiry           | DateTime                                | С | 01 | This IE shall be included in a subscription response if, based on operator policy and taking into account the expiry time included in the request, the UDR needs to include an expiry time.  This IE may be included in a subscription request. When present, this IE shall represent the time after which the subscription becomes invalid.  The absence of this attribute in the subscription response means the subscription to be valid without an expiry time.  |  |
| subsld           | string                                  | С | 01 | It represents the variable part of the IndividualPolicyDataSubscription resource URI, as specified in clause 5.2.11.2-1.   | PolSubscRet rieval   |

|                    |  |                   |   |    | This attribute shall be present if the PolicyDataSubscription is sent in a GET response message to the PolicyDataSubscriptions collection resource.   |  |  |  |
|--------------------|--|-------------------|---|----|---|--|--|--|
|                    |  |                   |   |    | This is a Read Only attribute and shall not be provided by the NF service consumer in any request.  |  |  |  |
| supportedFe        | atures   | SupportedFeatures | С | 01 | Used to negotiate the applicability of the optional features. This attribute shall be provided in the POST request and in the response of successful resource creation.                     |  |  |  |
| resetIds           |  | array(string)     | 0 | 1N | This IE uniquely identifies a part of temporary data in UDR that contains the created resource.  This attribute may be provided by the UDR in the response of successful resource creation. |  |  |  |
|                    |  |                   |   |    | Subscription resource nor the resource URI of   |  |  |  |
| NOTE 2: If Co      | the PolicyDataSubscriptions resource shall be included in the "monitoredResourceUris" attribute.  NOTE 2: If both ConditionalSubscriptionwithPartialNotification and ConditionalSubscriptionWithExcludeNotification are supported, the fragments defined in "monResItems" attribute and in "excludedResItems" attribute shall refer to different resources defined in "monitoredResourceUris".   |                   |   |    |   |  |  |  |
| re                 | NOTE 3: When "excludedResItems" attribute is included, and a change is detected in the monitored part of a resource (i.e., in those properties not included in the "excludedResItems" attribute), the triggered notification shall include the complete resource representation.   |                   |   |    |   |  |  |  |
| NOTE 4: The the "o | notification shall include the complete resource representation.  NOTE 4: The "excludedResItems" attribute may only be used with the OperatorSpecificData resource. E.g. if the OperatorSpecificData resource contains a map with two elements, one with key "operatorSpecificData1" and the other one with key "operatorSpecificData2", to excude the notification of changes in the "operatorSpecificData1" element the "excludedResItems" attribute will contain the value "/operatorSpecificData1" within the "items" array. |                   |   |    |   |  |  |  |

# 5.4.2.11 Type PolicyDataChangeNotification

Table 5.4.2.11-1: Definition of type PolicyDataChangeNotification

| Attribute name                          | Data type                   | Р | Cardinality | Description   | Applicability |
|---|-----------------------------|---|-------------|---|---------------|
| amPolicyData                            | AmPolicyData                | 0 | 01          | Access and Mobility Policy Data, if changed and notification was requested, or if it existed and immediate reporting was requested.               |               |
| uePolicySet                             | UePolicySet                 | 0 | 01          | UE Policy Set, if changed and notification was requested, or if it existed and immediate reporting was requested.                                 |               |
| plmnUePolicySet                         | UePolicySet                 | 0 | 01          | PLMN UE Policy Set, if changed<br>and notification was requested, or if<br>it existed and immediate reporting<br>was requested.                   |               |
| smPolicyData                            | SmPolicyData                | 0 | 01          | Session Management Policy Data, if changed and notification was requested, or if it existed and immediate reporting was requested.                |               |
| usageMonData                            | UsageMonData                | 0 | 01          | Usage Monitoring Data, if changed and notification was requested, or if it existed and immediate reporting was requested.                         |               |
| SponsorConnectivit<br>yData<br>(NOTE 4) | SponsorConnectivity<br>Data | 0 | 01          | Sponsor data connectivity profile information, if changed and notification was requested, or if it existed and immediate reporting was requested. |               |

| bdtData           | BdtData                                | 0 | 01 | Background Data Transfer Data, if changed and notification was requested, or if it existed and immediate reporting was requested.  |  |
|-------------------|--|---|----|--|--|
| opSpecData        | OperatorSpecificDat<br>aContainer      | 0 | 01 | Operator Specific Data, if changed and notification was requested, or if it existed and immediate reporting was requested. It may only be used when the receiver of the notification is able to univocally identify the changed operator specific data. (NOTE 3) |  |
| opSpecDataMap     | map(OperatorSpecifi<br>cDataContainer) | 0 | 1N | Operator Specific Data resource data, if changed and notification was requested, or if it existed and immediate reporting was requested. The key of the map is operator specific data element name and the value is the operator specific data of the UE.        | OpSpecDataMap<br>Notification                          |
| ueld              | VarUeld                                | С | 01 | Represents the UE subscription identifier SUPI or GPSI. It shall only be present when the "amPolicyData", "uePolicySet", "smPolicyData", "opSpecData" and/or "usageMonData" attribute is present.  |  |
| sponsorld         | string                                 | С | 01 | Represents the sponsor identity. It shall only be present when the "sponsorConnectivityData" attribute is present.   |  |
| bdtRefld          | BdtReferenceId                         | С | 01 | Represents the BDT reference identifier. It shall only be present when the "bdtData" attribute is present.   |  |
| usageMonId        | string                                 | С | 01 | Represents the unique identifier of the individual SM Policy usage monitoring resource. It shall only be present when the "usageMonData" attribute is present.   |  |
| plmnld            | Pimnid                                 | С | 01 | Represents the PLMN identifier. It shall only be present when the "plmnUePolicySet" attribute is present.  |  |
| delResources      | array(Uri)                             | 0 | 1N | The resources, as defined in table 5.2.2-1, if removed from UDR and notification on resource data change was requested. Not applicable for immediate reports. (NOTE 2)   | ResourceRemov<br>alNotificationPoli<br>cyData          |
| notifld           | string                                 | С | 01 | Notification Correlation ID assigned by the NF service consumer.  (NOTE 5)   | ConditionalSubs<br>criptionwithPartia<br>lNotification |
| reportedFragments | array(NotificationIte<br>m)            | С | 1N | This attribute contains the resource fragments indicated in the "monResItems" attribute of the PolicyDataSubscription data type. (NOTE 5)  | ConditionalSubs<br>criptionwithPartia<br>INotification |
| slicePolicyData   | SlicePolicyData                        | 0 | 01 | Network slice specific policy control data for an S-NSSAI, if changed and notification was requested, or if it existed and immediate reporting was requested.  |  |

| snssai          | Snssai          | С | 01 | Represents the S-NSSAI identifier, the unique identifier of the SlicePolicyControlData resource. It shall only be present when the "slicePolicyData" attribute is present.                                |      |
|-----------------|-----------------|---|----|---|------|
| pdtqData        | PdtqData        | 0 | 01 | Planned Data Transfer with QoS requirements Data, if changed and notification was requested, or if it existed and immediate reporting was requested.  | PDTQ |
| pdtqRefld       | pdtqReferenceId | С | 01 | Represents the PDTQ reference identifier. It shall only be present when the "pdtqData" attribute is present.  | PDTQ |
| groupPolicyData | GroupPolicyData | 0 | 01 | Contains group specific policy control data for a 5G VN group, if changed and notifications were requested, or if it existed and immediate reporting was requested.                                       | GMEC |
| intGroupId      | GroupId         | С | 01 | Represents the identifier for the 5G VN group, and the unique identifier of the corresponding GroupPolicyControlData resource.  It shall be present only when the "groupPolicyData" attribute is present. | GMEC |

- NOTE 1: When the "ResourceRemovalNotificationPolicyData" feature and/or "ConditionalSubscriptionwithPartialNotification" feature is not supported or supported but the applicable attribute(s) are not provided, at least one of the "amPolicyData", "uePolicySet", "smPolicyData", "usageMonData", "SponsorConnectivityData", "bdtData", "opSpecData", "plmnUePolicySet" or "slicePolicyData" or "groupPolicyData" shall be present.
- NOTE 2: When the "ResourceRemovalNotificationPolicyData" feature is supported, and the "delResources" attribute is present, the attributes that correspond with the values included in the "delResources" attribute shall be omitted. E.g., when the "delResources" attribute includes the value "../policy-data/ues/{ueld}/am-data" the attribute "amPolicyData" shall be omitted.
- NOTE 3: This attribute should not be used if the receiver of the notification is not able to univocally identify the changed operator specific data, and "opSpecDataMap" should be used instead.
- NOTE 4: The attribute does not follow the related naming convention (i.e. "lowerCamel") defined in clause 5.1.4 of 3GPP TS 29.501 [7]. This attribute is however kept as currently defined in this specification for backward compatibility considerations.
- NOTE 5: When the "ConditionalSubscriptionwithPartialNotification" feature is supported, the "notifid" and "reportedFragments" attributes shall be included in notification requests when a data change occurred in the resource fragments indicated in the "monResItems" attribute of the PolicyDataSubscription data type. When the feature "ImmediateReportPcc" is also supported, the "notifid" and "reportedFragments" attributes shall be included in subscription responses when the resource fragments existed when the immediate reporting was requested.

### 5.4.2.12 Type TimePeriod

Table 5.4.2.12-1: Definition of type TimePeriod

| Attribute name | Data type   | Р | Cardinality | Description   | Applicability |
|----------------|-------------|---|-------------|---|---------------|
| period         | Periodicity | M |             | Indicates whether the periodicity is "YEARLY", "MONTHLY", "WEEKLY", "DAILY" or "HOURLY".  |               |
| maxNumPeriod   | Uinteger    | 0 |             | Indicates the maximum number of periods after which the usage monitoring instance does not apply. If omitted, there is no limit in the number of periods. |               |

## 5.4.2.13 Type UsageMonDataScope

Table 5.4.2.13-1: Definition of type UsageMonDataScope

| Attribute name  | Data type  | Р | Cardinality | Description   | Applicability |  |  |
|---|------------|---|-------------|---|---------------|--|--|
| snssai  | Snssai     | M | 1           | Represents the SNSSAI.  |               |  |  |
| dnn   | array(Dnn) | 0 |             | Represents the Dnn. If omitted, the usage monitoring scope applies to all the DNNs. |               |  |  |
| NOTE: In this Release of the specification the "dnn" attribute shall always be present with one and only one entry. |            |   |             |   |               |  |  |

## 5.4.2.14 Type SmPolicySnssaiData

Table 5.4.2.14-1: Definition of type SmPolicySnssaiData

| Attribute name  | Data type                | Р | Cardinality | Description  | Applicability |
|-----------------|--------------------------|---|-------------|--|---------------|
| snssai          | Snssai                   | М | 1           | S-NSSAI associated with the data.  |               |
| smPolicyDnnData | map(SmPolicyDnn<br>Data) | 0 | 1N          | Session Management Policy data per DNN for all the DNNs of the indicated S-NSSAI. The key of the map is the DNN. |               |
| ueSliceMbr      | SliceMbr                 | 0 | 01          | Subscribed UE-Slice-MBR for the indicated S-NSSAI.   | NSAC          |

## 5.4.2.15 Type SmPolicyDnnData

Table 5.4.2.15-1: Definition of type SmPolicyDnnData

| Attribute name Data type P Cardinality |                            | Description | Applicability |   |        |
|--|----------------------------|-------------|---------------|---|--------|
| dnn                                    | Dnn                        | М           | 1             | DNN associated with the data  |        |
| allowedServices                        | array(string)              | 0           | 1N            | List of subscriber's allowed service identifiers  |        |
| subscCats                              | array(string)              | 0           | 1N            | List of categories associated with the subscriber   |        |
| gbrUI                                  | BitRate                    | 0           | 01            | Maximum aggregate UL bitrate that can be provided across all GBR QoS Flows in the DNN   |        |
| gbrDl                                  | BitRate                    | 0           | 01            | Maximum aggregate DL bitrate that can be provided across all GBR QoS Flows in the DNN   |        |
| adcSupport                             | boolean                    | 0           | 01            | Indicates whether application detection and control is enabled for the PDU session.  True: Application detection and control is enabled for the PDU session;  False: Application detection and control is not enabled for the PDU session.  The absence of this attribute means that ADC support is not provisioned for the UE and PDU session. |        |
| subscSpendingLi<br>mits                | boolean                    | O           | 01            | Indicates whether the PCF must enforce session management related policies based on subscriber spending limits.  True: Spending limit control is enabled; False: Spending limit control is not enabled. The absence of this attribute means that spending limit control is not provisioned for the UE and PDU session.                          |        |
| spendLimInfo                           | map(PolicyCou<br>nterInfo) | 0           | 1N            | Contains the status of the requested policy counters for the PDU session. The key of the map is the attribute "policyCounterId".  | SLAMUP |
| ipv4Index                              | IpIndex                    | 0           | 01            | Information that identifies which IP pool or external server is used to allocate the IPv4 address.  |        |

| 1                 | 1                               |   |    |  |
|-------------------|---------------------------------|---|----|--|
| ipv6Index         | IpIndex                         | 0 | 01 | Information that identifies which IP pool or external server is used to allocate the IPv6 address.   |
| offline           | boolean                         | 0 | 01 | Indicates whether the offline charging is applicable to the PDU session.  True: Offline charging is applicable to the PDU session;  False: Offline charging is not applicable to the PDU session.  The absence of this attribute means that the charging method is not provisioned for the UE and PDU session.   |
| online            | boolean                         | 0 | 01 | Indicates whether the online charging is applicable to the PDU session.  True: Online charging is applicable to the PDU session; False: Online charging is not applicable to the PDU session.  The absence of this attribute means that the charging method is not provisioned for the UE and PDU session.   |
| chfInfo           | ChargingInform ation            | 0 | 01 | The address(es) and, if available, the CHF instance ID and the CHF set ID of the Charging Function. (NOTE)   |
| refUmDataLimitIds | map(LimitIdTo<br>MonitoringKey) | 0 | 1N | A reference to the "UsageMonDataLimit" or "UsageMonData" instances for this DNN and SNSSAI that may also include the related monitoring key(s). The key of the map is the limit identifier.  |
| mpsPriority       | boolean                         | 0 | 01 | True: Indicates subscription to the MPS priority service; priority applies to all traffic on the PDU Session. False: MPS priority service is not subscribed. The absence of this attribute means that MPS priority is not provisioned for the UE and PDU session.  |
| mcsPriority       | boolean                         | 0 | 01 | True: Indicates subscription to the MCS priority service; priority applies to all traffic on the PDU Session. False: IMS signalling priority service is not subscribed. The absence of this attribute means that IMS signalling priority is not provisioned for the UE and PDU session.  |
| imsSignallingPrio | boolean                         | 0 | 01 | True: Indicates subscription to the IMS signalling priority service; priority only applies to IMS signalling traffic. False: IMS signalling priority service is not subscribed. The absence of this attribute means that IMS signalling priority is not provisioned for the UE and PDU session.  |
| mpsPriorityLevel  | integer                         | 0 | 01 | Relative priority level for the multimedia priority services   |
| mcsPriorityLevel  | integer                         | 0 | 01 | Relative priority level for the mission critical services  |
| prainfos          | map(Presencel<br>nfo)           | 0 | 1N | Presence reporting area information. Each PresenceInfo element shall include the Presence Reporting Area Identifier within the "prald" attribute and, for a UE-dedicated presence reporting area, shall also include the list of elements composing the presence reporting area. A "prald" may indicate a Presence Reporting Area Set. The "prald" attribute within the PresenceInfo data type shall also be the key of the map. |

|                       |                             |   |    | The attribute "presenceState" shall not be present.   |  |
|-----------------------|-----------------------------|---|----|---|--|
| bdtReflds             | map(BdtRefere nceldRm)      | 0 | 1N | Identifies transfer policies of background data transfer.  Any string value can be used as a key of the map.  | EnhancedBac<br>kgroundData<br>Transfer |
| locRoutNotAllowe<br>d | boolean                     | 0 | 01 | Identifies whether AF influence on traffic routing is allowed or not. True: if no local routing is allowed; False: local routing is allowed. The absence of this attribute means that AF influence on traffic routing is not provisioned for the UE and PDU session.  |  |
| sfcNotAllowed         | boolean                     | 0 | 01 | Identifies whether AF influence on Service Function Chaining is allowed or not.  True: if no AF influence on Service Function Chaining is allowed; False: AF influence on Service Function Chaining allowed.  The absence of this attribute means that AF influence on Service Function Chaining is not provisioned for the UE and PDU session. | SFC                                    |
| tnaps                 | array(Tnapld)               | 0 | 1N | Contains the TNAP ID(s) collocated with the 5G-RG(s) of a specific user.  | AfGuideTNAP<br>s                       |
| restriStatus          | array(Restricted<br>Status) | 0 | 1N | List of restricted status that contains the reason for the status and the time stamp of when the status was stored.   | AbnormalBeh<br>aviour                  |

## 5.4.2.16 Type LimitIdToMonitoringKey

Table 5.4.2.16-1: Definition of type LimitIdToMonitoringKey

| Attribute name   | Data type     | Р | Cardinality | Description       | Applicability |  |  |
|--|---------------|---|-------------|-------------------|---------------|--|--|
| limitId  | string        | М | 1           | Limit Identifier. |               |  |  |
| monkey   | array(string) | 0 | 1N          | Monitoring Keys.  |               |  |  |
| NOTE: In this Release of the specification there is only one Monitoring Key per Limit Identifier |               |   |             |                   |               |  |  |

## 5.4.2.17 Type UePolicySetPatch

Table 5.4.2.17-1: Definiton of type UePolicySetPatch

| Attribute name   | Data type                        | Р | Cardinality | Description  | Applicability         |
|------------------|----------------------------------|---|-------------|--|-----------------------|
| uePolicySections | map(UePoli<br>cySection)         | 0 | 1N          | Contains the updated UE Policy Sections. The UPSI (UE Policy Section Identifier) is used as the key in the map.  |                       |
| upsis            | array(Upsi)                      | 0 | 1N          | List of identifiers for the "uePolicySections" (list of UPSI(s)).  |                       |
| andsplnd         | boolean                          | 0 | 01          | Indication of UE supporting ANDSP.   |                       |
| epsUrspInd       | boolean                          | 0 | 01          | Indication of UE supporting URSP provisioning in EPS. True: The UE supports URSP provisioning in EPS; False: The UE does not support URSP provisioning in EPS. | EpsUrsp               |
| vpsUrspInd       | boolean                          | 0 | 01          | Indication of UE supporting VPLMN-specific URSP. True: The UE supports VPLMN-specific URSP; False: The UE does not support VPLMN-specific URSP.                | VPLMNSpecifi<br>cURSP |
| urspEnfInd       | boolean                          | 0 | 01          | Indication of UE supporting URSP enforcement report.  True: The UE supports URSP enforcement report;  False: The UE does not support URSP enforcement report.  | URSPEnforce<br>ment   |
| pei              | Pei                              | 0 | 01          | Personal Equipment Identifier.   |                       |
| oslds            | array(Osld)                      | 0 | 1N          | Identification of the UE Operating System(s).  |                       |
| restriStatus     | array(Restri<br>ctedStatus)      | 0 | 1N          | List of restricted status that contains the reason for the status and the time stamp of when the status was stored.  | AbnormalBeh<br>aviour |
| spendLimInfo     | map(Policy<br>CounterInfo<br>Rm) | 0 | 1N          | Contains the updated status of the requested policy counters for UE. The key of the map is the attribute "policyCounterId".                                    | SLAMUP                |

## 5.4.2.18 Type PlmnRouteSelectionDescriptor

Table 5.4.2.18-1: Definition of type PlmnRouteSelectionDescriptor

| Attribute name          | Data type                              | Р | Cardinality | Description  |
|-------------------------|--|---|-------------|--|
| servingPlmn             | Plmnld                                 | М | 1           | Identity of the serving PLMN.                                  |
| snssaiRouteSelDes<br>cs | array(SnssaiRouteS electionDescriptor) | 0 | 1N          | Contains the route selection descriptor parameters per SNSSAI. |

### 5.4.2.19 Type SnssaiRouteSelectionDescriptor

Table 5.4.2.19-1: Definition of type SnssaiRouteSelectionDescriptor

| Attribute name   | Data type             | Р | Cardinality | Description  |
|------------------|-----------------------|---|-------------|--|
| snssai           | Snssai                | M | 1           | SNSSAI.  |
| dnnRouteSelDescs | array(DnnRouteSelecti | 0 | 1N          | Contains the route selection descriptor parameters |
|                  | onDescriptor)         |   |             | per DNN.   |

## 5.4.2.20 Type DnnRouteSelectionDescriptor

Table 5.4.2.20-1: Definition of type DnnRouteSelectionDescriptor

| Attribute name | Data type             | Р | Cardinality | Description                           | Applicability     |
|----------------|-----------------------|---|-------------|---------------------------------------|-------------------|
| dnn            | Dnn                   | М | 1           | DNN.                                  |                   |
| sscModes       | array(SscMode)        | 0 | 1N          | Contains the allowed SSC modes        |                   |
|                |                       |   |             | for the traffic to this DNN.          |                   |
| pduSessTypes   | array(PduSessionType) | 0 | 1N          | Contains the allowed PDU              |                   |
|                |                       |   |             | Session types for the traffic to this |                   |
|                |                       |   |             | DNN.                                  |                   |
| atsssInfo      | boolean               | 0 | 01          | Indicates whether MA PDU              |                   |
|                |                       |   |             | session establishment is allowed      |                   |
|                |                       |   |             | for this DNN.                         |                   |
|                |                       |   |             | True: MA PDU session                  |                   |
|                |                       |   |             | establishment is allowed for this     |                   |
|                |                       |   |             | DNN.                                  |                   |
|                |                       |   |             | False: MA PDU session                 |                   |
|                |                       |   |             | establishment is not allowed for      |                   |
|                |                       |   |             | this DNN.                             |                   |
|                |                       |   |             | The absence of this attribute         |                   |
|                |                       |   |             | means that the ATSSS                  |                   |
|                |                       |   |             | information is not provisioned for    |                   |
|                |                       |   |             | the UE and PDU session.               |                   |
| IboRoamAllowed | boolean               | 0 | 01          | Indicates whether local breakout      | VPLMNSpecificURSP |
|                |                       |   |             | for the DNN and S-NSSAI is            |                   |
|                |                       |   |             | allowed when roaming.                 |                   |
|                |                       |   |             | true: allowed                         |                   |
|                |                       |   |             | false: not allowed.                   |                   |
|                |                       |   |             | If the attribute is absent it means   |                   |
|                |                       |   |             | not allowed.                          |                   |

## 5.4.2.21 Type SmPolicyDataPatch

Table 5.4.2.21-1: Definition of type SmPolicyDataPatch

| Attribute name     | Data type      | Р | Cardinality | Description                                  | Applicability |
|--------------------|----------------|---|-------------|--|---------------|
| umData             | map(UsageMon   | 0 | 1N          | Contains the remaining allowed usage data    |               |
|                    | Data)          |   |             | associated with the subscriber.              |               |
|                    |                |   |             | The value of the limit identifier is used as |               |
|                    |                |   |             | the key in the map.                          |               |
| smPolicySnssaiData | map(SmPolicyS  | 0 | 1N          | Modifiable Session Management Policy         |               |
|                    | nssaiDataPatch |   |             | data per S-NSSAI for all the SNSSAIs of      |               |
|                    | )              |   |             | the subscriber.                              |               |
|                    |                |   |             | The key of the map is the S-NSSAI.           |               |
|                    |                |   |             | (NOTE 2)                                     |               |
| NOTE 4 1 411 D.I.  |                |   |             | 1 ( ) 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1      |               |

NOTE 1: In this Release of the specification the "limitId" corresponds to the Monitoring Key.

NOTE 2: The S-NSSAI value used as key of the map is encoded as a string as defined in 3GPP TS 29.571[7], clause 5.4.4.2.

### 5.4.2.22 Type SmPolicySnssaiDataPatch

Table 5.4.2.22-1: Definition of type SmPolicySnssaiDataPatch

| Attribute name  | Data type                     | Р | Cardinality | Description   | Applicability |
|-----------------|-------------------------------|---|-------------|---|---------------|
| snssai          | Snssai                        | М | 1           | S-NSSAI associated with the data.   |               |
| smPolicyDnnData | map(SmPolicyDnn<br>DataPatch) | 0 |             | Modifiable Session Management Policy data per DNN for all the DNNs of the indicated S-NSSAI. The key of the map is the DNN. |               |

## 5.4.2.23 Type SmPolicyDnnDataPatch

Table 5.4.2.23-1: Definition of type SmPolicyDnnDataPatch

| Attribute name | Data type                    | Р | Cardinality | Description  | Applicability                          |
|----------------|------------------------------|---|-------------|--|--|
| dnn            | Dnn                          | М | 1           | DNN associated with the data   |  |
| bdtReflds      | map(BdtRefere<br>nceldRm)    | 0 | 1N          | Updated transfer policies of background data transfer. Any string value can be used as a key of the map.                       | EnhancedBac<br>kgroundData<br>Transfer |
| restriStatus   | array(Restricted<br>Status)  | 0 | 1N          | List of restricted status that contains the reason for the status and the time stamp of when the status was stored.            | AbnormalBeh<br>aviour                  |
| spendLimInfo   | map(PolicyCou<br>nterInfoRm) | 0 | 1N          | Updated the status of the requested policy counters for the PDU session. The key of the map is the attribute "policyCounterId" | SLAMUP                                 |

## 5.4.2.24 Type ResourceItem

Table 5.4.2.24-1: Definition of type ResourceItem

| Attribute name   | Data type       | Р | Cardinality | Description  | Applicability |  |  |
|--|-----------------|---|-------------|--|---------------|--|--|
| monResourceUri   | Uri             | М | 1           | Represents the URI that identifies the monitored resource as defined in table 5.2.2-1. (NOTE)  |               |  |  |
| items  | array(ItemPath) | М | 1N          | Represents fragments of the resource identified by the "monResourceUri" attribute, i.e. a subset of resource data, for which a modification triggers a notification. |               |  |  |
| NOTE: The resource URI included in the "monResourceUri" attribute shall be one of the resource URIs included in the "monitoredResourceUris" attribute of the PolicyDataSubscription data type. |                 |   |             |  |               |  |  |

# 5.4.2.25 Type NotificationItem

Table 5.4.2.25-1: Definition of type NotificationItem

| Attribute name | Data type              | Р | Cardinality | Description  | Applicability |
|----------------|------------------------|---|-------------|--|---------------|
| resourceld     | Uri                    | М | 1           | This IE contains the URI of the resource which has been changed.   |               |
| notifitems     | array(UpdatedIte<br>m) | М | 1N          | This IE contains the fragments of the resource identified by the "resourceld" attribute which have been updated or requested to be notified. |               |

## 5.4.2.26 Type UpdatedItem

Table 5.4.2.26-1: Definition of type UpdatedItem

| Attribute name | Data type | Р | Cardinality | Description  | Applicability |
|----------------|-----------|---|-------------|--|---------------|
| item           | ItemPath  | M | 1           | This IE contains a JSON pointer value (as defined in IETF RFC 6901 [20]) that references a target location within the resource that identifies the resource fragment.  |               |
| value          | Any type  | M | 1           | This IE indicates the value of the resource fragment located at the target location within the resource specified in the "item" attribute.  The data type of this attribute shall be the same as the type of the attribute or element located in the path.  The null value shall be allowed. |               |

## 5.4.2.27 Type BdtDataPatch

Table 5.4.2.27-1: Definition of type BdtDataPatch

| Attribute name | Data type       | Р | Cardinality | Description  |
|----------------|-----------------|---|-------------|--|
| bdtpStatus     | BdtPolicyStatus | 0 | 01          | Contains the validation status for a negotiated BDT policy. It |
|                |                 |   |             | shall be included when the BDT policy is re-negotiated.        |
| transPolicy    | TransferPolicy  | 0 | 01          | This IE contains the transfer policy.                          |
| warnNotifEnabl | boolean         | 0 | 01          | This IE indicates whether the BDT warning notification is      |
| ed             |                 |   |             | enabled or disabled.   |
|                |                 |   |             | true: enabled;   |
|                |                 |   |             | false: disabled.   |

## 5.4.2.28 Type PolicyDataForIndividualUe

Table 5.4.2.28-1: Definition of type PolicyDataForIndividualUe

| Attribute name  | Data type                                  | Р | Cardinality | Description  | Applicability |  |  |
|---|--|---|-------------|--|---------------|--|--|
| uePolicyDataSet   | UePolicySet                                | 0 | 01          | The IE contains UE policies.   |               |  |  |
| smPolicyDataSet   | SmPolicyData                               | 0 | 01          | The IE contains SM policies.   |               |  |  |
| amPolicyDataSet   | AmPolicyData                               | 0 | 01          | The IE contains AM policies.   |               |  |  |
| umData  | map(UsageMon<br>Data)                      | С | 1N          | The IE contains UM policies. The value of the limit identifier is used as the key of the map. (NOTE)   |               |  |  |
| operatorSpecific<br>DataSet   | map(OperatorSp<br>ecificDataContai<br>ner) | 0 | 1N          | The IE contains operator specific data. The key of the map is operator specific data element name and the value is the operator specific data of the UE.                   |               |  |  |
| suppFeat  | SupportedFeatur<br>es                      | С | 01          | Indicates the list of negotiated supported features. This parameter shall be provided if the NF service consumer has provided a list of supported features in its request. |               |  |  |
| NOTE: The "umData" attribute shall be absent when the smPolicyDataSet attribute is present and includes the "umData" attribute. |  |   |             |  |               |  |  |

## 5.4.2.29 Type SlicePolicyData

Table 5.4.2.29-1: Definition of type SlicePolicyData

| Attribute name | Data type         | Р | Cardinality | Description   | Applicability |
|----------------|-------------------|---|-------------|---|---------------|
| mbrUl          | BitRate           | 0 | 01          | Maximum aggregate ULdata rate that can be provided across all GBR and Non-GBR QoS Flows in the S-NSSAI. (NOTE 1)  |               |
| mbrDl          | BitRate           | 0 | 01          | Maximum aggregate DL data rate that can be provided across all GBR and Non-GBR QoS Flows in the S-NSSAI. (NOTE 1)   |               |
| remainMbrUI    | BitRate           | 0 | 01          | The remaining maximum aggregate UL data rate that can be provided across all GBR and Non-GBR QoS Flows in the S-NSSAI. (NOTE 2) It is set to the maximum allowed aggregate UL data rate across all GBR and Non-GBR QoS Flows in the S-NSSAI when the system is initially configured based on operator policies. |               |
| remainMbrDI    | BitRate           | 0 | 01          | The remaining maximum aggregate DL data rate that can be provided across all GBR and Non-GBR QoS Flows in the S-NSSAI. (NOTE 2) It is set to the maximum allowed aggregate DL data rate across all GBR and Non-GBR QoS Flows in the S-NSSAI when the system is initially configured based on operator policies. |               |
| suppFeat       | SupportedFeatures | С | 01          | Indicates the list of negotiated supported features. It shall be provided in the HTTP GET response if the "supp-feat" attribute query parameter is included in the HTTP GET request.  |               |

NOTE 1: The "mbrUl" and "mbrDl" attributes are only used for limiting data rate per network slice with assistance of the NWDAF.

## 5.4.2.30 Type SlicePolicyDataPatch

Table 5.4.2.30-1: Definition of type SlicePolicyDataPatch

| Attribute name     | Data type              | Р      | Cardinality | Description  | Applicability |
|--------------------|------------------------|--------|-------------|--|---------------|
| remainMbrUl        | BitRate                | 0      | 01          | The remaining maximum aggregate UL bitrate that can be provided across all GBR and Non-GBR QoS Flows in the S-NSSAI. |               |
| remainMbrDl        | BitRate                | 0      | 01          | The remaining maximum aggregate DL bitrate that can be provided across all GBR and Non-GBR QoS Flows in the S-NSSAI. |               |
| NOTE: At least one | e of the attributes sh | all be | included.   |  |               |

NOTE 2: The "remainMbrUI" and "remainMbrDI" attributes are only used for limiting data rate per network slice with PCF based monitoring.

# 5.4.2.31 Type MbsSessPolCtrlData

Table 5.4.2.31-1: Definition of type MbsSessPolCtrlData

| Attribute name    | Data type          | Р | Cardinality | Description   | Applicability |
|-------------------|--------------------|---|-------------|---|---------------|
| 5qis              | array(5Qi)         | 0 | 1N          | Contains the list of allowed 5QI(s) for an MBS PCC rule of the MBS Session.   |               |
| maxMbsArpLevel    | ArpPriorityLevel   | 0 | 01          | Contains the highest ARP level value allowed for any MBS PCC rule of the MBS Session.   |               |
| maxMbsSessionAmbr | BitRate            | 0 | 01          | Contains the maximum MBS Session-<br>AMBR for all non-GBR QoS flows of an<br>MBS session in the downlink.                         |               |
| maxGbr            | BitRate            | 0 | 01          | Contains the maximum aggregated bitrate that can be provided across all the GBR QoS Flows for an MBS session in the downlink.     |               |
| suppFeat          | SupportedFeat ures | С | 01          | Indicates the list of negotiated supported features. This parameter shall be provided if feature negotiation needs to take place. |               |

## 5.4.2.32 Type MbsSessPolDataId

Table 5.4.2.32-1: Definition of type MbsSessPolDatald

| Attribute name  | Data type    | Р | Cardinality | Description  | Applicability |  |  |
|---|--------------|---|-------------|--|---------------|--|--|
| mbsSessionId  | MbsSessionId | С |             | Contains the source specific multicast address used as MBS session identifier.  (NOTE) |               |  |  |
| afAppld   | string       | С | 01          | Contains the AF application identifier.  (NOTE)  |               |  |  |
| NOTE: Either the "mbsSessionId" attribute or the "afAppId" attribute shall be provided. |              |   |             |  |               |  |  |

#### 5.4.2.33 Type PdtqData

Table 5.4.2.33-1: Definition of type PdtqData

| Attribute name       | Data type                 | Р | Cardinality | Description   |
|----------------------|---------------------------|---|-------------|---|
| aspld                | string                    | М | 1           | This IE contains an identity of an application service provider.  |
| pdtqPolicy           | PdtqPolicy                | М | 1           | This IE contains the PDTQ policy.   |
| appld                | ApplicationId             | 0 | 01          | This IE contains an application identifier.   |
| pdtqRefld            | PdtqReferenceId           | 0 | 01          | This IE indicates the PDTQ reference ID for the PDTQ policy.  |
| nwAreaInfo           | NetworkAreaInfo           | 0 | 01          | This IE represents a network area information.  |
| numOfUes             | Uinteger                  | 0 | 01          | This IE contains the number of UEs using the indicated PDTQ   |
|                      | _                         |   |             | policy. It shall be present when available.   |
| desTimeInts          | array(TimeWindo<br>w)     | 0 | 1N          | This IE contains a list of desired time windows for PDTQ.   |
| dnn                  | Dnn                       | 0 | 01          | This IE identifies a DNN.   |
| snssai               | Snssai                    | 0 | 01          | This IE identifies a slice.   |
| qosParamSet          | QosParameterSe<br>t       | С | 01          | Contains the requested QoS requirements expressed as one or more individual QoS parameters. (NOTE 3, NOTE 4)  |
| qosReference         | string                    | С | 01          | Contains the requested QoS requirements expressed as the QoS Reference which represents a pre-defined QoS information.  (NOTE 2, NOTE 4)  |
| altQosParamSe<br>ts  | array(AltQosPara<br>mSet) | 0 | 1N          | Contains the alternative QoS requirements expressed as the list of individual QoS parameter sets in a prioritized order. The lower the index of the array for a given entry, the higher the priority.  (NOTE 3)   |
| altQosRefs           | array(string)             | 0 | 1N          | Contains the alternative QoS requirements expressed as the list of QoS References in a prioritized order.  The lower the index of the array for a given entry, the higher the priority.  (NOTE 2)   |
| notifUri             | Uri                       | 0 | 01          | This IE contains an URI of the recipient of the PDTQ warning notification.  |
| warnNotifEnabl<br>ed | boolean                   | 0 | 01          | This IE indicates whether the PDTQ warning notification is enabled or disabled.  true: enabled; false: disabled (default).  |
| suppFeat             | SupportedFeatur<br>es     | С | 01          | This IE represents a list of Supported features used as described in clause 5.6.  This attribute shall be provided in the PUT request and in the response of successful resource creation, and in the HTTP GET response if the "supp-feat" attribute query parameter is included in the HTTP GET request. (NOTE). |
| resetIds             | array(string)             | 0 | 1N          | This IE uniquely identifies a part of temporary data in UDR that contains the created resource.  This attribute may be provided in the response of successful resource creation.  |

NOTE 1: In the HTTP request, it represents the set of features supported by the NF service consumer. In the HTTP response, it represents the set of features supported by both the NF service consumer and the UDR.

NOTE 2: The "altQosParamSets" attribute may be included only if the "qosParamSet" attribute is included.

NOTE 3: The "altQosParamSets" attribute may be included only if the "qosParamSet" attribute is included.

NOTE 4: Either the "gosReference" attribute or the "gosParamSet" attribute shall be included.

# 5.4.2.34 Type PdtqDataPatch

Table 5.4.2.34-1: Definition of type PdtqDataPatch

| Attribute name       | Data type  | Р | Cardinality | Description   |
|----------------------|------------|---|-------------|---|
| pdtqPolicy           | PdtqPolicy | 0 | 01          | This IE contains the PDTQ policy.   |
| warnNotifEnabl<br>ed | boolean    | 0 |             | This IE indicates whether the PDTQ warning notification is enabled or disabled.  true: enabled; false: disabled |
| notifUri             | Uri        | 0 | 01          | This IE contains an URI of the recipient of the PDTQ warning notification.                                      |

## 5.4.2.35 Type GroupPolicyData

Table 5.4.2.35-1: Definition of type GroupPolicyData

| Attribute name                | Data type         | Р | Cardinality | Description  | Applicability |
|-------------------------------|-------------------|---|-------------|--|---------------|
| maxGroupMbrUI                 | BitRate           | 0 | 01          | Contains the maximum aggregate UL data rate that can be provided across all GBR and Non-GBR QoS Flows in the 5G VN group.  (NOTE)  |               |
| maxGroupMbrDl                 | BitRate           | 0 | 01          | Contains the maximum aggregate DL data rate that can be provided across all GBR and Non-GBR QoS Flows in the 5G VN group.  (NOTE)  |               |
| remainGroupMbrUl              | BitRate           | 0 | 01          | Contains the remaining maximum aggregate UL data rate that can be provided across all GBR and Non-GBR QoS Flows in the 5G VN group.  (NOTE)  |               |
| remainGroupMbrDl              | BitRate           | 0 | 01          | Contains the remaining maximum aggregate DL data rate that can be provided across all GBR and Non-GBR QoS Flows in the 5G VN group.  (NOTE)  |               |
| suppFeat  NOTE: The initial v | SupportedFeatures |   | 01          | Contains the list of negotiated supported features.  This attribute shall be present only when feature negotiation needs to take place.  d on the Maximum Group Data Rate information in the maximum Group Data Rate information in the maximum Group Data Rate information. |               |

NOTE: The initial value of these attributes shall be set based on the Maximum Group Data Rate information and/or operator policies.

## 5.4.2.36 Type GroupPolicyDataPatch

Table 5.4.2.36-1: Definition of type GroupPolicyDataPatch

| Attribute name   | Data type | Р | Cardinality | Description   | Applicability |  |  |
|--|-----------|---|-------------|---|---------------|--|--|
| maxGroupMbrUl  | BitRate   | 0 | 01          | Contains the updated maximum aggregate UL data rate that can be provided across all GBR and Non-GBR QoS Flows in the 5G VN group.  (NOTE)           |               |  |  |
| maxGroupMbrDl  | BitRate   | 0 | 01          | Contains the updated maximum aggregate DL data rate that can be provided across all GBR and Non-GBR QoS Flows in the 5G VN group.  (NOTE)           |               |  |  |
| remainGroupMbrUI   | BitRate   | 0 | 01          | Contains the updated remaining maximum aggregate UL data rate that can be provided across all GBR and Non-GBR QoS Flows of the 5G VN group.  (NOTE) |               |  |  |
| remainGroupMbrDl   | BitRate   | 0 | 01          | Contains the updated remaining maximum aggregate DL data rate that can be provided across all GBR and Non-GBR QoS Flows of the 5G VN group.  (NOTE) |               |  |  |
| NOTE: At least one of these attributes shall be present. |           |   |             |   |               |  |  |

## 5.4.2.37 Type RestrictedStatus

Table 5.4.2.37-1: Definiton of type RestrictedStatus

| Attribute name | Data type   | Р | Cardinality | Description                            | Applicability |
|----------------|-------------|---|-------------|--|---------------|
| exceptionId    | ExceptionId | М | 1           | Indicating the Exception ID.           |               |
| timeStamp      | DateTime    | M | 1           | Time stamp when the status was stored. |               |

## 5.4.2.38 Type PolicyCounterInfoRm

Table 5.4.2.38-1: Definition of type PolicyCounterInfoRm

| Attribute name         | Data type                          | Р | Cardinality | Description   | Applicability |
|------------------------|------------------------------------|---|-------------|---|---------------|
| currentStatus          | string                             | 0 | 01          | Identifies the policy counter status applicable for a specific policy counter identified by the policyCounterId. The values (e.g. valid, invalid or any other status) are not specified. The interpretation and actions related to the defined values are out of scope of 3GPP. |               |
| penPolCounterStat uses | array(PendingPolic yCounterStatus) | 0 | 1N          | Provides the pending policy counter status.   |               |

#### Simple data types and enumerations 5.4.3

#### 5.4.3.1 Introduction

This clause defines simple data types and enumerations that can be referenced from data structures defined in the previous clauses.

#### 5.4.3.2 Simple data types

The simple data types defined in table 5.4.3.2-1 shall be supported.

Table 5.4.3.2-1: Simple data types

| Type Definition | Description   | Applicability  |
|-----------------|---|--|
| string          | This data type is defined in the same way as the "BdtReferenceId" data type defined in 3GPP TS 29.122 [9], but with the "nullable: true" property.  | EnhancedBackgr<br>oundDataTransfer   |
| integer         | Information that identifies which IP pool or external server is used to allocate the IP address.  |  |
| string          | It contains one JSON pointer value (as defined in IETF RFC 6901 [20]) that references a target location within the resource.  E.g. "/smPolicySnssaiData/ <snssai>" represents the subscription to data changes in the SmPolicyData data document, in particular to the element of the "smPolicySnssaiData" map whose key is identified by the <snssai> value.  E.g. 2  "/smPolicySnssaiData/<snssai>/smPolicyDnnData/<dnn>" represents the subscription to data changes in the SmPolicyData data document, in particular to the element of the "smPolicySnssaiData" map whose key is identified by the <snssai> value and, within this one, to the element of the "smPolicyDnnData" map whose key is identified by the <dnn> value.  (NOTE)</dnn></snssai></dnn></snssai></snssai></snssai> | ConditionalSubsc riptionwithPartialN otification   |
| string          | Operating System of the served UE. It contains a Universally Unique IDentifier (UUID) as specified in IETF RFC 4122 [17]. The format of the OS Id is represented in 3GPP TS 24.501 [11].  |  |
| Bytes           | Base64-encoded characters, containing an identifier of a UE Policy Section (UPSI) as defined in clause D.1.1 of 3GPP TS 24.501 [11], i.e. a Base64 representation of the 3 octets that contain the MCC and MNC as defined in Figure D.6.2.3 of 3GPP TS 24.501 [11] followed by the UPSC as defined in Figure D.6.2.5 of   |  |
|                 | string integer string string  | string  This data type is defined in the same way as the "BdtReferenceld" data type defined in 3GPP TS 29.122 [9], but with the "nullable: true" property.  Information that identifies which IP pool or external server is used to allocate the IP address.  It contains one JSON pointer value (as defined in IETF RFC 6901 [20]) that references a target location within the resource.  E.g. "/smPolicySnssaiData/ <snssai>" represents the subscription to data changes in the SmPolicyData data document, in particular to the element of the "smPolicySnssaiData" map whose key is identified by the <snssai> value.  E.g. 2  "/smPolicySnssaiData/<snssai>/smPolicyDnnData/<dnn>" represents the subscription to data changes in the SmPolicyData data document, in particular to the element of the "smPolicySnssaiData" map whose key is identified by the <snssai> value and, within this one, to the element of the "smPolicyDnnData" map whose key is identified by the <snssai> value and, within this one, to the element of the "smPolicyDnnData" map whose key is identified by the <dnn> value.  (NOTE)  string  Operating System of the served UE. It contains a Universally Unique IDentifier (UUID) as specified in IETF RFC 4122 [17]. The format of the OS Id is represented in 3GPP TS 24.501 [11].  Bytes  Base64-encoded characters, containing an identifier of a UE Policy Section (UPSI) as defined in clause D.1.1 of 3GPP TS 24.501 [11], i.e. a Base64 representation of the 3 octets that contain the MCC and MNC as defined</dnn></snssai></snssai></dnn></snssai></snssai></snssai> |

#### 5.4.3.3 Enumeration: UsageMonLevel

The enumeration represents the usage monitoring level. It shall comply with the provisions defined in table 5.4.3.3-1.

Table 5.4.3.3-1: Enumeration UsageMonLevel

| Enumeration value | Description   |
|-------------------|---|
| SESSION_LEVEL     | The usage monitoring is applicable for PDU session level. |
| SERVICE_LEVEL     | The usage monitoring is applicable for service level.     |

### 5.4.3.4 Enumeration: Periodicity

The enumeration represents the time period. It shall comply with the provisions defined in table 5.4.3.4-1.

Table 5.4.3.4-1: Enumeration Periodicity

| Enumeration value | Description            |  |
|-------------------|------------------------|--|
| YEARLY            | Time period is yearly  |  |
| MONTHLY           | Time period is monthly |  |
| WEEKLY            | Time period is weekly  |  |
| DAILY             | Time period is daily   |  |
| HOURLY            | Time period is hourly  |  |

### 5.4.3.5 Enumeration: BdtPolicyStatus

The enumeration represents the validation status of the BDT policy. It shall comply with the provisions defined in table 5.4.3.5-1.

Table 5.4.3.5-1: Enumeration BdtPolicyStatus

| Enumeration value | Description  |
|-------------------|--|
| INVALID           | This value is used to indicate that the BDT policy is invalid while the BDT policy re- |
|                   | negotiation is ongoing because the network performance has degraded.                   |
| VALID             | This value is used to indicate that the BDT policy is valid.                           |

### 5.4.3.6 Enumeration: PolicyDataSubset

This enumeration indicates the policy data subsets (e.g. AM policy data, SM policy data, etc.). It shall comply with the provisions of table 5.4.3.6-1.

Table 5.4.3.6-1: Enumeration PolicyDataSubset

| Enumeration value      | Description             |
|------------------------|-------------------------|
| AM_POLICY_DATA         | AM policy data.         |
| SM_POLICY_DATA         | SM policy data.         |
| UE_POLICY_DATA         | UE policy data.         |
| UM_DATA                | Usage Monitoring data.  |
| OPERATOR_SPECIFIC_DATA | Operator specific data. |

#### 5.4.3.7 void

# 5.5 Error handling

### 5.5.1 General

For the Nudr\_DataRepository service API for Policy Data, HTTP error responses shall be supported as specified in clause 4.8 of 3GPP TS 29.501 [5]. Protocol errors and application errors specified in table 5.2.7.2-1 of 3GPP TS 29.500 [4] shall be supported for an HTTP method if the corresponding HTTP status codes are specified as mandatory for that HTTP method in table 5.2.7.1-1 of 3GPP TS 29.500 [4].

In addition, the requirements in the following clauses are applicable for the Nudr\_DataRepository service API for Policy Data.

### 5.5.2 Protocol Errors

No specific procedures for the Nudr\_DataRepository service API for Policy Data are specified.

## 5.5.3 Application Errors

The application errors defined for the Nudr\_DataRepository service API for Policy Data are listed in table 5.5.3-1.

Table 5.5.3-1: Application errors

| Ар    | plication Error   | HTTP status code | Description |  |  |
|-------|---|------------------|-------------|--|--|
|       |   |                  |             |  |  |
| NOTE: | NOTE: Including a "ProblemDetails" data structure with the "cause" attribute in the HTTP response is optional |                  |             |  |  |
|       | unless explicitly mandated by other clauses in this document.   |                  |             |  |  |

The application error handling shall follow 3GPP TS 29.504 [6] clause 6.1.6 unless explicitly specified in this document.

# 5.6 Feature negotiation

The optional features in table 6.1.8-1 of 3GPP TS 29.504 [6] are defined for the Nudr\_DataRepository API. They shall be negotiated using the extensibility mechanism defined in clause 6.6 of 3GPP TS 29.500 [4].

# 6 Usage of Nudr\_DataRepository Service API for Application Data

### 6.1 Introduction

The following clauses specify the usage of Nudr\_DataRepository service for application data. The principles specified in 3GPP TS 29.504 [6] are followed unless explicitly specified otherwise in the following clauses.

### 6.2 Resources

### 6.2.1 Overview

This clause specifies the resources for the usage of the Unified Data Repository service for Application Data.

### 6.2.2 Resource Structure

This clause describes the structure for the Resource URIs and the resources and methods used for the service.

Figure 6.2.2-1 depicts the resource URIs structure for the Nudr DataRepository API for application data

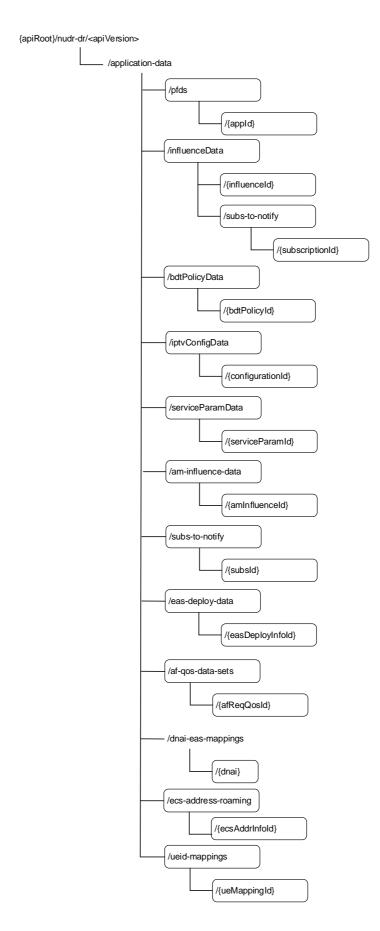

Figure 6.2.2-1: Resource URI structure of the Nudr\_DataRepository API for application data

Table 6.2.2-1 provides an overview of the resources and applicable HTTP methods.

Table 6.2.2-1: Resources and methods overview

| Resource name                             | Resource URI  | HTTP method or custom operation | Description  |
|---|---|---------------------------------|--|
| PFD Data                                  | /application-data/pfds  | GET                             | Retrieve PFDs for application identifier(s) identified by query parameter(s). Retrieve PFDs for all application identifier(s) if no query parameter is included in the Request URI.          |
| Individual PFD Data                       | /application-data/pfds/{appld}  | GET                             | Retrieve the corresponding PFDs of the specified application identifier.   |
|   |   | DELETE                          | Delete the corresponding PFDs of the specified application identifier.   |
|   |   | PUT                             | Create or update the corresponding PFDs for the specified application identifier.  |
| Influence Data                            | /application-data/influenceData (NOTE 1)  | GET                             | Retrieve the Session Influence Data of given services, S-NSSAIs and DNNs or Internal Group Identifier(s) or Subscriber Category(ies) or SUPIs.   |
| Individual Influence<br>Data              | /application-data/influenceData/<br>{influenceId}<br>(NOTE 1)                   | PUT                             | Create an individual Influence Data resource identified by {influenceId}, or modify all of the properties of an individual Influence Data resource identified by {influenceId}.              |
|   |   | PATCH                           | Modify part of the properties of an individual Influence Data resource identified by {influenceId}.  |
|   |   | DELETE                          | Delete an individual Influence Data resource identified by {influenceId}.  |
| Influence Data<br>Subscription            | /application-data/influenceData/<br>subs-to-notify                              | POST                            | Create a new Individual Influence Data Subscription resource.  |
|   | (NOTE 1)  | GET                             | Read subscriptions for a given S-<br>NSSAI and DNN or Internal Group<br>Identifier(s) or Subscriber<br>Category(ies) or SUPI.  |
| Individual Influence<br>Data Subscription | /application-data/influenceData/<br>subs-to-notify/{subscriptionId}<br>(NOTE 1) | GET                             | Get an existing individual Influence Data Subscription resource identified by {subscriptionId}.  |
|   |   | PUT                             | Modify an existing individual Influence Data Subscription resource identified by {subscriptionId}.   |
|   |   | DELETE                          | Delete an individual Influence Data<br>Subscription resource identified by<br>{subscriptionId}.  |
| Applied BDT Policy<br>Data                | /application-data/bdtPolicyData (NOTE 1)  | GET                             | Retrieve the applied BDT policy data.  |
|   |   | PUT                             | Create an individual applied BDT Policy Data resource identified by {bdtPolicyId}.   |
| Individual Applied<br>BDT Policy Data     | /application-<br>data/bdtPolicyData/{bdtPolicyId}<br>(NOTE 1)                   | PATCH                           | Modify BDT Reference Id of an individual applied BDT Policy Data resource identified by {bdtPolicyId}.   |
|   | (**************************************   | DELETE                          | Delete an individual applied BDT Policy Data resource identified by {bdtPolicyId}.   |
| IPTV Configurations                       | /application-data/iptvConfigData (NOTE 1)                                       | GET                             | Retrieve IPTV configurations for configuration identifier(s), given S-NSSAI(s) and DNN(s), or SUPIs or Internal Group Identifiers  |
| Individual IPTV<br>Configuation           | /application-data/iptvConfigData/<br>{configurationId}<br>(NOTE 1)              | PUT                             | Create an Individual IPTV Configuration resource identified by {configurationId}, or modify all the properties of an Individual IPTV Configuration resource identified by {configurationId}. |

|  |   | PATCH  | Modify some properties of an  |
|--|---|--------|---|
|  |   |        | Individual IPTV Configuration resource identified by {configurationId}.   |
|  |   | DELETE | Delete an Individual IPTV   |
|  |   |        | Configuration resource identified by {configurationId}  |
| Service Parameter<br>Data                  | /application-<br>data/serviceParamData<br>(NOTE 1)      | GET    | Retrieve the Service Parameter Data of given services, S-NSSAIs and DNNs or Internal Group Identifiers or SUPIs.  |
| Individual Service                         | /application-<br>data/serviceParamData/                 | PUT    | Create an individual Service Parameter Data resource identified by {serviceParamId}, or modify all of the properties of an individual Service Parameter Data resource identified by {serviceParamId}. |
| Parameter Data                             | {serviceParamId}<br>(NOTE 1)                            | PATCH  | Modify part of the properties of an individual Service Parameter Data resource identified by {serviceParamId}.  |
|  |   | DELETE | Delete an individual Service Parameter Data resource identified by {serviceParamId}.  |
| AM Influence Data                          | /application-data/am-influence-<br>data                 | GET    | Retrieve the AM Influence Data of given S-NSSAIs and DNNs and/or Internal Group Identifiers or SUPIs or for LBO roaming scenarios, any inbound roaming UEs identified by their home PLMN ID(s).       |
| Individual AM                              | /application-data/am-influence-                         | PUT    | Create an individual AM Influence Data resource identified by {amInfluenceId}, or modify all of the properties of an individual AM Influence Data resource identified by {amInfluenceId}.             |
| Influence Data                             | data/{amInfluenceId}                                    | PATCH  | Modify part of the properties of an individual AM Influence Data resource identified by {amInfluenceId}.  |
|  |   | DELETE | Delete an individual AM Influence Data resource identified by {amInfluenceId}.  |
|  |   | POST   | Create a subscription to receive notification of application data changes.  |
| ApplicationDataSubs criptions              | /application-data/subs-to-notify                        | GET    | Read all the subscriptions, or subscriptions for given S-NSSAI and DNN or Internal Group Identifier or SUPI.  |
|  |   | PUT    | Modify a subscription to receive notification of application data changes identified by {subsld}.   |
| IndividualApplication DataSubscription     | /application-data/subs-to-notify/<br>{subsId}           | DELETE | Delete a subscription identified by {subsld}.   |
| ·  |   | GET    | Read an existing individual Subscription resource identified by {subsld}.   |
| EAS Deployment<br>Information Data         | /application-data/eas-deploy-data                       | GET    | Retrieve the EAS Deployment<br>Information Data, given DNN(s), S-<br>NSSAI(s), Application ID or Internal<br>Group Identifiers.   |
| Individual EAS Deployment Information Data | /application-data/eas-deploy-<br>data/{easDeployInfold} | GET    | Read an existing individual EAS Deployment Data identified by {easDeployInfold}.  |

| Individual UE ID                         | /application-data/ueid-            | GET    | Retrieve an existing "Individual UE ID   |
| Mapping                                  | mappings/{ueMappingId}             |        | Mapping" resource.   |
|  |                                    | PUT    | Create or Update a UE ID Mapping.  |
|  |                                    |        | (NOTE 2)   |
|  |                                    | DELETE | Delete an existing "Individual UE ID   |
|  |                                    |        | Mapping" resource.   |

NOTE 1: The path segment does not follow the related naming convention defined in 3GPP TS 29.501 [5]. The path segment is kept though as defined in the current specification for backward compatibility considerations.

NOTE 2: Ranging/Sidelink UE ID Mapping information between Application Layer ID and GPSI may also be pre-

### 6.2.3 Resource: PFD Data

provisioned by the operator.

### 6.2.3.1 Description

The PFD Data resource represents all the PFD Datas to the Nudr\_DataRepository Service at a given UDR.

### 6.2.3.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/pfds

Table 6.2.3.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

### 6.2.3.3 Resource Standard Methods

#### 6.2.3.3.1 GET

This method shall support the URI query parameters specified in table 6.2.3.3.1-1.

Table 6.2.3.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type   | Р | Cardinality | Description   |  |
|-----------|---|---|-------------|---|--|
| appld     | array(ApplicationId)  | 0 | 1N          | Contains the information of the application identifier(s) for the |  |
|           |   |   |             | querying PFD Data resource.                                       |  |
| (NOTE)    |   |   |             | If the appld query paremeter is not included in the URI, the      |  |
|           |   |   |             | query applies to all application identifier(s) for the querying   |  |
|           |   |   |             | PFD Data resource.  |  |
|           |   |   |             | If the appld array contains one or more ApplicationId entries,    |  |
|           |   |   |             | the UDR returns an Individual PFD Data resource                   |  |
|           |   |   |             | representation for each matched ApplicationId.                    |  |
| supp-feat | SupportedFeatures   | 0 | 01          | The features supported by the NF service consumer.                |  |
| NOTE: The | NOTE: The query parameter does not follow the related naming convention (i.e. "lower-with-hyphen") defined in |   |             |   |  |
| cla       | clause 5.1.3.3 of 3GPP TS 29.501 [7]. This query parameter is however kept as currently defined in this       |   |             |   |  |
|           | specification for backward compatibility considerations.  |   |             |   |  |

This method shall support the request data structures specified in table 6.2.3.3.1-2 and the response data structures and response codes specified in table 6.2.3.3.1-3.

Table 6.2.3.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.3.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type                      | Р | Cardinality | Response codes | Description  |  |
|--------------------------------|---|-------------|----------------|--|--|
| array(PfdDataForAppE xt)       | M | 0N          |                | A representation of PFDs for request applications is returned. |  |
| NOTE: The mandator also apply. | , |             |                |  |  |

### 6.2.4 Resource: Individual PFD Data

### 6.2.4.1 Description

The Individual PFD Data resource represents Individual PFD Datas to the Nudr\_DataRepository Service at a given UDR.

### 6.2.4.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/pfds/{appId}

This resource shall support the resource URI variables defined in table 6.2.4.2-1.

Table 6.2.4.2-1: Resource URI variables for this resource

| Name    | Data type     | Definition   |
|---------|---------------|--|
| apiRoot | string        | See 3GPP TS 29.504 [6] clause 6.1.1.                         |
| appld   | ApplicationId | Indicates the application identifier for the request pfd(s). |
|         |               | Data type ApplicationId is defined in 3GPP TS 29.571 [7].    |

### 6.2.4.3 Resource Standard Methods

#### 6.2.4.3.1 GET

This method shall support the URI query parameters specified in table 6.2.4.3.1-1.

Table 6.2.4.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type         | Р | Cardinality | Description  |
|-----------|-------------------|---|-------------|--|
| supp-feat | SupportedFeatures | 0 | 01          | The features supported by the NF service consumer. |

This method shall support the request data structures specified in table 6.2.4.3.1-2 and the response data structures and response codes specified in table 6.2.4.3.1-3.

Table 6.2.4.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.4.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | P | Cardinality | Response codes | Description  |  |
|--|---|-------------|----------------|--|--|
| PfdDataForAppEx<br>t   | М | 1           |                | A representation of PFDs for the request application identified by the application identifier is returned. |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |

#### 6.2.4.3.2 DELETE

This method shall support the URI query parameters specified in table 6.2.4.3.2-1.

Table 6.2.4.3.2-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.4.3.2-2 and the response data structures and response codes specified in table 6.2.4.3.2-3.

Table 6.2.4.3.2-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.4.3.2-3: Data structures supported by the DELETE Response Body on this resource

| Data type | Р | Cardinality | Response codes | Description  |  |  |  |
|-----------|---|-------------|----------------|--|--|--|--|
| n/a       |   |             |                | Successful case. The Individual PFD Data resource related to the application identifier was deleted. |  |  |  |
|           |   |             |                |  |  |  |  |

#### 6.2.4.3.3 PUT

This method shall support the URI query parameters specified in table 6.2.4.3.3-1.

Table 6.2.4.3.3-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.4.3.3-2 and the response data structures and response codes specified in table 6.2.4.3.3-3.

Table 6.2.4.3.3-2: Data structures supported by the PUT Request Body on this resource

| Data type       | P | Cardinality | Description  |
|-----------------|---|-------------|--|
| PfdDataForAppEx | М | 1           | Contains the information for the creation or modification of an individual PFD |
| t               |   |             | Data resource.   |

Table 6.2.4.3.3-3: Data structures supported by the PUT Response Body on this resource

| Data type  | Р | Cardinality | Response codes    | Description   |  |
|--|---|-------------|-------------------|---|--|
| PfdDataForAppE<br>xt   | М | 1           | 201 Created       | The resource has been successfully created and a response body is returned containing a representation of the resource. |  |
| PfdDataForAppE<br>xt   | М | 1           | 200 OK            | The resource has been successfully updated and a response body is returned containing a representation of the resource. |  |
| n/a  |   |             | 204 No<br>Content | The resource has been successfully updated.   |  |
| NOTE: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                   |   |  |

Table 6.2.4.3.3-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description  |
|----------|-----------|---|-------------|--|
| Location | string    | M |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/application-data/pfds/{appld}</apiversion> |

### 6.2.5 Resource: Influence Data

### 6.2.5.1 Description

The Influence Data resource represents a Traffic Influence Data to the Nudr\_DataRepository Service at a given UDR.

#### 6.2.5.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/influenceData

This resource shall support the resource URI variables defined in table 6.2.5.2-1.

Table 6.2.5.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

### 6.2.5.3 Resource Standard Methods

#### 6.2.5.3.1 GET

This method shall support the URI query parameters specified in table 6.2.5.3.1-1.

Table 6.2.5.3.1-1: URI query parameters supported by the GET method on this resource

| Name                       | Data type          | Р | Cardinality | Description   |
|----------------------------|--------------------|---|-------------|---|
| influence-lds              | array(string)      | 0 | 1N          | Each element identifies a influenceld, i.e. an Individual   |
| (NOTE 2)                   |                    |   |             | Influence Data resource. (NOTE 1)   |
| dnns                       | array(Dnn)         | Ο | 1N          | Each element identifies a DNN. The UDR shall return only Individual Influence Data resource(s) that match one of the provided DNNs. (NOTE 1)                            |
| snssais                    | array(Snssai)      | 0 | 1N          | Each element identifies a slice. The UDR shall return only Individual Influence Data resource(s) that match one of the provided S-NSSAIs. (NOTE 1)                      |
| internal-Group-Ids         | array(GroupId)     | 0 | 1N          | Each element identifies a group of users. The UDR shall return only Individual Influence Data resource(s) that  |
| (NOTE 2)                   |                    |   |             | match one of the provided internal group IDs within the "interGroupId" attribute.  (NOTE 1)   |
| internal-group-ids-<br>Add | array(GroupId)     | 0 | 1N          | Each element identifies an internal group id. The UDR shall return only Individual Influence Data resource(s) that match all the provided internal group IDs within the |
| (NOTE 2)                   |                    |   |             | "interGroupIdList" attribute.   |
| subscriber-categories      | array(string)      | 0 | 1N          | Each element identifies a subscriber category. The UDR shall return only Individual Influence Data resource(s) that match all the provided subscriber category(ies).    |
| supis                      | array(Supi)        | 0 | 1N          | Each element identifies a user. The UDR shall return only Individual Influence Data resource(s) that match one of the provided SUPIs. (NOTE 1)                          |
| supp-feat                  | SupportedFeatur es | 0 | 01          | Identifies the features supported by the NF service consumer.   |

NOTE 1: At least one of the "influence-lds", "dnns", "snssais", "internal-Group-lds", "internal-group-ids-Add" (may be included when FinerGranUEs feature is supported) or "supis" query parameters shall be provided.

NOTE 2: The query parameter does not follow the related naming convention (i.e. "lower-with-hyphen") defined in clause 5.1.3.3 of 3GPP TS 29.501 [7]. This query parameter is however kept as currently defined in this specification for backward compatibility considerations.

NOTE: The combination of a."internal-Goup-Ids" and the "supis", b."internal-group-ids-Add" and the "supis", c."subscriber-categories" and the "supis" and d. "internal-Group-Ids" and the "internal-group-ids-Add" query parameter represent mutually exclusive resource properties, i.e., if both query parameters are simultaneously present in the same request, the search will not match any resource.

When the request query contains more than one optional query parameters defined as an array, the UDR shall return the Individual Influence Data resources for each matching combination of the values of the elements of the array of the provided query parameters.

EXAMPLE:

If "snssais" query parameter is included with two S-NSSAI entries (S-NSSAI\_1 and S-NSSAI\_2) and "dnns" is included with two DNN entries (e.g. DNN\_A and DNN\_B), and the other optional query parameters are not included, the UDR shall return the Individual Influence Data resources for each matching S-NSSAI and DNN combination (for all the possible values for supi and groupId), i.e., the resource(s) matching SNSSAI\_1 and DNN\_A, the resource(s) matching SNSSAI\_1 and DNN\_B, the resource(s) matching SNSSAI\_2 and DNN\_A, and the resource(s) matching SNSSAI\_2 and DNN\_B.

To query for the Individual Influence Data resource(s) that apply to any UE, an entry of the "internal-Group-Ids" shall be set to "AnyUE".

This method shall support the request data structures specified in table 6.2.5.3.1-2 and the response data structures and response codes specified in table 6.2.5.3.1-3.

Table 6.2.5.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.5.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type               | Р    | Cardinality     | Response codes  | Description  |
|-------------------------|------|-----------------|-----------------|--|
| array(TrafficInfluData) | М    | 0N              | 200 OK          | The Traffic Influence Data stored in the UDR are returned. |
| NOTE: The mandator      | y HT | TP error status | codes for the G | ET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4]  |
| also apply.             |      |                 |                 |  |

### 6.2.6 Resource: Individual Influence Data

### 6.2.6.1 Description

The Individual Influence Data resource represents an Individual Traffic Influence Data to the Nudr\_DataRepository Service at a given UDR.

#### 6.2.6.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/influenceData/{influenceId}

This resource shall support the resource URI variables defined in table 6.2.6.2-1.

Table 6.2.6.2-1: Resource URI variables for this resource

| Name        | Data type | Definition  |
|-------------|-----------|---|
| apiRoot     | string    | See 3GPP TS 29.504 [6] clause 6.1.1.  |
| influenceId |           | The Identifier of an Individual Influence Data to be created or updated.  To enable the value to be used as part of a URI, the string shall only contain allowed characters according to the "lower-with-hyphen" naming convention defined in clause 5.1.3 of 3GPP TS 29.501 [5]. |

### 6.2.6.3 Resource Standard Methods

#### 6.2.6.3.1 PUT

This method shall support the URI query parameters specified in table 6.2.6.3.1-1.

Table 6.2.6.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.6.3.1-2 and the response data structures and response codes specified in table 6.2.6.3.1-3.

Table 6.2.6.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type        | Р | Cardinality | Description   |
|------------------|---|-------------|---|
| TrafficInfluData | М | 1           | The Traffic Influence Data to be stored in the UDR. |

Table 6.2.6.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |  |  |
|--|---|-------------|----------------|---|--|--|--|
| TrafficInfluData   | М | 1           | 201 Created    | The resource has been successfully created and a response body is returned containing a representation of the resource. |  |  |  |
| TrafficInfluData   | М | 1           | 200 OK         | The resource has been successfully updated and a response body is returned containing a representation of the resource. |  |  |  |
| n/a  |   |             | 204 No Content | The resource has been successfully updated.   |  |  |  |
| NOTE: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |  |

Table 6.2.6.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | M |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/application-data/influenceData/{influenceId}</apiversion> |

### 6.2.6.3.2 PATCH

This method shall support the URI query parameters specified in table 6.2.6.3.2-1.

Table 6.2.6.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.6.3.2-2 and the response data structures and response codes specified in table 6.2.6.3.2-3.

Table 6.2.6.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type             | Р | Cardinality | Description  |
|-----------------------|---|-------------|--|
| TrafficInfluDataPatch | М | 1           | The Traffic Influence Data to be updated in the UDR. |

Table 6.2.6.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |
|--|---|-------------|----------------|---|--|
| TrafficInfluData   | М | 1           | 200 OK         | The update of an Individual Traffic Influence Data resource is confirmed and a response body containing Traffic Influence Data shall be returned. |  |
| n/a  |   |             | 204 No Content | The Individual Traffic Influence Data resource has been successfully updated.   |  |
| NOTE: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |

#### 6.2.6.3.3 DELETE

This method shall support the URI query parameters specified in table 6.2.6.3.3-1.

Table 6.2.6.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.6.3.3-2 and the response data structures and response codes specified in table 6.2.6.3.3-3.

Table 6.2.6.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.6.3.3-3: Data structures supported by the DELETE Response Body on this resource

| Data type | P | Cardinality Response codes  |  | Description   |  |  |  |
|-----------|---|---|--|---|--|--|--|
| n/a       |   | 204 No Content  |  | The Individual Influence Data was deleted successfully. |  |  |  |
|           |   | atory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of 29.500 [4] also apply. |  |   |  |  |  |

# 6.2.7 Resource: Influence Data Subscription

### 6.2.7.1 Description

The Influence Data Subscription resource represents all Influence Data subscriptions to the Nudr\_DataRepository Service at a given UDR.

#### 6.2.7.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/influenceData/subs-to-notify

This resource shall support the resource URI variables defined in table 6.2.7.2-1.

Table 6.2.7.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

### 6.2.7.3 Resource Standard Methods

### 6.2.7.3.1 POST

This method shall support the URI query parameters specified in table 6.2.7.3.1-1.

Table 6.2.7.3.1-1: URI query parameters supported by the POST method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.7.3.1-2 and the response data structures and response codes specified in table 6.2.7.3.1-3.

Table 6.2.7.3.1-2: Data structures supported by the POST Request Body on this resource

| Data type       | Р | Cardinality | Description  |
|-----------------|---|-------------|--|
| TrafficInfluSub | M | 1           | Parameters to register a subscription to Traffic Influence Data. |

Table 6.2.7.3.1-3: Data structures supported by the POST Response Body on this resource

| Data type       | Р                              | Cardinality  | Response   | Description                                |  |  |  |  |
|-----------------|--------------------------------|--------------|--|--|--|--|--|--|
|                 |                                |              | codes  |  |  |  |  |  |
| TrafficInfluSub | М                              | 1            | 201 Created  | The subscription was created successfully. |  |  |  |  |
| NOTE: The man   | dator                          | y HTTP error | HTTP error status codes for the POST method listed in table 5.2.7.1-1 of |  |  |  |  |  |
| 3GPP TS         | 3GPP TS 29.500 [4] also apply. |              |  |  |  |  |  |  |

Table 6.2.7.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description  |
|----------|-----------|---|-------------|--|
| Location | string    | М |             | Contains the URI of the newly created resource, according to             |
|          |           |   |             | the structure: {apiRoot}/nudr-dr/ <apiversion>/application-</apiversion> |
|          |           |   |             | data/influenceData/subs-to-notify/{subscriptionId}                       |

#### 6.2.7.3.2 GET

This method shall support the URI query parameters specified in table 6.2.7.3.2-1.

Table 6.2.7.3.2-1: URI query parameters supported by the GET method on this resource

| Name                          | Data type      | Р | Cardinality | Description  |
|-------------------------------|----------------|---|-------------|--|
| dnn                           | Dnn            | 0 | 01          | Identifies a DNN. (NOTE 1)   |
| snssai                        | Snssai         | 0 | 01          | Identifies a slice. (NOTE 1)   |
| internal-Group-Id<br>(NOTE 3) | GroupId        | 0 | 01          | Identifies a group of users. (NOTE 1) (NOTE 2) (NOTE 4)                                      |
| internal-group-ids            | array(GroupId) | 0 | 1N          | Identifies a group of users that belong to all the listed internal groups. (NOTE 1) (NOTE 4) |
| subscriber-<br>categories     | array(string)  | 0 | 1N          | Identifies a list of subscriber category.  |
| supi                          | Supi           | 0 | 01          | Identifies a user.   |

NOTE 1: At least one of "dnn", "snssai" or "internal-Group-Id" or "internal-group-ids" (may be included when FinerGranUEs feature is supported) shall be provided.

NOTE 2: For the Traffic Influence Data applies to any UE, the "internal-Group-Id" sets to "AnyUE".

NOTE 3: The query parameter does not follow the related naming convention (i.e. "lower-with-hyphen") defined in clause 5.1.3.3 of 3GPP TS 29.501 [7]. This query parameter is however kept as currently defined in this specification for backward compatibility considerations.

NOTE 3: Attributes "internal-Group-Id" and "internal-group-ids" are mutually exclusive attributes.

This method shall support the request data structures specified in table 6.2.7.3.2-2 and the response data structures and response codes specified in table 6.2.7.3.2-3.

Table 6.2.7.3.2-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.7.3.2-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |
|--|---|-------------|----------------|---|--|
| array(TrafficInfluSub)   | М | 0N          |                | The subscription information as request in the request URI query parameter(s) are returned. |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |

## 6.2.8 Resource: Individual Influence Data Subscription

### 6.2.8.1 Description

The Individual Influence Data Subscription resource represents a single Influence Data subscription to the Nudr\_DataRepository Service at a given UDR.

#### 6.2.8.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/influenceData/subs-to-notify/{subscriptionId}

This resource shall support the resource URI variables defined in table 6.2.8.2-1.

Table 6.2.8.2-1: Resource URI variables for this resource

| Name           | Data type | Definition   |
|----------------|-----------|--|
| apiRoot        | string    | See 3GPP TS 29.504 [6] clause 6.1.1.   |
| subscriptionId | string    | Identifies an Individual Influence Data Subscription resource. To enable the value to be used as part of a URI, the string shall only contain allowed characters according to the "lower-with-hyphen" naming convention defined in clause 5.1.3 of 3GPP TS 29.501 [5]. |

#### 6.2.8.3 Resource Standard Methods

#### 6.2.8.3.1 GET

This method shall support the URI query parameters specified in table 6.2.8.3.1-1.

Table 6.2.8.3.1-1: URI query parameters supported by the GET method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.8.3.1-2 and the response data structures and response codes specified in table 6.2.8.3.1-3.

Table 6.2.8.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.8.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type       | Р | Cardinality | Response codes | Description                               |
|-----------------|---|-------------|----------------|---|
| TrafficInfluSub | М | 1           | 200 OK         | The subscription information is returned. |

#### 6.2.8.3.2 PUT

This method shall support the URI query parameters specified in table 6.2.8.3.2-1.

Table 6.2.8.3.2-1: URI query parameters supported by the PUT method on this resource

| I | Name | Data type | Р | Cardinality | Description |
|---|------|-----------|---|-------------|-------------|
| Ī | n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.8.3.2-2 and the response data structures and response codes specified in table 6.2.8.3.2-3.

Table 6.2.8.3.2-2: Data structures supported by the PUT Request Body on this resource

|   | Data type       | Р | Cardinality | Description  |  |
|---|-----------------|---|-------------|--|--|
| Ī | TrafficInfluSub | M | 1           | Modify an existing subscription to Traffic Influence Data. |  |

Table 6.2.8.3.2-3: Data structures supported by the PUT Response Body on this resource

| Data type  | Р           | Cardinality | Response codes | Description                                     |  |  |  |
|--|-------------|-------------|----------------|---|--|--|--|
|  |             |             | codes          |   |  |  |  |
| TrafficInfluSub  | М           | 1           | 200 OK         | The subscription was updated successfully.      |  |  |  |
| n/a  |             |             | 204 No Content | The subscription has been successfully updated. |  |  |  |
| NOTE: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] |             |             |                |   |  |  |  |
| also app   | also apply. |             |                |   |  |  |  |

#### 6.2.8.3.3 DELETE

This method shall support the URI query parameters specified in table 6.2.8.3.3-1.

Table 6.2.8.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.8.3.3-2 and the response data structures and response codes specified in table 6.2.8.3.3-3.

Table 6.2.8.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.8.3.3-3: Data structures supported by the DELETE Response Body on this resource

|     | Data type         | Р                              | Cardinality Response codes   |                | Description                                   |  |  |
|-----|-------------------|--------------------------------|--|----------------|---|--|--|
| n/a |                   |                                |  | 204 No Content | The subscription was terminated successfully. |  |  |
| NO  | TE: The ma        | ndat                           | ory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of |                |   |  |  |
|     | 3GPP <sup>-</sup> | 3GPP TS 29.500 [4] also apply. |  |                |   |  |  |

### 6.2.9 Resource: Applied BDT Policy Data

### 6.2.9.1 Description

The Applied BDT Policy Data resource represents an applied BDT Policy Data to the Nudr\_DataRepository Service at a given UDR.

### 6.2.9.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/bdtPolicyData

This resource shall support the resource URI variables defined in table 6.2.9.2-1.

Table 6.2.9.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

#### 6.2.9.3 Resource Standard Methods

#### 6.2.9.3.1 GET

This method shall support the URI query parameters specified in table 6.2.9.3.1-1.

Table 6.2.9.3.1-1: URI query parameters supported by the GET method on this resource

| Name               | Data type      | Р | Cardinality | Description  |
|--------------------|----------------|---|-------------|--|
| bdt-policy-ids     | array(string)  | 0 | 1N          | Each element identifies a bdtPolicyld, i.e., an identifier of<br>an Individual BDT Policy Data resource. The UDR shall<br>return an Individual Applied BDT Policy Data resource<br>for each matched bdtPolicyld. |
| internal-group-ids | array(GroupId) | 0 | 1N          | Each element identifies a group of users. The UDR shall return only Individual Applied BDT Policy Data resource(s) that match one of the provided internal group ID(s).  |
| supis              | array(Supi)    | 0 | 1N          | Each element identifies a user. The UDR shall return only Individual Applied BDT Policy Data resource(s) that match one of the provided SUPI(s).   |

NOTE: The "internal-group-ids" and the "supis" query parameters represent mutually exclusive resource properties, i.e., if both query parameters are simultaneously present in the same request, the search will not match any resource.

When the request contains the "bdt-policy-ids" and the "internal-group-ids" or "supis" query parameters, the UDR shall return the resource(s) that match any combination of the values of the "bdt-policy-ids" and the "internal-group-ids" or "supis" arrays.

**EXAMPLE:** 

If "bdt-policy-ids" query parameter is included with two bdtPolicyId entries (bdtPolicyId\_1 and bdtPolicyId\_2) and "supis" is included with two SUPI entries (e.g. SUPI\_A and SUPI\_B), the UDR shall return the Individual BDT Policy Data resource(s) for each matching bdtPolicyId and SUPI combination i.e., the resource(s) matching bdtPolicyId\_1 and SUPI\_A or SUPI\_B, and the resource(s) matching bdtPolicyId\_2 and SUPI A or SUPI\_B (note that other combinations are not possible).

This method shall support the request data structures specified in table 6.2.9.3.1-2 and the response data structures and response codes specified in table 6.2.9.3.1-3.

Table 6.2.9.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.9.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |  |
|--|---|-------------|----------------|---|--|--|
| array(BdtPolicyData)   | М | 0N          |                | The applied BDT Policy Data stored in the UDR are returned. |  |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |

## 6.2.10 Resource: Individual Applied BDT Policy Data

### 6.2.10.1 Description

The Individual Applied BDT Policy Data resource represents an Individual Applied BDT Policy Data to the Nudr\_DataRepository Service at a given UDR.

#### 6.2.10.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/bdtPolicyData/{bdtPolicyId}

This resource shall support the resource URI variables defined in table 6.2.10.2-1.

Table 6.2.10.2-1: Resource URI variables for this resource

| Name        | Data type | Definition  |
|-------------|-----------|---|
| apiRoot     | string    | See 3GPP TS 29.504 [6] clause 6.1.1.  |
| bdtPolicyId | string    | The Identifier of an Individual BDT Policy Data to be created or updated. To enable the value to be used as part of a URI, the string shall only contain allowed characters according to the "lower-with-hyphen" naming convention defined in clause 5.1.3 of 3GPP TS 29.501 [5]. |

### 6.2.10.3 Resource Standard Methods

### 6.2.10.3.1 PUT

This method shall support the URI query parameters specified in table 6.2.10.3.1-1.

Table 6.2.10.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.10.3.1-2 and the response data structures and response codes specified in table 6.2.10.3.1-3.

Table 6.2.10.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type     | Р | Cardinality | Description  |
|---------------|---|-------------|--|
| BdtPolicyData | М | 1           | The applied BDT Policy Data to be stored in the UDR. |

Table 6.2.10.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type     | Р | Cardinality | Response codes | Description   |  |  |  |
|---------------|---|-------------|----------------|---|--|--|--|
| BdtPolicyData | М | 1           | 201 Created    | The resource has been successfully created and a response body is returned containing a representation of the resource. |  |  |  |
|               |   |             |                |   |  |  |  |

Table 6.2.10.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | М |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/application-data/bdtPolicyData/{bdtPolicyId}</apiversion> |

#### 6.2.10.3.2 PATCH

This method shall support the URI query parameters specified in table 6.2.10.3.2-1.

Table 6.2.10.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.10.3.2-2 and the response data structures and response codes specified in table 6.2.10.3.2-3.

Table 6.2.10.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type          | Р | Cardinality | Description   |
|--------------------|---|-------------|---|
| BdtPolicyDataPatch | М | 1           | The applied BDT Policy Data to be updated in the UDR. |

Table 6.2.10.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data type   | Р      | Cardinality     | Response codes | Description  |  |  |
|---|--------|-----------------|----------------|--|--|--|
| BdtPolicyData   | M      | 1               | 200 OK         | The update of an applied BDT Policy Data resource is confirmed and a response body containing applied BDT Policy Data shall be returned. |  |  |
| n/a   |        |                 | 204 No Content | The update of an applied BDT Policy Data resource is confirmed.  |  |  |
| NOTE: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of |        |                 |                |  |  |  |
| 3GPP TS   | 3 29.5 | 600 [4] also ap | ply.           |  |  |  |

#### 6.2.10.3.3 DELETE

This method shall support the URI query parameters specified in table 6.2.10.3.3-1.

Table 6.2.10.3.3-1: URI query parameters supported by the DELETE method on this resource

| Ī | Name | Data type | Р | Cardinality | Description |
|---|------|-----------|---|-------------|-------------|
| Ī | n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.10.3.3-2 and the response data structures and response codes specified in table 6.2.10.3.3-3.

Table 6.2.10.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.10.3.3-3: Data structures supported by the DELETE Response Body on this resource

| Data type   | P | Cardinality | Response codes | Description  |  |  |
|---|---|-------------|----------------|--|--|--|
| n/a   |   |             |                | The Individual Applied BDT Policy Data was deleted successfully. |  |  |
| NOTE: The mandatory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |

## 6.2.11 Resource: IPTV Configurations

### 6.2.11.1 Description

This resource allows the NF service consumer to read all active IPTV Configurations applicable for given configuration identifier(s), DNN(s) and/or S-NSSAI(s), SUPI(s) or Internal Group Identifier(s) stored at the UDR.

#### 6.2.11.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/iptvConfigData

This resource shall support the resource URI variables defined in table 6.2.11.2-1.

Table 6.2.11.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

#### 6.2.11.3 Resource Standard Methods

#### 6.2.11.3.1 GET

This method shall support the URI query parameters specified in table 6.2.11.3.1-1.

Table 6.2.11.3.1-1: URI query parameters supported by the GET method on this resource

| Name              | Data type              | P      | Cardinality     | Description   |
|-------------------|------------------------|--------|-----------------|---|
| config-ids        | array(string)          | 0      | 1N              | Each element identifies a configurationId, i.e. an Individual IPTV Configuration resource. The UDR shall return an Individual IPTV Configuration resource for each matched configurationId. |
| dnns              | array(Dnn)             | 0      | 1N              | Each element identifies a DNN. The UDR shall return only Individual IPTV Configuration resource(s) that match one of the provided DNN(s).   |
| snssais           | array(Snssai)          | 0      | 1N              | Each element identifies a slice. The UDR shall return only Individual IPTV Configuration resource(s) that match one of the provided S-NSSAI(s).   |
| supis             | array(Supi)            | 0      | 1N              | Each element identifies a SUPI. The UDR shall return only Individual IPTV Configuration resource(s) that match one of the provided SUPI(s).   |
| inter-group-ids   | array(GroupId)         | 0      | 1N              | Each element identifies a group of users. The UDR shall return only Individual IPTV Configuration resource(s) that match one of the provided internal group ID(s).                          |
| NOTE: At least or | ne of the above attrib | utes s | hall be provide | ed.   |

NOTE: The "inter-group-ids" and the "supis" query parameters represent mutually exclusive resource properties, i.e., if both query parameters are simultaneously present in the same request, the search will not match any resource.

When the request query contains more than one optional query parameters defined as an array, the UDR shall return the Individual IPTV Configuration resources for each matching combination of the values of the provided query parameters.

**EXAMPLE:** 

If "snssais" query parameter is included with two S-NSSAI entries (S-NSSAI\_1 and S-NSSAI\_2) and "dnns" is included with two DNN entries (e.g. DNN\_A and DNN\_B), and the other optional query parameters are not included, the UDR shall return IPTV Configuration resources for each matching (for all the possible values for supi, and groupId), i.e. the resource(s) matching SNSSAI\_1 and DNN\_A, the resource(s) matching SNSSAI\_1 and DNN\_B, the resource(s) matching SNSSAI\_2 and DNN\_A, and the resources matching SNSSAI\_2 and DNN\_B.

This method shall support the request data structures specified in table 6.2.11.3.1-2 and the response data structures and response codes specified in table 6.2.11.3.1-3.

Table 6.2.11.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.11.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |  |
|--|---|-------------|----------------|---|--|--|
| array(IptvConfigData)  | М | 0N          |                | The IPTV configuration data stored in the UDR are returned. |  |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |

### 6.2.12 Resource: Individual IPTV Configuration

### 6.2.12.1 Description

The resource allows the NF sevice consumer to create an Individual IPTV configuration Data, modify or delete an existing Individual IPTV configuration Data.

### 6.2.12.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/iptvConfigData/{configurationId}

This resource shall support the resource URI variables defined in table 6.2.12.2-1.

Table 6.2.12.2-1: Resource URI variables for this resource

| Name            | Data type | Definition   |
|-----------------|-----------|--|
| apiRoot         | string    | See 3GPP TS 29.504 [6] clause 6.1.1.   |
| configurationId |           | The Identifier of an Individual IPTV Configuration to be created or updated. To enable the value to be used as part of a URI, the string shall only contain allowed characters according to the "lower-with-hyphen" naming convention defined in clause 5.1.3 of 3GPP TS 29.501 [5]. |

#### 6.2.12.3 Resource Standard Methods

### 6.2.12.3.1 PUT

This method shall support the URI query parameters specified in table 6.2.12.3.1-1.

Table 6.2.12.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.12.3.1-2 and the response data structures and response codes specified in table 6.2.12.3.1-3.

Table 6.2.12.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type      | Р | Cardinality | Description  |
|----------------|---|-------------|--|
| IptvConfigData | М | 1           | The IPTV configuration data to be stored in the UDR. |

Table 6.2.12.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |  |  |
|--|---|-------------|----------------|---|--|--|--|
| IptvConfigData   | М | 1           | 201 Created    | The resource has been successfully created and a response body is returned containing a representation of the resource. |  |  |  |
| IptvConfigData   | М | 1           | 200 OK         | The resource has been successfully updated and a response body is returned containing a representation of the resource. |  |  |  |
| n/a  |   |             | 204 No Content | The resource has been successfully updated.   |  |  |  |
| NOTE: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |  |

Table 6.2.12.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description  |
|----------|-----------|---|-------------|--|
| Location | string    | М |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/application-data/iptvConfigData/{configurationId}</apiversion> |

### 6.2.12.3.2 DELETE

This method shall support the URI query parameters specified in table 6.2.12.3.2-1.

Table 6.2.12.3.2-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.12.3.2-2 and the response data structures and response codes specified in table 6.2.12.3.2-3.

Table 6.2.12.3.2-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.12.3.2-3: Data structures supported by the DELETE Response Body on this resource

| Data typ | ре | Р | Cardinality                     | Response codes   | Description                            |  |  |  |  |
|----------|----|---|---------------------------------|--|--|--|--|--|--|
| n/a      |    |   |                                 | 204 No Content   | The resource was deleted successfully. |  |  |  |  |
| NOTE:    |    |   | atory HTTP ei<br>29.500 [4] als | error status codes for the DELETE method listed in table 5.2.7.1-1 of lso apply. |  |  |  |  |  |

#### 6.2.12.3.3 PATCH

This method shall support the URI query parameters specified in table 6.2.12.3.3-1.

Table 6.2.12.3.3-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.12.3.3-2 and the response data structures and response codes specified in table 6.2.12.3.3-3.

Table 6.2.12.3.3-2: Data structures supported by the PATCH Request Body on this resource

| Data type           | Р | Cardinality | Description   |
|---------------------|---|-------------|---|
| IptvConfigDataPatch | М | 1           | The IPTV configuration related data to be updated in the UDR. |

Table 6.2.12.3.3-3: Data structures supported by the PATCH Response Body on this resource

| Data type  | Р | Cardinality | Response       | Description                                 |  |  |
|--|---|-------------|----------------|---|--|--|
|  |   |             | codes          |   |  |  |
| IptvConfigData   | М | 1           | 200 OK         | The resource has been successfully updated. |  |  |
| n/a  |   |             | 204 No Content | The resource has been successfully updated. |  |  |
| NOTE: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |

## 6.2.13 Resource: Application Data Subscriptions

### 6.2.13.1 Description

This resource is used to represent subscriptions to notification of application data modification, e.g. PFD data change, IPTV configuration data change, BDT policy data change, but not for Traffic Influence Data.

#### 6.2.13.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/subs-to-notify

This resource shall support the resource URI variables defined in table 6.2.13.2-1.

Table 6.2.13.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

### 6.2.13.3 Resource Standard Methods

#### 6.2.13.3.1 POST

This method shall support the URI query parameters specified in table 6.2.13.3.1-1.

Table 6.2.13.3.1-1: URI query parameters supported by the POST method on this resource

|   | Name | Data type | Р | Cardinality | Description |
|---|------|-----------|---|-------------|-------------|
| n | /a   |           |   |             |             |

This method shall support the request data structures specified in table 6.2.13.3.1-2 and the response data structures and response codes specified in table 6.2.13.3.1-3.

Table 6.2.13.3.1-2: Data structures supported by the POST Request Body on this resource

| Data type           | Р | Cardinality | Description   |
|---------------------|---|-------------|---|
| ApplicationDataSubs | М | 1           | Identifies the subscription to notification of application data modification. |

Table 6.2.13.3.1-3: Data structures supported by the POST Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description   |  |
|---|---|-------------|----------------|---|--|
| ApplicationDataS ubs  | M | 1           | 201 Created    | Upon success, a response body containing a representation of each Individual subscription resource shall be returned.  The HTTP response shall include a "Location" HTTP header that contains the resource URI of the created resource. |  |
| NOTE: The mandatory HTTP error status codes for the POST method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |

Table 6.2.13.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | M |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/application-data/subs-to-notify/{subsId}</apiversion> |

### 6.2.13.3.2 GET

This method shall support the URI query parameters specified in table 6.2.13.3.2-1.

Table 6.2.13.3.2-1: URI query parameters supported by the GET method on this resource

| Name        | Data type  | Р | Cardinality | Description   |
|-------------|------------|---|-------------|---|
| data-filter | DataFilter | Ο | 01          | Indicate the data filter (e.g. dnn) for the query. When present, the UDR shall return the IndividualApplicationDataSubscription resource(s) for which the indicated information in the "data-filter" query parameter matches an entry of the "dataFilters" property of the resource (i.e. within the resource representation in the ApplicationDataSubs data structure). If the values of the "dataFilters" entry match the values provided in the "data- filter" query parameter, then the entry is considered to be a match even if it contains further attributes, for which no value was provided in the "data-filter" query parameter. |

This method shall support the request data structures specified in table 6.2.13.3.2-2 and the response data structures and response codes specified in table 6.2.13.3.2-3.

Table 6.2.13.3.2-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.13.3.2-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |
|--|---|-------------|----------------|---|--|
| array(ApplicationDataS ubs)  | М | 0N          | 200 OK         | The subscription information as request in the request URI query parameter(s) are returned. |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |

### 6.2.14 Resource: Individual Application Data Subscription

### 6.2.14.1 Description

This resource is used to represent an individual subscription to notification of application data modification.

### 6.2.14.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/subs-to-notify/{subsId}

This resource shall support the resource URI variables defined in table 6.2.14.2-1.

Table 6.2.14.2-1: Resource URI variables for this resource

| Name    | Data type | Definition  |
|---------|-----------|---|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1.  |
| subsld  | string    | The subsld identifies an individual application data subscription to notifications. The value is allocated by the UDR during creation of the ApplicationDataSubscriptions resource. |

### 6.2.14.3 Resource Standard Methods

### 6.2.14.3.1 PUT

This method shall support the URI query parameters specified in table 6.2.14.3.1-1.

Table 6.2.14.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.14.3.1-2 and the response data structures and response codes specified in table 6.2.14.3.1-3.

Table 6.2.14.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type           | Р | Cardinality | Description  |
|---------------------|---|-------------|--|
| ApplicationDataSubs | M | 1           | Updates the subscription to notification of application data modification. |

Table 6.2.14.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type                       | Р    | Cardinality    | Response codes    | Description  |
|---------------------------------|------|----------------|-------------------|--|
| ApplicationDataSubs             | М    | 1              | 200 OK            | The individual subscription resource was updated successfully.   |
| n/a                             |      |                |                   | The individual subscription resource was updated successfully and no additional content is to be sent in the response message. |
| NOTE: The mandatory also apply. | HTTF | error status o | codes for the PUT | method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4]   |

### 6.2.14.3.2 DELETE

This method shall support the URI query parameters specified in table 6.2.14.3.2-1.

Table 6.2.14.3.2-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.14.3.2-2 and the response data structures and response codes specified in table 6.2.14.3.2-3.

Table 6.2.14.3.2-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description                      |
|-----------|---|-------------|----------------------------------|
| n/a       |   |             | The request body shall be empty. |

Table 6.2.14.3.2-3: Data structures supported by the DELETE Response Body on this resource

| Data t | уре    | P Cardinality |   | Response       | Description   |  |  |  |
|--------|--------|---------------|---|----------------|---|--|--|--|
|        |        |               |   | codes          |   |  |  |  |
| n/a    |        |               |   | 204 No Content | Upon success, an empty response body shall be returned. |  |  |  |
| NOTE:  | The ma | ındat         | ry HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of |                |   |  |  |  |
|        | 3GPP 7 | TS 29         | ).500 [4] also a  | ipply.         |   |  |  |  |

### 6.2.14.3.3 GET

This method shall support the URI query parameters specified in table 6.2.14.3.3-1.

Table 6.2.14.3.3-1: URI query parameters supported by the GET method on this resource

| Ī | Name | Data type | Р | Cardinality | Description |
|---|------|-----------|---|-------------|-------------|
| Ī | n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.14.3.3-2 and the response data structures and response codes specified in table 6.2.14.3.3-3.

Table 6.2.14.3.3-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.14.3.3-3: Data structures supported by the GET Response Body on this resource

| Data type           | Р | Cardinality | Response codes | Description                               |
|---------------------|---|-------------|----------------|---|
| ApplicationDataSubs | М | 1           | 200 OK         | The subscription information is returned. |

### 6.2.15 Resource: Service Parameter Data

### 6.2.15.1 Description

The Service Parameter Data resource represents a Service Parameter Data to the Nudr\_DataRepository Service at a given UDR.

### 6.2.15.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/serviceParamData

This resource shall support the resource URI variables defined in table 6.2.15.2-1.

Table 6.2.15.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

### 6.2.15.3 Resource Standard Methods

### 6.2.15.3.1 GET

This method shall support the URI query parameters specified in table 6.2.15.3.1-1.

Table 6.2.15.3.1-1: URI query parameters supported by the GET method on this resource

| Name               | Data type                     | Р | Cardinality | Description  | Applicability         |
|--------------------|-------------------------------|---|-------------|--|-----------------------|
| service-param-ids  | array(string)                 | 0 | 1N          | Each element identifies a serviceParamld, i.e., an Individual Service Parameter Data. The UDR shall return an Individual Service Parameter Data resource for each matched serviceParamld.  |                       |
| dnns               | array(Dnn)                    | 0 | 1N          | Each element identifies a DNN. The UDR shall return only Individual Service Parameter Data resource(s) that match one of the provided DNNs.  |                       |
| snssais            | array(Snssai)                 | 0 | 1N          | Each element identifies a slice. The UDR shall return only Individual Service Parameter Data resource(s) that match one of the provided S-NSSAIs.  |                       |
| internal-group-ids | array(GroupId)                | 0 | 1N          | Each element identifies a group of users. The UDR shall return only Individual Service Parameter Data resource(s) that match one of the provided internal group IDs.   |                       |
| supis              | array(Supi)                   | 0 | 1N          | Each element identifies a user. The UDR shall return only Individual Service Parameter Data resource(s) that match one of the provided SUPIs.  |                       |
| ue-ipv4s           | array(Ipv4Addr)               | 0 | 1N          | Each element identifies a user. The UDR shall return only Individual Service Parameter Data resource(s) that match one of the provided IPv4 addresses.   |                       |
| ue-ipv6s           | array(Ipv6Addr)               | 0 | 1N          | Each element identifies a user. The UDR shall return only Individual Service Parameter Data resource(s) that match one of the provided IPv6 addresses.   |                       |
| ue-macs            | array(MacAddr48<br>)          | 0 | 1N          | Each element identifies a user. The UDR shall return only Individual Service Parameter Data resource(s) that match one of the provided UE MAC addresses.   |                       |
| any-ue             | boolean                       | 0 | 01          | Indicates whether the request is for any UE: - "true": the request is for any UE; - "false"(default): the request is not for any UE. The UDR shall return only Individual Service Parameter Data resource(s) that match the any UE indication. | FilterAnyUE           |
| roam-ue-net-descs  | array(NetworkDe<br>scription) | 0 | 1N          | Each element identifies one or more PLMNs for the roaming UE. The UDR shall return only Service Parameter Data resource(s) that match at least one of the provided PLMN as described in the NetworkDescription data type.                      | VPLMNSpecificUR<br>SP |
| supp-feat          | SupportedFeatur es            | 0 | 01          | Identifies the features supported by the NF service consumer.  |                       |

NOTE 1: At least one of the "service-param-ids", "dnns", "snssais", "internal-group-ids", "supis", "ue-ipv4s", "ue-ipv6s" or "ue-macs", and if the feature FilterAnyUE is supported, or "any-ue", and if the feature VPLMNSpecificURSP is supported, or "roam-ue-net-descs" query parameters shall be provided.

NOTE: The "any-ue" query parameter is commonly related to the search of the service parameter data resource(s) that relate to any UE using the service identified by a combination of DNN and S-NSSAI, and thus, it is commonly present together with the "dnns" and "snssais" query parameters. Note that, if the "any-ue" query parameter is present together with the "internal-group-ids", "supis", "ue-ipv4s", "ue-ipv6s", "ue-macs" and/or "roam-ue-net-descs" query parameters the search will not match any resource, since according to clause 6.4.2.15 only one of the the "supi", "anyUeInd", "interGroupId", "ueIpv4", "ueIpv6" "ueMac" or "roam-ue-net-descs" properties are simultaneously present in the resource.

When the request query contains more than one optional query parameters defined as an array, the UDR shall return the Service Parameter Data resources for each matching combination of the values of the elements of the array of the provided query parameters.

**EXAMPLE:** 

If "snssais" query parameter is included with two S-NSSAI entries (S-NSSAI\_1 and S-NSSAI\_2) and "dnns" is included with two DNN entries (e.g. DNN\_A and DNN\_B), and the other optional query parameters are not included, the UDR shall return the Individual Service Parameter Data resources for each matching S-NSSAI and DNN, i.e., the resource(s) matching SNSSAI\_1 and DNN\_A, the resource(s) matching SNSSAI\_1 and DNN\_B, the resource(s) matching SNSSAI\_2 and DNN\_A, and the resources matching SNSSAI\_2 and DNN\_B.

This method shall support the request data structures specified in table 6.2.15.3.1-2 and the response data structures and response codes specified in table 6.2.15.3.1-3.

Table 6.2.15.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.15.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description  |  |
|--|---|-------------|----------------|--|--|
| array(ServiceParamete rData)   | М | 0N          |                | The Service Parameter Data stored in the UDR are returned. |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |

### 6.2.16 Resource: Individual Service Parameter Data

### 6.2.16.1 Description

The Individual Service Parameter Data resource represents an Individual Service Parameter Data to the Nudr\_DataRepository Service at a given UDR.

#### 6.2.16.2 Resource definition

 $Resource\ URI:\ \{apiRoot\}/nudr-dr/< apiVersion>/application-data/serviceParamData/\{serviceParamId\}\}$ 

This resource shall support the resource URI variables defined in table 6.2.16.2-1.

Table 6.2.16.2-1: Resource URI variables for this resource

| Name           | Data type | Definition   |
|----------------|-----------|--|
| apiRoot        | string    | See 3GPP TS 29.504 [6] clause 6.1.1.   |
| serviceParamId |           | The Identifier of an Individual Service Parameter Data to be created or updated. To enable the value to be used as part of a URI, the string shall only contain allowed characters according to the "lower-with-hyphen" naming convention defined in clause 5.1.3 of 3GPP TS 29.501 [5]. |

### 6.2.16.3 Resource Standard Methods

### 6.2.16.3.1 PUT

This method shall support the URI query parameters specified in table 6.2.16.3.1-1.

Table 6.2.16.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.16.3.1-2 and the response data structures and response codes specified in table 6.2.16.3.1-3.

Table 6.2.16.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type           | Р | Cardinality | Description   |
|---------------------|---|-------------|---|
| ServiceParameterDat | М | 1           | The Service Parameter Data to be stored in the UDR. |
| a                   |   |             |   |

Table 6.2.16.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type  | P | Cardinality | Response codes | Description   |  |  |  |
|--|---|-------------|----------------|---|--|--|--|
| ServiceParameter<br>Data   | М | 1           | 201 Created    | The resource has been successfully created and a response body is returned containing a representation of the resource. |  |  |  |
| ServiceParameter<br>Data   | М | 1           | 200 OK         | The resource has been successfully updated and a response body is returned containing a representation of the resource. |  |  |  |
| n/a  |   |             | 204 No Content | The resource has been successfully updated.   |  |  |  |
| NOTE: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |  |

Table 6.2.16.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | М |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/application-data/serviceParamData/{serviceParamId}</apiversion> |

#### 6.2.16.3.2 PATCH

This method shall support the URI query parameters specified in table 6.2.16.3.2-1.

Table 6.2.16.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.6.3.2-2 and the response data structures and response codes specified in table 6.2.6.3.2-3.

Table 6.2.16.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type            | Р | Cardinality | Description  |
|----------------------|---|-------------|--|
| ServiceParameterData | М | 1           | The Service Parameter Data to be updated in the UDR. |
| Patch                |   |             |  |

Table 6.2.16.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |
|--|---|-------------|----------------|---|--|
| ServiceParameter<br>Data   | М | 1           | 200 OK         | The update of an Individual Service Parameter Data resource is confirmed and a response body containing Service Parameter Data shall be returned. |  |
| n/a  |   |             | 204 No Content | The Individual Service Parameter Data resource has been successfully updated.   |  |
| NOTE: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |

#### 6.2.16.3.3 DELETE

This method shall support the URI query parameters specified in table 6.2.16.3.3-1.

Table 6.2.16.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.16.3.3-2 and the response data structures and response codes specified in table 6.2.16.3.3-3.

Table 6.2.16.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.16.3.3-3: Data structures supported by the DELETE Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description   |  |  |
|---|---|-------------|----------------|---|--|--|
| n/a   |   |             |                | The Individual Service Parameter Data was deleted successfully. |  |  |
| NOTE: The mandatory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |

### 6.2.17 Resource: AM Influence Data

### 6.2.17.1 Description

The AM Influence Data resource represents an AM Influence Data to the Nudr\_DataRepository Service at a given UDR.

### 6.2.17.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/am-influence-data

This resource shall support the resource URI variables defined in table 6.2.17.2-1.

Table 6.2.17.2-1: Resource URI variables for this resource

| Name Data type |        | Definition                           |  |  |
|----------------|--------|--------------------------------------|--|--|
| apiRoot        | string | See 3GPP TS 29.504 [6] clause 6.1.1. |  |  |

### 6.2.17.3 Resource Standard Methods

### 6.2.17.3.1 GET

This method shall support the URI query parameters specified in table 6.2.17.3.1-1.

Table 6.2.17.3.1-1: URI query parameters supported by the GET method on this resource

| Name               | Data type                       | Р | Cardinality | Description  | Applicability         |
|--------------------|---------------------------------|---|-------------|--|-----------------------|
| am-influence-ids   | array(string)                   | 0 | 1N          | Each element identifies a amInfluenceId, i.e., an identifier of an Individual AM Influence Data resource. The UDR shall return an Individual AM Influence Data resource that matches one of provided amInfluenceId(s).   |                       |
| dnns               | array(Dnn)                      | 0 | 1N          | Each element identifies a DNN. The UDR shall return only AM Influence Data resource(s) that match at least one of the DNN(s) of the array. (NOTE 2)  |                       |
| snssais            | array(Snssai)                   | 0 | 1N          | Each element identifies a slice. The UDR shall return only AM Influence Data resource(s) that match at least one of the S-NSSAI(s) of the array. (NOTE 2)  |                       |
| dnn-snssai-infos   | array(DnnSnssail<br>nformation) | 0 | 1N          | Each element identifies a combination of (DNN, S-NSSAI). The UDR shall return only AM Influence Data resource(s) that match at least one of the SNSSAI and DNN combination(s) of the array.  (NOTE 2)  |                       |
| internal-group-ids | array(GroupId)                  | 0 | 1N          | Each element identifies a group of users. The UDR shall return only AM Influence Data resource(s) that match one of the provided GroupId(s).   |                       |
| supis              | array(Supi)                     | 0 | 1N          | Each element identifies a user. The UDR shall return only AM Influence Data resource(s) that match one of the provided SUPI(s).  |                       |
| any-ue             | boolean                         | 0 | 01          | Indicates whether the request is for any non-roaming UE: - "true": the request is for any non-roaming UE; - "false"(default): the request is not for any non-roaming UE. The UDR shall return only AM Influence Data resource(s) that contain the Any UE indication. |                       |
| roam-ue-plmn-ids   | array(Plmnld)                   | 0 | 1N          | Each element identifies a PLMN ID for<br>the roaming UE in LBO roaming<br>scenario. The UDR shall return only<br>AM Influence Data resource(s) that<br>match at least one of the provided<br>PLMN ID.  | DCAMP_Roamin<br>g_LBO |
| supp-feat          | SupportedFeatur es              | 0 | 01          | Identifies the features supported by the NF service consumer.  |                       |
| provided.          | e of the query param            |   |             | 'supp-feat" query parameter shall be   |                       |

NOTE: The "any-ue" query parameter is commonly related to the search of the AM influence data resource(s) that relate to any non-roaming UE using the service(s) identified by a combination of DNN and S-NSSAI, and thus, it is commonly present together with the "dnn-snssai-infos" query parameters. Note also that, if the "any-ue" query parameter is present together with the "internal-group-ids", and/or "supis" query parameters the search will not match any resource, since according to clause 6.4.2.16 only one of the the "supi", "anyUeInd" and "interGroupId" properties are simultaneously present in the resource.

When the request query contains more than one optional query parameters defined as an array, the UDR shall return the Individual AM Influence Data resources for each matching combination of the values of the elements of the array of the provided query parameters.

- EXAMPLE 1: If the "dnn-snssai-infos" query parameter is included with two DNN and S-NSSAI combinations (comb\_1 and comb\_2) and the "supis" query parameter is included with two SUPI entries (e.g. SUPI\_A and SUPI\_B), and all of them are matching entries, the UDR shall return the Individual AM Influence Data resources for each matching S-NSSAI and DNN and SUPI combination, i.e. the resource(s) matching comb\_1 and SUPI\_A, comb\_2 and SUPI\_A, comb\_1 and SUPI\_B, and comb2 and SUPI\_B.
- EXAMPLE 2: If the "dnn-snssai-infos" query parameter is included with two DNN and S-NSSAI combination (comb\_1 and comb\_2) and the "supis" query parameter is included with two SUPI entries (e.g. SUPI\_A and SUPI\_B), and there are no matching entries for comb\_1, the UDR shall return the Individual AM Influence Data resources for the matching S-NSSAI and DNN and SUPI combination, i.e., the resource(s) matching comb\_2 and SUPI\_A, and comb2 and SUPI\_B.

This method shall support the request data structures specified in table 6.2.17.3.1-2 and the response data structures and response codes specified in table 6.2.17.3.1-3.

Table 6.2.17.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.17.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |  |
|--|---|-------------|----------------|---|--|--|
| array(AmInfluData)   | М | 0N          | 200 OK         | The AM Influence Data stored in the UDR are returned. |  |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |   |  |  |

### 6.2.18 Resource: Individual AM Influence Data

### 6.2.18.1 Description

The Individual AM Influence Data resource represents an Individual AM Influence Data to the Nudr\_DataRepository Service at a given UDR.

### 6.2.18.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/am-influence-data/{amInfluenceId}

This resource shall support the resource URI variables defined in table 6.2.18.2-1.

Table 6.2.18.2-1: Resource URI variables for this resource

| Name          | Data type | Definition   |
|---------------|-----------|--|
| apiRoot       | string    | See 3GPP TS 29.504 [6] clause 6.1.1.   |
| amInfluenceId | string    | The identifier of an Individual AM Influence Data to be created or updated.  To enable the value to be used as part of a URI, the string shall only contain allowed characters according to the "lower-with-hyphen" naming convention defined in clause 5.1.3 of 3GPP TS 29.501 [5]. |

## 6.2.18.3 Resource Standard Methods

#### 6.2.18.3.1 PUT

This method shall support the URI query parameters specified in table 6.2.18.3.1-1.

Table 6.2.18.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.18.3.1-2 and the response data structures and response codes specified in table 6.2.18.3.1-3.

Table 6.2.18.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type   | Р | Cardinality | Description                                    |
|-------------|---|-------------|--|
| AmInfluData | M | 1           | The AM Influence Data to be stored in the UDR. |

Table 6.2.18.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type     | Р | Cardinality  | Response codes      | Description   |
|---------------|---|--------------|---------------------|---|
| AmInfluData   | М | 1            | 201 Created         | The resource has been successfully created and a response body is returned containing a representation of the resource. |
| AmInfluData   | М | 1            | 200 OK              | The resource has been successfully updated and a response body is returned containing a representation of the resource. |
| n/a           |   |              | 204 No Content      | The resource has been successfully updated.   |
| NOTE: The mai |   | y HTTP error | status codes for th | ne PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4]   |

Table 6.2.18.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | М |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/application-</apiversion> |
|          |           |   |             | data/am-influence-data/{amInfluenceId}  |

### 6.2.18.3.2 PATCH

This method shall support the URI query parameters specified in table 6.2.18.3.2-1.

Table 6.2.18.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.18.3.2-2 and the response data structures and response codes specified in table 6.2.18.3.2-3.

Table 6.2.18.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type        | Р | Cardinality | Description                                     |
|------------------|---|-------------|---|
| AmInfluDataPatch | M | 1           | The AM Influence Data to be updated in the UDR. |

Table 6.2.18.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data type   | Р                              | Cardinality | Response codes | Description   |  |  |
|---|--------------------------------|-------------|----------------|---|--|--|
| AmInfluData   | М                              | 1           | 200 OK         | The update of an Individual AM Influence Data resource is confirmed and a response body containing the AM Influence Data shall be returned. |  |  |
| n/a   |                                |             | 204 No Content | The Individual AM Influence Data resource has been successfully updated.  |  |  |
| NOTE: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of |                                |             |                |   |  |  |
| 3GPP T  | 3GPP TS 29.500 [4] also apply. |             |                |   |  |  |

#### 6.2.18.3.3 DELETE

This method shall support the URI query parameters specified in table 6.2.18.3.3-1.

Table 6.2.18.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.18.3.3-2 and the response data structures and response codes specified in table 6.2.18.3.3-3.

Table 6.2.18.3.3-2: Data structures supported by the DELETE Request Body on this resource

|          |   | ne mandatory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of GPP TS 29.500 [4] also apply. |             |                |  |  |  |

## 6.2.19 Resource: EAS Deployment Information Data

### 6.2.19.1 Description

The EAS Deployment Information Data resource represents all EAS Deployment Information Data to the Nudr\_DataRepository Service at a given UDR.

#### 6.2.19.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/eas-deploy-data

This resource shall support the resource URI variables defined in table 6.2.19.2-1.

Table 6.2.19.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

#### 6.2.19.3 Resource Standard Methods

### 6.2.19.3.1 GET

This method shall support the URI query parameters specified in table 6.2.19.3.1-1.

Table 6.2.19.3.1-1: URI query parameters supported by the GET method on this resource

| Name  | Data type P Cardinality Description       |   |    |                            |  |  |  |
|---|---|---|----|----------------------------|--|--|--|
| dnn   | Dnn                                       | 0 | 01 | Identifies a DNN.          |  |  |  |
| snssai  | Snssai                                    | 0 | 01 | Identifies a slice.        |  |  |  |
| internal-group-id   | GroupId O 01 Identifies a group of users. |   |    |                            |  |  |  |
| appld<br>(NOTE 2)   | string                                    | 0 | 01 | Identifies an application. |  |  |  |
| NOTE 1: At least one of the above attributes shall be provided.  NOTE 2: The query parameter does not follow the related naming convention (i.e. "lower-with-hyphen") defined in clause 5.1.3.3 of 3GPP TS 29.501 [7]. This query parameter is however kept as currently defined in this specification for backward compatibility considerations. |   |   |    |                            |  |  |  |

This method shall support the request data structures specified in table 6.2.19.3.1-2 and the response data structures and response codes specified in table 6.2.19.3.1-3.

Table 6.2.19.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р                | Cardinality | Description |
|-----------|------------------|-------------|-------------|
| n/a       | , and the second |             |             |

Table 6.2.19.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description  |  |  |
|--|---|-------------|----------------|--|--|--|
| array(EasDeployInfoD ata)  | М | 1N          |                | The subscribed EAS Deployment information as request in the request URI query parameter(s) are returned. |  |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |

# 6.2.20 Resource: Individual EAS Deployment Information Data

## 6.2.20.1 Description

The Individual EAS Deployment Information Data resource represents a single EAS Deployment Information data resourcein the Nudr\_DataRepository Service at a given UDR.

#### 6.2.20.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/eas-deploy-data/{easDeployInfoId}

This resource shall support the resource URI variables defined in table 6.2.20.2-1.

Table 6.2.20.2-1: Resource URI variables for this resource

| Name            | Data type | Definition   |
|-----------------|-----------|--|
| apiRoot         | string    | See 3GPP TS 29.504 [6] clause 6.1.1.                               |
| easDeployInfold | string    | Identifies an Individual EAS Deployment Information Data resource. |

#### 6.2.20.3 Resource Standard Methods

#### 6.2.20.3.1 GET

This method shall support the URI query parameters specified in table 6.2.20.3.1-1.

Table 6.2.20.3.1-1: URI query parameters supported by the GET method on this resource

| Name | Data type | P | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.20.3.1-2 and the response data structures and response codes specified in table 6.2.20.3.1-3.

Table 6.2.20.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.20.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type         | P | Cardinality | Response codes | Description                          |
|-------------------|---|-------------|----------------|--------------------------------------|
| EasDeployInfoData | М | 1           | 200 OK         | The EAS Deployment Data is returned. |

#### 6.2.20.3.2 PUT

This method shall support the URI query parameters specified in table 6.2.20.3.1-1.

Table 6.2.20.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.20.3.1-2 and the response data structures and response codes specified in table 6.2.20.3.1-3.

Table 6.2.20.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type         | Р | Cardinality | Description  |
|-------------------|---|-------------|--|
| EasDeployInfoData | М | 1           | The EAS Deployment Information Data to be stored in the UDR. |

Table 6.2.20.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type        | Р  | Cardinality | Response       | Description   |  |  |  |
|------------------|--|-------------|----------------|---|--|--|--|
|                  |  |             | codes          |   |  |  |  |
| EasDeployInfoDat | М  | 1           | 201 Created    | The resource has been successfully created and a response     |  |  |  |
| а                |  |             |                | body is returned containing a representation of the resource. |  |  |  |
| EasDeployInfoDat | М  | 1           | 200 OK         | The resource has been successfully updated and a response     |  |  |  |
| а                |  |             |                | body is returned containing a representation of the resource. |  |  |  |
| n/a              |  |             | 204 No Content | The resource has been successfully updated.                   |  |  |  |
| NOTE: The man    | IOTE: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] |             |                |   |  |  |  |
| also appl        | y.   |             |                |   |  |  |  |

#### Table 6.2.20.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | M |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/application-data/eas-deploy-data/{easDeployInfold}</apiversion> |

#### 6.2.20.3.3 DELETE

This method shall support the URI query parameters specified in table 6.2.20.3.3-1.

#### Table 6.2.20.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.20.3.3-2 and the response data structures and response codes specified in table 6.2.20.3.3-3.

#### Table 6.2.20.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Ρ | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

#### Table 6.2.20.3.3-3: Data structures supported by the DELETE Response Body on this resource

| Data type | Р | Cardinality  | Response       | Description                                       |  |  |  |  |
|-----------|---|--|----------------|---|--|--|--|--|
|           |   |  | codes          |   |  |  |  |  |
| n/a       |   |  | 204 No Content | The EAS Deployment Data was successfully deleted. |  |  |  |  |
|           |   | ory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of 0.500 [4] also apply. |                |   |  |  |  |  |

# 6.2.21 Resource: AF Requested QoS Data Sets

#### 6.2.21.1 Description

The "AF Requested QoS Data Sets" collection resource represents all the AF Requested QoS Data Set(s) managed by the UDR.

#### 6.2.21.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/af-qos-data-sets

This resource shall support the resource URI variables defined in table 6.2.21.2-1.

Table 6.2.21.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                              |
|---------|-----------|---|
| apiRoot | string    | See clause 6.1.1 of 3GPP TS 29.504 [6]. |

#### 6.2.21.3 Resource Standard Methods

#### 6.2.21.3.1 GET

This method shall support the URI query parameters specified in table 6.2.21.3.1-1.

Table 6.2.21.3.1-1: URI query parameters supported by the GET method on this resource

| Name          | Data type       | Р | Cardinality | Description  |
|---------------|-----------------|---|-------------|--|
| dnns          | array(Dnn)      | 0 | 1N          | Identifies the targeted DNN(s).  |
|               |                 |   |             | When this query parameter is provided, the UDR shall return only the resource(s) that match at least one of the provided DNN(s).  (NOTE 1, NOTE 2)               |
| snssais       | array(Snssai)   | 0 | 1N          | Identifies the targeted network slice(s).  |
|               |                 |   |             | When this query parameter is provided, the UDR shall return only the resource(s) that match at least one of the provided network slice(s).  (NOTE 1, NOTE 2)     |
| int-group-ids | array(GroupId)  | 0 | 1N          | Contains the targeted group(s) of UE(s).   |
|               |                 |   |             | When this query parameter is provided, the UDR shall return only the resource(s) that match at least one of the provided internal group ID(s).  (NOTE 1, NOTE 3) |
| supis         | array(Supi)     | 0 | 1N          | Contains the identifier(s) of the targeted UE(s).  |
|               |                 |   |             | When this query parameter is provided, the UDR shall return only the resource(s) that match at least one of the provided SUPI(s).                                |
|               | ( ( )           |   | 4.51        | (NOTE 1, NOTE 3)   |
| data-set-ids  | array(string)   | 0 | 1N          | Contains the identifier(s) of the requested "Individual AF Requested QoS Data Set" resource(s).  |
| supp-feat     | SupportedFeatur | 0 | 01          | (NOTE 1, NOTE 4)  Contains the features supported by the NF service  |
| Supp-leat     | es              |   | 01          | consumer.  |
|               |                 |   |             | This query parameter shall be present when feature negotiation needs to take place.  |

NOTE 1: At least one of these query parameters shall be present.

NOTE 2: These query parameters are mutually exclusive. Either one of them may be present.

NOTE 3: These query parameters are mutually exclusive. Either one of them may be present.

NOTE 4: When this query parameter is present, all the other query parameters shall not be present, except the "supp-feat" query parameter that may be present when needed.

This method shall support the request data structures specified in table 6.2.21.3.1-2 and the response data structures and response codes specified in table 6.2.21.3.1-3.

Table 6.2.21.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.21.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description   |  |  |  |
|--|---|-------------|----------------|---|--|--|--|
| array(AfRequestedQos<br>Data)  | M | 0N          | 200 OK         | Successful case. The requested "Individual AF Requested QoS Data Set" resource(s) matching the provided query parameter(s) shall be returned.  If there are no "Individual AF Requested QoS Data Set" resource(s) matching the provided query parameter(s), an empty array shall be returned. |  |  |  |
| NOTE: The mandatory HTTP error status codes for the HTTP GET method listed in table 5.2.7.1-1 of |   |             |                |   |  |  |  |
| 3GPP TS 29.500 [4] shall also apply.   |   |             |                |   |  |  |  |

# 6.2.22 Resource: Individual AF Requested QoS Data Set

### 6.2.22.1 Description

The "Individual AF Requested QoS Data Set" resource represents a single AF Requested QoS data Set managed by the UDR.

## 6.2.22.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/af-qos-data-sets/{afReqQoSId}

This resource shall support the resource URI variables defined in table 6.2.22.2-1.

Table 6.2.22.2-1: Resource URI variables for this resource

| Name       | Data type | Definition  |
|------------|-----------|---|
| apiRoot    | string    | See clause 6.1.1 of 3GPP TS 29.504 [6].                                 |
| afReqQosId | string    | Represents the identifier of the "Individual AF Requested QoS Data Set" |
|            |           | resource.   |

#### 6.2.22.3 Resource Standard Methods

#### 6.2.22.3.1 PUT

This method shall support the URI query parameters specified in table 6.2.22.3.1-1.

Table 6.2.22.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.22.3.1-2 and the response data structures and response codes specified in table 6.2.22.3.1-3.

Table 6.2.22.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type         | Р | Cardinality | Description   |
|-------------------|---|-------------|---|
| AfRequestedQosDat | М | 1           | Represents the parameters to request the creation/update of an AF |
| a                 |   |             | Requested QoS Data.   |

Table 6.2.22.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description  |  |  |
|---|---|-------------|----------------|--|--|--|
| AfRequestedQos<br>Data  | M | 1           | 201 Created    | Successful case. The "Individual AF Requested QoS Data Set" resource is successfully created and a representation of the created resource shall be returned in the response body.  An HTTP "Location" header that contains the URI of the created resource shall also be included. |  |  |
| AfRequestedQos<br>Data  | М | 1           | 200 OK         | Successful case. The "Individual AF Requested QoS Data Set" resource is successfully updated and a representation of the updated resource shall be returned in the response body.  |  |  |
| n/a   |   |             | 204 No Content | Successful case. The resource is successfully updated and no content is returned in the response body.   |  |  |
| NOTE: The mandatory HTTP error status codes for the HTTP PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] shall also apply. |   |             |                |  |  |  |

Table 6.2.22.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description  |
|----------|-----------|---|-------------|--|
| Location | string    | М | 1           | Contains the URI of the newly created resource, according to               |
|          |           |   |             | the structure:   |
|          |           |   |             | {apiRoot}/nudr-dr/ <apiversion>/application-data/af-qos-data-</apiversion> |
|          |           |   |             | sets/{afReqQosId}  |

#### 6.2.22.3.2 PATCH

This method shall support the URI query parameters specified in table 6.2.22.3.2-1.

Table 6.2.22.3.2-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.22.3.2-2 and the response data structures and response codes specified in table 6.2.22.3.2-3.

Table 6.2.22.3.2-2: Data structures supported by the PATCH Request Body on this resource

| Data type      | Р | Cardinality | Description  |
|----------------|---|-------------|--|
| AfRequestedQos | М | 1           | Represents the requested modifications to the "Individual AF Requested |
| DataPatch      |   |             | QoS Data Set" resource.  |

Table 6.2.22.3.2-3: Data structures supported by the PATCH Response Body on this resource

| Data type              | Р | Cardinality | Response codes | Description  |  |  |
|------------------------|---|-------------|----------------|--|--|--|
| AfRequestedQos<br>Data | М | 1           | 200 OK         | Successful case. The "Individual AF Requested QoS Data Set" resource is successfully modified and a representation of the updated resource shall be returned in the response body. |  |  |
| n/a                    |   |             | 204 No Content | Successful case. The "Individual AF Requested QoS Data" resource is successfully modified and no content is returned in the response body.   |  |  |
|                        |   |             |                |  |  |  |

#### 6.2.22.3.3 DELETE

This method shall support the URI query parameters specified in table 6.2.22.3.3-1.

#### Table 6.2.22.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.22.3.3-2 and the response data structures and response codes specified in table 6.2.22.3.3-3.

#### Table 6.2.22.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

#### Table 6.2.22.3.3-3: Data structures supported by the DELETE Response Body on this resource

| Data type  | Р | Cardinality | Response<br>Codes | Description   |  |  |
|--|---|-------------|-------------------|---|--|--|
| n/a  |   |             |                   | Successful case. The "Individual AF Requested QoS Data Set" resource is successfully deleted. |  |  |
| NOTE: The mandatory HTTP error status codes for the HTTP DELETE method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] shall also apply. |   |             |                   |   |  |  |

# 6.2.23 Resource: Individual DNAI EAS Mapping

#### 6.2.23.1 Description

The resource represents the EAS address information for a DNAI.

NOTE: This information is configured by the OAM.

#### 6.2.23.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/dnai-eas-mappings/{dnai}

This resource shall support the resource URI variables defined in table 6.2.23.2-1.

Table 6.2.23.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                          |
|---------|-----------|-------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1 |
| dnai    | Dnai      | The DNAI.                           |

#### 6.2.23.3 Resource Standard Methods

#### 6.2.23.3.1 GET

This method shall support the URI query parameters specified in table 6.2.23.3.1-1.

Table 6.2.23.3.1-1: URI query parameters supported by the GET method on this resource

| Name      | Data type         | Р | Cardinality | Description  |
|-----------|-------------------|---|-------------|--|
| supp-feat | SupportedFeatures | 0 | 01          | The features supported by the NF service consumer. |

This method shall support the request data structures specified in table 6.2.23.3.1-2 and the response data structures and response codes specified in table 6.2.23.3.1-3.

Table 6.2.23.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.23.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type                       | Р  | Cardinality | Response codes | Description  |  |  |
|---------------------------------|--|-------------|----------------|--|--|--|
| DnaiEasMapping                  | М  | 1           |                | Upon success, a response body containing the EAS information for the DNAI shall be returned. |  |  |
| NOTE: The mandatory also apply. | The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] |             |                |  |  |  |

# 6.2.24 Resource: ECS Address Roaming Data

### 6.2.24.1 Description

The ECS Address Roaming Data resource represents all ECS Address Roaming Data in the Nudr\_DataRepository Service at a given UDR.

#### 6.2.24.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/ecs-address-roaming

This resource shall support the resource URI variables defined in table 6.2.24.2-1.

Table 6.2.24.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

#### 6.2.24.3 Resource Standard Methods

#### 6.2.24.3.1 GET

This method shall support the URI query parameters specified in table 6.2.24.3.1-1.

Table 6.2.24.3.1-1: URI query parameters supported by the GET method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.24.3.1-2 and the response data structures and response codes specified in table 6.2.24.3.1-3.

Table 6.2.24.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.24.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | P | Cardinality | Response codes | Description  |  |  |
|--|---|-------------|----------------|--|--|--|
| array(EcsAddrData)   | М | 1N          | 200 OK         | The ECS Address Data requested in the request URI query parameter(s) are returned. |  |  |
| NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |

## 6.2.25 Resource: Individual ECS Address Roaming Data

#### 6.2.25.1 Description

The Individual ECS Address Roaming Data resource represents a single ECS Address Roaming Data entry at the Nudr\_DataRepository Service at a given UDR.

#### 6.2.25.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/ecs-address-roaming/{ecsAddrInfoId}

This resource shall support the resource URI variables defined in table 6.2.25.2-1.

Table 6.2.25.2-1: Resource URI variables for this resource

| Name          | Data type | Definition  |
|---------------|-----------|---|
| apiRoot       | string    | See 3GPP TS 29.504 [6] clause 6.1.1.                        |
| ecsAddrInfold | string    | Identifies an Individual ECS Address Roaming Data resource. |

#### 6.2.25.3 Resource Standard Methods

#### 6.2.25.3.1 GET

This method shall support the URI query parameters specified in table 6.2.25.3.1-1.

Table 6.2.25.3.1-1: URI query parameters supported by the GET method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.25.3.1-2 and the response data structures and response codes specified in table 6.2.25.3.1-3.

Table 6.2.25.3.1-2: Data structures supported by the GET Request Body on this resource

|     | Data type | Р | Cardinality | Description |
|-----|-----------|---|-------------|-------------|
| n/a |           |   |             |             |

Table 6.2.25.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description                            |
|-------------|---|-------------|----------------|--|
| EcsAddrData | М | 1           | 200 OK         | The requested information is returned. |

#### 6.2.25.3.2 PUT

This method shall support the URI query parameters specified in table 6.2.25.3.1-1.

Table 6.2.25.3.2-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.25.3.2-2 and the response data structures and response codes specified in table 6.2.25.3.2-3.

Table 6.2.25.3.2-2: Data structures supported by the PUT Request Body on this resource

| Data type   | Р | Cardinality | Description   |
|-------------|---|-------------|---|
| EcsAddrData | М | 1           | The ECS Address Roaming Data to be stored in the UDR. |

Table 6.2.25.3.2-3: Data structures supported by the PUT Response Body on this resource

| Data type  | Р  | Cardinality | Response       | Description   |  |  |  |
|--|----|-------------|----------------|---|--|--|--|
|  |    |             | codes          |   |  |  |  |
| EcsAddrData  | М  | 1           | 201 Created    | The resource has been successfully created and a response     |  |  |  |
|  |    |             |                | body is returned containing a representation of the resource. |  |  |  |
| EcsAddrData  | М  | 1           | 200 OK         | The resource has been successfully updated and a response     |  |  |  |
|  |    |             |                | body is returned containing a representation of the resource. |  |  |  |
| n/a  |    |             | 204 No Content | The resource has been successfully updated.                   |  |  |  |
| NOTE: The mandatory HTTP error status codes for the PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] |    |             |                |   |  |  |  |
| also appl  | у. |             |                |   |  |  |  |

Table 6.2.25.3.2-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | M |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/application-data/ecs-address-roaming/{ecsAddrInfoId}</apiversion> |

#### 6.2.25.3.2A PATCH

This method shall support the URI query parameters specified in table 6.2.25.3.2A-1.

Table 6.2.25.3.2A-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.25.3.2A-2 and the response data structures and response codes specified in table 6.2.25.3.2A-3.

Table 6.2.25.3.2A-2: Data structures supported by the PATCH Request Body on this resource

| Data type        | Р | Cardinality | Description  |
|------------------|---|-------------|--|
| EcsAddrDataPatch | М | 1           | Represents the requested ECS Address Roaming Data to be updated. |

Table 6.2.25.3.2A-3: Data structures supported by the PATCH Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description  |  |
|---|---|-------------|----------------|--|--|
| EcsAddrData   | M | 1           |                | Successful case. The resource has been successfully updated and a response body is returned containing a representation of the resource. |  |
| n/a   |   |             |                | Successful case. The resource has been successfully updated and no content is returned in the response body.                             |  |
| NOTE: The mandatory HTTP error status codes for the HTTP PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] shall also apply. |   |             |                |  |  |

#### 6.2.25.3.3 DELETE

This method shall support the URI query parameters specified in table 6.2.25.3.3-1.

Table 6.2.25.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | P | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.25.3.3-2 and the response data structures and response codes specified in table 6.2.25.3.3-3.

Table 6.2.25.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.25.3.3-3: Data structures supported by the DELETE Response Body on this resource

| Data t | уре               | Р     | Cardinality   | Response | Description                        |  |  |  |
|--------|-------------------|-------|---|----------|------------------------------------|--|--|--|
|        |                   |       |   | codes    |                                    |  |  |  |
| n/a    |                   |       | 204 No Content  |          | The data was successfully deleted. |  |  |  |
| NOTE:  | The ma            | ndat  | ry HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of |          |                                    |  |  |  |
|        | 3GPP <sup>-</sup> | TS 29 | 0.500 [4] also a  | apply.   |                                    |  |  |  |

# 6.2.26 Resource: UE ID Mappings

### 6.2.26.1 Description

This resource represents all the active UE ID Mappings at the UDR.

### 6.2.26.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/ueid-mappings

This resource shall support the resource URI variables defined in table 6.2.26.2-1.

Table 6.2.26.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

#### 6.2.26.3 Resource Standard Methods

#### 6.2.26.3.1 GET

This method shall support the URI query parameters specified in table 6.2.26.3.1-1.

Table 6.2.26.3.1-1: URI query parameters supported by the GET method on this resource

| Name           | Data type                  | Р        | Cardinality     | Description  |
|----------------|----------------------------|----------|-----------------|--|
| app-layer-ids  | array(Applicationla yerld) | 0        | 1N              | Contains the requested Application Layer ID(s). (NOTE) |
| gpsis          | array(Gpsi)                | 0        | 1N              | Contains the requested GPSI(s). (NOTE)                 |
| supp-feat      | SupportedFeature s         | 0        | 01              | Contains the list of supported features.               |
| NOTE: These qu | ery parameters are mut     | ually ex | clusive. Either | one of them may be present.                            |

This method shall support the request data structures specified in table 6.2.26.3.1-2 and the response data structures and response codes specified in table 6.2.26.3.1-3.

Table 6.2.26.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.26.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type  | P                                    | Cardinality | Response codes | Description  |  |  |
|--|--------------------------------------|-------------|----------------|--|--|--|
| array(UeldMappingInfo )  | M                                    | 0N          | 200 OK         | Successful case. The requested UE ID mapping information is returned.  If there are no UE ID Mapping(s) corresponding to the |  |  |
|  |                                      |             |                | received query parameter(s), if any, an empty array shall be returned.   |  |  |
| NOTE: The mandatory HTTP error status codes for the HTTP GET method listed in table 5.2.7.1-1 of |                                      |             |                |  |  |  |
| 1 3GPP TS 29.500 [4  | 3GPP TS 29.500 [4] shall also apply. |             |                |  |  |  |

# 6.2.27 Resource: Individual UE ID Mapping

### 6.2.27.1 Description

This resource represents a UE ID Mapping at the UDR.

#### 6.2.27.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/application-data/ueid-mappings/{ueMappingId}

This resource shall support the resource URI variables defined in table 6.2.27.2-1.

Table 6.2.27.2-1: Resource URI variables for this resource

| Name        | Data type | Definition   |
|-------------|-----------|--|
| apiRoot     | string    | See 3GPP TS 29.504 [6] clause 6.1.1.               |
| ueMappingId | string    | Identifies an "Individual UE ID Mapping" resource. |

#### 6.2.27.3 Resource Standard Methods

#### 6.2.27.3.1 GET

This method shall support the URI query parameters specified in table 6.2.27.3.1-1.

Table 6.2.27.3.1-1: URI query parameters supported by the GET method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.27.3.1-2 and the response data structures and response codes specified in table 6.2.27.3.1-3.

Table 6.2.27.3.1-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 6.2.27.3.1-3: Data structures supported by the GET Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description  |  |  |
|---|---|-------------|----------------|--|--|--|
| UeldMappingInfo   | М | 1           |                | Successful case. The requested "UE ID Mapping" resource is returned. |  |  |
| NOTE: The mandatory HTTP error status codes for the HTTP GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |

#### 6.2.27.3.2 PUT

This method shall support the URI query parameters specified in table 6.2.27.3.2-1.

Table 6.2.27.3.2-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             | n/a         |

This method shall support the request data structures specified in table 6.2.27.3.1-2 and the response data structures and response codes specified in table 6.2.27.3.1-3.

Table 6.2.27.3.2-2: Data structures supported by the PUT Request Body on this resource

| Data type       | Р | Cardinality | Description   |
|-----------------|---|-------------|---|
| UeldMappingInfo | М |             | Contains the parameters to request the creation/update of a UE ID |
|                 |   |             | Mapping.  |

Table 6.2.27.3.2-3: Data structures supported by the PUT Response Body on this resource

| Data type       | Р   | Cardinality | Response codes | Description   |  |  |  |
|-----------------|---|-------------|----------------|---|--|--|--|
| UeldMappingInfo | М   | 1           | 201 Created    | Successful case. The "UE ID Mapping" resource is successfully created and a representation of the created resource is returned in the response body.  An HTTP "Location" header containing the URI of the created resource shall be returned. |  |  |  |
| UeldMappingInfo | М   | 1           | 200 OK         | Successful case. The "UE ID Mapping" resource is successfully updated and a representation of the updated resource is returned in the response body.  |  |  |  |
| n/a             |   |             | 204 No Content | Successful case. The "UE ID Mapping" resource is successfully updated and no content is returned in the response body.  |  |  |  |
|                 | NOTE: The mandatory HTTP error status codes for the HTTP PUT method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |             |                |   |  |  |  |

Table 6.2.27.3.2-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | M |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/application-data/ueid-mappings/{ueMappingId}</apiversion> |

#### 6.2.27.3.3 DELETE

This method shall support the URI query parameters specified in table 6.2.27.3.3-1.

## Table 6.2.27.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.2.27.3.3-2 and the response data structures and response codes specified in table 6.2.27.3.3-3.

Table 6.2.27.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

#### Table 6.2.27.3.3-3: Data structures supported by the DELETE Response Body on this resource

| Data type  | Р | Cardinality | Response codes | Description  |  |  |  |
|--|---|-------------|----------------|--|--|--|--|
| n/a  |   |             |                | Successful case. The "UE ID Mapping" resource is successfully deleted. |  |  |  |
| NOTE: The mandatory HTTP error status codes for the HTTP DELETE method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |  |

## 6.3 Notifications

#### 6.3.1 General

Notifications shall comply with clause 6.2 of 3GPP TS 29.500 [4] and clause 4.6.2.3 of 3GPP TS 29.501 [5].

Table 6.3.1-1: Notifications overview

| Notification                          | Callback URI      | HTTP method or custom operation | Description (service operation)  |
|---------------------------------------|-------------------|---------------------------------|--|
| Influence Data<br>Update Notification | {notificationUri} |                                 | One of notification reference provided by the service consumer during the subscription of the AF Influence Data. |
| Application Data Change Notification  | {notificationUri} | POST                            | Application Data Change Notification   |

## 6.3.2 Void

# 6.3.3 Influence Data Update Notification

## 6.3.3.1 Description

The Influence Update Notification is used by the UDR to report one or several observed Influence Data(s) to a NF service consumer that has subscribed to such Notifications.

## 6.3.3.2 Operation Definition

The POST method shall be used for traffic influence data change notification and the URI shall be provided during the subscription procedure.

Callback URI: {notificationUri}

This method shall support the URI query parameters specified in table 6.3.3.2-1.

Table 6.3.3.2-1: URI query parameters supported by the POST method

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.3.3.2-2 and the response data structures and response codes specified in table 6.3.3.2-3.

Table 6.3.3.2-2: Data structures supported by the POST Request Body on this resource

| Data type   | Р | Cardinality | Description   |
|---|---|-------------|---|
| array(TrafficInfluData or<br>TrafficInfluDataNotif) | М |             | Provides Information about observed Influence Data. If the EnhancedInfluDataNotification feature is supported, the TrafficInfluDataNotif data type shall be sent. |

Table 6.3.3.2-3: Data structures supported by the POST Response Body on this resource

| Data type       | Р   | Cardinality Response codes |  | Description                                      |  |  |  |
|-----------------|---|----------------------------|--|--|--|--|--|
| n/a             |   | 204 No Content             |  | The receipt of the Notification is acknowledged. |  |  |  |
| NOTE: The manda | OTE: The mandatory HTTP error status codes for the POST method listed in table 5.2.7.1-1 of |                            |  |  |  |  |  |
| 3GPP TS         | 3GPP TS 29.500 [4] also apply.  |                            |  |  |  |  |  |

# 6.3.4 Application Data Change Notification

The POST method shall be used for application data change notification and the URI shall be provided during the subscription procedure.

Callback URI: {notificationUri}

This method shall support the URI query parameters specified in table 6.3.4-1.

Table 6.3.4-1: URI query parameters supported by the POST method

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 6.3.4-2 and the response data structures and response codes specified in table 6.3.4-3.

Table 6.3.4-2: Data structures supported by the POST Request Body

| Data type                    | Р | Cardinality | Description                               |
|------------------------------|---|-------------|---|
| array(ApplicationDataChangeN | М | 1N          | Notification of application data changes. |
| otif)                        |   |             |   |

Table 6.3.4-3: Data structures supported by the POST Response Body

| Data type I   |  | Р | Cardinality | Response       | Description  |  |  |
|---|--|---|-------------|----------------|--|--|--|
|   |  |   |             | codes          |  |  |  |
| n/a   |  |   |             | 204 No Content | The reception of the notification is acknowledged. |  |  |
| NOTE: The mandatory HTTP error status codes for the POST method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |  |   |             |                |  |  |  |

## 6.4 Data Model

#### 6.4.1 General

This clause specifies the application data model supported by the API.

Table 6.4.1-1 specifies the data types defined for the Nudr\_DataRepository Service API for Application Data service-based interface protocol.

Table 6.4.1-1: Nudr\_DataRepository specific Data Types for Application Data

| Data type                  | Section defined | Description  | Applicability                      |
|----------------------------|-----------------|--|------------------------------------|
| AfRequestedQosData         | 6.4.2.18        | Represents an AF Requested QoS Data Set.   | GMEC                               |
| AfRequestedQosDataPatch    | 6.4.2.19        | Represents the requested modifications to an AF Requested QoS Data Set.  | GMEC                               |
| AmInfluData                | 6.4.2.16        | Contains AM influence data.  | DCAMP                              |
| AmInfluDataPatch           | 6.4.2.17        | Contains AM influence data that can be updated.  | DCAMP                              |
| ApplicationDataSubs        | 6.4.2.10        | Contains application data subscription data.   |                                    |
| ApplicationDataChangeNotif | 6.4.2.11        | Contains the new or updated application data or removed indication.  |                                    |
| BdtPolicyData              | 6.4.2.7         | Contains applied BDT policy data.  | EnhancedBackgrou<br>ndDataTransfer |
| BdtPolicyDataPatch         | 6.4.2.8         | Contains modification instructions to be performed on the applied BDT policy data.   | EnhancedBackgrou<br>ndDataTransfer |
| CorrelationType            | 6.4.3.4         | Indicates that the EAS(es) corresponding to a common DNAI or common EAS should be selected   | CommonEASDNAI                      |
| DataInd                    | 6.4.3.3         | Indicates the type of data.  |                                    |
| DataFilter                 | 6.4.2.12        | Indicates an application data filter.  |                                    |
| DnaiEasInfo                | 6.4.2.22        | Contains EAS information for a DNAI.   | DnaiEasMappings                    |
| DnaiEasMapping             | 6.4.2.21        | Contains DNAI(s) to EAS mapping.   | DnaiEasMappings                    |
| EcsAddrData                | 6.4.2.23        | Represents ECS Address Configuration Data.   | HR-SBO                             |
| IptvConfigData             | 6.4.2.9         | Represents IPTV configuration data information.  |                                    |
| PfdDataForAppExt           | 6.4.2.6         | The PFDs and related data for the application  |                                    |
| QosRequirements            | 6.4.6.24        | Represents QoS requirements.   | GMEC                               |
| QosRequirementsRm          | 6.4.6.25        | Represents the same as the QosRequirements data type but: - with the OpenAPI "nullable: true" property; and - with the individual attributes defined with the corresponding nullable data types. | GMEC                               |
| ServiceParameterData       | 6.4.2.15        | Contains the service parameter data.   |                                    |
| TrafficCorrelationInfo     | 6.4.2.18        | Contains the information for traffic correlation.  | CommonEASDNAI                      |
| ServiceParameterDataPatch  | 6.4.2.15A       | Contains the service parameter data that can be updated.   |                                    |
| TrafficInfluData           | 6.4.2.2         | Contains traffic influence data.   |                                    |
| TrafficInfluDataPatch      | 6.4.2.3         | Contains modification instructions to be performed on the traffic influence data.  |                                    |
| TrafficInfluDataNotif      | 6.4.2.14        | Contains traffic influence data for notification.  | EnhancedInfluData<br>Notification  |
| TrafficInfluSub            | 6.4.2.4         | Contains traffic influence subscription data.  |                                    |

Table 6.4.1-2 specifies data types re-used by the Nudr\_DataRepository Service API for Application Data service based interface protocol from other specifications, including a reference to their respective specifications and when needed, a short description of their use within the Nudr\_DataRepository Service API for Application Data service based interface.

Table 6.4.1-2: Nudr\_DataRepository re-used Data Types for Application Data

| Data type                 | Reference            | Comments   | Applicability          |
|---------------------------|----------------------|--|------------------------|
| 5QiPriorityLevel          | 3GPP TS 29.571 [7]   | Represents the 5QI Priority Level  | GMEC                   |
| 5QiPriorityLevelRm        | 3GPP TS 29.571 [7]   | Represents the 5QI Priority Level. This data   | GMEC                   |
|                           |                      | type is defined in the same way as the   |                        |
|                           |                      | "5QiPriorityLevel" data type, but with the OpenAPI "nullable: true" property.          |                        |
| A2xParamsPc5              | 3GPP TS 29.522 [19]  | Contains the A2X service parameters data   | A2X                    |
| AZXI didilisi 65          | 3011 10 29.322 [19]  | provisioned over PC5 reference point.  | NZX                    |
| A2xParamsPc5Rm            | 3GPP TS 29.522 [19]  | This data type is defined in the same way as   | A2X                    |
|                           |                      | the A2xParamsPc5 data type, but with the   |                        |
|                           |                      | OpenAPI nullable property set to true.   |                        |
| A2xParamsUu               | 3GPP TS 29.522 [19]  | Contains the A2X service parameters data   | A2X                    |
| A2xParamsUuRm             | 3GPP TS 29.522 [19]  | provisioned over Uu reference point.  This data type is defined in the same way as     | A2X                    |
| AZXI didiiisouitiii       | 3011 10 29.322 [19]  | the A2xParamsUu data type, but with the  | AZA                    |
|                           |                      | OpenAPI nullable property set to true.   |                        |
| AmInfluEvent              | 3GPP TS 29.522 [19]  | Identifies the type of AM related events of  |                        |
|                           |                      | which the AF requests to be notified.  |                        |
| AlternativeServiceRequire | 3GPP TS 29.514 [52]  | Contains alternative QoS related parameters  | GMEC                   |
| mentsData ApplicationId   | 3GPP TS 29.571 [7]   | and a reference to them.  Indicates an application identifier.                         |                        |
| BdtReferenceId            | 3GPP TS 29.371 [7]   | Identifies a selected policy of background   | EnhancedBackgrou       |
| Batterereneera            | 0011 10 20.122 [0]   | data transfer.   | ndDataTransfer         |
| BitRate                   | 3GPP TS 29.571 [7]   | Represent a bitrate.   | GMEC                   |
| BitRateRm                 | 3GPP TS 29.571 [7]   | Represent a bitrate. This data type is defined   | GMEC                   |
|                           |                      | in the same way as the "BitRate" data type,  |                        |
|                           |                      | but with the OpenAPI nullable property set to  |                        |
| DateTime                  | 3GPP TS 29.571 [7]   | Indicates a date and time.   |                        |
| DateTimeRm                | 3GPP TS 29.571 [7]   | Indicates a date and time.   |                        |
| Bate rimeran              | 0011 10 20.071 [7]   | updated.   |                        |
| Dnai                      | 3GPP TS 29.571 [7]   | Represents a DNAI.   | DnaiEasMappings        |
| DnaiChangeType            | 3GPP TS 29.571 [7]   | Describes the types of DNAI change.  |                        |
| Dnn                       | 3GPP TS 29.571 [7]   | Identifies a Data Network Name. (NOTE 2)   |                        |
| DnnSnssaiInformation      | 3GPP TS 29.522 [19]  | Represents a DNN, S-NSSAI combination.   | DCAMP                  |
| DurationSec               | 3GPP TS 29.571 [7]   | Represents a duration in seconds.  | DCAMP<br>Cooking Times |
| DurationSecRm             | 3GPP TS 29.571 [7]   | Represents a removable duration in seconds.  | CachingTimer DCAMP     |
| EcsAuthMethod             | 3GPP TS 29.503 [30]  | Represents the ECS Authentication Methods.   | HR-SBO                 |

|------------------------|---------------------|---|-----------------------|
| IptvConfigDataPatch    | 3GPP TS 29.522 [19] | Contains the IPTV configuration data used for PATCH.  |                       |
| lpv4Addr               | 3GPP TS 29.571 [7]  | Identifies an IPv4 address.   |                       |
| lpv6Addr               | 3GPP TS 29.571 [7]  | Identifies an IPv6 address.   |                       |
| Link                   | 3GPP TS 29.122 [9]  | Identifies a referenced resource.   | HR-SBO                |
| MacAddr48              | 3GPP TS 29.571 [7]  | MAC Address.  |                       |
| MaxDataBurstVol        | 3GPP TS 29.571 [7]  | Represents Maximum Data Burst Volume expressed in Bytes.  | GMEC                  |
| M D ( D ) ( ID         | 00DD T0 00 574 [7]  | Minimum = 1. Maximum = 4095.  | 01450                 |
| MaxDataBurstVolRm      | 3GPP TS 29.571 [7]  | Represents Maximum Data Burst Volume expressed in Bytes. Minimum = 1. Maximum = 4095.   | GMEC                  |
|                        |                     | This data type is defined in the same way as the "MaxDataBurstVol" data type, but with the OpenAPI "nullable: true" property.   |                       |
| MulticastAccessControl | 3GPP TS 29.522 [19] | Represents the multicast access control information.  |                       |
| NetworkAreaInfo        | 3GPP TS 29.554 [13] | Describes a network area information.   |                       |
| NetworkDescription     | 3GPP TS 29.522 [19] | Represents the description of a PLMN in terms of the PLMN ID, the MCC (and optionally, applicable MNCs) or the indication of any PLMN   | VPLMNSpecificUR<br>SP |
| PacketDelBudget        | 3GPP TS 29.571 [7]  | Represents the Packet Delay Budget expressed in milliseconds.  Minimum = 1  | GMEC                  |
| PacketDelBudgetRm      | 3GPP TS 29.571 [7]  | Represents the Packet Delay Budget expressed in milliseconds. This data type is defined in the same way as the "PacketDelBudget" data type, but with the OpenAPI "nullable: true" property. | GMEC                  |
| PacketErrRate          | 3GPP TS 29.571 [7]  | Represents the Packet Error Rate (  | GMEC                  |
| PacketErrRateRm        | 3GPP TS 29.571 [7]  | Represents the Packet Error Rate. This data type is defined in the same way as the "PacketErrRate" data type, but with the OpenAPI "nullable: true" property.                               | GMEC                  |
| ParameterOverPc5       | 3GPP TS 29.522 [19] | Contains the V2X service parameters data provisioned over PC5.  |                       |
| ParameterOverPc5Rm     | 3GPP TS 29.522 [19] | This data type is defined in the same way as the ParameterOverPc5 data type, but with the OpenAPI nullable property set to true.  |                       |
| ParameterOverUu        | 3GPP TS 29.522 [19] | Contains the V2X service parameters data provisioned over Uu.   |                       |
| ParameterOverUuRm      | 3GPP TS 29.522 [19] | This data type is defined in the same way as the ParameterOverUu data type, but with the OpenAPI nullable property set to true.   |                       |
| ParamForProSeDc        | 3GPP TS 29.522 [19] | Contains the service parameters for 5G ProSe direct communications.   | ProSe                 |
| ParamForProSeDcRm      | 3GPP TS 29.522 [19] | This data type is defined in the same way as the ParamForProSeDc data type, but with the OpenAPI nullable property set to true.   |                       |
| ParamForProSeDd        | 3GPP TS 29.522 [19] | Contains the service parameters for 5G<br>ProSe direct discovery.   | ProSe                 |
| ParamForProSeDdRm      | 3GPP TS 29.522 [19] | This data type is defined in the same way as the ParamForProSeDd data type, but with the OpenAPI nullable property set to true.   |                       |
| ParamForProSeEndUe     | 3GPP TS 29.522 [19] | Contains the service parameters for 5G ProSe End UE.  | ProSe_Ph2             |
| ParamForProSeEndUeRm   | 3GPP TS 29.522 [19] | This data type is defined in the same way as the ParamForProSeEndUe data type, but with the OpenAPI nullable property set to true.  | ProSe_Ph2             |
| ParamForProSeRemUe     | 3GPP TS 29.522 [19] | Contains the service parameters for 5G<br>ProSe remote UE.  | ProSe                 |

| ParamForProSeRemUeR<br>m    | 3GPP TS 29.522 [19] | This data type is defined in the same way as the ParamForProSeRemUe data type, but with the OpenAPI nullable property set to true.             |                                 |
|-----------------------------|---------------------|--|---------------------------------|
| ParamForProSeU2NRelUe       | 3GPP TS 29.522 [19] | Contains the service parameters for 5G<br>ProSe UE-to-network relay UE.  | ProSe                           |
| ParamForProSeU2NRelUe<br>Rm | 3GPP TS 29.522 [19] | This data type is defined in the same way as<br>the ParamForProSeU2NRelUe data type, but<br>with the OpenAPI nullable property set to<br>true. |                                 |
| ParamForProSeU2URelUe       | 3GPP TS 29.522 [19] | Contains the service parameters for 5G ProSe UE-to-UE Relay UE.  | ProSe_Ph2                       |
| ParamForProSeU2URelUe<br>Rm | 3GPP TS 29.522 [19] | This data type is defined in the same way as the ParamForProSeU2URelUe data type, but with the OpenAPI nullable property set to true.          | ProSe_Ph2                       |
| ParamForRangingSIPos        | 3GPP TS 29.522 [19] | Contains the service parameters for ranging and sidelink positioning.  | Ranging_SL                      |
| ParamForRangingSIPosR<br>m  | 3GPP TS 29.522 [19] | This data type is defined in the same way as the "ParamForRangingSIPos" data type, but with the OpenAPI "nullable: true" property.             | Ranging_SL                      |
| PfdChangeNotification       | 3GPP TS 29.551 [8]  | Describes the PFD change.  |                                 |
| PfdContent                  | 3GPP TS 29.551 [8]  | Represents the content of a PFD for an application identifier.   |                                 |
| Plmnld                      | 3GPP TS 29.571 [7]  | Identifies a PLMN.   | DCAMP_Roaming_<br>LBO<br>HR-SBO |
| RouteToLocation             | 3GPP TS 29.571 [7]  | Identifies the N6 traffic routing requirement.   |                                 |
| ServiceAreaCoverageInfo     | 3GPP TS 29.534 [22] | Contains service area coverage information.  | DCAMP                           |
| Snssai                      | 3GPP TS 29.571 [7]  | Identifies a Single Network Slice Selection Assistance Information.  |                                 |
| SpatialValidityCond         | 3GPP TS 29.571 [7]  | Indicates the spatial validity condition.  | HR-SBO                          |
| SubscribedEvent             | 3GPP TS 29.522 [19] | Identified the type of UP path management events of which the AF requests to be notified.  |                                 |
| Supi                        | 3GPP TS 29.571 [7]  | Identifies a SUPI that shall contain either an IMSI or an NAI.   |                                 |
| SupportedFeatures           | 3GPP TS 29.571 [7]  | Used to negotiate the applicability of the optional features.  |                                 |
| TemporalInValidity          | 3GPP TS 29.565 [27] | Represents the temporal invalidity conditions.   | GMEC                            |
| TemporalValidity            | 3GPP TS 29.514 [16] | Indicates the time interval during which the AF request is to be applied.  | MultiTemporalCond ition         |
| Tnapld                      | 3GPP TS 29.571 [7]  | Trusted Network Access Point identifier.   | AfGuideTNAPs                    |
| TscailnputContainer         | 3GPP TS 29.514 [16] | Represents the TSCAI Input information container.  | GMEC                            |
| UeldMappingInfo             | 3GPP TS 29.522 [19] | Contains the UE ID mapping information.  | Ranging_SL                      |
| Uinteger                    | 3GPP TS 29.571 [7]  | Unsigned Integer, i.e. only value 0 and integers greater than 0 are allowed.   |                                 |
| UintegerRm                  | 3GPP TS 29.571 [7]  | This data type is defined in the same way as the "Uinteger" data type, but with the OpenAPI "nullable: true" property.                         |                                 |
| Uri                         | 3GPP TS 29.571 [7]  | Identifies a URI.  |                                 |
| UriRm                       | 3GPP TS 29.571 [7]  | Identifies a removable URI.  | DCAMP                           |
| UrspRuleRequest             | 3GPP TS 29.522 [19] | Contains service parameter data used to guide the URSP.  | AfGuideURSP                     |

NOTE 1: In order to support a set of MAC addresses with a specific range in the traffic filter, feature MacAddressRange as specified in clause 6.1.8 of TS 29.504 [6] shall be supported.

NOTE 2: The UDR uses the DNN as received from the NF service consumer without applying any transformation. To successfully perform DNN matching, in a specific deployment a DNN shall always be encoded either with the full DNN (e.g., because there are multiple Operator Identifiers for a Network Identifier) or the DNN Network Identifier only.

# 6.4.2 Structured data types

# 6.4.2.1 Introduction

This clause defines the structures to be used in resource representations.

# 6.4.2.2 Type TrafficInfluData

Table 6.4.2.2-1: Definition of type TrafficInfluData

| Attribute name         | Data type            | Р | Cardinality | Description   | Applicability                                |
|------------------------|----------------------|---|-------------|---|--|
| upPathChgNotifCorr     | string               | С | 01          | Contains the Notification Correlation Id  | 1.1.   |
| eld                    |                      |   |             | allocated by the NEF for the UP path  |  |
|                        |                      |   |             | change notification. It shall be included                                       |  |
|                        |                      |   |             | when the NEF requests the UP path   |  |
|                        |                      |   | <u> </u>    | change notification.  |  |
| appReloInd             | boolean              | 0 | 01          | Identifies whether an application can be  |  |
|                        |                      |   |             | relocated once a location of the  |  |
|                        |                      |   |             | application has been selected.  True: the application cannot be                 |  |
|                        |                      |   |             | relocated;  |  |
|                        |                      |   |             | False (default): the application can be   |  |
|                        |                      |   |             | relocated.  |  |
| afAppld                | string               | С | 01          | Identifies an application.  |  |
|                        | g                    |   |             | (NOTE 1) (NOTE 3)   |  |
| dnn                    | Dnn                  | 0 | 01          | Identifies a DNN  |  |

|                   |                    |   |     | units of milliseconds. The SMF may use      |              |
|                   |                    |   |     | this value to decide whether edge           |              |
|                   |                    |   |     | relocation is needed to ensure that the     |              |
|                   |                    |   |     | user plane latency does not exceed the      |              |
|                   |                    |   |     | value.                                      |              |
| simConnInd        | boolean            | 0 | 01  | Indication of simultaneous connectivity     | SimultConnec |
|                   |                    |   |     | temporarily maintained for the source       | tivity       |
|                   |                    |   |     | and target PSA.                             |              |
|                   |                    |   |     | It is used to indicate whether the          |              |
|                   |                    |   |     | simultaneous connectivity should be         |              |
|                   |                    |   |     | temporarily mantained for the source and    |              |
|                   |                    |   |     | target PSA.                                 |              |
|                   |                    |   |     | It is set to "true" if the temporary        |              |
|                   |                    |   |     | simultaneous connectivity should be         |              |
|                   |                    |   |     | temporarily maintained; otherwise, it is    |              |
|                   |                    |   |     | set to "false". Default value is "false" if |              |
|                   |                    |   |     |   |              |
| aima Caman Taurra | Dunation C         |   | 0.4 | omitted.                                    | 0:           |
| simConnTerm       | DurationSec        | С | 01  | Indication of the minimum time interval to  | SimultConnec |
|                   |                    |   |     | be considered for inactivity of the traffic | tivity       |
|                   |                    |   |     | routed via the source PSA during the        |              |
|                   |                    |   |     | edge re-location procedure before           |              |
|                   |                    |   |     | removing the source PSA.                    |              |
|                   |                    |   |     | It may be included when the                 |              |
|                   |                    |   |     | "simConnInd" attribute is set to true.      |              |

| supportedFeatures | SupportedFeatures       | С | 01 | Indicates the list of negotiated supported features.   |                                       |
|-------------------|-------------------------|---|----|--|---------------------------------------|
|                   |                         |   |    | This attribute shall be supplied by the UDR in the response to the PUT request when it was present in the PUT request and the UDR supports feature negotiation for Influence Data.   |                                       |
|                   |                         |   |    | This attribute shall be supplied by the UDR in the response to the GET request when the GET request includes the "supp-feat" query parameter and the UDR supports feature negotiation for Influence Data.  |                                       |
| resUri            | Uri                     | С | 01 | Represents the URI of Individual Influence Data. It shall only be included in the HTTP GET response.   | EnhancedInfl<br>uDataNotificat<br>ion |
| resetIds          | array(string)           | 0 | 1N | This IE uniquely identifies a part of temporary data in UDR that contains the created resource. This attribute may be provided in the response of successful resource creation.  |                                       |
| nscSuppFeats      | map(SupportedFea tures) | 0 | 1N | A map of Network Function Service Consumer features supported per service. The key used in this map for each entry is the ServiceName value as defined in 3GPP TS 29.510[24] (e.g. for Nsmf_EventExposure API, the key shall be set to nsmf-event-exposure). | NscSupporte<br>dFeatures              |

- NOTE 1: Only one of "afAppId", "trafficFilters" or "ethTrafficFilters" shall be included.
- NOTE 2: If "HR-SBO" feature is not supported, only one of "supi" or "interGroupId" or "interGroupIdList" shall be included. If "HR-SBO" feature is supported and the AF request to influence traffic routing is working in HR-SBO sessions in the VPLMN, only one of "supi", "interGroupId" set to "AnyUE", "ipv4Addr" or "ipv6Addr" shall be included.
- NOTE 3: If the EnhancedInfluDataNotification feature is not supported, to indicate the deletion of a Traffic Individual Influence Data resource, only the appropriate combination of "supi" or "interGroupId", and "afAppId", "trafficFilters" or "ethTrafficFilters" that identify the resource shall be included. The rest of attributes shall be omitted.
- NOTE 4: Properties "validStartTime" and "validEndTime" shall only be included for single temporal validity condition. Property "tempValidities" shall only be included for multiple temporal validity conditions when the feature MultiTemporalCondition is supported.
- NOTE 5: If the Traffic Influence Data applies to any UE, then the "interGroupId" sets to "AnyUE".
- NOTE 6: In this release of the specification, the property "headers" only includes the 3gpp-Sbi-Binding header with the binding indication for the URI included in the property "upPathChgNotifUri".
- NOTE 7: The indication of traffic correlation shall be provided only when the AF indicated that all the PDU sessions related to the 5G VN group member UEs should be correlated by a common DNAI in the user plane for the traffic as described in 3GPP TS 29.522 [19].
- NOTE 8: When FinerGranUEs feature is supported, the Traffic Influence Data applies to the UE(s) that belong to all the Internal Group Identifiers included within the attribute "interGroupIdList", if present.
- NOTE 9: When FinerGranUEs feature is supported, the Traffic Influence Data applies to the UE(s) that belong to all the subscriber categories included within the attribute "subscriberCatList", which is included only if either "interGroupIdList" is included or "interGroupId" is included.
- NOTE 10: Attributes "interGroupId" and "interGroupIdList" are mutually exclusive attributes.
- NOTE 11: When the SFC feature is supported, for the purpose of influencing Service Function Chaining, at least one of the "sfcldDl" and "sfcldUl" attribute shall be present.

# 6.4.2.3 Type TrafficInfluDataPatch

Table 6.4.2.3-1: Definition of type TrafficInfluDataPatch

| Attribute name     | Data type                  | Р | Cardinality | Description  | Applicability  |
|--------------------|----------------------------|---|-------------|--|----------------|
| upPathChgNotifCorr | string                     | 0 | 01          | Contains the Notification Correlation Id                                   |                |
| eld                |                            |   |             | allocated by the NEF for the UP path                                       |                |
|                    |                            |   |             | change notification.   |                |
| appReloInd         | boolean                    | 0 | 01          | Identifies whether an application can                                      |                |
|                    |                            |   |             | be relocated once a location of the  |                |

| simConnTerm | DurationSecRm | С | Indication of the minimum time interval to be considered for inactivity of the traffic routed via the source PSA during the edge re-location procedure before removing the source PSA. | SimultConnecti<br>vity |

# 6.4.2.4 Type TrafficInfluSub

Table 6.4.2.4-1: Definition of type TrafficInfluSub

| Attribute name          | Data type                        | Р | Cardinality | Description  | Applicability          |
|-------------------------|----------------------------------|---|-------------|--|------------------------|
| dnns                    | array(Dnn)                       | 0 | 1N          | Each element identifies a DNN. (NOTE 1)  |                        |
| snssais                 | array(Snssai)                    | 0 | 1N          | Each element identifies an interna slice. (NOTE 1)   |                        |
| internalGroupIds        | array(GroupId)                   | 0 | 1N          | Each element identifies a group of users. (NOTE 1) (NOTE 2) (NOTE 3) (NOTE 5)  |                        |
| internalGroupIdsAd<br>d | array(GroupId)                   | 0 | 1N          | Each element identifies an internal group of users. (NOTE 1) (NOTE 2) (NOTE 4) (NOTE 5)  | FinerGranUE<br>s       |
| subscriberCatList       | array(string)                    | 0 | 1N          | Each element identifies a subscriber category. (NOTE 6)  | FinerGranUE<br>s       |
| supis                   | array(Supi)                      | 0 | 1N          | Each element identifies the user. (NOTE 1)   |                        |
| plmnld                  | Plmnld                           | 0 | 01          | Identifies the PLMN of the UE.   | HR-SBO                 |
| ipv4Addr                | lpv4Addr                         | 0 | 01          | Identifies the UE IPv4 address.  | HR-SBO                 |
| ipv6Addr                | lpv6Addr                         | 0 | 01          | Identifies the UE IPv6 address.  | HR-SBO                 |
| notificationUri         | Uri                              | M | 1           | URI provided by the NF service consumer indicating where to receive the subscribed notifications from the UDR.   |                        |
| expiry                  | DateTime                         | С | 01          | This IE shall be included in a subscription response if, based on operator policy and taking into account the expiry time included in the request, the UDR needs to include an expiry time.  This IE may be included in a subscription request. When present, this IE shall represent the time after which the subscription becomes invalid. The absence of this attribute in the subscription response means the subscription to be valid without an expiry time. |                        |
| supportedFeatures       | SupportedFeatures                | С | 01          | Used to negotiate the applicability of the optional features. This attribute shall be provided in the POST request and in the response of successful resource creation.  |                        |
| resetIds                | array(string)                    | 0 | 1N          | This IE uniquely identifies a part of temporary data in UDR that contains the created resource. This attribute may be provided in the response of successful resource creation.  |                        |
| immRep                  | boolean                          | 0 | 01          | If provided and set to "true", it indicates that existing entries that match this subscription shall be immediately reported within the "immReports" attribute in the response. The default value is false.  | ImmediateRe portPcc    |
| immReports              | array(TrafficInfluDa<br>taNotif) | 0 | 1N          | Contains entries stored in the UDR that match this subscription. It may be included only in the POST (or PUT) response body of a subscription creation (or modification), and only if the request included the "immRep" attribute set to true.   | ImmediateRe<br>portPcc |

- NOTE 1: If the TrafficInfluSubExt feature is not supported, either "dnns", "snssais", "internalGroupIds", "internalGroupIdsAdd" or "supis" shall be provided. If the TrafficInfluSubExt feature is supported, any of these attributes may be provided.
- NOTE 2: For the Traffic Influence Data applies to any UE, the "internalGroupIds" needs to have an entry set to "AnyUE".
- NOTE 3: The "internalGroupIds" attribute shall be compared only with the "interGroupId" of the TrafficInfluData data type and there is a match only if they both exist and "interGroupId" is contained in "internalGroupIds".
- NOTE 4: When the FinerGranUEs feature is supported, the "internalGroupIdsAdd" attribute shall be compared only with the "interGroupIdList" of the TrafficInfluData data type and there is a match only if they both exist and are identical.
- NOTE 5: The attributes "internalGroupIds" and "internalGroupIdsAdd" are mutually exclusive attributes.
- NOTE 6: When the FinerGranUEs feature is supported, the "subscriberCatList" attribute of the TrafficInfluSub data type shall be compared with the "subscriberCatList" of the TrafficInfluData data type and there is a match only if they both exist and are identical.

#### 6.4.2.5 Void

## 6.4.2.6 Type: PfdDataForAppExt

Table 6.4.2.6-1: Definition of type PfdDataForAppExt

| Attribute name | Data type          | Р | Cardinality | Description  | Applicability |
|----------------|--------------------|---|-------------|--|---------------|
| suppFeat       | SupportedFeatur es | 0 | 01          | Used to negotiate the applicability of the optional features.  |               |
|                |                    |   |             | This attribute shall be provided in the PUT request and in the response of successful resource creation. This attribute shall be provided in the HTTP GET response if the "supp-feat" attribute query parameter is included in the HTTP GET request. |               |
| applicationId  | ApplicationId      | М | 1           | Identifier of an application.  |               |
| pfds           | array(PfdContent ) | М | 1N          | PFDs for the application identifier. (NOTE 2) (NOTE 3) (NOTE 4)  |               |
| cachingTime    | DateTime           | 0 | 01          | Caching time for an application identifier. (NOTE 1)   |               |
| cachingTimer   | DurationSec        | 0 | 01          | Caching timer for an application identifer expressed as duration with unit of second. (NOTE 1)   | CachingTimer  |
| resetIds       | array(string)      | 0 | 1N          | This IE uniquely identifies a part of temporary data in UDR that contains the created resource.  This attribute may be provided in the response of successful resource creation.   |               |
| allowedDelay   | DurationSec        | 0 | 01          | Indicates that the list of PFDs in this request should be deployed within the time interval indicated by the Allowed Delay.  |               |

NOTE 1: When the feature "CachingTimer" is supported, the "cachingTime" attribute and the "cachingTimer" attribute are multually exclusive.

NOTE 2: The "sourceNfType" attribute within the PfdContent data type is applicable only if the "PfdDetermination" feature is supported.

NOTE 3: The "pfdld" attribute within the PfdContent data type shall be present if available.

NOTE 4: The "dnProtocol" attribute within the PfdContent data type is applicable only if the "DomainNameProtocol" feature is supported.

# 6.4.2.7 Type BdtPolicyData

Table 6.4.2.7-1: Definition of type BdtPolicyData

| Attribute name   | Data type      | Р | Cardinality | Description  | Applicability |  |
|--|----------------|---|-------------|--|---------------|--|
| interGroupId   | GroupId        | С | 01          | Identifies a group of users. (NOTE)  |               |  |
| supi   | Supi           | С | 01          | Identifies a user. (NOTE)  |               |  |
| bdtRefId   | BdtReferenceId | М | 1           | Identifies a selected policy of background data transfer.  |               |  |
| dnn  | Dnn            | 0 | 01          | Identifies a DNN   |               |  |
| snssai   | Snssai         | 0 | 01          | The identification of slice.   |               |  |
| resUri   | Uri            | С | 01          | Represents the URI of Individual Applied BDT Policy Data. It shall only be included in the HTTP GET response.  |               |  |
| resetIds   | array(string)  | 0 | 1N          | This IE uniquely identifies a part of temporary data in UDR that contains the created resource.  This attribute may be provided in the response of successful resource creation. |               |  |
| NOTE: Either "supi" or "interGroupId" shall be included. |                |   |             |  |               |  |

|   |                         |   |             |   |                |
|   |                         |   |             | This attribute may be provided in the response of   |                |
| immBonorto                              | orroy/Applic            | _ | 1N          | successful resource creation.   | Immediate Dans |
| immReports                              | array(Applic ationDataC | 0 | 1IN         | Contains entries stored in the UDR that match   | ImmediateRepo  |
|   |                         |   |             | this subscription.  | rtPcc          |
|   | hangeNotif)             |   |             | It may be included only in the POST (or PUT)  |                |
|   |                         |   |             | response body of a subscription creation (or  |                |
|   |                         |   |             | modification), and only if the request included the   |                |
|   |                         |   |             | "immRep" attribute set to true.   |                |

When multiple attributes defined as an array are included within an entry of the "dataFilters" attribute, the UDR shall determine that the subscription is for all application data of type "dataInd" that contain a matching combination of the values of the elements of the array of the provided attributes.

**EXAMPLE:** 

For a subscription to notification on changes of Service Parameter Data resources ("dataInd" is set to "SVC\_PARAM"), if "snssais" attribute is included with two S-NSSAI entries (S-NSSAI\_1 and S-NSSAI\_2) and "dnns" is included with two DNN entries (e.g. DNN\_A and DNN\_B), and the other optional attributes are not included, the UDR shall notify about changes of Service Parameter Data resources that contain a matching S-NSSAI and DNN combination, i.e. the resource(s) matching SNSSAI\_1 and DNN\_A, the resource(s) matching SNSSAI\_1 and DNN\_B, the resource(s) matching SNSSAI\_2 and DNN\_A, and the resources matching SNSSAI\_2 and DNN\_B.

|                  |                         |   |             | indicated in the rest of the  |               |
|                  |                         | ļ | <u> </u>    | attributes of DataFilter (if any).                                  |               |

|                |                             | т. — |    |  |                 |
|----------------|-----------------------------|------|----|--|-----------------|
| uelpv4s        | array(Ipv4Addr)             |      | 1N | Each element identifies the user. When used in subscription procedures, the UDR shall notify only about changes of application data of type "dataInd" that contain at least one of the IPv4 address(es) included in the array, and match also the filters indicated in the rest of the attributes of DataFilter (if any).  |                 |
| uelpv6s        | array(Ipv6Addr)             | 0    | 1N | Each element identifies the user. When used in subscription procedures, the UDR shall notify only about changes of application data of type "dataInd" that contain at least one of the IPv6 addresses included in the array, and match also the filters indicated in the rest of the attributes of DataFilter (if any).  |                 |
| ueMacs         | array(MacAddr48)            | 0    | 1N | Each element identifies the user. When used in subscription procedures, the UDR shall notify only about changes of application data of type "dataInd" that contain at least one of the UE MAC address(es) included in the array, and match also the filters indicated in the rest of the attributes of DataFilter (if any).  |                 |
| anyUeInd       | boolean                     | 0    | 01 | Indicates whether the request is for any UE: - "true": the request is for any UE; - "false"(default): the request is not for any UE. When used in subscription procedures, the UDR shall notify only about changes of application data of type "dataInd" that contain an any UE indication, and match also the filters indicated in the rest of the attributes of DataFilter (if any). | FilterAnyUE     |
| dnnSnssaiInfos | array(DnnSnssaiInformation) | Ο    | 1N | Each element identifies a combination of (DNN, S-NSSAI). When used in subscription procedures, the UDR shall only notify about changes in resource(s) with "dataInd" value AM that contain at least one DNN and S-NSSAI combination indicated in the array, and match also the rest of the filters (if any). (NOTE 3)  | DCAMP           |
| dnais          | array(Dnai)                 | 0    | 1N | Each element identifies a DNAI. When used in subscription procedures, the UDR shall only notify about changes of application data of type "dataInd" that contain at least one of the DNAIs included in the array, and match also the rest of the filters (if any).   | DnaiEasMappings |

- NOTE 1: The "dnns" and "snssais" attributes are applicable to the BDT Policy Data, IPTV Configuration Data, Service Parameter Data, AM Influence Data, DNAI EAS Mappings, and ECS Address Roaming Data. The "internalGroupIds" and "supis" attributes are applicable to the BDT Policy Data, IPTV Configuration Data, Service Parameter Data, and AM Influence Data. The "uelpv4s" "uelpv6s" and "ueMacs" attributes are applicable to the Service Parameter Data. The "applds" attribute is applicable to the PFD Data, Service Parameter Data and IPTV Configuration Data. The "anyUeInd" attribute is applicable to Service Parameter Data, AM Influence Data. The "dnnSnssaiInfos" is applicable to AM Influence Data. The "dnais" attribute is applicable to DNAI EAS Mappings.
- NOTE 2: At application datat changes, subscriptions to changes based on attributes of this table are considered to be matched, and the corresponding notifications are sent, no matter if the matching application data matches the provided values before the change, after the change, or both before and after the change.
- NOTE 3: For AM Influence Data, only one of the "dnns", "snssais", or "dnn-snssai-infos" attributes may be simultaneously provided.

NOTE: When the "anyUeInd" attribute is related to the subscription to notification of changes of the service parameter data resource(s), and it refers to any UE using the service identified by a combination of DNN and S-NSSAI, the "anyUeInd" attribute is present together with the "dnns" and "snssais" properties. Note also that, if the "anyUeInd" attribute is present together with the "internalGroupIds", "supis", "ueIpv4s", "ueIpv6s" and/or "ueMacs" attributes the subscription will not match any resource, since according to clause 6.4.2.15 only one of the the "supi", "anyUeInd", "interGroupId", "ueIpv4", "ueIpv6" or "ueMac" properties are simultaneously present in the resource.

When the "anyUeInd" attribute is related to the subscription to notification of changes of the AM Influence data resource(s), and it refers to any UE using the service(s) identified by the corresponding DNN and S-NSSAI, the "anyUeInd" attribute is present together with the "dnnSnssaiInfos" property. Note also that, if the "anyUeInd" attribute is present together with the "internalGroupIds" and/or "supis" attributes the subscription will not match any resource, since according to clause 6.4.2.16 only one of the the "supi", "anyUeInd", or "interGroupId" properties are simultaneously present in the resource.

#### 6.4.2.13 Void

### 6.4.2.14 Type TrafficInfluDataNotif

Table 6.4.2.14-1: Definition of type TrafficInfluDataNotif

| Attribute name   | Data type        | Р | Cardinality | Description   | Applicability |
|------------------|------------------|---|-------------|---|---------------|
| resUri           | Uri              | M | 1           | Represents the URI of Individual Influence Data. For notifying deletion, only resUri shall be provided in the   |               |
|                  |                  |   |             | TrafficInfluDataNotif data type.  |               |
| trafficInfluData | TrafficInfluData | С | 01          | Traffic Influence Data. It shall be present for notifying Individual Influence Data creation or update and, if the feature "ImmediateReportPcc" is supported, also for providing immediate reports. |               |

# 6.4.2.15 Type ServiceParameterData

Table 6.4.2.15-1: Definition of type ServiceParameterData

| Attribute name            | Data type                     | Р | Cardinality | Description  | Applicability         |
|---------------------------|-------------------------------|---|-------------|--|-----------------------|

| snssai                    | Snssai                        | 0 | 01          | Identifies an S-NSSAI.<br>(NOTE 2)   |                       |
| appld                     | string                        | 0 | 01          | Identifies an application identifier. (NOTE 2)   |                       |
| supi                      | Supi                          | 0 | 01          | Identifies a user. (NOTE1)   |                       |
| uelpv4                    | lpv4Addr                      | 0 | 01          | The IPv4 address of the served UE. (NOTE1)   |                       |
| uelpv6                    | lpv6Addr                      | 0 | 01          | The IPv6 address of the served UE. (NOTE1)   |                       |
| ueMac                     | MacAddr48                     | 0 | 01          | The MAC address of the served UE. (NOTE1)  |                       |
| interGroupId              | GroupId                       | 0 | 01          | Identifies a group of users. (NOTE1)   |                       |
| anyUeInd                  | boolean                       | 0 | 01          | Identifies whether the service parameters applies to any non-roaming UE. This attribute shall set to "true" if applicable for any UE, otherwise, set to "false". (NOTE1)               |                       |
| roamUeNetDescs            | array(NetworkDe<br>scription) | 0 | 1N          | Each element identifies one (e.g., combination of MCC and MNC) or more (e.g. a MCC only) PLMN ID(s).  It indicates the PLMN(s) of inbound roamers to which the provided AF guidance on | VPLMNSpecifi<br>cURSP |
| paramOverPc5              | ParameterOverP                | 0 | 01          | VPLMN-specific URSP rules apply. (NOTE 1)  Contains the V2X service  |                       |
|                           | c5                            | ) |             | parameters used over PC5.  |                       |
| paramOverUu               | ParameterOverU<br>u           | 0 | 01          | Contains the V2X service parameters used over Uu.  |                       |
| a2xParamsPc5              | A2xParamsPc5                  | 0 | 01          | Contains the A2X service parameters used over PC5 reference point.   | A2X                   |
| a2xParamsUu               | A2xParamsUu                   | 0 | 01          | Contains the A2X service parameters used over Uu reference point.  | A2X                   |
| urspGuidance              | array(UrspRuleR<br>equest)    | 0 | 1N          | Contains the service parameters used to guide the URSP rule(s). (NOTE 3) (NOTE 1)  | AfGuideURSP           |
| vpsUrspGuidance           | array(UrspRuleR<br>equest)    | 0 | 1N          | Contains the service parameters provided by an AF to guide the VPLMN-specific URSP rule(s). (NOTE 4)   | VPLMNSpecifi<br>cURSP |
| paramForProSeDd           | ParamForProSe<br>Dd           | 0 | 01          | Contains the service parameters for 5G ProSe direct discovery.   | ProSe                 |
| paramForProSeDc           | ParamForProSe<br>Dc           | 0 | 01          | Contains the service parameters for 5G ProSe direct communications.  | ProSe                 |
| paramForProSeU2NRe<br>IUe | ParamForProSe<br>U2NRelUe     | 0 | 01          | Contains the service parameters for 5G ProSe UE-to-network relay UE.   | ProSe                 |
| paramForProSeRemU<br>e    | ParamForProSe<br>RemUe        | 0 | 01          | Contains the service parameters for 5G ProSe remote UE.  | ProSe                 |
| paramForProSeU2URe<br>IUe | ParamForProSe<br>U2URelUe     | 0 | 01          | Contains the service parameters for 5G ProSe UE-to-UE Relay UE.  | ProSe_Ph2             |

| paramForProSeEndUe       | ParamForProSe<br>EndUe   | 0 | 01 | Contains the service parameters for 5G ProSe End UE.   | ProSe_Ph2           |
|--------------------------|--------------------------|---|----|--|---------------------|
| tnaps                    | array(Tnapld)            | 0 | 1N | Contains the TNAP ID(s) collocated with the 5G-RG(s) of a specific user.   | AfGuideTNAP<br>s    |
| deliveryEvents           | array(Event)             | 0 | 1N | Contains the events related to the outcome of UE policy delivery.  | DeliveryOutco<br>me |
| policDelivNotifCorreld   | string                   | С | 01 | Contains the Notification Correlation Id allocated by the NEF for the notification of UE Policy delivery outcome. It shall be included when the NEF requests the notification of UE Policy delivery outcome.   | DeliveryOutco<br>me |
| policDelivNotifUri       | Uri                      | С | 01 | Contains the URI where the NEF receives the notification of UE Policy delivery outcome. It shall be included when the NEF requests the notification of UE policy delivery outcome.   | DeliveryOutco<br>me |
| headers                  | array(string)            | 0 | 1N | Headers provisioned by the NEF. E.g. 3gpp-Sbi-Binding header (as specified in 3GPP TS 29.500 [4]) with the binding indication for the URI included in the policDelivNotifUri attribute. The encoding of the header shall comply with clause 6.3 of IETF RFC 9110 [21]. | DeliveryOutco<br>me |
| suppFeat                 | SupportedFeatur<br>es    | С | 01 | Indicates the list of Supported features used as described in clause 5.8.  This parameter shall be supplied in the PUT request that requested the creation of an individual Service parameter resource, and in the PUT response.                                       |                     |
| resUri                   | Uri                      | С | 01 | Represents the URI of Individual Service Parameter Data. It shall only be included in the HTTP GET response.   |                     |
| resetIds                 | array(string)            | 0 | 1N | This IE uniquely identifies a part of temporary data in UDR that contains the created resource.  This attribute may be provided in the response of successful resource creation.   |                     |
| paramForRangingSIPo<br>s | ParamForRangin<br>gSIPos | 0 | 01 | Contains the service parameters for ranging and sidelink positioning.  | Ranging_SL          |

- NOTE 1: Only one of the "supi", "anyUeInd", "interGroupId", "ueIpv4", "ueIpv6" or "ueMac" attribute, and when the feature "VPLMNSpecificURSP" is supported, or "roamUeNetDescs" attribute, shall be provided. When the "AfGuideTNAPs" feature is supported, and the attribute "tnaps" is included, only the "supi" attribute shall be provided. For V2X, Prose (when the "ProSe" and/or "ProSe\_Ph2" feature is supported), A2X (when the "A2X" feature is supported) and URSP service parameter provisioning for the HPLMN (i.e. via the "urspGuidance" attribute), only "anyUeInd", "gpsi" and "externalGroupId" attributes are applicable. For VPLMN-specific URSP service parameter provisioning (i.e. via the "vpsUrspGuidance" attribute, see also clause 4.4.20), when the "VPLMNSpecificURSP" feature is supported, only "supi" and "roamUeNetDescs" attributes are applicable. The "roamUeNetDescs" attribute only applies to URSP service parameter provisioning and may be included only when the "vpsUrspGuidance" attribute is provided.
- NOTE 2: Only the combination of "dnn" and "snssai" or "appld" attribute shall be provided. When the "AfGuideTNAPs" feature is supported and the attribute "tnaps" is included, only the combination of "dnn" and "snssai" attributes shall be provided.
- NOTE 3: When the "AfGuideURSP" feature is supported and the attribute "urspGuidance" is included, the provided URSP guidance may apply to DNN and S-NSSAI combination(s) and/or application(s) different to the ones provided within the "dnn" and "snssai" or "appld" attributes.
- NOTE 4: When the "VPLMNSpecificURSP" feature is supported and the attribute "vpsUrspGuidance" is included, the provided URSP guidance may apply to DNN and S-NSSAI combination(s) and/or application(s) different to the ones provided within the "dnn" and "snssai" or "appld" attributes.

# 6.4.2.15A Type ServiceParameterDataPatch

Table 6.4.2.15A-1: Definition of type ServiceParameterDataPatch

| Attribute name            | Data type                   | Р | Cardinality | Description  | Applicability                      |
|---------------------------|-----------------------------|---|-------------|--|------------------------------------|
| paramOverPc5              | ParameterOverP<br>c5Rm      | 0 | 01          | Contains the V2X service parameters used over PC5. When the "NullableSupport" feature is supported, this attribute is nullable. When the "NullableSupport" feature is not supported, this attribute is not nullable.                   | , p                                |
| paramOverUu               | ParameterOverU<br>uRm       | 0 | 01          | Contains the V2X service parameters used over Uu. When the "NullableSupport" feature is supported, this attribute is nullable. When the "NullableSupport" feature is not supported, this attribute is not nullable.                    |                                    |
| a2xParamsPc5              | A2xParamsPc5R<br>m          | 0 | 01          | Contains the A2X service parameters used over PC5 reference point.   | A2X                                |
| a2xParamsUu               | A2xParamsUuR<br>m           | 0 | 01          | Contains the A2X service parameters used over Uu reference point.  | A2X                                |
| urspInfluence             | array(UrspRuleR<br>equest)  | 0 | 1N          | Contains the service parameter used to influence the URSP. This attribute is deprecated by the "urspGuidance" attribute that should be used instead.   | AfGuideURSP                        |
| urspGuidance              | array(UrspRuleR<br>equest)  | 0 | 1N          | Contains the service parameters used to guide the URSPrule(s).   | AfGuideURSP<br>PatchCorrectio<br>n |
| vpsUrspGuidance           | array(UrspRuleR<br>equest)  | 0 | 1N          | Contains the service parameters provided by an AF to guide the VPLMN-specific URSP rule(s).  | VPLMNSpecifi<br>cURSP              |
| paramForProSeDd           | ParamForProSe<br>DdRm       | 0 | 01          | Contains the service parameters for 5G ProSe direct discovery. When the "NullableSupport" feature is supported, this attribute is nullable. When the "NullableSupport" feature is not supported, this attribute is not nullable.       | ProSe                              |
| paramForProSeDc           | ParamForProSe<br>DcRm       | 0 | 01          | Contains the service parameters for 5G ProSe direct communications. When the "NullableSupport" feature is supported, this attribute is nullable. When the "NullableSupport" feature is not supported, this attribute is not nullable.  | ProSe                              |
| paramForProSeU2NRe<br>IUe | ParamForProSe<br>U2NRelUeRm | 0 | 01          | Contains the service parameters for 5G ProSe UE-to-network relay UE. When the "NullableSupport" feature is supported, this attribute is nullable. When the "NullableSupport" feature is not supported, this attribute is not nullable. | ProSe                              |

| paramForProSeRemU         | ParamForProSe               | 0 | 01 | Contains the service  | ProSe               |
|---------------------------|-----------------------------|---|----|---|---------------------|
| e                         | RemUeRm                     |   |    | parameters for 5G ProSe remote UE. When the "NullableSupport" feature is supported, this attribute is nullable. When the "NullableSupport" feature is not supported, this attribute is not nullable.  |                     |
| paramForProSeU2URe<br>IUE | ParamForProSe<br>U2URelUeRm | 0 | 01 | Contains the service parameters for 5G ProSe UE-to-UE Relay UE.   | ProSe_Ph2           |
| paramForProSeEndUe        | ParamForProSe<br>EndUeRm    | 0 | 01 | Contains the service parameters for 5G ProSe End UE.  | ProSe_Ph2           |
| tnaps                     | array(Tnapld)               | 0 | 1N | Contains the TNAP ID(s) collocated with the 5G-RG(s) of a specific user.  | AfGuideTNAP<br>s    |
| deliveryEvents            | array(Event)                | 0 | 1N | Contains the events related to the outcome of UE policy delivery. When the "NullableSupport" feature is supported, this attribute is nullable. When the "NullableSupport" feature is not supported, this attribute is not nullable.                             | DeliveryOutco<br>me |
| policDelivNotifUri        | Uri                         | С | 01 | Contains the URI where the NEF receives the notification of UE Policy delivery outcome. It shall be included when the NEF requests the notification of UE policy delivery outcome.  | DeliveryOutco<br>me |
| headers                   | array(string)               | 0 | 1N | Headers provisioned by the NEF. E.g. 3gpp-Sbi-Binding header (as specified in 3GPP TS 29.500 [4]) with the binding indication for the URI included in the policDelivNotifUri IE. The encoding of the header shall comply with clause 6.3 of IETF RFC 9110 [21]. | DeliveryOutco<br>me |
| paramForRangingSIPo<br>s  | ParamForRangin<br>gSIPosRm  | 0 | 01 | Contains the service parameters for ranging and sidelink positioning.   | Ranging_SL          |

# 6.4.2.16 Type AmInfluData

Table 6.4.2.16-1: Definition of type AmInfluData

| Attribute name    | Data type                          | Р | Cardinality | Description   | Applicability         |
|-------------------|------------------------------------|---|-------------|---|-----------------------|
| applds            | array(string)                      | 0 | 1N          | Identifies one or more applications.  |                       |
| dnnSnssaiInfos    | array(DnnSnssaiInf ormation)       | 0 | 1N          | Each element identifies a combination of (DNN, S-NSSAI).  |                       |
| interGroupId      | GroupId                            | 0 | 01          | Identifies a group of users. (NOTE 1)   |                       |
| supi              | Supi                               | 0 | 01          | Identifies a user. (NOTE 1)   |                       |
| anyUeInd          | boolean                            | 0 | 01          | Indicates whether the data applies to any non-roaming UE. If present and set to "true" the data is applicable for any non-roaming UE. Otherwise set to "false". Default value is "false" if omitted. (NOTE 1)   |                       |
| roamUePlmnlds     | array(Plmnld)                      | 0 | 1N          | Each element identifies a home PLMN Id for the inbound roaming UEs in LBO roaming scenario. (NOTE 1) (NOTE 3)   | DCAMP_Roa<br>ming_LBO |
| policyDuration    | DurationSec                        | 0 | 01          | Indicates the time duration that the policy shall last.   |                       |
| evSubs            | array(AmInfluEvent )               | 0 | 1N          | List of AM related events for which a subscription is required.   |                       |
| headers           | array(string)                      | 0 | 1N          | Headers provisioned by the NEF. E.g. 3gpp-Sbi-Binding header (as specified in 3GPP TS 29.500 [4]) with the binding indication for the URI included in the notifUri IE. The encoding of the header shall comply with clause 6.3 of IETF RFC 9110 [21].   |                       |
| notifUri          | Uri                                | С | 01          | Contains the Callback URI to receive notifications. It shall be present if the "evSubs" attribute is present.   |                       |
| notifCorrld       | string                             | 0 | 01          | Notification correlation identifier.  |                       |
| thruReq           | boolean                            | 0 | 01          | If present and set to "true", it indicates that high throughput is desired for the indicated UE traffic. Otherwise set to "false". Default value is "false" if omitted. (NOTE 2)  |                       |
| covReq            | array(ServiceArea<br>CoverageInfo) | 0 | 1N          | Identifies service area coverage requirements. (NOTE 2)   |                       |
| supportedFeatures | SupportedFeatures                  | С | 01          | Indicates the list of negotiated supported features.  This attribute shall be supplied by the UDR in the response to the PUT request when it was present in the PUT request and the UDR supports feature negotiation for AM Influence Data.  This attribute shall be supplied by the UDR in the response to the GET request when the GET request includes the "supp-feat" query parameter and the UDR supports feature negotiation for AM Influence Data. |                       |
| resUri            | Uri                                | С | 01          | Represents the URI of Individual AM Influence Data. It shall only be included in the HTTP GET response.   |                       |
| resetIds          | array(string)                      | 0 | 1N          | This IE uniquely identifies a part of temporary data in UDR that contains the created resource.  This attribute may be provided in the response of successful resource creation.  |                       |

- NOTE 1: One of "supi", "interGroupId", "anyUeInd" and "roamUePlmnIds" shall be included.

  NOTE 2: At least one of these attributes shall be included.

  NOTE 3: "roamUePlmnIds" attribute applies only to LBO roaming scenarios and is associated with the inbound roaming UEs and applicable when "applds" attribute or "dnnSnssaiInfos" attribute is provided.

#### 6.4.2.17 Type AmInfluDataPatch

Table 6.4.2.17-1: Definition of type AmInfluDataPatch

| Attribute name | Data type                    | Р | Cardinality | Description   | Applicability |
|----------------|------------------------------|---|-------------|---|---------------|
| applds         | array(string)                | 0 | 1N          | Identifies one or more applications.  |               |
| dnnSnssaiInfos | array(DnnSnssaiInf ormation) | 0 | 1N          | Each element identifies a combination of (DNN, S-NSSAI).  |               |
| policyDuration | DurationSecRm                | 0 | 01          | Indicates the time duration that the policy shall last.   |               |
| evSubs         | array(AmInfluEvent )         | 0 | 1N          | List of AM related events for which a subscription is required.   |               |
| headers        | array(string)                | 0 | 1N          | Headers provisioned by the NEF. E.g. 3gpp-Sbi-Binding header (as specified in 3GPP TS 29.500 [4]) with the binding indication for the URI included in the notifUri IE. The encoding of the header shall comply with clause 6.3 of IETF RFC 9110 [21]. |               |
| notifUri       | UriRm                        | С | 01          | Contains the Callback URL to receive notifications.   |               |
| notifCorrld    | string                       | 0 | 01          | Notification correlation identifier.  |               |
| thruReq        | boolean                      | 0 | 01          | Indicates whether high throughput is desired for the indicated UE traffic: - "true": high throughput is desired for the indicated UE traffic; - "false": high throughput is not desired for the indicated UE traffic.                                 |               |
| covReq         | string                       | 0 | 01          | Identifies service area coverage requirements.  |               |

# 6.4.2.18 Type AfRequestedQosData

Table 6.4.2.18-1: Definition of type AfRequestedQosData

| Attribute name | Data type           | Р | Cardinality | Description   | Applicability |
|----------------|---------------------|---|-------------|---|---------------|
| supi           | Supi                | С | 01          | Identifies a UE.  |               |
|                |                     |   |             | (NOTE 1)  |               |
| interGroupId   | GroupId             | С | 01          | Identifies a group of UE(s).  |               |
| Intereroupia   | Огоиріи             |   | 01          | lacitines a group of oE(s).   |               |
|                |                     |   |             | (NOTE 1)  |               |
| afAppId        | string              | 0 | 01          | Contains the identifier of the AF   |               |
| dnn            | Dnn                 | 0 | 01          | Application.  Represents a DNN.   |               |
| dilli          | Dilli               |   | 01          | Represents a Diviv.   |               |
|                |                     |   |             | (NOTE 2)  |               |
| sliceInfo      | Snssai              | 0 | 01          | Represents the identifier of a network                                      |               |
| flowInfo       | array(FlowInfo)     | С | 1N          | slice.  Contains the IP data flow(s) for which the                          |               |
| liowinio       | array(Flowinio)     |   | 1IN         | AF requested QoS applies. Each IP data                                      |               |
|                |                     |   |             | flow consists of a flow identifier and the                                  |               |
|                |                     |   |             | corresponding UL and/or DL flow   |               |
|                |                     |   |             | description.  |               |
|                |                     |   |             | (NOTE 2)  |               |
| ethFlowInfo    | array(EthFlowDesc   | С | 1N          | (NOTE 3)  Contains the Ethernet packet filters of                           | 1             |
| Can lowing     | ription)            |   | 11          | one or more Ethernet flow(s) for which                                      |               |
|                |                     |   |             | the AF requested QoS applies.   |               |
|                |                     |   |             |   |               |
| 50.50          | (5)(5)              |   | 4.51        | (NOTE 3)  |               |
| enEthFlowInfo  | array(EthFlowInfo)  | С | 1N          | Contains the Ethernet flow(s) for which                                     |               |
|                |                     |   |             | the AF requested QoS applies. Each<br>Ethernet data flow consists of a flow |               |
|                |                     |   |             | identifier and the corresponding UL   |               |
|                |                     |   |             | and/or DL flow(s) description.  |               |
|                |                     |   |             | , , ,   |               |
|                |                     |   |             | (NOTE 3)  |               |
| evSubsc        | EventsSubscReqD ata | 0 | 01          | Contains the requested event(s) subscription related information.           |               |
| qosReference   | string              | С | 01          | Contains a pre-defined QoS reference.                                       |               |
| 4001101010100  | Jang                |   |             |   |               |
|                |                     |   |             | (NOTE 4)  |               |
| qosReqs        | QosRequirements     | С | 01          | Contains the requested QoS parameters                                       |               |
|                |                     |   |             | related information.  |               |
|                |                     |   |             | (NOTE 4)  |               |
| altSerRegs     | array(string)       | 0 | 1N          | Contains an ordered list of alternative                                     |               |
|                | , , ,               |   |             | service requirements that include a set of                                  |               |
|                |                     |   |             | QoS reference(s). The lower the index of                                    |               |
|                |                     |   |             | the array for a given entry, the higher the                                 |               |
|                |                     |   |             | priority.   |               |
|                |                     |   |             | (NOTE 4)  |               |
| altSerReqsData | array(AlternativeSe | 0 | 1N          | Contains an ordered list of alternative                                     |               |
|                | rviceRequirements   |   |             | service requirements that include   |               |
|                | Data)               |   |             | individual QoS parameter set(s). The  |               |
|                |                     |   |             | lower the index of the array for a given                                    |               |
|                |                     |   |             | entry, the higher the priority.   |               |
|                |                     |   |             | (NOTE 4)  |               |
| disUeNotif     | boolean             | 0 | 01          | Indicates whether to disable QoS flow                                       |               |
|                |                     |   |             | parameters signalling to the UE.  |               |
|                |                     |   |             | Hamis Him Him all and Associated Ave. 15 July 10, 100 and                   |               |
|                |                     |   |             | - "true" indicates to disable QoS flow                                      |               |
|                |                     |   |             | parameters signalling to the UE "false" indicates not to disable QoS        |               |
|                |                     |   |             | flow parameters signalling to the UE.                                       |               |
|                |                     |   |             | - The default value is "false" if this                                      |               |
|                |                     |   |             | attribute is absent and has not been  |               |
|                |                     |   |             | previously provisioned.   |               |

| tempInValidity | TemporalInValidity | 0 | 01 | Indicates the temporal invalidity conditions, i.e., the time interval during which the AF requested QoS is not to be applied.  |
|----------------|--------------------|---|----|--|
| headers        | array(string)      | 0 | 1N | Contains the headers provisioned by the NEF, e.g., the "3gpp-Sbi-Binding" header (specified in 3GPP TS 29.500 [4]) containing the binding indication information applicable to the URI included in the "notifUri" attribute provided within the "evSubsc" attribute.  The encoding of the header shall comply with clause 6.3 of IETF RFC 9110 [21]. |
| suppFeat       | SupportedFeatures  | С | 1  | Contains the list of supported features among the ones defined in clause 6.1.8 of 3GPP TS 29.504 [6].  This attribute shall be present only when feature negotiation needs to take place.  |

- NOTE 1: These attributes are mutually exclusive. Either one of them shall be present.
- NOTE 2: This attribute contains the Data Network Name, i.e., a full DNN with both the Network Identifier and Operator Identifier, or a DNN with the Network Identifier only. The PCF uses the DNN as obtained from the UDR without applying any transformation (e.g., during SM Policy Association matching). To successfully perform DNN matching in a specific deployment, a DNN shall always be encoded either as a full DNN (e.g., because there are multiple Operator Identifiers for a Network Identifier) or the DNN Network Identifier only.
- NOTE 3: These attributes are mutually exclusive. Either one of them shall be present.
- NOTE 4: The "qosReqs" attribute and the "qosReference" attribute are mutually exclusive and either one of them shall be present. The "altSerReqs" attribute and the "altSerReqsData" attribute are mutually exclusive. If the "qosReference" attribute is present, then the "altQosReqs" attribute shall not be present.

# 6.4.2.19 Type AfRequestedQosDataPatch

Table 6.4.2.19-1: Definition of type AfRequestedQosDataPatch

| Attribute name       | Data type                  | Р | Cardinality | Description  | Applicability |
|----------------------|----------------------------|---|-------------|--|---------------|
| afAppId              | string                     | 0 | 01          | Contains the identifier of the AF application.   |               |
| evSubsc              | EventsSubscReqD ataRm      | 0 | 01          | Contains the requested event(s) subscription related information.  |               |
| flowInfo             | array(FlowInfo)            | 0 | 1N          | Contains the updated IP data flow(s) for which the AF requested QoS applies.  Each IP data flow consists of a flow identifier and the corresponding UL and/or DL flow description  |               |
| ethFlowInfo          | array(EthFlowDesc ription) | 0 | 1N          | Contains the updated Ethernet packet filters of one or more Ethernet flow(s) for which the AF requested QoS applies.   |               |
|                      | (=1, =1, 1, 2, )           |   |             | (NOTE)   |               |
| enEthFlowInfo        | array(EthFlowInfo)         | 0 | 1N          | Contains the updated Ethernet flow(s) for which the AF requested QoS applies. Each Ethernet data flow consists of a flow identifier and the corresponding UL and/or DL flow(s) description.  |               |
|                      |                            |   |             | (NOTE)   |               |
| qosReference         | string                     | 0 | 01          | Contains the updated pre-defined QoS reference.  |               |
|                      |                            |   |             | (NOTE)   |               |
| qosReqs              | QosRequirements<br>Rm      | 0 | 01          | Contains the updated requested QoS parameters related information.   |               |
|                      |                            |   |             | (NOTE)   |               |
| altSerReqs           | array(string)              | 0 | 0N          | Contains the updated ordered list of alternative service requirements that include a set of QoS reference(s). The lower the index of the array for a given entry, the higher the priority.   |               |
| altSerReqsData       | array(AlternativeSe        | 0 | 1N          | (NOTE)  Contains the updated ordered list of   |               |
| апоегкецѕрага        | rviceRequirements Data)    |   | 111         | alternative service requirements that include individual QoS parameter set(s). The lower the index of the array for a given entry, the higher the priority.  |               |
| Ji - I I - N I - 41f | h l                        |   | 0.4         | (NOTE)   |               |
| disUeNotif           | boolean                    | 0 | 01          | Contains the updated indication on whether to disable QoS flow parameters signalling to the UE.  |               |
|                      |                            |   |             | <ul> <li>"true" indicates to disable QoS flow parameters signalling to the UE.</li> <li>"false" indicates not to disable QoS flow parameters signalling to the UE.</li> </ul>  |               |
| tempInValidity       | TemporalInValidity         | 0 | 01          | Indicates the updated temporal invalidity conditions, i.e., the time interval during which the AF requested QoS is not to be applied.  |               |
| headers              | array(string)              | 0 | 1N          | Contains the updated headers provisioned by the NEF, e.g., the "3gpp-Sbi-Binding" header (specified in 3GPP TS 29.500 [4]) containing the binding indication information applicable to the URI included in the "notifUri" attribute provided within the "evSubsc" attribute.  The encoding of the header shall comply with clause 6.3 of IETF RFC 9110 [21]. |               |

# 6.4.2.20 Type TrafficCorrelationInfo

Table 6.4.2.20-1: Definition of type TrafficCorrelationInfo

| Attribute name | Data type                              | Р | Cardinality | Description  | Applicability |
|----------------|--|---|-------------|--|---------------|
| corrType       | CorrelationType                        | С | 01          | Indicates selecting a common DNAI or EAS for the application identified by the Application Identifier or traffic filtering information. It shall be provided when the traffic correlation information is provisioned for the first time. |               |
| tfcCorrld      | string                                 | С | 01          | Identification of a set of UEs accessing the application identified by the Application Identifier or traffic filtering information. It shall be provided when the traffic correlation information is provisioned for the first time.     |               |
| comEasIpv4Addr | lpv4AddrRm                             | С | 01          | IPv4 address of common EAS for the application identified by the Application Identifier or traffic filtering information for the UEs the AF request aims at. It may be provided when the "corrType" attribute includes "COMMON_EAS".     |               |
| comEaslpv6Addr | lpv6AddrRm                             | С | 01          | IPv6 address of common EAS for the application identified by the Application Identifier or traffic filtering information for the UEs the AF request aims at. It may be provided when the "corrType" attribute includes "COMMON_EAS".     |               |
| fqdnRange      | array(FqdnPatt<br>ernMatchingRul<br>e) | С | 1N          | FQDN(s) used for influencing EASDF-based DNS query procedure. It may be provided when the "corrType" attribute includes "COMMON_EAS".  |               |
| notifUri       | UriRm                                  | 0 | 01          | Contains the Callback URL to receive notifications.  |               |
| notifCorrld    | string                                 | 0 | 01          | Notification correlation identifier.   |               |

# 6.4.2.21 Type DnaiEasMapping

Table 6.4.2.21-1: Definition of type DnaiEasMapping

| Attribute name | Data type      | Р | Cardinality | Description                           | Applicability |
|----------------|----------------|---|-------------|---------------------------------------|---------------|
| dnaiEasInfos   | array(DnaiEasI | M | 1N          | Each element contains EAS information |               |
|                | nfo)           |   |             | for the DNAI(s) of a DNN/S-NSSAI.     |               |

#### Type DnaiEasInfo 6.4.2.22

Table 6.4.2.22-1: Definition of type DnaiEasInfo

| Attribute name | Data type                              | Р | Cardinality | Description  | Applicability |
|----------------|--|---|-------------|--|---------------|
| dnn            | Dnn                                    | С | 01          | DNN. (NOTE 1)  |               |
| snssai         | Snssai                                 | С | 01          | S-NSSAI. (NOTE 1)  |               |
| dnais          | array(Dnai)                            | М | 1N          | DNAI(s) for the EAS deployment information.  |               |
| easIpAddrs     | array(lpAddr)                          | С | 1N          | IP address(es) or IP address ranges (IPv4 subnetwork(s) and/or Ipv6 prefix(es)) of the EAS(s) of the DNAI(s). (NOTE 2) |               |
| fqdns          | array(FqdnPatt<br>ernMatchingRul<br>e) | С | 1N          | FQDN(s) where the EAS(s) is/are deployed for the DNAI(s). (NOTE 2)   |               |

NOTE 1: At least one of "dnn" and "snssai" shall be provided.

NOTE 2: Exactly one of "easlpAddrs" and "fqdns" shall be provided.

#### 6.4.2.23 Type EcsAddrData

Table 6.4.2.23-1: Definition of type EcsAddrData

| Attribute name      | Data type        | Р | Cardinality | Description                               | Applicability |
|---------------------|------------------|---|-------------|---|---------------|
| self                | Link             | С | 01          | Identifies the individual resource.       |               |
|                     |                  |   |             | It shall be present in the HTTP GET       |               |
|                     |                  |   |             | response when reading multiples           |               |
|                     |                  |   |             | entries.                                  |               |
| ecsServerAddr       | EcsServerAddr    | М | 1           | Represents the ECS address(es).           |               |
| spatialValidityCond | SpatialValidityC | 0 | 01          | Indicates the spatial validity condition. |               |
|                     | ond              |   |             |   |               |
| ecsAuthMethods      | array(EcsAuth    | 0 | 1N          | Indicates the Supported ECS               |               |
|                     | Method)          |   |             | Authentication Method(s).                 |               |
| dnn                 | Dnn              | 0 | 01          | Indicates the HPLMN DNN for this ECS      |               |
|                     |                  |   |             | Address Roaming Data.                     |               |
| snssai              | Snssai           | 0 | 01          | Indicates the HPLMN S-NSSAI for this      |               |
|                     |                  |   |             | ECS Address Roaming Data.                 |               |
| suppFeat            | SupportedFeat    | С | 01          | Indicates the negotiated supported        |               |
|                     | ures             |   |             | features. It shall be provided in an      |               |
|                     |                  |   |             | HTTP POST response if it was              |               |
|                     |                  |   |             | provided in the HTTP POST request.        |               |

#### 6.4.2.23A Type EcsAddrDataPatch

Table 6.4.2.23A-1: Definition of type EcsAddrDataPatch

| Attribute name      | Data type            | Р | Cardinality | Description                               | Applicability |
|---------------------|----------------------|---|-------------|---|---------------|
| ecsServerAddr       | EcsServerAddr        | 0 | 01          | Represents the ECS address(es).           |               |
| spatialValidityCond | SpatialValidityC ond | 0 | 01          | Indicates the spatial validity condition. |               |
| ecsAuthMethods      | array(EcsAuth        | 0 | 1N          | Contains the Supported ECS                |               |
|                     | Method)              |   |             | Authentication Method(s).                 |               |

## 6.4.2.24 Type QosRequirements

Table 6.4.2.24-1: Definition of type QosRequirements

| Attribute name  | Data type              | Р | Cardinality | Description  | Applicability |
|-----------------|------------------------|---|-------------|--|---------------|
| marBwUl         | BitRate                | 0 | 01          | Contains the maximum requested bandwidth for the Uplink.                               |               |
| marBwDl         | BitRate                | 0 | 01          | Contains the maximum requested bandwidth for the Downlink.                             |               |
| mirBwUl         | BitRate                | 0 | 01          | Contains the minimum requested bandwidth for the Uplink.                               |               |
| mirBwDI         | BitRate                | 0 | 01          | Contains the minimum requested bandwidth for the Downlink.                             |               |
| maxBurstSize    | MaxDataBurstVol        | 0 | 01          | Represents the Maximum Burst Size for values lower than or equal to 4095 Bytes. (NOTE) |               |
| extMaxBurstSize | ExtMaxDataBurstV<br>ol | 0 | 01          | Represents the Maximum Burst Size for values greater than 4095 Bytes. (NOTE)           |               |
| pdb             | PacketDelBudget        | 0 | 01          | Represents the 5GS Packet Delay Budget.  |               |
| per             | PacketErrRate          | 0 | 01          | Represents the Packet Error Rate.  |               |
| priorLevel      | 5QiPriorityLevel       | Ω | 01          | Represents the Priority Level.   |               |

6.4.2.25 Type QosRequirementsRm

This data type is defined in the same way as the QosRequirements data type but with the OpenAPI "nullable: true" property and with the individual attributes defined with the corresponding removable data type.

Table 6.4.2.25-1: Definition of type QosRequirementsRm

| Attribute name  | Data type             | Р | Cardinality | Description   | Applicability |
|-----------------|-----------------------|---|-------------|---|---------------|
| marBwUl         | BitRateRm             | 0 | 01          | Contains the maximum requested bandwidth for the Uplink.                        |               |
| marBwDI         | BitRateRm             | 0 | 01          | Contains the maximum requested bandwidth for the Downlink.                      |               |
| mirBwUl         | BitRateRm             | 0 | 01          | Contains the minimum requested bandwidth for the Uplink.                        |               |
| mirBwDl         | BitRateRm             | 0 | 01          | Contains the minimum requested bandwidth for the Downlink.                      |               |
| maxBurstSize    | MaxDataBurstVolR<br>m | 0 | 01          | Represents the Maximum Burst Size for values lower than or equal to 4095 Bytes. |               |
| extMaxBurstSize | ExtMaxDataBurstV olRm | 0 | 01          | Represents the Maximum Burst Size for values greater than 4095 Bytes.           |               |
| pdb             | PacketDelBudgetR<br>m | 0 | 01          | Represents the 5GS Packet Delay Budget.   |               |
| per             | PacketErrRateRm       | 0 | 01          | Represents the Packet Error Rate.   |               |
| priorLevel      | 5QiPriorityLevelRm    | 0 | 01          | Represents the Priority Level.  |               |

# 6.4.3 Simple data types and enumerations

#### 6.4.3.1 Introduction

This clause defines simple data types and enumerations that can be referenced from data structures defined in the previous clauses.

### 6.4.3.2 Simple data types

The simple data types defined in table 6.4.3.2-1 shall be supported.

Table 6.4.3.2-1: Simple data types

| Type Name | Type Definition | Description | Applicability |
|-----------|-----------------|-------------|---------------|
|           |                 |             |               |

#### 6.4.3.3 Enumeration: DataInd

Table 6.4.3.3-1: Enumeration DataInd

| Enumeration value | Description  | Applicability   |
|-------------------|--|-----------------|
| PFD               | PFD data   |                 |
| IPTV              | IPTV configuration data  |                 |
| BDT               | BDT data   |                 |
| SVC_PARAM         | Service parameter data   |                 |
| AM                | AM influence data  | DCAMP           |
| DNAI_EAS          | DNAI EAS mapping data  | DnaiEasMappings |
| REQ_QOS           | Indicates the AF Requested QoS data for a UE or group of UE(s) not identified by UE address(es). | GMEC            |
| ECS               | ECS Address Roaming Data.  | HR-SBO          |

### 6.4.3.4 Enumeration: CorrelationType

Table 6.4.3.4-1: Enumeration CorrelationType

| Enumeration value | Description  | Applicability |
|-------------------|--|---------------|
| COMMON_DNAI       | Indicates that the EAS(es) corresponding to a common |               |
|                   | DNAI should be selected.                             |               |
| COMMON_EAS        | Indicates that the common EAS should be selected     |               |

# 6.5 Error handling

#### 6.5.1 General

HTTP error handling shall be supported as specified in clause 5.2.4 of 3GPP TS 29.500 [4].

For the Nudr\_DataRepository Service API for Application Data, HTTP error responses shall be supported as specified in clause 4.8 of 3GPP TS 29.501 [5]. Protocol errors and application errors specified in table 5.2.7.2-1 of 3GPP TS 29.500 [4] shall be supported for an HTTP method if the corresponding HTTP status codes are specified as mandatory for that HTTP method in table 5.2.7.1-1 of 3GPP TS 29.500 [4]. In addition, the requirements in the following clauses shall apply.

#### 6.5.2 Protocol Errors

In this Release of the specification, there are no additional protocol errors applicable for the Nudr\_DataRepository Service API for Application Data.

# 6.5.3 Application Errors

The application errors defined for the Nudr\_DataRepository Service API for Application Data are listed in table 6.5.3-1.

#### Table 6.5.3-1: Application errors

| Application Error |   | HTTP status code | Description |  |  |  |
|-------------------|---|------------------|-------------|--|--|--|
|                   |   |                  |             |  |  |  |
| NOTE:             | NOTE: Including a "ProblemDetails" data structure with the "cause" attribute in the HTTP response is optional |                  |             |  |  |  |
|                   | unless explicitly mandated by other clauses in this document.   |                  |             |  |  |  |

The application error handling shall follow 3GPP TS 29.504 [6] clause 6.1.6 unless explicitly specified in this document.

# 6.6 Feature negotiation

The optional features in table 6.1.8-1 of 3GPP TS 29.504 [6] are defined for the Nudr\_DataRepository API. They shall be negotiated using the extensibility mechanism defined in clause 6.6 of 3GPP TS 29.500 [4].

# 7 Usage of Nudr\_DataRepository Service API for Structured Data for Exposure

#### 7.1 Introduction

The following clauses specify the usage of Nudr\_DataRepository service for exposure data. The principles specified in 3GPP TS 29.504 [6] are followed unless explicitly specified otherwise in the following clauses.

#### 7.2 Resources

#### 7.2.1 Overview

This clause specifies the resources for the usage of the Unified Data Repository service for Structured Data for Exposure.

#### 7.2.2 Resource Structure

This clause describes the structure for the Resource URIs and the resources and methods used for the service.

Figure 7.2.2-1 depicts the resource URIs structure for the Nudr\_DataRepository API for exposure data data.

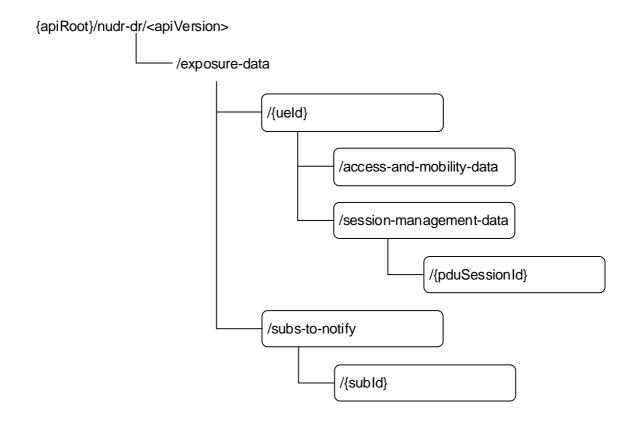

Figure 7.2.2-1: Resource URI structure of the Nudr\_DataRepository API for exposure data

Table 7.2.2-1 provides an overview of the resources and applicable HTTP methods.

Table 7.2.2-1: Resources and methods overview

| Resource name                      | Resource URI   | HTTP method | Description  |
|------------------------------------|--|-------------|--|
| AccessAndMobility Data             | /exposure-data/{ueld}/ access-and-mobility-data                      | PUT         | Create and update the access and mobility exposure data for a UE                         |
|                                    |  | PATCH       | Update the access and mobility exposure data for a UE.                                   |
|                                    |  | GET         | Retrieve the access and mobility exposure data for a UE                                  |
|                                    |  | DELETE      | Delete the access and mobility exposure data for a UE                                    |
| PduSessionManag ementData          | /exposure-data/{ueld}/<br>session-management-data/<br>{pduSessionId} | PUT         | Create and update the session management data for a UE and for an individual PDU session |
|                                    | (randomer)   | GET         | Retrieve the session management data for a UE and for an individual PDU session          |
|                                    |  | DELETE      | Delete the session management data for a UE and for an individual PDU session            |
| ExposureDataSubs criptions         | /exposure-data/subs-to-notify  | POST        | Create a subscription to receive notifications on exposure data changes.                 |
| IndividuaExposure DataSubscription | /exposure-data/subs-to-notify/<br>{subId}                            | PUT         | Modify a subscription to receive notifications on exposure data changes.                 |
|                                    |  | DELETE      | Delete a subscription identified by {subId}.   |

## 7.2.3 Resource: AccessAndMobilityData

### 7.2.3.1 Description

This resource represents the exposure data related to access and mobility.

#### 7.2.3.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/exposure-data/{ueId}/access-and-mobility-data

This resource shall support the resource URI variables defined in table 7.2.3.2-1.

Table 7.2.3.2-1: Resource URI variables for this resource

| Name    | Data type | Definition   |
|---------|-----------|--|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1.   |
| ueld    |           | Represents the SUPI or GPSI. Data type VarUeld is defined in 3GPP TS 29.571 [7]. |

### 7.2.3.3 Resource Standard Methods

#### 7.2.3.3.1 PUT

This method shall support the URI query parameters specified in table 7.2.3.3.1-1.

Table 7.2.3.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 7.2.3.3.1-2 and the response data structures and response codes specified in table 7.2.3.3.1-3.

Table 7.2.3.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type          |      | Р | Cardinality | Description  |
|--------------------|------|---|-------------|--|
| AccessAndMobilityD | )ata | M | 1           | Access and mobility data for the UE is created or updated. |

Table 7.2.3.3.1-3: Data structures supported by the PUT Response Body on this resource

| Р | Cardinality | Response codes | Description  |
|---|-------------|----------------|--|
| M | 1           | 201 Created    | Successful case. The resource has been successfully created and a response body containing a representation of the access and mobility data shall be returned. |
| M | 1           | 200 OK         | Successful case. The resource has been successfully updated and a response body containing a representation of the access and mobility data shall be returned. |
|   |             | 204 No Content | Successful case. The resource has been successfully updated and no additional content is to be sent in the response message.                                   |
| N | Л           | Л 1            | 1 201 Created  1 200 OK  204 No Content  |

Table 7.2.3.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description  |
|----------|-----------|---|-------------|--|
| Location | string    | M |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/exposure-data/{ueId}/access-and-mobility-data</apiversion> |

#### 7.2.3.3.2 GET

This method shall support the URI query parameters specified in table 7.2.3.3.2-1.

Table 7.2.3.3.2-1: URI query parameters supported by the GET method on this resource

| Name      | Data type         | Р | Cardinality | Description  |
|-----------|-------------------|---|-------------|--|
| supp-feat | SupportedFeatures | 0 |             | The features supported by the NF service consumer.<br>See 3GPP TS 29.500 [4] clause 6.6.2 and<br>3GPP TS 29.571 [7]. |

This method shall support the request data structures specified in table 7.2.3.3.2-2 and the response data structures and response codes specified in table 7.2.3.3.2-3.

Table 7.2.3.3.2-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 7.2.3.3.2-3: Data structures supported by the GET Response Body on this resource

| Data type   | Р | Cardinality | Response codes | Description  |  |  |
|---|---|-------------|----------------|--|--|--|
| AccessAndMobilityData   | М | 1           | 200 OK         | The response body contains the access and mobility data. |  |  |
| NOTE: The HTTP status code for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |

#### 7.2.3.3.3 DELETE

This method shall support the URI query parameters specified in table 7.2.3.3.3-1.

Table 7.2.3.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 7.2.3.3.3-2 and the response data structures and response codes specified in table 7.2.3.3.3-3.

Table 7.2.3.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 7.2.3.3.3-3: Data structures supported by the DELETE Response Body on this resource

|   | Data type    | Р  | Cardinality | Response codes | Description                                   |  |  |  |  |  |
|---|--------------|--|-------------|----------------|---|--|--|--|--|--|
| I | n/a          |  |             | 204 No Content | Upon success, an empty response body shall be |  |  |  |  |  |
|   |              |  |             |                | returned.                                     |  |  |  |  |  |
|   | NOTE: The HT | TE: The HTTP status code for the DELETE method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |             |                |   |  |  |  |  |  |

#### 7.2.3.3.4 PATCH

This method shall support the URI query parameters specified in table 7.2.3.3.4-1.

Table 7.2.3.3.4-1: URI query parameters supported by the PATCH method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 7.2.3.3.4-2 and the response data structures and response codes specified in table 7.2.3.3.4-3.

Table 7.2.3.3.4-2: Data structures supported by the PATCH Request Body on this resource

| Data type             | Р | Cardinality | Description                          |
|-----------------------|---|-------------|--------------------------------------|
| AccessAndMobilityData | М | 1           | Access and mobility data for the UE. |

Table 7.2.3.3.4-3: Data structures supported by the PATCH Response Body on this resource

|   | Data type   | Р | Cardinality | Response codes | Description  |  |  |  |
|---|---|---|-------------|----------------|--|--|--|--|
| r | n/a   |   |             | 204 No Content | Upon successful modification there is no body in the |  |  |  |
|   |   |   |             |                | response message.                                    |  |  |  |
| 1 | NOTE: The HTTP status code for the PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |   |             |                |  |  |  |  |

# 7.2.4 Resource: PduSessionManagementData

#### 7.2.4.1 Description

This resource represents the exposure data related to session and management data for a given subscriber and a given PDU session.

#### 7.2.4.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/exposure-data/{ueId}/session-management-data/{pduSessionId}

This resource shall support the resource URI variables defined in table 7.2.4.2-1.

Table 7.2.4.2-1: Resource URI variables for this resource

| Name         | Data type | Definition   |
|--------------|-----------|--|
| apiRoot      | string    | See 3GPP TS 29.504 [6] clause 6.1.1.   |
| ueld         |           | Represents the SUPI or GPSI. Data type VarUeld is defined in 3GPP TS 29.571 [7].               |
| pduSessionId |           | Identifies an individual PDU session. Data type PduSessionId is defined in 3GPP TS 29.571 [7]. |

#### 7.2.4.3 Resource Standard Methods

#### 7.2.4.3.1 PUT

This method shall support the URI query parameters specified in table 7.2.4.3.1-1.

Table 7.2.4.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 7.2.4.3.1-2 and the response data structures and response codes specified in table 7.2.4.3.1-3.

Table 7.2.4.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type                | Р | Cardinality | Description   |
|--------------------------|---|-------------|---|
| PduSessionManagementData | М | 1           | Session management data for a UE and a PDU session is created |
|                          |   |             | or updated.   |

Table 7.2.4.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type                    | P      | Cardinality    | Response<br>Codes   | Description   |
|------------------------------|--------|----------------|---------------------|---|
| PduSessionManagemen<br>tData | M      | 1              | 201 Created         | Successful case. The resource has been successfully created and a response body containing a representation of the session management data shall be returned. |
| PduSessionManagemen<br>tData | M      | 1              | 200 OK              | Successful case. The resource has been successfully updated and a response body containing a representation of the session management data shall be returned. |
| n/a                          |        |                | 204 No Content      | Successful case. The resource has been successfully updated and no additional content is to be sent in the response message.                                  |
| NOTE: The HTTP statu         | IS COC | le for the PUT | method listed in ta | able 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.  |

Table 7.2.4.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description  |
|----------|-----------|---|-------------|--|
| Location | string    | М |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/exposure-</apiversion> |
|          |           |   |             | data/{ueld}/session-management-data/{pduSessionId}   |

#### 7.2.4.3.2 GET

This method shall support the URI query parameters specified in table 7.2.4.3.2-1.

Table 7.2.4.3.2-1: URI query parameters supported by the GET method on this resource

| Name        | Data type         | Р | Cardinality | Description   |
|-------------|-------------------|---|-------------|---|
| ipv4-addr   | lpv4Addr          | 0 | 01          | UE IPv4 address.  |
| ipv6-prefix | Ipv6Prefix        | 0 | 01          | UE IPv6 prefix.   |
| dnn         | Dnn               | 0 | 01          | Identifies a DNN.   |
| fields      | array(string)     | С | 1N          | When the NF consumer only retrieves a subset of the resource, the "fields" query parameter shall be included. The "fields" query parameter contains the pointers of the attribute(s) to be retrieved. |
| supp-feat   | SupportedFeatures | 0 | 01          | The features supported by the NF service consumer.<br>See 3GPP TS 29.500 [4] clause 6.6.2 and 3GPP TS 29.571 [7].   |

This method shall support the request data structures specified in table 7.2.4.3.2-2 and the response data structures and response codes specified in table 7.2.4.3.2-3.

Table 7.2.4.3.2-2: Data structures supported by the GET Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 7.2.4.3.2-3: Data structures supported by the GET Response Body on this resource

| Data type             | Р | Cardinality | Response<br>Codes | Description                                       |  |  |  |  |
|-----------------------|---|-------------|-------------------|---|--|--|--|--|
| PduSessionManagement  | М | 1           | 200 OK            | The response body contains the session management |  |  |  |  |
| Data                  |   |             |                   | data.   |  |  |  |  |
| NOTE: The HTTP status |   |             |                   |   |  |  |  |  |

#### 7.2.4.3.3 DELETE

This method shall support the URI query parameters specified in table 7.2.4.3.3-1.

Table 7.2.4.3.3-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 7.2.4.3.3-2 and the response data structures and response codes specified in table 7.2.4.3.3-3.

Table 7.2.4.3.3-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description |
|-----------|---|-------------|-------------|
| n/a       |   |             |             |

Table 7.2.4.3.3-3: Data structures supported by the DELETE Response Body on this resource

| Data type     | Р      | Cardinality   | Response codes | Description   |  |  |
|---------------|--------|---|----------------|---|--|--|
| n/a           |        |   | 204 No Content | Upon success, an empty response body shall be returned. |  |  |
| NOTE: The HTT | P stat | us code for the DELETE method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply. |                |   |  |  |

## 7.2.5 Resource: ExposureDataSubscriptions

#### 7.2.5.1 Description

This resource is used to represent subscriptions to notifications of exposure data modifications.

#### 7.2.5.2 Resource Definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/exposure-data/subs-to-notify

This resource shall support the resource URI variables defined in table 7.2.5.2-1.

Table 7.2.5.2-1: Resource URI variables for this resource

| Name    | Data type | Definition                           |
|---------|-----------|--------------------------------------|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1. |

#### 7.2.5.3 Resource Standard Methods

#### 7.2.5.3.1 POST

This method shall support the URI query parameters specified in table 7.2.5.3.1-1.

Table 7.2.5.3.1-1: URI query parameters supported by the POST method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 7.2.5.3.1-2 and the response data structures and response codes specified in table 7.2.5.3.1-3.

Table 7.2.5.3.1-2: Data structures supported by the POST Request Body on this resource

| Data type                | Р | Cardinality | Description  |
|--------------------------|---|-------------|--|
| ExposureDataSubscription | М | 1           | Identifies an individual subscription to notifications of exposure |
|                          |   |             | data modifications.  |

Table 7.2.5.3.1-3: Data structures supported by the POST Response Body on this resource

| Data type   | P  | Cardinality | Response codes | Description  |  |  |
|---|----|-------------|----------------|--|--|--|
| ExposureDataSub scription   | M  | 1           | 201 Created    | Upon success, a response body containing a representation of the Individual subscription resource shall be returned.  The HTTP response shall include a "Location" HTTP header |  |  |
|   |    |             |                | that contains the resource URI of the created resource.  |  |  |
| NOTE: The mandatory HTTP error status codes for the POST method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] |    |             |                |  |  |  |
| also appl   | у. |             |                |  |  |  |

Table 7.2.5.3.1-4: Headers supported by the 201 Response Code on this resource

| Name     | Data type | Р | Cardinality | Description   |
|----------|-----------|---|-------------|---|
| Location | string    | M |             | Contains the URI of the newly created resource, according to the structure: {apiRoot}/nudr-dr/ <apiversion>/exposure-data/subs-to-notify/{subId}</apiversion> |

## 7.2.6 Resource: IndividualExposureDataSubscription

#### 7.2.6.1 Description

This resource represents an individual subscription to notifications of exposure data modifications.

#### 7.2.6.2 Resource Definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/exposure-data/subs-to-notify/{subId}

This resource shall support the resource URI variables defined in table 7.2.6.2-1.

Table 7.2.6.2-1: Resource URI variables for this resource

| Name    | Data type | Definition  |
|---------|-----------|---|
| apiRoot | string    | See 3GPP TS 29.504 [6] clause 6.1.1.  |
| subId   | string    | Identifies an individual subscription to notifications. The value is allocated by the UDR |
|         |           | during creation of the IndividualExposureDataSubscription resource.                       |

#### 7.2.6.3 Resource Standard Methods

#### 7.2.6.3.1 PUT

This method shall support the URI query parameters specified in table 7.2.6.3.1-1.

Table 7.2.6.3.1-1: URI query parameters supported by the PUT method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 7.2.6.3.1-2 and the response data structures and response codes specified in table 7.2.6.3.1-3.

Table 7.2.6.3.1-2: Data structures supported by the PUT Request Body on this resource

| Data type                | Р | Cardinality | Description   |
|--------------------------|---|-------------|---|
| ExposureDataSubscription | М | 1           | Identifies an individual subscription to notifications of exposure data |
|                          |   |             | modifications.  |

Table 7.2.6.3.1-3: Data structures supported by the PUT Response Body on this resource

| Data type                    | Р | Cardinality | Response codes | Description   |  |  |  |
|------------------------------|---|-------------|----------------|---|--|--|--|
| ExposureData<br>Subscription | M | 1           |                | The individual subscription resource was updated successfully and a body with the modified subscription to notifications about exposure data is returned. |  |  |  |
| n/a                          |   |             | 204 No Content | The individual subscription resource was successfully modified.   |  |  |  |
|                              | 1 |             |                |   |  |  |  |

#### 7.2.6.3.2 DELETE

This method shall support the URI query parameters specified in table 7.2.6.3.2-1.

Table 7.2.6.3.1-1: URI query parameters supported by the DELETE method on this resource

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

This method shall support the request data structures specified in table 7.2.6.3.2-2 and the response data structures and response codes specified in table 7.2.6.3.2-3.

Table 7.2.6.3.2-2: Data structures supported by the DELETE Request Body on this resource

| Data type | Р | Cardinality | Description                      |
|-----------|---|-------------|----------------------------------|
| n/a       |   |             | The request body shall be empty. |

Table 7.2.6.3.2-3: Data structures supported by the DELETE Response Body on this resource

| Data type  |  | Cardinality | Response       | Description   |
|--|--|-------------|----------------|---|
|  |  |             | codes          |   |
| n/a  |  |             | 204 No Content | Upon success, an empty response body shall be returned. |
| NOTE: The mandatory HTTP error status codes for the DELETE method listed in table 5.2.7.1-1 of |  |             |                |   |
| 3GPP TS 29.500 [4] also apply.   |  |             |                |   |

## 7.3 Data Model

#### 7.3.1 General

This clause specifies the application data model supported by the API.

Table 7.3.1-1 specifies the data types defined for the Nudr\_DataRepository for Exposure Data service based interface protocol.

Table 7.3.1-1: Nudr\_DataRepository specific Data Types for Exposure Data

| Data type                      | Section defined | Description   | Applicability |
|--------------------------------|-----------------|---|---------------|
| AccessAndMobilityData          | 7.3.2.2         |   |               |
| ExposureDataChangeNotification | 7.3.2.5         | Contains changed exposure data for one UE for which Notification was requested. |               |
| ExposureDataSubscription       | 7.3.2.4         | Subscription to Notifications about Exposure Data.                              |               |
| PduSessionManagementData       | 7.3.2.3         |   |               |
| PduSessionStatus               | 7.3.3.3         | Represents the state of the PDU session, i.e. active or released.               |               |

Table 7.3.1-2 specifies data types re-used by the Nudr\_DataRepository for Exposure Data service based interface protocol from other specifications, including a reference to their respective specifications and when needed, a short description of their use within the Nudr\_DataRepository for Exposure Data service based interface.

Table 7.3.1-2: Nudr\_DataRepository re-used Data Types for Exposure Data

| Data type                         | Reference               | Comments   | Applicability  |  |
|-----------------------------------|-------------------------|--|----------------|--|
| AccessType                        | 3GPP TS 29.571 [7]      | Identifies the access type, i.e. 3GPP access or Non-3GPP access. |                |  |
|                                   |                         | Describes the connectivity management state of a UE.             |                |  |
| DateTime                          | 3GPP TS 29.571 [7]      |  |                |  |
| Dnai                              | 3GPP TS 29.571 [7]      | Identifies a Data network access identifier.                     |                |  |
| Dnn                               | 3GPP TS 29.571 [7]      | Identifies a Data Network Name. (NOTE)                           |                |  |
| lpv4Addr                          | 3GPP TS 29.571 [7]      | The IPv4 Address.  |                |  |

| VarUeld 3GPP TS 29.571 [7]        |                         | String represents the SUPI or GPSI.                              |                |  |
| NOTE: The UDR u                   | ses the DNN as received | from the NF service consumer without applying any tran           | sformation. To |  |
| successfull                       | y perform DNN matching, | a DNN shall always be encoded either with the full DNN           | (e.g., because |  |

successfully perform DNN matching, a DNN shall always be encoded either with the full DNN (e.g., because there are multiple Operator Identifiers for a Network Identifier) or the DNN Network Identifier only.

# 7.3.2 Structured data types

#### 7.3.2.1 Introduction

This clause defines the structures to be used in resource representations.

# 7.3.2.2 Type AccessAndMobilityData

Table 7.3.2.2-1: Definition of type AccessAndMobilityData

| Attribute name              | Data type             | Р | Cardinality | Description  | Applicability |
|-----------------------------|-----------------------|---|-------------|--|---------------|
| location                    | UserLocation          | 0 | 01          | Current location for the UE, which can be a combination of E-UTRA, NR and non-3GPP access location.  |               |
| locationTs                  | DateTime              | 0 | 01          | Indicates when the location was last updated.  |               |
| timeZone                    | TimeZone              | 0 | 01          | Current time zone for the UE.  |               |
| timeZoneTs                  | DateTime              | 0 | 01          | Indicates when the timeZone was last updated.  |               |
| accessType                  | AccessType            | 0 | 01          | Current access type for the UE (3GPP access or non-3GPP access).   |               |
| accessTypeTs                | DateTime              | 0 | 01          | Indicates when the accessType was last updated.  |               |
| regStates                   | array(RmInfo)         | 0 | 1N          | Describes the registration management state of the UE.   |               |
| regStatesTs                 | DateTime              | 0 | 01          | Indicates when the regStates were last updated.  |               |
| connStates                  | array(CmInfo)         | 0 | 1N          | Describes the connectivity management state of the UE.   |               |
| connStatesTs                | DateTime              | 0 | 01          | Indicates when the connStates were last updated.   |               |
| reachabilityStatus          | UeReachability        | 0 | 01          | Describes the reachability of the UE.  |               |
| reachabilityStatusTs        | DateTime              | 0 | 01          | Indicates when the reachabilityStatus was last updated.  |               |
| smsOverNasStatus            | SmsSupport            | 0 | 01          | Indicates the supported SMS delivery of the UE.  |               |
| smsOverNasStatusTs          | DateTime              | 0 | 01          | Indicates when thesmsOverNasStatus was last updated.   |               |
| roamingStatus               | boolean               | 0 | 01          | True: The serving PLMN of the UE is different from the HPLMN of the UE; False: The serving PLMN of the UE is the HPLMN of the UE.  |               |
| roamingStatusTs             | DateTime              | 0 | 01          | Indicates when the roamingStatus was last updated.   |               |
| currentPlmn                 | Plmnld                | 0 | 01          | The identity of the PLMN serving the UE.   |               |
| currentPlmnTs               | DateTime              | 0 | 01          | Indicates when the currentPlmn was last updated.   |               |
| ratTypes                    | array(RatType)        | 0 | 1N          | RAT type(s)  |               |
| ratTypesTs                  | DateTime              | 0 | 01          | Indicates when the ratTypes was last updated.  |               |
| suppFeat                    | SupportedFeat<br>ures | С | 01          | This IE represents a list of Supported features used as described in clause 7.5. Shall be present in the HTTP PUT request/response; or in the HTTP GET response if the "supp-feat" attribute query parameter is included in the HTTP GET request. (NOTE) |               |
| resetIds  NOTE: In the HTTP | array(string)         | O | 1N          | This IE uniquely identifies a part of temporary data in UDR that contains the created resource. This attribute may be provided in the response of successful resource creation. es supported by the NF service consumer.                                 | In the LITTO  |

NOTE: In the HTTP request, it represents the set of features supported by the NF service consumer. In the HTTP response, it represents the set of features supported by both the NF service consumer and the UDR.

## 7.3.2.3 Type PduSessionManagementData

Table 7.3.2.3-1: Definition of type PduSessionManagementData

| Attribute name         | Data type               | Р | Cardinality | Description                            | Applicability |
|------------------------|-------------------------|---|-------------|--|---------------|
| pduSessionStatus       | PduSessionStatus        | 0 | 01          | Status of the PDU session.             |               |
| pduSessionStatusTs     | DateTime                | 0 | 01          | Indicates when the pduSessionStatus    |               |
|                        |                         |   |             | was last updated.                      |               |
| dnai                   | Dnai                    | 0 | 01          | DNAI                                   |               |
| dnaiTs                 | DateTime                | 0 | 01          | Indicates when the dnai was last       |               |
|                        |                         |   |             | updated.                               |               |
| n6TrafficRoutingInfo   | array(RouteToLoc ation) | 0 | 1N          | N6 traffic routing information.        |               |
| n6TrafficRoutingInfoTs | DateTime                | 0 | 01          | Indicates when the                     |               |
|                        |                         |   |             | n6TrafficRoutingInfo was last          |               |
|                        |                         |   |             | updated.                               |               |
| ipv4Addr               | lpv4Addr                | 0 | 01          | UE IPv4 address.                       |               |
| ipv6Prefix             | array(Ipv6Prefix)       | 0 | 1N          | UE IPv6 prefix.                        |               |
| ipv6Addrs              | array(Ipv6Addr)         | 0 | 1N          | IPv6 addresses.                        |               |
| pduSessType            | PduSessionType          | 0 | 01          | PDU session type.                      |               |
| ipAddrTs               | DateTime                | 0 | 01          | Indicates when the ipv4Addr and        |               |
|                        |                         |   |             | Ipv6Prefix were last updated.          |               |
| dnn                    | Dnn                     | 0 | 01          | DNN                                    |               |
| pduSessionId           | PduSessionId            | 0 | 01          | The identifier of a                    | ResourceNoti  |
|                        |                         |   |             | PduSessionManagement resource.         | ficationExpos |
|                        |                         |   |             | (NOTE 1).                              | ureDataFix    |
| suppFeat               | SupportedFeature        | С | 01          | This IE represents a list of Supported |               |
|                        | S                       |   |             | features used as described in          |               |
|                        |                         |   |             | clause 7.5.                            |               |
|                        |                         |   |             | Shall be present in the HTTP PUT       |               |
|                        |                         |   |             | request/response; or in the HTTP       |               |
|                        |                         |   |             | GET response if the "supp-feat"        |               |
|                        |                         |   |             | attribute query parameter is included  |               |
|                        | ( ) ( )                 | _ | 1           | in the HTTP GET request. (NOTE 2)      |               |
| resetIds               | array(string)           | 0 | 1N          | This IE uniquely identifies a part of  |               |
|                        |                         |   |             | temporary data in UDR that contains    |               |
|                        |                         |   |             | the created resource.                  |               |
|                        |                         |   |             | This attribute may be provided in the  |               |
|                        |                         |   |             | response of successful resource        |               |
|                        |                         |   |             | creation.                              |               |

NOTE 1: The "pduSessionId" attribute shall be present when the ResourceNotificationExposureDataFix is supported.

NOTE 2: In the HTTP request, it represents the set of features supported by the NF service consumer. In the HTTP response, it represents the set of features supported by both the NF service consumer and the UDR.

## 7.3.2.4 Type ExposureDataSubscription

Table 7.3.2.4-1: Definition of type ExposureDataSubscription

| Attribute name        | Data type                                     | Р | Cardinality | Description   | Applicability          |
|-----------------------|---|---|-------------|---|------------------------|
| notificationUri       | Uri   | М | 1           | URI provided by the NF service consumer indicating where to receive to subscribed notifications from the UDR.   |                        |
| monitoredResourceUris | array(Uri)                                    | М | 1N          | A set of URIs that identify the resources for which a modification triggers a notification.   |                        |
| expiry                | DateTime                                      | С | 01          | This IE shall be included in a subscription response if, based on operator policy and taking into account the expiry time included in the request, the UDR needs to include an expiry time.  This IE may be included in a subscription request. When present, this IE shall represent the time after which the subscription becomes invalid.  The absence of this attribute in the subscription response means the subscription to be valid without an expiry time. |                        |
| supportedFeatures     | SupportedFeatures                             | С | 01          | Used to negotiate the applicability of the optional features. This attribute shall be provided in the POST request and in the response of successful resource creation.   |                        |
| resetIds              | array(string)                                 | 0 | 1N          | This IE uniquely identifies a part of temporary data in UDR that contains the created resource. This attribute may be provided in the response of successful resource creation.   |                        |
| immRep                | boolean                                       | Ο | 01          | If provided and set to "true", it indicates that existing entries that match this subscription shall be immediately reported within the "immReports" attribute in the response. The default value is false.   | ImmediateRepo<br>rtPcc |
| immReports            | array(ExposureDat<br>aChangeNotificatio<br>n) | 0 | 1N          | Contains entries stored in the UDR that match this subscription. It may be included only in the POST (or PUT) response body of a subscription creation (or modification), and only if the request included the "immRep" attribute set to true.  | ImmediateRepo<br>rtPcc |

#### 7.3.2.5 Type ExposureDataChangeNotification

Table 7.3.2.5-1: Definition of type ExposureDataChangeNotification

| Attribute name               | Data type                           | Р    | Cardinality      | Description  | Applicability |
|------------------------------|-------------------------------------|------|------------------|--|---------------|
| ueld                         | VarUeld                             | 0    | 01               | User identity of modified data.  |               |
| accessAndMobilityData        | AccessAndMobility Data              | 0    | 01               | Access and Mobility Data for the UE.   |               |
| pduSessionManagement<br>Data | array(PduSession<br>ManagementData) | 0    | 1N               | PDU Session Management Data for one or several PDU sessions of the UE.   |               |
| delResources                 | array(Uri)                          | 0    | 1N               | The resources, as defined in table 7.2.2-1, if removed from UDR and notification on resource data change was requested. It may be present when the ResourceNotificationExposureData Fix is supported (NOTE). |               |
| NOTE: When the "delR         | esources" attribute is              | pres | ent, the attribu | tes that correspond with the values in   | cluded in the |

## 7.3.3 Simple data types and enumerations

#### 7.3.3.1 Introduction

This clause defines simple data types and enumerations that can be referenced from data structures defined in the previous clauses.

#### 7.3.3.2 Simple data types

The simple data types defined in table 7.3.3.2-1 shall be supported.

Table 7.3.3.2-1: Simple data types

| Type Name | Type Definition | Description | Applicability |
|-----------|-----------------|-------------|---------------|
|           |                 |             |               |

#### 7.3.3.3 Enumeration: PduSessionStatus

Table 7.3.3.3-1: Enumeration PduSessionStatus

| Enumeration value | Description                  | Applicability |
|-------------------|------------------------------|---------------|
| "ACTIVE"          | The PDU session is active.   |               |
| "RELEASED"        | The PDU session is released. |               |

## 7.4 Error handling

#### 7.4.1 General

For the Nudr\_DataRepository service API for Exposure Data, HTTP error responses shall be supported as specified in clause 4.8 of 3GPP TS 29.501 [5]. Protocol errors and application errors specified in table 5.2.7.2-1 of 3GPP TS 29.500 [4] shall be supported for an HTTP method if the corresponding HTTP status codes are specified as mandatory for that HTTP method in table 5.2.7.1-1 of 3GPP TS 29.500 [4].

In addition, the requirements in the following clauses are applicable for the Nudr\_DataRepository service API for Exposure Data.

#### 7.4.2 Protocol Errors

No specific procedures for the Nudr\_DataRepository service API for Exposure Data are specified.

### 7.4.3 Application Errors

The application errors defined for the Nudr\_DataRepository service API for Exposure Data are listed in table 7.4.3-1.

Table 7.4.3-1: Application errors

| Application Error | HTTP status code | Description |
|-------------------|------------------|-------------|
|                   |                  |             |

The application error handling shall follow 3GPP TS 29.504 [6] clause 6.1.6 unless explicitly specified in this document.

## 7.5 Feature negotiation

The optional features in table 6.1.8-1 of 3GPP TS 29.504 [6] are defined for the Nudr\_DataRepository API. They shall be negotiated using the extensibility mechanism defined in clause 6.6 of 3GPP TS 29.500 [4].

#### 7.6 Notifications

#### 7.6.1 General

Notifications shall comply with clause 6.2 of 3GPP TS 29.500 [4] and clause 4.6.2.3 of 3GPP TS 29.501 [5].

This clause describes the resources to provide Notification to NF service consumers which have subscribed to be notified when exposure data is changed.

Table 7.6.1-1: Notifications overview

| Notification                      | Callback URI      | HTTP method or custom operation | Description (service operation)   |
|-----------------------------------|-------------------|---------------------------------|-----------------------------------|
| Exposure Data Change Notification | {notificationUri} | POST                            | Exposure Data Change Notification |

## 7.6.2 Exposure Data Change Notification

The POST method shall be used for Data Change Notifications and the URI shall be as provided during the subscription procedure.

Callback URI: {notificationUri}

Support of URI query parameters is specified in table 7.6.2-1.

Table 7.6.2-1: URI query parameters supported by the POST method

| Name | Data type | Р | Cardinality | Description |
|------|-----------|---|-------------|-------------|
| n/a  |           |   |             |             |

Support of request data structures is specified in table 7.6.2-2 and of response data structures and response codes is specified in table 7.6.2-3.

Table 7.6.2-2: Data structures supported by the POST Request Body

| Data type                | Р | Cardinality | Description  |
|--------------------------|---|-------------|--|
| array(ExposureDataChange | М | 1N          | Each element in the array provides the changed exposure data for |
| Notification)            |   |             | one user.  |

Table 7.6.2-3: Data structures supported by the POST Response Body

| Data  | type | Р | Cardinality | Response codes | Description   |  |
|-------|------|---|-------------|----------------|---|--|
| n/a   |      |   |             | 204 No Content | Upon success, an empty response body shall be returned. |  |
| NOTE: |      |   |             |                |   |  |

# Annex A (normative): OpenAPI specification

#### A.1 General

The present Annex contains an OpenAPI [3] specification of HTTP messages and content bodies used by the Nudr\_DataRepository service for Policy Data, Application Data and Exposure Data.

This Annex shall take precedence when being discrepant to other parts of the specification with respect to the encoding of information elements and methods.

NOTE: The semantics and procedures, as well as conditions, e.g. for the applicability and allowed combinations of attributes or values, not expressed in the OpenAPI definitions but defined in other parts of the specification also apply.

Informative copies of the OpenAPI specification files contained in this 3GPP Technical Specification are available on a Git-based repository that uses the GitLab software version control system (see clause 5B of the 3GPP TR 21.900 [18] and clause 5.3.1 of the 3GPP TS 29.501 [5] for further information).

## A.2 Nudr\_DataRepository API for Policy Data

For the purpose of referencing entities in the Open API file defined in this Annex, it shall be assumed that this Open API file is contained in a physical file named "TS29519\_Policy\_Data.yaml".
